PILOTS DATABASE INSTRUMENTS AUTHORITY LIST

This list includes all projective tests, self-report questionnaires, structured interviews, and other assessment instruments that have been used in papers indexed in the PILOTS Database.

The PILOTS Database is an electronic index to the Published International Literature on Traumatic Stress. It includes references to more than 50,000 publications on:

- post-traumatic stress disorder,
- other psychiatric disorders—especially dissociative identity disorder (formerly called multiple personality disorder), other dissociative disorders, or borderline personality disorder—associated etiologically or epidemiologically with exposure to a traumatic event, or to an event experienced as traumatic by the population under discussion.
- other mental-health sequelae of such exposure

Like most bibliographic databases, the PILOTS Database provides a bibliographic citation of each paper it indexes, an abstract of its content, and a list of descriptors indicating its subject-matter. In addition, each record includes an “Instruments” field listing the psychological and medical assessment instruments used in the research or clinical work reported in the document. (In the ProQuest version of the PILOTS Database, this is called the “Test and Measures” field.)

This enables PILOTS Database users to

- determine which instruments were used in the work described in a particular paper
- determine which published papers have used a particular instrument
- locate papers whose focus is the description, validation, or use of a particular instrument

To make this possible, we have established a standard form of the name of each instrument. This form represents, to the best of our knowledge, the official name of the instrument as given by its author or publisher. We attempt to use that form consistently, regardless of the form of name used by the author of a particular paper.

These standardized names are assembled in this PILOTS Database Instruments Authority List. Most entries include:

- the name of the instrument
- the surnames of its creators (this information is intended primarily to indicate which instrument is meant—there are several with similar names—and should not be taken as a definitive ascription of authorship)
- a bibliographic reference to one or more publications cited as the source of information on the instrument by those reporting use of it
- a bracketed reference to the five-digit PILOTS ID number of the document referenced or of the document citing it

In addition, many entries also include a brief description of the nature of the instrument or its relationship to other instruments. There are also many cross-references, linking alternate names for instruments with the form used in the PILOTS database.

It should be understood that this Authority List does not purport to be a complete bibliography of psychological and medical assessment instruments used in traumatic stress work. We have not attempted to maintain in this list the standards of accuracy and completeness that we hope characterize the PILOTS Database itself. The bibliographic citations in this list are taken without revision from a wide range of publications in the traumatic stress literature, and more than twenty years of experience has shown us that many writers give deplorably incomplete information about the instruments they use in their work. This Authority List represents our best efforts at bringing consistency to a chaotic bibliographical environment without diverting our attention substantially from our primary mission: the indexing of the worldwide traumatic stress literature.
We hope that, despite its obvious limitations, this Authority List will prove useful to those interested in the instruments used in traumatic stress research and treatment. It may also be helpful to those concerned with assessment in other areas of mental health. In any event, it will continue to serve its primary purpose, as an aid to us in the compilation of the PILOTS Database. We would be delighted to learn that other users have found ways to benefit from our efforts.

Your corrections, suggestions, or comments are welcome. Please address these to:

You may also use the above address to request information on the PILOTS Database. A detailed PILOTS Database User’s Guide is available as a PDF document for consultation or downloading at the National Center’s website at <http://www.ptsd.va.gov>. Updated versions of this PILOTS Database Instruments Authority List may be viewed or downloaded from the same source.
Instrument names in bold are those used in the “Instruments” field of PILOTS database records. The abbreviation UF (“used for”) means that this instrument may also be known by the other name(s) which follow. These alternate names are listed in ordinary type, with the instruction to USE the chosen version. Occasionally the instruction SEE ALSO is used to refer the user to other closely related instruments.

12 Weeks Postpartum Structured Interview (Van Son et al)
“Participants were asked to answer questions about the delivery: experience of pain, experiences of social support from medical staff and partner, and having been adequately informed about the delivery.” [30457]

15 Woordentaak A en B (Saan and Deelman)
“to assess declarative memory consolidation” [36365]
UF: 15 Word Task (Saan and Deelman)

15 Word Task (Saan and Deelman)
USE: 15 Woordentaak A en B (Saan and Deelman)

15-Item Memory Test (Rey)
USE: Memory for Fifteen Items Test (Rey)

15D (Sintonen)

16-PF
USE: Sixteen Personality Factor Inventory (Cattell et al)

16D (Apajasalo et al)

17D (Apajasalo et al)

5 Mots (Dubois et al)
“a word recall test with both delayed free recall and recall with semantic prompts” [36778]

5-Dimension Altered States of Consciousness Profile (Dittrich et al)
“The SD-ASC rating scale measures alterations in mood, perception, experience of self in relation to environment, and thought disorder.” [34934]

5-Pfa (Engvik)
“The 5-Pfa is a 65-item self-report personality instrument capturing dimensions of the 5-factor personality model closely related to the Big Five.” [29263]

6-Minute Walk Test (Butland et al)
“an assessment of whole body mobility and endurance” [36800]

9/11 Instrument (Norris)
USE: Assessment of Exposure to the Events of September 11 (Norris)
9/11 Measure of Perceived Threat (Meisenhelder and Marcum)
"To capture vicarious vulnerability triggered by 9/11 events, the investigators created a measure of perceived threat on four items describing perceptions of personal safety observed following the tragic events." [32781]

9/11 Memory Consortium Survey Questionnaire

9/11 Questionnaire (Wilczak)
"an open-ended questionnaire, developed by the present author for specific use in the proposed study" [91853]

A Behavioral Checklist Describing Essential Functional Gains (War Trauma Recovery Project)
"evaluated overall functioning and the impact of symptoms of trauma-related distress on [patient’s] ability to perform normal activities of daily living" [29314]

A-87 Aggression Rating Scale (Zuzul)

A-COPE
USE: Adolescent Coping Orientation for Problem Experiences (Patterson et al)

A-FILE
USE: Adolescent-Family Inventory of Life Events and Changes (McCubbin et al)

A2 Questionnaire (Rutter)

AA-Questionnaire (Gardell and Westlander)
"A somewhat modified version of a questionnaire constructed by the research division of the PA-council in Stockholm ..." Gardell, B; Westlander, G. Om industriarbete och mental hälsa. Stockholm: PA-rådets medd. 56, 1968. [cited in 01047]

Aachen Long-Term Outcome Score

Aachen Questionnaire on Trauma Processing
USE: Aachener Fragebogen zur Traumaverarbeitung

Aachen Scale of Cognitive Self-Regulation
[used but not usefully cited in 31703]

Aachen Scale of Coping Strategies
[used but not usefully cited in 31703]

Aachen Self-Efficacy Questionnaire
USE: Aachener Selbstwirksamkeitsfragebogen

Aachener Fragebogen zur Traumabewältigung
USE: Aachener Fragebogen zur Traumaverarbeitung

Aachener Fragebogen zur Traumaverarbeitung
29 items

UF: Aachen Questionnaire on Trauma Processing
Aachener Fragebogen zur Traumaverarbeitung

Aachener Selbstwirksamkeitsfragebogen
The ASP "consists of 20 items to be rated on a 5-point Likert scale" [33532]

UF: Aachen Self-Efficacy Questionnaire
AAUW Sexual Harassment Survey
"a 14-item inventory designed to measure the frequency with which students are victimized by sexually harassing behaviors" [81723]

Abbreviated Conners Teacher Rating Scale
USE: Conners Teacher Rating Scale (Conners)

Abbreviated Fatigue Questionnaire (Alberts et al)
4 items

Abbreviated Injury Scale (Greenspan et al)
Gennarelli, T A; Baker, S P; Bryant, R W; et al. (Committee on Scaling). Abbreviated Injury Scale 1985 Revision. Arlington Heights, Illinois: American Association for Automotive Medicine, 1985. [cited in 11889]

Abbreviated Multidimensional Acculturation Scale
[used but not cited in 92851]

Abbreviated Premorbid Adjustment Scale
[used but not cited in 90480]

Abel Questionnaire for Men
"contains approximately 600 questions...includes both a physical measurement of sexual interests and a detailed sex history inventory" [16970]

Abend-Morgenprotokolle in Schlafforschung und Schlafmedizin (Hoffmann et al)
"a validated sleep diary assessing mood (morning/evening), tiredness (morning/evening), sleep efficiency and latency, frequency and duration of waking up as well as total bed time and sleep time" [38826]

Aberdeen Trauma Screening Index (Klein et al)
"a brief screening tool developed for use in a clinical setting by non-mental health professionals to facilitate the early identification of individuals most at risk of psychopathology 3-months post-accident" [24602]
Klein, S; Alexander, D A; Hutchinson, J D; Simpson, J A; Simpson, J M; Bell, J S. The Aberdeen Trauma Screening Index: an instrument to predict post-accident psychopathology. Psychological Medicine 32: 863-871 (2002). [24602]

Aberrant Behavior Checklist (Aman et al)
"The ABC was designed to examine problematic behaviors and changes of these behaviors in those with intellectual disabilities. It is a 5-factor scale comprising 58 items." [35209]

Abnormal Involuntary Movement Scale

About Me Questionnaire (Kerr and Muehlenkamp)
"a 10-item psychosocial questionnaire designed for nonsuicidal self-injury research among college student populations" [34242]

Abraham Creativity Test
UF: Creativity Test (Abraham)

Absorption Scale (Tellegen)
USE: Multidimensional Personality Questionnaire (Tellegen)

Abuse Assessment Screen (Norton et al)

Abuse Assessment Screen (Soeken et al)
"developed by the Nursing Research consortium on Violence and Abuse" [09984]
Soeken, K; McFarlane, J; Parker, B. The Abuse Assessment Screen: a clinical instrument to measure frequency, severity and perpetrator of abuse against women. In: Beyond Diagnosis: Health Care Advocacy for Battered Women and Their Children. Thousand Oaks, California: Sage, [in press]. [cited in 09984, where the Screen appears on p. 546]

Abuse Assessment Tool (McWhinney-Dehaney)

AAUW Sexual Harassment Survey
"a 14-item inventory designed to measure the frequency with which students are victimized by sexually harassing behaviors" [81723]
Abuse Attribution Inventory (Feiring et al)
"developed for this study [to measure] abuse-specific self-blame attributional style" [15550]

Abuse Dimensions Inventory (Chaffin et al)
"a 15-scale instrument designed to measure the severity of physical and sexual abuse" [08309]
Chaffin, M; Wherry, J; Newlin, C; Crutchfield, A; Dykman, R. The Abuse Dimensions Inventory: a research instrument for measuring abuse characteristics. Journal of Interpersonal Violence, in press. [cited in 08309]

Abuse Disability Questionnaire (McNamara)
"The ADQ was developed to assess the perceived multiple negative consequences that exist in a person’s life and that are associated with the experience of partner abuse.” [15103]

Abuse Experience Survey (Parker and Lee)
"devised by the researchers" [16963]

Abuse Experiences Survey (Bottoms et al)
Bottoms, B L; Nielsen, M; Murray, R; Filipas, H. Religion-related child physical abUSE: characteristics and psychological outcomes. Journal of Aggression, Maltreatment and Trauma 8(1/2); 87-114 (2003). [18410]

Abuse History (Soloff et al)
"a semi-structured 19 item Abuse History, derived from the Dissociative Disorders Interview Schedule, [that] surveys occurrence, severity, and duration of physical and sexual abuse separately…” [31911]

Abuse History Interview (Zanarini et al)
"a semi-structured interview" [21942]
Zanarini, M C; Frankenburg, F R; Reich, D B; Marino, M F; Haynes, M C; Gunderson, J G. Violence in the lives of adult borderline patients. Journal of Nervous and Mental Disease 187: 65-71 (1999). [cited in 21942]

Abuse History Questionnaire (Dale et al)
"Designed for this study, this instrument asked participants whether they had experienced abuse as either a child or an adult.” [86486]
Dale, L P; Carroll, L E; Galen, G C; Schein, R; Bliss, A; Mattison, A M; Neace, W P. Yoga practice may buffer the deleterious effects of abuse on women’s self-concept and dysfunctional coping. Journal of Aggression, Maltreatment and Trauma 20: 90-102 (2011). [86486]

Abuse History Questionnaire (Neal and Nagle)
"We developed this questionnaire to inquire about the participants’ experiences with child physical and sexual abuse.” [40138]

Abuse History Questionnaire (Twaeite and Rodriguez-Srednicki)
"a three-item questionnaire created by the authors of the present study” [18626]

Abuse Inventory (Samelius et al)
"The AI was developed for the present study and comprises detailed questions about physical, sexual, and psychological abuse.” [82660]

Abuse Problem-Solving Questionnaire
"a 10-item, 5-response alternative, multiple choice which measures the accuracy with which women solve problems associated with abuse” [20123]
[used but not cited in 20123]

Abuse Questionnaire (Janssen et al)
"a semi-structured interview to ascertain whether [subjects] had experienced any kind of emotional, psychological, physical, or sexual abuse before the age of 17” [31770]

Abuse Questionnaire (Waugh et al)
"A childhood abuse questionnaire was developed for this study [to] take into account the possibility of large numbers of the population being moved away from their homes and families, as happened during the evacuation in World War II.” [30842]
Waugh, M J; Robbins, I; Davies, S; Feigenbaum, J. The long-term impact of war experiences and evacuation on people who were children during World War II. Aging and Mental Health 11: 168-174 (2007). [30842]
Abuse Risk Inventory for Women (Yegides)

Abuse Screening Inventory (Swahnberg and Wijma)
"a screening questionnaire with 16 questions on abuse, health, and demographic data” [82660]

Abuse Severity Measure (Leserman et al)
USE: Severity of Abuse Measure (Leserman et al)

Abuse Shame Inventory (Feiring et al)
[not named in publication; name assigned by PILOTS database staff]

Abuse Stress Response Inventory
[used but not cited in 90495]

Abuse-Focused Treatment Scale (Gore-Felton et al)
"This [12-item] scale was designed to assess a variety of treatment strategies therapists may engage in with patients who present a history of child sexual abuse." [22425]

Abuse-Perpetration Inventory (Lisak et al)
"assesses histories of sexual and physical abuse" [14841]
Lisak, D; Conklin, A; Hopper, J; Miller, P; Smith, B. The Abuse-Perpetration Inventory: development of a valid assessment instrument for research on the cycle of violence. Manuscript submitted for publication, 1997. [cited in 14841]

Abuse-Related Beliefs Questionnaire (Ginzburg et al)
"The [18-item] ARBQ was developed to assess three major components of abuse-related beliefs: guilt, shame, and negative self-evaluation.” [28849]

Abusive Behavior Checklist (Shea)
[cited as "Shea, 1996" in 90065]

Abusive Behavior Inventory (Shepard and Campbell)

Abusive Behavior Observation Checklist (Dutton)
"The ABOC is a 96-item instrument used to measure frequency of abusive behaviors by male intimate partners according to type (total abuse, physical abuse, sexual abuse, and psychological abuse)." [27139]

Abusive Sexual Exposure Scale (Spaccarelli)

Abusive Violence Scale (Hendrix and Schumm)

AC Co-Occurring Disorder Screen
"an integrated screen [to] identify people with a possible co-occurring disorder who needed to be fully assessed for a concurrent mental health and substance abuse disorder” [81620]
UF: AC-COD Screen

AC Questionnaire (Martorell et al)
USE: Escala de Autoconcepto (Martorell et al)

AC-COD Screen
USE: AC Co-Occurring Disorder Screen
Academic Motivation Scale (Vallerand et al)

"On a [28-item scale...students rated the extent to which items presently corresponded to reasons for why they attend college." [40079]

Acceptability Checklist - Child (Sheeringa et al)

"The ACC is a 62-item checklist created to match the content of the 12 sessions and is the measure of feasibility for children's capacities to complete the TF-CBT techniques." [35571]

Acceptance and Action Questionnaire (Hayes et al)

"a self-report questionnaire developed to measure experiential avoidance" [16757]

Hayes, S C; Bissett, R T; Strosahl, K; Follette, W C; Polusny, M A; Pictorello, J; Toarmino, D; Batten, S V; Dykstra, T; Stewart, S H; Zvolensky, M J; Eifert, G H; Bond, F W; Bergan, J. Psychometric properties of the Acceptance and Action Questionnaire. Manuscript submitted for publication, 2001. [cited in 16757]

Acceptance of Disability Scale (Linkowski)

"Items tap willingness to accept disability related to illness." [39199]

Acceptance of Illness Scale (Felton et al)

"The AIS focuses directly on the degree to which respondents accept their illness without experiencing negative feelings or responses." [33579]

Acceptance of Interpersonal Violence Scale (Burt)

USE: Rape Supportive Beliefs Scales (Burt)

Accident Assessment Interview Schedule

"This 43-item structured interview...was based on the Road Traffic Accident Research Questionnaire (Mayou et al), modified to accommodate other types of accidental injury. In addition, questions relating to specific predictors of general psychopathology following accidental injury were included." [24602]

Accident Fear Questionnaire (Kuch et al)

Accident Inventory Questionnaire (Selley et al)

"based on a questionnaire by Rosser et al" [09911]

Selley, C; King, E; Peveler, R; Osola, K; Martin, N; Thompson, C. Post-traumatic stress disorder symptoms and the Clapham rail accident. *British Journal of Psychiatry* 171: 478-482 (1997). [09911]

Account Development Scale (Easton)

Acculturation Attitudes Scales (Doná)

Doná, G. Acculturation, coping and mental health of Guatemalan refugees living in settlements in Mexico. Doctoral dissertation, Queen's University (Canada), 1993. [cited in 84786]

Acculturation Instrument (Neff et al)

"based on a questionnaire by Rosser et al" [09911]

Acculturation Rating Scale for Mexican Americans (Cuellar et al)

Acculturation Scale (Burnam et al)

[cited only as “Burnam and colleagues (1987)” in 91442]
Acculturation Scale (Marin et al)

Acculturation Scale for Southeast Asians (Anderson et al)

Acculturation Stress Index
[cited but not cited in 90305]

Acculturation Stress Scale for International Students (Sandhu and Asrabadi)

Acculturative Hassles Inventory (Vinokurov et al)
"developed to assess acculturative stressors in four life domains (school, peers, language, and family) among Soviet Jewish adolescent refugees" [30785]

Achenbach System of Empirically Based Assessment

Achievement Motivation Questionnaire (Cassidy and Lynn)
[cited but not cited in 92214]

Achievement/Striving Measure (Spence et al)

Achievements of Coverage Scale (Hatanaka et al)
"9 items that measured favorable responses from viewers, and personal growth resulting from the report, among others" [83706]

Acholi Psychosocial Assessment Instrument (Bolton et al)
"we created a local instrument consisting of questions on all the symptoms of all 5 local problems...judged amenable to interventions within the NGOs’ capacity" [29827]
Bolton, P A; Bass, J K; Betancourt, T S; Speelman, L; Onyango, G; Clougherty, K F; Neugebauer, R; Murray, L K; Verdelli, H. Interventions for depression symptoms among adolescent survivors of war and displacement in Northern Uganda: a randomized controlled trial. *Journal of the American Medical Association* 298: 519-527 (2007). [29827]

Ackerman-Banks Neuropsychological Rehabilitation Battery
Ackerman, R J; Banks, M E. *Ackerman-Banks Neuropsychological Rehabilitation Battery*. Akron, Ohio: Abackans DCP, 1994. [cited in 17202]

ACQ-Inventory (Couch and Keniston)

ACQUIP Health Checklist
"a mailed questionnaire that assessed demographics, health behaviors, and prior medical conditions including depression and PTSD" [30391]

Acquired Capability for Suicide Scale (Bryan et al)
"The ACSS is a 5-item measure designed by our group to assess one’s fearlessness about, and ability to enact, lethal self-injury." [33730]

Acquired Capability for Suicide Scale (Smith et al)
"The ACESS is a 20-item self-report instrument developed by the authors of the interpersonal theory of suicide to assess fearlessness of death and perceived tolerance for physical pain." [40110]

Acquired Equivalence Task (Myers et al)
"This computer-based task includes two phases: acquisition and generalization." [39313]
Myers, C E; Shohamy, D; Gluck, M; Grossman, S; Kluger, A; Ferris, S; et al. Dissociating hippocampal vs. basal ganglia contributions to learning and transfer. *Journal of Cognitive Neuroscience* 15: 185-193 (2003). [cited in 39313]
Acrophobia Questionnaire (Cohen)

“This questionnaire describes 20 situations that can cause fear of heights and asks for anxiety ratings on 7-point Likert-type scales.” [36318]

Action Control Scale (Kuhl)

Activation-Deactivation Adjective Checklist (Thayer)

Active Coping with Trauma Scale (Clum)

"69 items, measuring frequency of individuals' use of coping strategies for traumatic events" [19664]
[cited only as "unpublished raw data, 1999" in 19664]

Active Expression of Hostility Scale (Egendorf et al)

Active Inhibition Scale (Ayers et al)

"an inventory of avoidant coping behaviors developed for use with bereaved youth" [87452]

Activities of Daily Living Index (Katz et al)

Activities of Daily Living Scale (Fillenbaum et al)

a 10-item scale
Fillenbaum, G; Hughes, D C; Heyman; A; George, L K; Blazer, D G. Relationship of health and demographic characteristics to Mini-Mental State Examination score among community residents. *Psychological Medicine* 18: 719-726 (1995). [cited in 14814]

Activities of Daily Living Scale (MacKenzie et al)

Activities Questionnaire (Long)

“created for this study” [90471]

Activity Check List (Field et al)

“created for this study...designed to assess group equivalence on demographic, social support, and optimism measures” [07568]

Activity Restriction Measure (Verbugge)

"This measure of activity restriction due to health symptoms consists of three yes/no items." [22739]

Activity Restriction Scale (Williamson et al)

"an 11-item instrument designed to measure changes in caregiver activities due to caring for the patient” [36901]

Acute Dissociation Inventory (Leonard et al)

"The ADI is a 35-item self-report scale which was developed specifically for this study. It was based on the Acute Panic Inventory..." [21655]

Acute Dissociation Scale (Williams)

Acute Life Stress Measure (Hawton and Rodham)

"This is a measure of 20 potentially stressful life events that are relevant to adolescent school children." [33759]
Hawton, K; Rodham, K. *By Their Own Hand: Deliberate Self-harm and Suicidal Ideas in Adolescents*. London: Jessica Kingsley, 2006. [cited in 33759]
Acute Panic Inventory (Dillon et al)

Acute Physiology and Chronic Health Evaluation
“a prognostic indicator for ICU patients” [23090]
UF: Apache

Acute Post-Traumatic Symptoms Twelve Theme Questionnaire (Brende)

Acute Stress Checklist for Children (Kassam-Adams)
“A brief [29-item] self-report measure of acute stress reactions, including Acute Stress Disorder symptoms as defined in the DSM-IV...practical for administration to children and adolescents with recent exposure to a potentially traumatic event and...suitable for both clinical and research settings” [19815]

Acute Stress Disorder Interview (Bryant et al)
"The ASDI is a 19-item, dichotomously scored interview schedule that is based on criteria from the DSM-IV." [21711]

Acute Stress Disorder Inventory (Bryant et al)

Acute Stress Disorder Scale (Bryant et al)
"a self-report measure of acute stress reactions that are precursors of PTSD”

Acute Stress Disorder Symptom Checklist (Robert et al)

Acute Stress Disorder Symptom Scale (Sattler et al)
“16-item scale...based on the DSM-IV criteria for ASD” [80414]

Acute Stress List (Van der Velden and Kleber)
USE: Pelingslijst Acute Stress (Van der Velden and Kleber)

Acute Stress Reactions Scale (Milgram and Toubiana)
"a 13-item scale, constructed on the basis of the literature on acute stress and bereavement” [13289]

Acute Stressors Scale (Chatters)
“examines the degree of stress produced by 11 life events that may have occurred in the past month” [29198]

ADAA Support Group Project Questionnaire (Davidson and Segee)
“A 70-item self-report questionnaire was constructed...to assess demographics, attendance and expectations, treatment seeking, awareness of advocacy organizations, awareness of social phobia, and disability.” [25583]
Segee, P F; Maguire, L; Ross, J; Malik, M L; Colket, J; Davidson, J R T. Demographics, treatment seeking, and diagnoses of anxiety support group participants. *Journal of Anxiety Disorders* 13: 315-334 (1999). [25583]

Adaptation Now Index (Domanskaite-Gota et al)
“Five variables describing the psychosocial adaptation to life, covering divorce, changes in education, education after the service, job now, [and] change of job, were used to create an Adaptation Now Index...” [33237]

Adaptations to Trauma Work Questionnaire
“asked team members to rate how often they had to focus on various other problems during their work in addition to PTSD” [31176]
[used but not cited in 31176]
Adapted Shame/Guilt Scale (Hoblitzelle)

"The ASGS comprises 30 items, each of which is an adjective referring to an affective state." [20984]

Adaptive Behavior Assessment System (Harrison and Oakland)

Adaptive Digit Ordering Test (Werheid et al)

"The DOT is a working memory task similar to the Digit Span forward and Backward Subtest of the Wechsler Memory Scale."[30505]

Adaptive Social Behavior Index (Hogan et al)

Addenbrooke's Cognitive Examination - Revised.

Hodges, J. Addenbrooke's Cognitive Examination: ACE-R. [used but cited only as a web document in 40564]

Addiction Recovery Scale (Mercer et al)

Addiction Severity Index (McLellan et al)

UF: ASI

Addictive Behaviors Questionnaire (Weathers and Brief)

"a self-report measure corresponding directly to the DSM-IV criteria for substance use disorders" [16998]

ADHD Rating Scale (DuPaul et al)

18 items

Adherence to General Psychiatric Management Scale (Kolla et al)

"a 52-item self-report scale" [33312; scale not named; name assigned by PILOTS Database staff]

Kolla, N J; Links, P S; McMain, S; Streiner, D L; Cardish, R; Cook, M. Demonstrating adherence to guidelines for the treatment of patients with borderline personality disorder. Canadian Journal of Psychiatry 54: 181-189 (2009). [cited in 33312]

Adherence to Writing Instructions Questions (Pennebaker et al)

Adherence-Competence Scale (Najavits and Liese)

ADIS

USE: Anxiety Disorders Interview Schedule (DiNardo et al)

Adjective Check List (Gough and Heilbrun)

Later editions are cited in 02405, 00382, etc.

Adjective Checklist (Brody and Ehrlichman)

"a 25-item adjective checklist that measures the Big 5 personality traits" [84954]

Adjective Checklist (Russell and Mehrabian)

Adjective Markers of Personality: Extraversion and Neuroticism
"This scale consisted of 12 adjective markers of personality, 6 each for extraversion and neuroticism." [80752]

Adjective Pairs (Spilka et al)

Adjective Q-Set for Nonprofessional Sorters (Block)

Adjective Rating of God Scale (Spilka et al)

Adjustment Disorder New Module (Maercker et al)
"The ADNM measure consists of two parts: a life event list and a symptom list." [30078]

Adjustment Disorder Questionnaire (Einsle et al)

Adjustment Problem Checklist (Foy et al)
USE: Los Angeles Symptom Checklist

Admission Experience Survey (Gardner et al)
"used to assess perceived coercion" [31735]

Adolescent Alcohol Involvement Scale (Mayer and Filstead)

Adolescent Attachment Interview (Salzman et al)

Adolescent Attachment Scale (Miller and Hoicowitz)
"This scale is based on the...Experiences in Close Relationships Inventory, designed to assess attachment anxiety and avoidance. It was modified to assess adolescent/parent attachment." [39989]

Adolescent Autonomy Scale
UF: Échelle de l'Autonomie de l'Adolescent

Adolescent Clinical Sexual Behavior Inventory (Friedrich et al)
"a 45-item measure designed to elicit parent- and self-report regarding a range of sexual behaviors in high-risk adolescents" [18418]

Adolescent Complex Emergency Daily Stressors Scale
[used but not cited in 36912]

Adolescent Complex Emergency Exposure Scale (Mels et al)
"specially designed for war-affected adolescents in this region...consists of 14 yes/no questions, each referring to a specific event" [33034]
Adolescent Coping Orientation for Problem Experiences (Patterson et al)
Patterson, J; McCubbin, H; Needle, R. *A-COPE, Adolescent Coping Orientation for Problem Experience, Form B.* Madison: University of Wisconsin, 1983. [cited in 03403]
UF: A-COPE

Adolescent Coping Scale (Frydenberg and Lewis)

Adolescent Demographic Questionnaire (Long)
"created for this study" [90471]

Adolescent Depressive Experiences Questionnaire (Blatt et al)
USE: *Depressive Experiences Questionnaire for Adolescents (Blatt et al)*

Adolescent Diagnostic Interview (Winters and Henly)

Adolescent Dissociative Experiences Scale (Armstrong et al)
Armstrong, J; Putnam, F; Carlson, E. *A-DES (version 1.0).* In: Silberg, J (ed.), *The Dissociative Child: Diagnosis, Treatment, and Management,* pp. 334-337. Lutherville, Maryland: Sidran Press, 1996. [13514, which includes the text of the instrument]

Adolescent Drinking Index (Harrell and Wirtz)

Adolescent Drug and Alcohol Inventory (Petchers and Singer)

Adolescent Drug Involvement Scale (Moberg and Hahn)
"This 20-item self-report measure contains questions that measure each of 4 drinking motives: coping, conformity, enhancement, and social motives." [33060]

Adolescent Friendship Inventory (Rubinstein et al)
a 30-item measure of peer relationships

Adolescent Grief Inventory (Adolescent Bereavement Consortium)
"A structured clinical interview designed for use with children ages 10 to 19 years. The preliminary version included 142 questions representing eight conceptual domains" [17503]

Adolescent Hassles Inventory (Bobo et al)

Adolescent Health Behavior Questionnaire (Jessor et al)

Adolescent Health Survey (Blum et al)
Blum, R W; Resnick, M D; Bergeisen, L G. *The state of adolescent health in Minnesota.* Unpublished manuscript, University of Minnesota, 1989. [cited in 20392]

Adolescent Health Survey (Molnar et al)

Adolescent Injuries Checklist (Jelalian et al)
17 items

Adolescent Life Change Event Scale (Yeaworth et al)
Adolescent Life Events Questionnaire (Hankin and Abramson)

"The ALEQ is a 57-item self-report measure of negative events including family school, and social problems." [39713]

Adolescent Maltreatment Index (Brezina)

Adolescent Perceived Events Scale (Compas et al)

Adolescent Post War Adversities Scale (Layne et al)

"a 37-item adolescent-report inventory of common post-war life adversities including housing, financial, and interpersonal problems" [30785]

Layne, C; Stuvland, R; Saltzman, W; Djapo, N; Pynoos, R S. Adolescent Post War Adversities Scale. Unpublished instrument, 1999. [cited in 30785]

Adolescent Psychopathology Scale (Reynolds)

"The APS consists of 20 clinical disorder scales, 5 personality disorder scales, and 11 psychosocial problem content scales. The Posttraumatic Stress Disorder subscale of the APS includes 12 items that assess the experience of a negative or traumatic event and the symptoms associated with such an event." [21145]

Adolescent Relationship Inventory (Brent et al)

Brent, David A; et al. [Unpublished instrument.] [cited in 01926]

Adolescent Resilience Scale (Oshio et al)

Adolescent Resource Challenges Scale (Ewart)

"based on the Adolescent Perceived Events Scale (Compas et al)…modified for use with inner-city youth" [09488]

Adolescent Risk Behavior Assessment (Donenberg et al)

"a computer-assisted structured interview designed specifically for use with adolescents to assess sexual and drug behaviors that are associated with HIV infection" [34780]

Adolescent Risk Behavior Survey (Taussig and Talmi)

"a project designed measure…used to assess the frequency of current (past-year) engagement in risk behaviors in four domains: sexual, substance use, self-destructive, and delinquent behaviors" [16057]

Adolescent Self-Esteem Measure (Wolf et al)

Adolescent Self-Report Trauma Questionnaire (Horowitz et al)

Adolescent Sexual Behavior Inventory (Friedrich)

Adolescent Sexual Concern Questionnaire (Hussey and Singer)

"a 29-item paper-and-pencil sexual abuse screening instrument" [07684]

Adolescent Sexual Offender Assessment Packet (Gray and Wallace)

Adolescent Sexual Victimization Questionnaire (Sandberg et al)

“questions…adapted from the Sexual Experiences Survey (Koss and Oros)” [14308]

Adolescent Shame Measure (Reimer)

“modeled after Tangney’s Test of Self-Conscious Affect for Adolescents..the ASM is composed of 13 brief scenarios, each of which is followed by 4 emotional response alternatives designed to tap feelings of shame, guilt, anger/blame, and detachment” [19612]

Adolescent Social Adjustment Index (Rosenheck and Fontana)

Adolescent Social Network Assessment (Mason et al)

“The ASNA captures information on each person’s close personal contacts, their strong ties which constitute their social networks.” [36533]

Adolescent Social Network Questionnaire (Kaplan et al)

"a paper-and-pencil, self-report measure, designed for this study, which allows for the analysis of descriptive, structural, and qualitative aspects of the social network” [09932]

Adolescent Social Self-Efficacy Scale (Connolly)

Adolescent Stress Profile (Krill)

Adolescent Students’ Self-Supporting Personality Scale (Xia and Huang)

USE: Interpersonal Self-Support Scale (Xia and Huang)

Adolescent Suicide Attempt Interview (Shaffer and Trautman)

Shaffer, D; Trautman, R.  *Adolescent Suicide Attempt Interview*.  New York: Columbia University College of Physiciand Surgeons, Division of Child psychiatry, 1984. [cited in 09932]

Adolescent Symptom Inventory (Gadow and Sprafkin)

“The ASI is a 120-item checklist with symptoms of 24 behavioral disorders” [35810]

Adolescent Trauma Event Questionnaire

[used but not cited in 91600]

Adolescent Trauma Inventory

[used but not cited in 90400]

Adolescent-Family Inventory of Life Events and Changes (McCubbin et al)

McCubbin, H I; Patterson, J M; Bauman, E; Harris, L H.  Adolescent-Family Inventory of Life Events and Changes.  In: Olson, D H; McCubbin, H J; Barnes, H L; Larsen, A; Muxen, M; Wilson, M (ed.).  *Family Inventories*, pp. 109-119.  St. Paul: University of Minnesota Press, 1985.  [cited in 02380]

UF: A-FILE

Adolescent’s Resilience Attitudes Scale (Biscoe and Harris)

Biscoe, B; Harris, B.  *Adolescent’s Resilience Attitudes Scale Manual*.  Oklahoma City, Oklahoma: Eagle Ridge Institute, 1993. [cited in 27586]

Adolescent/Adult Sensory Profile (Brown and Dunn)

“an evidence-based tool used to determine sensory modulation patterns” [84977]

Adolescents Multifactor Emotional Intelligence Scale

[used but not cited in 91698]

Adolescents’ Self-Report of Parental Monitoring (Capaldi and Patterson)

"This is a 7-item scale developed on the basis of the operational definition of monitoring in Capaldi and Patterson.” [84522]

Adoption Questionnaire (Storsbergen)
"a semi-structured questionnaire ... [addressing] sociodemographic characteristics, ... placement history, and characteristics of the adoptive family" [34544]

Adquest (Peake et al)
"The 80-item adolescent self-report asks about life areas such as race/ethnicity and racism, school and education, work, safety, health, sexuality, substance abuse, and personal/family life." [80910]

Adult "Step-Wise" Assault Interview (Yuille)
"This semi-structured interview is routinely used as an investigative tool for victims with allegations of sexual assault and domestic violence." [17034]

Adult ADHD Clinical Diagnostic Scale (Adler and Cohen)
"a semistructured interview that assesses the 18 DSM-IV-TR symptoms of ADHD in both childhood and adulthood, using child- and adult-specific prompts" [37956]

Adult and Child Fire Questionnaire (Jones and Ribbe)
Jones, R T; Ribbe, D P. The Adult and Child Fire Questionnaire. Unpublished manuscript, Virginia Polytechnic Institute and State University, Blacksburg, 1990. [cited in 00979]

Adult Assessment and Referral Tool
USE: Adult Enhanced Services Referral Tool (Project Liberty)

Adult Attachment Interview (Crittenden)
"The AAI is originally based on the ideas of attachment theory, and it purports to assess adults’ state of mind or ‘internal representational models’ of their early attachment relationships with their parents." [14735]

Adult Attachment Interview (George et al)
George, C; Kaplan, N; Main, M. Adult Attachment Interview, 3rd ed. Unpublished instrument, Department of Psychology, University of California (Berkeley), 1996. [cited in 14074]

Adult Attachment Prototype Questionnaire (Westen and Nakash)
provides ‘5-point ratings of degree of match to 4 attachment prototypes: secure, dismissing, preoccupied, and disorganized/unresolved’ [87522]

Adult Attachment Questionnaire (Simpson et al)
"a 17-item, 5-point Likert-type self-report measure" [84361]

Adult Attachment Scale (Collins and Read)

Adult Behavior Checklist (Achenbach)

Adult Child Distortion Scale (Crites and Russell)
"Assesses dysfunctional codependency areas of family of origin and current family structure, as well as personal communication style." [17514]
Crites, F; Russell, J R. Adult Child Distortion Scale. Fort Worth: Association for Pragmatic Therapy, 1988. [cited in 17514]

Adult Competencies Interview (RESIST)

Adult Dispositional Hope Scale
[used but not cited in 92329]

Adult Enhanced Services Referral Tool (Project Liberty)
"a screening instrument for making and monitoring referrals to enhanced services" [80206]

UF: Adult Assessment and Referral Tool
Adult Health Questionnaire (Smith et al)
[developed for this study]

Adult Life Events Questionnaire (Horesh and Iancu)
"The ALEQ was constructed for the present study based on the Psychiatric Epidemiology Research Interview. It consists of 86 items and includes life events from the PERI and a list of life events specifically relevant to the social, national, and political aspects of life in Israel." [33932]

Adult Life Phase Interview (Bifulco et al)
"a semi-structured interview instrument...designed to follow on chronologically from the CECA [Childhood Experience of Care and Abuse], which ends at the 17th birthday" [22633]
Bifulco, A; Bernazzani, O; Moran, P M; Ball, C. Lifetime stressors and recurrent depression: preliminary findings of the Adult Life Phase Interview (ALPHI). *Social Psychiatry and Psychiatric Epidemiology* 35: 264-275 (2000). [22633]

Adult Measure of Behavioural Inhibition (Gladstone and Parker)
"The AMBI is a 16-item self-report inventory that assesses current tendency to respond to new stimuli with inhibition and/or avoidance" [37709]

Adult Memory and Information Processing Battery (Coughlan and Hollows)
Coughlan, A; Hollows, S E. *Adult Memory and Information Processing Battery*. Leeds, England: St. James' University Hospital, Psychology Department, 1985. [cited in 07717]

Adult Non-Interpersonal Violence Scale
[used but not cited in 27116]

Adult Nowicki-Strickland Internal-External Control Scale
USE: Nowicki-Strickland Internal-External Control Scale (Nowicki and Duke)

Adult Parental Acceptance and Rejection Questionnaire (Rohner)
"a 60-item questionnaire assessing adults’ perceptions of treatment received from the mother in childhood" [04856]

Adult Personality Functioning Assessment (Hill et al)
"assesses functioning in several domains of adult life, including work and school, love relationships, friendships, nonspecific social relationships, negotiations, and coping with tasks of daily life" [23982]

Adult Physical Assault Scale (Wright et al)
"The 12-item APA included items adapted from the physical domestic violence subscale of the Abusive Behavior Inventory." [84118]
Wright, C V; Collinsworth, L L; Fitzgerald, L F. Why did this happen to me?: cognitive schema disruption and posttraumatic stress disorder in victims of sexual trauma. *Journal of Interpersonal Violence* 25: 1801-1814 (2010). [84118]

Adult Physical Experiences Questionnaire (Hetzel and McCane)
"This measure was almost identical to the Childhood Physical Experiences Questionnaire, except that it asked about physical harm experiences that occurred after the age of 15." [27528]

Adult Psychological Symptoms Checklist
USE: Assessment of Psychological Symptoms Checklist (Gilbert et al)

Adult Self-Expression Scale (Gay et al)

Adult Self-Perception Profile (Messer and Harter)
“an instrument representing self-evaluation of competence in 12 domains”

Adult Self-Report (Achenbach)

Adult Self-Transcendence Inventory (Levenson et al)
"consists of 18 Likert-scaled items" [28508]
**Adult Separation Anxiety Questionnaire (Manicavasagar et al)**
“a self-report measure for assessing typical SA symptoms in adulthood” [24679]

**Adult Separation Anxiety Semi-Structured Interview (Manicavasagar et al)**
"assigns persons to a category of Adult Separation Anxiety Disorder” [24679]

**Adult Separation Anxiety Structured Interview (Manicavasagar et al)**
"a 27-item, clinician-administered assessing the presence of adult separation anxiety disorder over the previous 3 months” [83705]

**Adult Service Utilization Form (Paranjape et al)**
"The ASUF is a 14-item checklist [that] assesses the frequency of a woman’s utilization of psychiatric, psychological, medical, social service, or self-help services.” [29468]

**Adult Sexual Experiences Questionnaire (Schaaf and McCanne)**
"The ASEQ (55 a modified version of Finkelhor's Survey of Childhood Sexual Experiences. The ASEQ assesses the adult experience (since age 15) of unwanted or forced sexual contact.” [16576]

**Adult Social Support Scale (Harter)**
"addresses six sources of support”

**Adult Survivors of Sexual Abuse Client Self-Reporting Questionnaire (Brown)**
[used but not further cited in 90450]

**Adult Temperament Questionnaire**
[used but not cited in 93127]

**Adult Victimization Scale (Draucker)**
"designed for the purpose of this study”

**Adult War Problems Interview (RESIST)**
Jayawickreme, N; Jayawickreme, E; Goonasekera, M A; Foa, E B. Distress, wellbeing and war: qualitative analyses of civilian interviews from north eastern Sri Lanka. *Intervention* 7: 204-222 (2009). [83634; the AWPI appears on pp. 208-209]

**Adult-Adolescent Parenting Inventory (Bavolek)**

**Adult-Child Relationship Questionnaire (Pianta)**

**Adult’s Social Support Questionnaire (Bogat et al)**
Bogat, G A; Chin, R; Sabbath, W; Schwartz, C. *The Adult’s Social Support Questionnaire* (Technical Report no. 2). East Lansing: Michigan State University, 1983. [cited in 16961]

**Advantages of Condom Use (Prochaska et al)**
"13 reasons to use or not use condoms” [39890]

**Adversarial Sexual Beliefs Scale (Burt)**
USE: Rape Supportive Beliefs Scales (Burt)

**Adverse and Traumatic Events Questionnaire (Linley et al)**
Linley, P A; Felus, A; Gillett, R; Joseph, S. Emotional expression and growth following adversity: emotional expression mediates subjective distress and is moderated by emotional intelligence. *Journal of Loss and Trauma* 16: 387-401 (2011). [85944]
Adverse Childhood Experiences Study Questionnaire (Felitti et al)

Adverse Events Checklist (Scheeringa et al)
"The AEC is an 8-item yes/no checklist designed for this study." [35571]

Adverse Events Measure (Kratochvil et al)
a brief 10-item side effects checklist

Adverse Experiences Questionnaire (Stoll et al)
"The four-item Adverse Experiences Questionnaire assesses the presence of four types of traumatic memories during a stay in the ICU or hospital ward." [29651]

Adversities and Trauma Inventory (Samuels-Dennis et al)
23 items, "derived from the Composite International Diagnostic Interview — PTSD module (World Health Organization) and the Betrayal Trauma Survey (Goldberg and Freyd)" [35435]

AECOM Coping Styles Questionnaire
USE: Albert Einstein College of Medicine Coping Styles Questionnaire (Plutchik)

AF-CBT Implementation Measure (Kolko et al)
"The AIM was designed to evaluate the degree to which practitioners reported using various AF-CBT treatment practices in the past six months." [86255]

Affect Balance Scale (Bradburn)
USE: Bradburn Affects Balance Scale (Bradburn)

Affect Balance Scale (Derogatis)
"a 40-item checklist of adjectives" [10348]

Affect Grid (Russell et al)

Affect Intensity Measure (Larsen)
UF: Affective Intensity Measure (Larsen and Diener)

Affect Questionnaire (Stewart)

Affect Task (Steele et al)
"a series of cartoons that assesses children’s emotional understanding of common social dilemmas" [86517]
Steele, M; Steele, H; Fonagy, P. The affect task protocol and coding guidelines. Unpublished manuscript, University of London, 1994. [cited in 86517]

Affective Commitment Scale (Allen and Meyer)
an 8-point scale

Affective Control Scale (Berg et al)
Affective Intensity Measure (Larsen and Diener)
USE: Affect Intensity Measure (Larsen)

Affective Lability Scales (Harvey et al)
“assess a construct related to but not identical to negative affectivity” [23944]

Affective Norms for English Words (Bradley and Lang)
“provides a normative emotional rating for a large number of words in the English language” [34801]

Affective Orientation Scale (Booth-Butterfield and Booth-Butterfield)

Affective Stroop Task (Blair et al)
Blair, K S; Smith, B W; Mitchell, D G; Morton, J; Vythilingam, M; Pessoa, L; Fridberg, D; Zametkin, A; Sturman, D; Nelson, E E; Drevets, W C; Pine, D S; Martin, A; Blair, R J. Modulation of emotion by cognition and cognition by emotion. Neuroimage 35: 430-440 (2007). [cited in 34316]

Affectometer 2 (Kammann and Flett)

Afghan and Iraq Post-Deployment Screen
“includes 3 standard, previously validated, brief mental health screens to assess for symptoms of PTSD, depression, and high-risk alcohol use” [31014]
[used but not clearly cited in 31014]

Afghan Daily Stressors Scale (Miller et al)
“a context-specific [26-item] measure of daily stressors...developed for the present study” [33035]
Miller, K E; Omidian, P; Rasmussen, A; Yaqubi, A; Daudzai, H. Daily stressors, war experiences, and mental health in Afghanistan. Transcultural Psychiatry 45: 611-638 (2008). [cited in 33035]

Afghan Symptom Checklist (Miller et al)
“a 22-item instrument...a brief assessment tool designed for efficient and culturally grounded needs assessment and program evaluation” [29849]

Afghan War Experiences Scale (Miller et al)
“The AWES, which asks participants to indicate whether they have experienced each of 17 war-related experiences of violence or loss...was adapted from the War Experiences Scale developed by Weine et al and Miller et al in their research with Bosnian refugees.” [29849]

Afghanistan Traumatic Events Checklist (Panter-Brick et al)
a 20-item checklist based on the Gaza Traumatic Event Checklist and the Harvard Trauma Questionnaire

African American Historical Trauma Questionnaire (Miller)

African Self-Consciousness Scale
[used but not cited in 90161]

African-American Women’s Stress Scale (Watts-Jones)
Agricultural Coping Systems Inventory
[used but not cited in 93602]

Age Universal Intrinsic/Extrinsic Scale
[used but not cited in 91885]

Age Universal Religious Orientation Scale (Gorsuch and Venable)

Ages and Stages Questionnaire (Bricker and Squires)
"The ASQ is a parent/carer completed measure to assess a child’s emotional and social competence at different developmental stages." [37156]
Bricker, D D; Squires, J. Ages and Stages Questionnaires: A Parent-Completed, Child-Monitoring System (ASQ), 2nd ed.

Aggie Figures Learning Test (Madjan et al)
"This new visuoperceptual instrument was developed as a nonverbal equivalent to the Rey Auditory Verbal Learning Test" [34232]

Aggravating Reactions Scale (Van der Wal et al)
Van der Wal, J; Cleiren, M P H D; Han, R; Diekstra, R FW. Verslag van het nabestaandenprojekt, Deel 2: Psychometrische evaluatie van enkele vragenlijsten, afgenomen tijdens de eerste meting onder nabestaanden van suicides en verkeersslachtoffers. Internal report, Leiden University Department of Clinical and Health Psychology, 1988. [cited in 07092]

Aggression Inventory (Little et al)
a self-report measure

Aggression Questionnaire (Buss and Perry)
a 29-item measure of physical aggression" [15557]

Aggression Scale (Deb et al)
"The Aggression Scale is based on Chauhan and Tiwari's Frustration Scale, in which aggression has been taken as a mode of frustration. It comprises 30 items overall and is designed to measure the level of aggression in an individual." [84595]

Aggression Scale (Orpinas and Frankowski)
a self-report measure of aggressive acts committed during the week prior to the survey" [82201]

Aggression Scale (Ryden)

Aggression Scale/My Day at School (Schwartz et al)

Aggressive Acts Questionnaire (Haller and Woodard)
"The AAQ is a 40-item, face-valid self-report inventory designed to assess current (past 30-day) victimization and perpetration.‖ [14496]

Aggressive Behavior Measure (Keane et al)
"This 6-item measure assessed instances of aggressive behavior that ranged from verbal abuse and threats of violence to actual perpetration of violence." [80694; Measure not named in text, so name assigned by PILOTS Database staff]

Aggressive Behavior Scale (Muller)
“developed for this study in order to measure aggressive lifetime behavior”
Aggressive Fantasy Scale
[used but not cited in 20562]

Agitation Inventory (Cohen-Mansfield et al)

Agoraphobic Cognitions Questionnaire (Chambless et al)

AI-SUPERPFP Instrument
[website reference only given in 26776]
UF: American Indian Service Utilization, Psychiatric Epidemiology, Risk and Protective Factors Project Instrument

AID Questionnaire (McNair and Lorr)

AIDS Caregiver Scale
[used but not cited in 90930]

AIDS Clinical Trials Group Questionnaire (Chesney et al)
"Subjects self-reported their adherence to anti-HIV medication regimens using the ACTG." [26037]
Chesney, M A; Ickovics, J R; Chambers, D B; Gifford, A; Neidig, J; Zwickl, B; Wu, A W. Self-reported adherence to antiretroviral medication among participants in HIV clinical trials. *AIDS Care* 12: 405-408 (2000). [cited in 26037]

AIDS Information Survey (DiClemente et al)

AIDS Risk Behaviors and Attitudes Survey
Whitmire, L E; Harlow, L L; Quina, K; Morokoff, P J. *Childhood Trauma and HIV: Women at Risk*. Philadelphia; Brunner/Mazel, 1999. [15564; the Survey appears on pp. 172-173]

AIDS Risk Interview (Chawarski et al)
"reliably assesses behavior patterns associated with the risk of HIV infection among persons with severe mental illness" [26335]

AIDS Risk Inventory (Hoff et al)
"This structured interview includes 8 items that assess HIV knowledge and items that assess HIV risk behaviors." [28526]
Hoff, R A; Beam-Goulet, J; Rosenheck, R A. Mental disorder as a risk factor for human immunodeficiency virus infection in a sample of veterans. *Journal of Nervous and Mental Disease* 186: 556-560 (1997). [cited in 28526]

AIDS-Related Behavioral Intentions Questionnaire

AIDS-Related Risk Behavior Inventory

AIDS-Specific Posttraumatic Stress Response Scale (Friedman)
"developed specifically for this study" [90078]
Friedman, J E. Depression and posttraumatic stress response as outcomes of AIDS-related loss in gay male caregivers. Doctoral dissertation, Pacific Graduate School of Psychology, 1997. [90078]

Air Traffic Controller Questionnaire (Rose et al)
UF: Psychophysiological Anxiety Reactions Scale

Akute Posttraumatische Diagnoseskala (Steil)
Alabama Parenting Questionnaire
"The 34 items in this instrument can be categorized into five different sub-scales: involvement with the child, use of positive reinforcement, lack of monitoring and supervision of the child, inconsistency in applying discipline, and use of corporal punishment." [18994]

Alameda Disability Scale (Belloc et al)

Albany Panic and Phobia Questionnaire (Rapee et al)
"The APPQ is a 27-item questionnaire developed to assess fear of activities that may elicit physical sensations." [24176]

Albert Einstein College of Medicine Coping Styles Questionnaire (Plutchik)
UF: AECOM Coping Styles Questionnaire
Coping Styles Questionnaire (Plutchik)

Alcohol Abuse Involvement Scale (Mayer and Filstead)
"a 14-item, self-report screening measure for alcohol use and abuse in adolescent populations" [22301]

Alcohol and Alcohol Problems Perception Questionnaire

Alcohol and Drug Screening Questionnaire (Lauterbach and Vrana)
"This measure was designed for the present study. It assesses the amount, frequency, and patterns of alcohol and drug use." [16881]

Alcohol and Drug Use History Questionnaire (Specht and Cellucci)
"This measure assesses the presence/absence of 14 DSM-IV criteria for substance dependence prior to incarceration." [86189]

Alcohol Assessment (Zvolensky)
"The AA is a 3-item measure" [81124]

Alcohol Craving Questionnaire (Singleton et al)
"assesses current craving for alcohol" [23243]

Alcohol Dependence Scale (Skinner and Allen)
Skinner, H A; Allen, B A. Alcohol dependence syndrome: measurement and validation. *Journal of Abnormal Psychology* 91: 199-209. [cited in 05327]

Alcohol Effects Questionnaire (Rohsenow)
"a 5-item tension reduction subscale" [28110]

Alcohol Expectancy Questionnaire (Brown et al)

Alcohol Problems Questionnaire (Drummond)

Alcohol Purchase Task (Murphy and MacKillop)
Murphy, J G; MacKillop, J. Relative reinforcing efficacy of alcohol among college student drinkers. *Experimental and Clinical Psychopharmacology* 14: 219-227
Alcohol Research Center Intake Interview
USE: Structured Diagnostic Interview for Identification of Primary Alcoholism (Schuckit et al)

Alcohol Usage Questionnaire (Mehrabian and Russell)
"a 12-item questionnaire designed to provide a measure of habitual alcohol consumption" [34204]

Alcohol Use Disorder and Associated Disabilities Interview Schedule (Grant et al)
"a validated structured lay interview to diagnose substance use disorders" [25299]

Alcohol Use Disorders Identification Test (Saunders et al)
Saunders, J B; Aasland, O G; Babor, T F; De La Fuente, J R; Grant, M. Development of the Alcohol Use Disorders Identification Test (AUDIT): WHO collaborative project on early detection of persons with harmful alcohol consumption, II. Addiction 88: 791-804 (1993). [cited in 25299]

Alcohol Use Inventory (Horn and Wanberg)

Alcohol Use Scale (Drake et al)

Alcohol, Smoking and Substance Involvement Screening Test

Alcoholic Family Background Questionnaire (Carson et al)
[unpublished instrument, cited in 02480]

Alderley Park State Anxiety Questionnaire
Walker, L; Greenwood, D G; Hurst, B C; Chaplin, C A; Bardham, K D; Ekeberg, Ø; Morris, P. [unpublished data, cited in 03120]

Alexithymia Provoked Response Questionnaire (Krystal et al)

Alexithymia Scale for Children (Fukunishi et al)
"The ASC is an observer-rated [12-item] instrument used to measure alexithymia in children as rated by a caregiver who is familiar with the child." [84532]

Alfred P. Murrah Federal Building Bombing Reaction Questionnaire
"a 179-item self-report questionnaire" [16929]

Alienation Scale (Dean)
[used but not cited in 92199]

Alienation Scale (Keniston)
[used but not cited in 92199]

Alienation Scale (Nettler)

Alienation Scale (Nicassio)
"originally developed for use with southeast Asian refugees; it includes 10 questions" [30969]
Alledaagse Problemen Lijst (Vingerhoets et al)

A questionnaire consisting of 114 items that describe problem situations and events referring to different life areas such as relationships, parenthood, household, and work...based on English-language questionnaires including the Daily Hassle Scale (Kenner et al), the Daily Life Experience Questionnaire (Stone and Neale), and the EveryDay Problems Scale (Burks and Martin). [Vingerhoets et al. 1989; Vingerhoets, A. J. J. M.; Jeninga, A. J.; Menges, L. J. Het meeten van chronische en alledaagse stressoren: eerste onderzoeksvaardingen met de Alledaagse Problemen Lijst (APL). Gedrag en Gezondheid 17: 10-17 (1989).]

UF: Everyday Problem Checklist (Vingerhoets et al)

Allen Cognitive Levels Scale

"the ACL is an instrument commonly used by occupational therapists in assessing consumers’ ability to learn." [Allen et al. 1992]

Allgemeine Depressionsskala (Hautzinger and Bailer)

Allgemeine Flugangstfragebogen (Mühlberger et al)

"includes separate ratings for a fear of flying and an avoidance of flying" [Mühlberger et al. 2001]

Allgemeines Stressniveau (Bodenmann)

"In this 17-item self-report questionnaire [measuring “general level of stress”], current levels of stress are assessed in several life domains" [Bodenmann et al. 1998]

Allodi Trauma Scale (Allodi)

Alphabetischer Durchstreichstest (Grünberger)

"for quantification of attention, concentration, and attention variability" [Grünberger 1977]

AmBLaNCE

USE: Atypical Maternal Behavior Instrument (Bronfman et al)

Ambiguous Intentions Hostility Questionnaire

[used but not cited in 92331]

Ambulance Work Stressors Questionnaire

"Adapted from Clohessy and Ehlers...this 14-item questionnaire measured the degree of stress associated with...incident-related stressors [and] organization-related stressors" [Clohessy et al. 1999]

AMDP System

American Fear Survey Schedule for Children (Burnham)
"The FSSC-AM is an ipsative survey with 98 items designed to identify specific fear sensitivities in individual children and adolescents (ages 7-18). [It] is an adapted version of the Australian Fear Survey Schedule for Children - II." [82422]

American Indian Service Utilization, Psychiatric Epidemiology, Risk and Protective Factors Project Instrument
USE: AI-SUPERPFP Instrument

American Indian/Alaska Native Inmate Survey (De Ravello et al)
"We developed a 217-item survey that asked qualitative and quantitative questions about the lives of AI/AN inmates before and during incarceration at NMWCF." [30646]; instrument not named in article, name assigned by PILOTS Database staff

American National Adult Reading Test (Grober and Sliwinski)
"assesses the ability to pronounce irregularly spelled English words" [26549]

American Society of Anesthesiologists Physical Status Classification
"measures physical health status before trauma" [37203]

American Spinal Injury Association Impairment Scale

American Thoracic Society Questionnaire

Americans View Their Mental Health Survey (Veroff et al)

Amnesty International Form (Fossum et al)

Amplification Scale (Barsky)
USE: Barsky Amplification Scale (Barsky et al)

Amsterdam Biographical Questionnaire (Wilde)

Amsterdam Short Memory Test
"a 30-item forced choice verbal recognition task...developed to detect submaximal effort during neuropsychological testing" [14470]

Analog Parenting Task (Zaidi et al)
"The APT consists of 28 slides, each depicting a child engaging in a developmentally appropriate or developmentally inappropriate activity that could be irritating or concerning to a child’s caretaker." [19020]

Analogue Chromatic Continuous Scale (Grossi et al)

Analysis of Social Support in School Transitions (Barone et al)

Anchor Periods Questionnaire (Shrira and Shmotkin)
"includes questions about the participants’ lives" [32456]

Andrew Violence Scale (Andrew)
Anger Acting-Out Scale (Hinton et al)
USE: Anger Scales (Hinton et al)

Anger and Aggression Instrument (Taylor)
"developed to record and collate information from patients' case file records" [31400]

Anger and Hostility Scale (Sappington and Kelly)
"measures the extent to which subjects perceive themselves to have problems caused by their own tempers" [09296]

Anger Attack Questionnaire (Fava et al)

Anger Catastrophic-Cognitions Scale (Hinton et al)
USE: Anger Scales (Hinton et al)

Anger Disorder Scale (DiGuiseppe and Tafrate)

Anger Episode Frequency (Hinton et al)
USE: Anger Scales (Hinton et al)

Anger Expression Scale (Spielberger)
"a 24-item, self-report psychometric inventory with three subscales for assessing individual differences in the expression, suppression, and control of anger" [dbat 27]

UF: AX Scale

Anger Expression Scale for Children (Steele et al)
"This 30-item measure was developed as a measure of anger expression for children, based on the adult State-Trait Anger Expression Inventory (Spielberger)." [35775]

Anger Intensity Scale (Hinton et al)
USE: Anger Scales (Hinton et al)

Anger Management Scale (Stith and Hamby)
"The AMS assesses specific cognitions and behaviors that can increase or decrease anger in relationships and therefore influence the respondent's level of partner violence." [18571]

Anger Response Inventory (Hoshmand and Austin)

Anger Rumination Scale (Sukhodolsky et al)

Anger Scale (Brezina)

Anger Scale (Orth and Maercker)
"For the present study, we developed a 20-item scale measuring anger at the perpetrator, desire for revenge, anger at the criminal justice system, anger at third persons, and anger at the self." [82679]
Anger Scales (Hinton et al)
[generic name assigned by PILOTS Database staff to 8 instruments developed to profile anger episodes in Cambodian refugees]
UF:  
Anger Acting-Out Scale (Hinton et al)  
Anger Catastrophic-Cognitions Scale (Hinton et al)  
Anger Episode Frequency (Hinton et al)  
Anger Intensity Scale (Hinton et al)  
Anger Somatic-Symptoms Addendum (Hinton et al)  
Anger Trauma-Recall Severity Scale (Hinton et al)  
Length-of-Palpitations Scale (Hinton et al)  
Panic Attack Somatic-Symptom Scale (Hinton et al)

Anger Self-Report (Zelin et al)
UF:  
Anger Self-Report—General Expression (Zelin et al)

Anger Somatic-Symptoms Addendum (Hinton et al)
USE: Anger Scales (Hinton et al)

Anger Trauma-Recall Severity Scale (Hinton et al)
USE: Anger Scales (Hinton et al)

Angie/Andy Cartoon Trauma Scales (Praver et al)
"a cartoon-based methodology, measuring trauma-related sequelae of prolonged, repeated abuse...Angie/Andy is a child version of the adult measure, the SIDES [Structured Interview for Disorders of Extreme Stress]" [15306]

Angie/Andy Child Rating Scales (Praver et al)
[cited only as "Praver, Pelcovitz & DiGiuseppe, 1993" in 90176]

Angie/Andy Parent Rating Scales (Praver et al)
[cited only as "Praver, Pelcovitz & DiGiuseppe, 1993" in 90176]

Angstfragebogen für Schüler (Wieczerkowski and Nickel)

Anhedonia Scale (Fawcett et al)
USE: Pleasure Scale (Fawcett et al)

Animal Naming Test
[used but not cited in 90906]

Animal-Related Experiences Inventory (Boat)

Animals Word Generation Test
[used but not cited in 39452]

Annett Handedness Questionnaire

Anniversary Phenomena Survey III (Smith)

Anomia Scale (Srole)

Anomie Hostility Scale
[used but not cited in 82536]

Anomy Scale (McClosky and Schaar)
Anorectic Behavior Observation Scale (Vandereycken)
“a self-reporting questionnaire developed to obtain information from parents about specific behaviors and attitudes in their children that might be symptomatic for anorexia or bulimia nervosa” [15041]

ANSIE
USE: Nowicki-Strickland Internal-External Control Scale (Nowicki and Duke)

Antenatal Questionnaire
[used but not cited in 39550]

Anticipated Future Parenting Index
[used but not cited in 92110]

Anticipation of Combat Scale (Rosen et al)
"This scale was composed of 13 questions that asked soldiers how much stress they had felt during the deployment when thinking about specific events associated with combat." [21767]
Rosen, L N; Wright, K; Marlowe, D; Bartone, P; Gifford, R K. Gender differences in subjective distress attributable to anticipation of combat among U.S. Army soldiers deployed to the Persian Gulf during Operation Desert Storm. Military Medicine 164: 753-757 (1999). [21767; the Scale appears on p. 757]

Anticipation of Loss Inventory (Horowitz et al)
"This 35-item scale was developed to measure the effects of anticipated loss (i.e. one that has not yet occurred) and selected personality features on the intensity and trajectory of grief reactions." [27349]
Horowitz, M H; Field, N P; Fridhandler, B. Anticipation of Loss Inventory. Unpublished measure, University of California, San Francisco, 1991. [cited in 27349]

Anticipation of Negative Consequences Scale
[mentioned in 01627, with reference to 01090; not an actual instrument]

Anticipatory Grief Scale (Theut et al)
"a 27-item self-administered questionnaire assessing reactions to and coping with expected death” [40298]

Antisaccade Task
[a cognitive processing task used but not clearly cited in 86560]

Antisocial Behavior Checklist (Zucker et al)
"a 42-item instrument” [15998]
Zucker, R A; Ham, H P; Fitzgerald, H E. Assessing antisocial behavior with the Antisocial Behavior Checklist: reliability and validity studies. Unpublished manuscript, Department of Psychiatry, University of Michigan, 1993. [cited in 15998]

Antisocial Behavior Form (Noll)
"The ABF was created for purposes of this study and is a self-report measure assessing symptoms of antisocial personality disorder according to the DSM-IV. The ASF consists of participation in 22 antisocial acts involving unlawful behavior, physical aggression, and deceit since the age of 18.” [34961]
Noll, J. Antisocial Behavior Form. Cincinnati: Cincinnati Children’s Hospital Medical Center, 2006. [cited in 34961]

Antisocial Behavior Inventory
[used but not cited in 90998]

Antisocial Behavior Scale
[used but not clearly cited in 33019]

Antisocial Behavior Scale (Bacchini and Affuso)
"The scale consists of a 20-item list of violations of moral norms, social conventions, or laws of differing degrees of seriousness.” [84522]

Antisocial Behaviors Inventory (Daigneault et al)
"The ABI [was] developed specifically for this study. It evaluated the presence of 10 antisocial behaviors displayed during the past year…” [80326]

Antisocial Beliefs Scale (Evans et al)
"This questionnaire was developed for the purposes of the present study to assess antisocial beliefs prior to the offense…” [29384]

Antisocial Childhood Index (Helzer et al)
Antisocial Process Screening Device (Frick and Hare)

Anxiety and Depression Detector (Means-Christensen et al)
a 5-item "screening device for anxiety and depressive disorders in primary care settings" [28298]
Means-Christensen, A J; Sherbourne, C D; Roy-Byrne, P P; Craske, M G; Stein, M B. Using five questions to screen for five common mental disorders in primary care: diagnostic accuracy of the Anxiety and Depression Detector. *General Hospital Psychiatry* 28: 108-118 (2006). [28298; the ADD appears on p. 117]

Anxiety and Fear Behavior Scale (Vera)
USE: Echelle Comportementale d’Anxiété et de Peurs (Vera)

Anxiety Control Questionnaire (Rapee et al)
"The ACQ is a 30-item measure designed to assess perceptions of control over potentially threatening internal and external events and situations associated with anxious responding." [29558]

Anxiety Control Questionnaire for Children (Weems et al)
"Items on the ACQ-C measure perceived lack of control over anxiety-related events." [37136]

Anxiety Disorder Diagnostic Questionnaire (Norton and Robinson)
"The ADDQ is a 4-section questionnaire that can be administered to all participants regardless of their diagnoses. It attempts to measure 2 different aspects of anxiety: fearfulness and apprehension/worry." [37098]

Anxiety Disorder Interview Schedule for DSM-IV: Child and Parent Versions (Silverman and Albano)

Anxiety Disorders Interview Schedule (DiNardo et al)
USE: Anxiety Disorders Interview Schedule (DiNardo et al)

Anxiety Disorders Interview Schedule for Children (Silverman and Nelles)

Anxiety Disorders Interview Schedule for DSM-IV
"a structured diagnostic interview for anxiety disorders as well as depressive disorders with a short screen for psychotic processes" [21229]

Anxiety Expectation Scale (Gursky and Reiss)

Anxiety Frequency Index
[used but not cited in 90549]

Anxiety Inventory (Wichowski and Benishek)
"consists of 17 items...designed to clarify the diagnosis of panic disorder" [28625]

Anxiety Scale (Costello and Comrey)
a 9-item scale
Anxiety Scale (Vizek Vidovic and Arambasic)
"15 items related to the specific aspects of manifest anxiety" [20155]

Anxiety Screening Questionnaire (Weisberg et al)
"developed specifically for the Primary Care Anxiety Project (PCAP)...a 32-item self-report measure that assesses essential features of DSM-IV anxiety disorders" [34456]

Anxiety Sensitivity Index (Reiss et al)

Anxiety Sensitivity Index-3 (Taylor et al)
"The ASI-3 is an 18-item measure that assesses cognitive, social, and physical concerns about arousal-related sensations.” [35262]
Taylor, S; Zvolensky, M J; Cox, B J; Deacon, B J; Heimberg, R G; Ledley, D R; et al. Robust dimensions of anxiety sensitivity: development and initial validation of the Anxiety Sensitivity Index-3 (ASI-3). *Psychological Assessment* 19: 176-188 (2007). [cited in 35262]

Anxiety-Depersonalization Scale (Taal and Faber)

Anxiety-Depression Rating Scale (Rahim)

Anxious Ruminating Questionnaire (Rector et al)
"The ARQ is a 22-item scale that assesses ruminative response to anxious mood and asks respondents to indicate what they think about when they feel anxious." [39039]

Apartment Scale (Karp et al)

Appetitive Aggression Scale (Weierstall and Elbert)
"a scale for the assessment of appetitive aggressive behavior based on theoretical considerations" [85074]

Appraisal of Diabetes Scale (Carey et al)

Appraisal of Life Events Scale (Ferguson et al)
"assesses cognitive appraisal of stressful situations via three dimensions: Challenge, Threat, and Loss" [84149]

Appraisal of Social Concerns (Telch et al)
"The ASC is a 20-item self-report cognitive assessment instrument for use with socially anxious individuals." [29325]
Appraisal of Violence Questionnaire (Dutton)

Appraisal Scale (Stallard and Smith)
"12 items assessed how often adolescents experienced accident-related negative appraisals during the week before the survey." [86695]

Appraisals of Anomalous Experiences Interview (Brett et al)
"The AANEX is a semi-structured interview developed to assess phenomenological, psychological, and contextual factors surrounding the experience of psychotic-like anomalies." [35288]

Appraisals of the Refugee Situation Scale (Adjukovic)

Approach-Avoidance Scale (Cohen and Roth)

Approval of Aggression Measure (Brezina)

Approval of Violence Scale (Brady and Rapoport)

Aprosodia Battery (Ross et al)
"The Aprosodia Battery was developed to distinguish patterns of deficits related to right versus left focal brain damage as the result of ischemic injury." [32245]

Arabic Anxiety Scale (Abdel-Khalek)
"contains 47 brief items" [24016]

Arabic Children’s Depression Inventory (Abdel-Khalek)

Areas of Change Questionnaire (Margolin et al)

Arizona Sexual Experience Scale (McGahuey et al)

Arizona Social Support Interview Schedule (Barrera)

Armed Forces Qualification Test

Armenian Activities Scale (Kassabian)
"a behavioral scale, to assess the frequency of selected ethnically oriented activities" [14191]
Kassabian, A. A three generational study of Armenian family structure as it correlates to Armenian ethnic identity within the context of traumatic loss. Doctoral dissertation, Catholic University of America, 1987. [cited in 14191]

Armenian Identity Scale (Kassabian et al)
"a measure of attitude, to assess the centrality of social and family relationships and language maintenance to a sense of Armenian identity" [14191]
Kassabian, A. A three generational study of Armenian family structure as it correlates to Armenian ethnic identity within the context of traumatic loss. Doctoral dissertation, Catholic University of America, 1987. [cited in 14191]
Army Classification Battery (Montague et al)

UF: General Technical Test (Montague et al)

Army General Classification Test
"a test of general intelligence" [32873]

Army Life Events Scale (Shechner et al)
"The ALE scale, developed for the present study on the basis of life event methodology, measured exposure to and appraisal of impact of a spectrum of negative army life events." [29819]

Army Post-Deployment Reintegration Scale (Blais et al)
36 items

Army Soldier and Family Survey

Army Speed and Accuracy Test
[a "clerical aptitude" test used but not cited in 09678]

Army Spouse Life Events Scale (Rosen)
"a 24-item life-event checklist...developed for [this] study" [07581]

Aron's Scale
USE: Thematic Apperception Test (Morgan and Murray)

Arousal Predisposition Scale (Coren)
"The APS is a 12-item self-report and measures arousability as a predisposition or long-term trait." [29717]

Arthritis Impact Measurement Scale 2 (Meenan et al)

Articulated Thoughts During Simulated Situations (Davison et al)
a "think-aloud cognitive assessment approach" [14581]

ASEBA Teacher Report Form
[used but not cited in 93209]

ASI
USE: Addiction Severity Index (McLellan et al)

ASIA Impairment Scale
"used to classify injury severity" [26908]

Asian American Racism-Related Stress Inventory (Liang et al)
[used but not cited in 93431]

Asian American Values Scale - Multidimensional (Kim et al)
"The AAVS-M is a 42-item scale assessing the extent to which respondents endorse traditional Asian values of collectivism, conformity to norms, emotional self-control, family recognition through achievement, and humility." [82685]

Asperger's Syndrome Diagnostic Scale (Myles et al)
Assailant Availability Scale (Sullivan et al)
“created for this study...included 18 items assessing the degree to which assailants were emotionally available and responsive to children according to the children’s reports.” [15227]
Sullivan, C M; Juras, J; Bybee, D; Nguyen, H; Allen, N. How children's adjustment is affected by their relationships to their mothers' abusers. Journal of Interpersonal Violence 15: 587-602 (2000). [15227]

Assault Characteristics Questionnaire (Littleton and Radecki Breitkopf)

Assault Information and History Interview (Foa and Rothbaum)
Foa, E B; Rothbaum, B O. Treating the Trauma of Rape: Cognitive-Behavioral Therapy for PTSD. New York: Guilford Press, 1998. [ES 087; the Interview appears on pp. 249-260]

Assault Information Interview (Rothbaum)

Assault Inventory (Otago University)

Assault Phobia Questionnaire
"This 10-item scale follows the DSM-IV criteria for specific phobias. It is similar to [Ehring et al’s Travel Phobia Questionnaire].” [30793]
[used but not cited in 30793]

Assault Reaction Interview (Riggs et al)
USE: Initial Interview (Riggs et al)

Assault Reaction Scale (Siegel et al)

Assaultive Behavior Survey
[used but not cited in 92424]

Assertion Inventory (Gambrill and Richey)

Assessing Environments II Questionnaire (Berger et al)
"a 190-item questionnaire that assesses a range of childhood experiences, personal attitudes, and perceptions in 15 different scales”

Assessing Environments III Questionnaire (Berger et al)
"a 164-item questionnaire” adapted from the AEII questionnaire
Berger, A M; Knutson, J F. Assessing Environments III. Unpublished instrument, Department of Psychology, University of Iowa, Iowa City, Iowa, 1984. [cited in 04042]

Assessment Checklist for Children (Tarren-Sweeney)
"The ACC is a caregiver-report psychiatric rating scale, measuring behaviors, emotional states, traits, and manners of relating to others, as manifested by children in care.” [81914]

Assessment for Lifetime History of Aggression (Brown and Goodwin)
UF: Brown-Goodwin Assessment for Lifetime History of Aggression

Assessment Instrument for Interviewing Adult Victims of Hurricane Hugo (Freedy et al)

Assessment of African American Cultural-Spiritual Experiences (Miller)

Assessment of Chronic Traumatic Stress
[used but not cited in 91223]
Assessment of Communication and Interaction Skills (Forsyth et al)
"The ACIS is an observational instrument...used to analyze the behavior of a person when interacting in an individual and/or group setting." [16070]

Assessment of Current Functioning (Freeston)
USE: Questionnaire sur l’Évaluation du Functionnement Actuel (Freeston)

Assessment of Delivery Questionnaire
[used but not cited in 92911]

Assessment of DSM-IV Personality Disorder (Schotte et al)
"a self-report screener for personality disorders" [25150]

Assessment of Dynamic Adaptation (Clarke)
"a measure of the psychological impact specific to sex offender treatment providers" [91963]

Assessment of Exposure to 9/11 Attack
[used but not cited in 91915]

Assessment of Exposure to the Events of September 11 (Norris)
"a three-part tool to help identify bias introduced into studies as the result of the 9/11 attacks on America" [OBSSR website]
electronic document at <http://obssr.od.nih.gov/Content/About_OBSSR/Activities/attack.htm> [cited in 31391]
UF: 9/11 Instrument (Norris)

Assessment of General Stress Susceptibility (Schulz et al)
"The questionnaire consists of 29 items, forming an overall stress reactivity score as well as 6 subscales..." [27840]

Assessment of Leisure and Recreation Involvement (Ragheb)
"The LRI consists of six subscales including the pleasure, meaning, centrality, interest, importance, and intensity of leisure and recreation involvement." [32620]

Assessment of Life Threat and Treatment Intensity Questionnaire (Stuber et al)
"constructed for this study"
Stuber, M L; Kazak, A E; Meeske, K; Barakat, L P; Guthrie, D; Garnier, H; Pynoos, R S; Meadows, A T. Predictors of posttraumatic stress symptoms in childhood cancer survivors. Pediatrics 100: 958-964 (1997). [09954]

Assessment of Life-History of Aggression (Coccaro et al)
"This is a 10-item scale measuring aggression across the lifespan." [31069]

Assessment of Motor and Process Skills (Fisher)
"The AMPS is an observation tool used to measure the motor and process skills of a person as routine tasks of personal significance are performed." [16070]

Assessment of Past Traumas Questionnaire (Greenberg)

Assessment of Prior Disclosure Questionnaire (Greenberg)

Assessment of Psychological Symptoms Checklist (Gilbert et al)
"The ASPCL was developed as a self-report checklist to assess a variety of common symptoms, their chronicity, distress/severity, and perceived interference with everyday life." [26818]
UF: Adult Psychological Symptoms Checklist
Assessment of Self Questionnaire (Classen et al)
"an idiographic method designed to elicit and assess the constructs that survivors use to describe various aspects of the self" [20647]

Assessment of Women and Girls' Protection in Affected Areas Questionnaire
53 items

Assessment Package for Schools (Wellborn and Connell)
UF: Relatedness Scales (Wellborn and Connell)
Rochester Assessment Package for Schools

Assessment Reactions Questionnaire (Griffin et al)
"developed for previous studies examining trauma-focused research reactions" [82947]

Assessment-Treatment Flowchart for Adolescents (Briere)
"This form not only helps guide the initial treatment plan, but also provides a serial reassessment of symptoms and possible interventions on a regular basis thereafter." [86173]
Briere, J N; Lanktree, C B. Treating Complex Trauma in Adolescents and Young Adults. Thousand Oaks, California: Sage Publications, 2012. [86173; the ATF-A appears on pp. 203-204]

Assimilation Scale (Cernovsky)

Asthma Control Questionnaire (Juniper et al)
"The ACQ is a 7-item measure completed by the child examining asthma symptoms over the past week." [82040]

Asthma Control Test (Nathan et al)

Asthma Illness Representation Scale (Sidora-Arcoleo et al)
"The AIRS contains 37 items with 5 subscales and a total score [that] compares caregivers’ representation of their children’s asthma with the professional model of asthma management." [39368]

Asthma Symptom Checklist (Kinsman et al)
"ASC aims to measure subjective asthma symptomatology and comprises 5 subscales: panic-fear, irritability, fatigue, hyperventilation, and bronchoconstriction." [38326]

Ataque de Nervios Questionnaire (Salmán et al)
Salmán, E; Liebowitz, M R; Guarinaccia, P J; Jusino, C M; Garfinkel, R; Street, L; Cardenas, D C; Silvestre, J; Fyer, A L; Carrasco, J L; Davies, S O; Klein, D F. Types of ataques de nervios: the influence of coexisting psychiatric diagnosis. Culture, Medicine, and Psychiatry 22: 231-244 (1998). [cited in 15158]

Atrocity Scale (Brett and Laufer)
Brett, E; Laufer, R. Atrocity Scale. Unpublished. [cited in 02839]

Attachment and Clinical Issues Questionnaire
[used but not cited in 93534]

Attachment History Questionnaire (Kessler and Pottharst)
"elicits basic information about childhood attachments" [21604]
[used but not cited in 21604]

Attachment Interview for Adults (George et al)
George, C; Kaplan, N; Main, M. Attachment Interview for Adults. Unpublished manuscript, University of California, Berkeley, 1984. [cited in 06348]

Attachment Prototype Scale (Bartholomew and Horowitz)
Attention Prototype Scale (Hazan and Shaver)

Attention Questionnaire (Scher and Mayseless)

Attention Questionnaire (West et al)
"75-item questionnaire that assesses four pathological patterns of attachment: compulsive self-reliance, compulsive caregiving, compulsive care seeking, and angry withdrawal" [87532]

Attention Scale (Kitson)

Attention Security Ratings (Shaver and Brennan)

Attention Story Completion Task (Verscheuren et al)
"a migration-specific adaptation of a validated doll-play procedure for preschool and school-age children" [87532]

Attention Story Stems (Friedrich)

Attachment Style Interview (Bifulco et al)
"The ASI assesses the quality of relationships and support, which form the basis for ratings about the individual's ability to form close relationships and attachment security." [83861]

Attachment Style Questionnaire (Feeney et al)
"a 40-item self-report questionnaire" [19749]

Attachment Styles Questionnaire (Mikulincer et al)
"15 statements, based in the descriptions by Hazan and Shaver of how people typically feel in close relationships" [18416]

Attachment to God (Kirkpatrick and Shaver)
"An exploratory measure of attachment to God, modeled on the Shaver-Hazan parental attachment measure" [81956]

Attachment-Related Interview Questions to Use With Children (Friedrich)

Attention Bell Test (Biancardi and Stoppa)
USE: Test delle Campanelle (Biancardi and Stoppa)

Attention Deficit/Hyperactivity Disorder Symptoms Scale (Barkley and Murphy)
"The ADHDSS is an 18-item self-report checklist of inattention and hyperactivity symptoms." [27085]

Attention Deficit/Hyperactivity Disorder Test (Gilliam)
"a 36-item normed test based on the DSM-IV criteria" [82155]

Attention Process Test (Sohlberg and Mateer)
### Attention to Positive and Negative Information Scale (Noguchi et al)
A 40-item scale that "measured chronic individual differences in the tendency to attend to, think about, and focus on positive (or negative) information with respect to the self, others, and past and future events" [34920]

### Attention-Deficit Scales for Adults
[used but not cited in 90926]

### Attentional Control Scale (Derryberry and Reed)
"the 20 self-report ACS items address attentional focus, attentional shift, and thought control" [37175]

### Attentional Network Task (Fan et al)

### Attitude and Behavior Questionnaire (Search Institute)
USE: Einstellung- und Verhaltensfragebogen (Janke and Hüppe)

### Attitude and Behavior Questionnaire (Search Institute)
a "152-item inventory developed by the Search Institute" [21488]

Benson, D L. *The Troubled Journey: A Portrait of 6th-12th Grade Youth*. Minneapolis: Search Institute, 1990. [cited in 21488]

Blyth, D A. *Healthy Communities; Healthy Youth: How Communities Contribute to Positive Youth Development*. Minneapolis: Search Institute, 1993. [cited in 21488]

UF: Profiles of Student Life: Attitude and Behavior Questionnaire

Search Institute Profiles of Student Life: Attitude and Behavior Questionnaire

### Attitude and Symptom Questionnaire
Martín, Catherine A; Wilson, John F; Fiebelman, Nathan D; Gurley, Diana N; Miller, Thomas W. Physicians’ psychologic reactions to malpractice litigation. *Southern Medical Journal* 84(11): 1300-1304 (November 1991). [02669]

### Attitude Survey (Schwarz et al)

### Attitude Toward Heights Questionnaire (Abelson and Curtis)
"The ATHQ consists of 6 questions assessing participants’ attitudes toward height situations." [36318]

### Attitude Toward Prisons Scale (Melvin et al)
"The ATP is a 36-item scale designed to measure an individual’s attitudes toward prisoners." [40103]

### Attitude Toward Spanking (Holden et al)

### Attitude Toward War Scale (Thurston)

### Attitude Towards Emotional Expression Scale (Joseph et al)
"The ATEES [is a 20-item scale] designed to assess individual differences in cognitions and behaviors concerning emotional expression." [18958]

### Attitudes About Dating Index (Foo and Margolin)
assesses "participants' beliefs about the justifiability of using aggression toward a dating partner" [84378]

### Attitudes About Family Violence (Graham-Bermann)
"This self-report measure asks the child to rate 10 statements using a 5-point Likert-type scale on how much each statement reflects the child’s beliefs and is true." [84600]

Graham-Bermann, S A. *Attitudes About Family Violence (AAGV)*. Ann Arbor: Department of Psychology, University of Michigan, 1994. [cited in 84600]

### Attitudes About Guilt Survey (Kubany)
Attitudes About Marriage Index (Margolin and Foo)
"a self-report measure modeled after Greenblat's questionnaire assessing approval versus disapproval of aggression toward one's wife in specific circumstances" [22746]
Margolin, G; Foo, L. Attitudes About Marriage Index. Unpublished instrument, University of Southern California, 1992. [cited in 22746]

Attitudes and Concepts of Death (Adams)

Attitudes and Expectations Questionnaire
[used but confusingly cited in 29157]

Attitudes and Practices to the Assessment of Sexual Abuse in Men Questionnaire (Lab et al)
"asked questions [of mental health personnel] about subjects' attitudes and practice in the assessment of sexual abuse in male patients" [21997]
Lab, D D; Feigenbaum, J D; De Silva, P. Mental health professionals' attitudes and practices towards male childhood sexual abuse. Child Abuse and Neglect 24: 391-409 (2000). [21997; the Questionnaire appears on pp. 405-409]

Attitudes and Reactions Questionnaire (Keinan et al)
"specifically constructed for the present study" [09287]

Attitudes Facing Sexuality and Love Questionnaire (Guilbert et al)

Attitudes Questionnaire (Solomon and Israeli)
"The scale consists of 53 items, encompassing the attitudes toward the etiology, policy and treatment of CSR [combat stress reaction]." [08176]

Attitudes to Emotional Expression Scale (Williams et al)
a 4-item scale "based upon the Dysfunctional Attitude Scale"
SEE ALSO: Dysfunctional Attitude Scale (Weissman and Beck)

Attitudes to Health and Services Questionnaire (Fraser)
"This is a 10-item questionnaire, developed for the Leaving Care Study, looking at young peoples' attitudes to mental and physical health and also accessibility and contact with health services." [39293]

Attitudes to Stress and PTSD Schedule (Royal Navy)
"developed and used by the Royal navy, addresses attitudes toward mental illness" [81118]

Attitudes to Stress Schedule
[used but not cited in 28437]

Attitudes Toward Christian Women Scale (Postovoit)
"The ACWS is a 22-item scale [that] examines the degree to which participants agree with a number of religious belief statements on a six-point Likert scale." [18325]

Attitudes Toward Exposure Therapy (Harned et al)
"A 21-item measure of clinician attitudes toward ET was developed for the present study." [36157]

Attitudes Toward Family Violence Questionnaire (Jaffe et al)
"This questionnaire comprises 41 items assessing children’s attitudes about the appropriateness of using violence in a variety of contexts." [15207]

Attitudes Toward Family Violence Scale (LaCrosse)

Attitudes Toward Gangs Scale
[used but not cited in 20562]
Attitudes Toward Lesbians and Gay Males Scale (Herek)

Attitudes Toward Marriage and the Family Scale (Feldman)

Attitudes Toward Peace Questionnaire (Shammay and Kimhi)
"The questionnaire includes 12 items" [82355; instrument name assigned by PILOTS Database staff]

Attitudes Toward Rape Questionnaire (Feild)

Attitudes Toward Rape Victims Scale (Ward)
"The ARVS is a 25-item instrument designed to assess victim blame, resistance, credibility, denigration, responsibility, trivialization, and deservingness." [14848]

Attitudes Toward SARS Survey (Maunder et al)
"76 items probing attitudes toward SARS" [instrument name in article; name assigned by PILOTS Database staff]
Maunder, R G; Lancee, W J; Rourke, S; Hunter, J J; Goldbloom, D; Balderson, K; Petryshen, P; Steinberg, R; Wasilenki, D; Koh, D; Fones, C S L. Factors associated with the psychological impact of Severe Acute Respiratory Syndrome on nurses and other hospital workers in Toronto. *Psychosomatic Medicine* 66: 938-942 (2004).

Attitudes Toward Seeking Professional Psychological Help Scale

Attitudes Toward War and Peace Questionnaire (Punamäki)

Attitudes Toward Women Scale (Spence et al)
UF: AWS

Attitudes Towards CBT-PE Questionnaire (Amsel et al)
"measured trainees' attitudes toward [individual component] recommendations [for CBT-PE]" [19118]

Attitudes Towards Forgiveness Scale (Brown)
"ATF consists of 6 items that assessed the extent to which participants viewed forgiveness as a virtue or desirable characteristic regardless of the extent to which they themselves actually practice forgiveness." [87551]

Attitudes Towards PTSD Scale (Dispenza);

Attitudes Towards Therapy With PTSD Scale (Dispenza)

Attitudes Towards Violence Scale
[used but not cited in 91697]

Attitudes, Feelings, and Experiences Survey (Lenzenweger)
"a 400-item [survey] that includes four schizotypy and schizophrenia-related measures: the Perceptual Aberration scale, the Magical Ideation scale, the Referential Thinking scale, and the Paranoid Schizophrenia scale" [22459]

Attorney-Client Relationship Questionnaire (Child Custody Research Project)
Attributed Responsibility Interview (Van Loey et al)
[instrument not named in text; name assigned by PILOTS Database staff]
"We developed a semi-structured interview in order to assess the participant’s perceptions of responsibility with regards to who or what caused the burn." [31510]

Attribution about Responsibility Measure (Brewin and Shapiro)
"Participants used a 3-point scale to rate the extent to which 9 causal statements were true for why the abuse happened." [81054]

Attribution of Meaning Questionnaire (Bramslen)

Attribution of Problem Cause and Solution Scale (Stepleman et al)

Attribution of Rape Blame Scale (Ward and Resick)

Attribution of Responsibility for the Solution Scale (Heath et al)

Attribution of Responsibility Questionnaire (Brewin and Shapiro)
USE: Life Evaluation and Attribution of Responsibility Questionnaire (Brewin and Shapiro)

Attribution of Violence Questionnaire (Dutton)

Attribution Questionnaire (Corrigan et al)
"developed to address nine stereotypes about people with mental illness" [35791]

Attributional Style Questionnaire (Peterson et al)

UF: Expanded Attributional Style Questionnaire (Peterson and Villanova)

Attributional Style Questionnaire (Seligman)

Attributional Style Questionnaire for Children [KASTAN] (Kaslow et al)
USE: Children’s Attributional Style Questionnaire (Kaslow et al)

Attributions of Causality for Rape Scale (Meyer and Taylor)
USE: Blame Attribution Scale (Meyer and Taylor)

Attributions of Improvement Questionnaire (Livanou et al)
"modified from [an instrument of] Basoglu et al" [24794]
Livanou, M; Basoglu, M; Marks, I M; De Silva, P; Noshirvani, H; Lovell, K; Thrasher, S. Beliefs, sense of control and treatment outcome in post-traumatic stress disorder. Psychological Medicine 32: 157-165 (2002). [24794]

Attributions of Responsibility and Blame Scales (McMillen and Zuravin)
"Forty items...developed for this study to assess the attributions respondents made about their child sexual abuse" [13373]

Attributions of Responsibility Measure (Brewin and Shapiro)
Attributions Scale (Frazier)
"a 19-item paper-and-pencil measure assessing the degree to which respondents attributed their experiences to various causes" [32753]

Atypical Maternal Behavior Instrument (Bronfman et al)
UF: AMBIANCE

Auditory Consonant Trigram Test

Auditory Continuous Performance Test
[used but not cited in 91991]

Auditory Hallucinations Interview (Romme and Escher)
[used but cited only as “unpublished” in 31334]

Auditory Vocal Hallucination Rating Scale (Jenner and Van de Willige)
"a [16-item] structured interview" [37924]
Jenner, J A; Van de Willige, G. The Auditory Vocal Hallucination Rating Scale (AVHRS). Groningen, The Netherlands: University Medical Center Groningen, University Center for Psychiatry, University of Groningen, 2002. [cited in 37924]

Auditory-Verbal Learning Test (Rey)
UF: Rey Auditory-Verbal Learning Test

Aufmerksamkeits-Belastungs-Test (Brickenkamp)

Aural Pressure Index (Stahle et al)

Aussagen-Liste zum Selbstdwertgefühl für Kindern und Jugendlichen (Schauder)

Australian Army General Classification Test
"a 100-item general intelligence test" used but not cited in 09678

Australian Assessment of Quality of Life Instrument
"The instrument has a coherent principal component structure with 5 orthogonal factors (illness, independent living, physical ability, psychological well-being, and social relationships)." [36865]

Australian Community Participation Questionnaire

Australian Longitudinal Study of Ageing
The *Australian Longitudinal Study of Ageing*. Adelaide, South Australia: Flinders University, 1992. [cited in 26912]

Australian Longitudinal Study of Women's Health
"a longitudinal study of the health and well-being of three cohorts of Australian women” [80107]
Lee, C. *Women's Health Australia: What Do We Know? What Do We Need to Know?* Brisbane: Australian Academic Press, 2001. [cited in 80107]

Authenticity Scale (Wood et al)
"a 12-item measure of authenticity consisting of 3 subscales — authentic living, external influence, and self-alienation" [38107]
Authoritative Parenting Scale (Steinberg et al)

Autism Diagnostic Interview (Lecouteur et al)

Autism Spectrum Screening Questionnaire (Ehlers and Gillberg)

Autobiographical Emotional Events Dialogue (Koren-Karie et al)
"The AEED is a narrative co-=construction measure developed to assess attachment security in childhood." [29986]

Autobiographical Memory Interview (Kopelman et al)

Autobiographical Memory Questionnaire (Rubin et al)

Autobiographical Memory Test (Buss et al)

Autobiographical Memory Test (Williams and Broadbent)
UF Biographical Memory Test

Automated Behavioral Health Clinic
"The computerized intake screening questionnaire...includes standardized measures of childhood trauma, combat exposure, and mental health symptoms." [83851]

Automated Neuropsychological Assessment Metrics (Reeves et al)
"Includes a battery of standardized tests designed for clinical use" [27357]

Automatic Thoughts Questionnaire (Hollon and Kendall)

Autonomic Changes Questionnaire
[attributed to Russian Center for Autonomic Pathology in 34496]

Autonomic Perception Questionnaire (Mandler et al)

Autonomy and Relatedness Inventory (Schaefer and Edgerton)

Autoquestionnaire de l'État de Stress Post-traumatique (Jehel et al)
"A French-language self-report version of Watson et al’s PTSD-Interview" [19003]

Autoquestionnaire de Stress Immédiat (Crocq)
"Il s’agit d’un autoquestionnaire analogique de 50 symptômes" [18022]
[used but not cited in 18022]
Aversion to Sexual Activity Scale (Katz et al)
"The SAS (consists of 30 items rated on a 4-point Likert-type scale. This scale was used to assess sexual anxiety and avoidance, based on the DSM-III-R criteria for sexual aversion disorder..." [16576]

Aversive Emotional Support Scale (Butler et al)

Avoidance Form (Schwartz et al)
"a 13-item scale designed to reflect the subject's hierarchy of fears"

Avoidance of Intrusive Memories: Rumination, Suppression/Distraction (Newby and Moulds)
"This 14-item measure was used to assess suppression/distraction (6 items) and rumination (8 items) in response to intrusive memories." [36466]

Avoidance Profile (Marks)
"a series of open-ended child-directed interview questions to identify undesired behaviors and establish goals for intervention" [28982]

Awareness During General Anaesthesia Questionnaire (Schwender et al)
"The questionnaire was subdivided into six sections: personal data, detailed description in own words, sensory perceptions, feelings and emotions, cognition and interpretations, reactions, consequences and after effects." [20168]

Awareness Questionnaire (Sherer et al)
"Subject and surrogate rate the patient's physical, mental, and social functioning" [38983]

AWS
USE: Attitudes Toward Women Scale (Spence et al)

AX Scale
USE: Anger Expression Scale (Spielberger)

Axis II Checklist (Westen et al)
"a randomly ordered checklist of all the criteria for the DSM-IV personality disorder diagnoses that was completed by each clinician in regards to their patient" [37560]

Ayers Coping Scale
"a validated 8-item measure that allows the creation of avoidant and problem-focused subscales, reflecting different styles of coping" [27946]

AZT Knowledge Questionnaire
[cited in 03091; no reference given]

B/G-Steem (Maines and Robinson)
"this test measures self-esteem and locus of control in children." [17973]

Back Pain Classification Scale (Leavitt)
UF: Low Back Pain Symptom Check List (Leavitt)

Background and Current Status Questionnaire (Johnson)
Background Data Questionnaire (Sigmon)
"45 open-ended and limited choice...items [of] demographic information [and] characteristics of the sexual abuse experience, as well as adjustment issues..." [13484]

Background Information Questionnaire (Gould et al)
"records basic sociodemographic data and details on previous operational deployments" [81118]

Background Information Schedule (Mukherjee)
"used to gather information about the participant, her abuse and treatment, the involvement of authorities, vocational training received at the shelter, and the presence of counseling and the participant’s perception if its impact" [84595]
Mukherjee, A. A study on impact of sexual abuse on mental health of children. Doctoral dissertation, Calcutta University (India), 2006. [cited in 84595]

Backlash Stress Scale (Schneider)

Backlash Trauma Scale (Kira et al)
an 18-item scale “selected and adapted” from Loo’s Race-Related Stressors Scale [82453]

Bad Things Scale (Johnson et al)
"relates to 22 different types of victimization that may have occurred in the respondent’s life" [20985]

Baksbat Inventory (Chhim)
USE: TPO Baksbat Inventory (Chhim)

Balanced Emotional Empathy Scale
[used but not cited in 92036]

Balanced Inventory of Desirable Responding (Paulhus)

Bali Survivors Questionnaire (Lesmana et al)
"given the absence of a widely accepted, cross-culturally valid and applicable, standardized self-report assessment of PTSD, a [34-item forced-choice] questionnaire was developed..." [33415; the Questionnaire is not named, so name was assigned by PILOTS Database staff]

Balloon Analogue Risk Task (Lejuez et al)

Balloons Test (Edgeworth et al)

Baltimore How I Feel Scale (Ialongo et al)
"a 30-item, youth self-report scale of anxious and depressive symptoms" [25657]

Bankrobbery Questionnaire (Camphuis and Emmelkamp)
"specifically developed for this study" [20302]

Bar-Ilan Picture Test for Children (Itskovitz and Strauss)
"This semi-projective instrument is an open-ended questionnaire relating to pictures representing images of children, parents, and teachers in the natural setting...designed to elicit children’s perceptions, attitudes, anxieties, and fears..." [23050]

Barnes Akathisia Scale (Barnes)
Barranquilla Rapid Survey Intelligence Test (Psychological Corporation)

Barratt Impulsivity Scale (Barratt)
UF: Impulsivity Scale (Barratt)

Barratt Simplified Measure of Social Status
"an updated adaptation of the Hollingshead index“ [30297]
Barratt, W. The Barratt Simplified Measure of Social Status (BSMSS) measuring SES. Unpublished manuscript, Indiana State University, 2006. [cited in 30297]

Barrier and Asset Checklist
"a 29-item checklist of potential barriers and assets to access evidence-based treatment“ [82097]

Barrier Box Task (Harrington et al)

Barriers Checklist (Hernandez et al)
"a list of potential barriers to treatment...: personal, site, and clinician-level barriers“ [82906]
Hernandez, A; Ruble, C; Rockmore, L; McKay, M; Messam, T; Harris, M; Hope, S. An integrated approach to treating non-offending parents affected by sexual abuse. Social Work in Mental Health 7: 533-555 (2009). [82906]

Barriers to Care Scale (Wittchen and Jacobi)

Barriers to Help Seeking Scale (Mansfield et al)

Barriers to Need Questionnaire (Davis et al)
"a 16-item self-report measure developed for this study to assess unmet health care and social services needs in low socioeconomic status (SES) and/or African American populations“ [81791]

Barriers to Responding to Sexual Aggression (Nurius et al)
"adapted from Smith and Lazarus...assessed appraisals about the outcome of the situation“ [80742]

Barron Ego Strength Scale
USE: Minnesota Multiphasic Personality Inventory ( Hathaway and McKinley)

Barsky Amplification Scale (Barsky et al)
UF: Amplification Scale (Barsky)

Barthel ADL Index (Mahoney and Barthel)

Baseline Interview Protocol (Center for Therapeutic Community Research)
"The CTCR Baseline Protocol is a structured interview that was adapted from the Addiction Severity Index and the Drug Abuse Treatment Assessment Resources to measure self-reported lifetime and current (past 12 months) substance use, perceived problems related to substance use, and substance abuse treatment history.“ [30093]

Basic Beliefs Inventory (Catlin and Epstein)

Basic Character Inventory (Lazare et al)
Basic Emotions Scale (Dalgleish and Power)

Basic Empathy Scale (Jolliffe and Farrington)
[used but not cited in 92747]

Basic English Skills Test (Texas Adult Education Agency)

Basic Motor Ability Test (Arnheim and Sinclair)

Basic Personality Inventory (Jackson)

Basic Personality Traits Inventory (Gençöz and Öncül)
a 45-item scale
Gencöz, T; Öncül, O. Examination of personality characteristics in a Turkish sample: development of the Basic Personality Traits Inventory. *Journal of General Psychiatry*, in press. [cited in 38916]

BASIC Ph (Lahad et al)

Basic Psychological Needs Scale (Gagné)
"used to assess Relatedness (8 items), Competence (6 items), and Autonomy (7 items)" [27746]

Basic Reading Inventory (Johns)

Basic Trust Inventory (Trzebinski and Zieba)
"The BTI, which measures the strength of basic trust, consists of 20 statements." [39995]

BASIS-32 (Eisen et al)
"an instrument originally developed and normed for use with psychiatric inpatient populations but now widely used as an outcome measure for mental health programs" [27621]

UF: Behaviour and Symptom Identification Scale (Eisen et al)

Bates Infant Temperament Questionnaire (Bates et al)

Battelle Developmental Inventory

Battered Partner Shelter Survey (Ascione and Weber)

Battered Woman Syndrome Questionnaire (Walker)
[used but not cited in 92508]

Battery of Interpersonal Capabilities (Paulhus and Martin)
"a measure of ‘functional flexibility’ or a person’s ability to adapt behavior to the demands of the interpersonal situation" [26030]

Battle Self-Esteem Inventory (Battle)

UF: Culture Free Self-Esteem Inventories

Battlefield Stressors Self-Report Questionnaire (Dekel et al)
"a specially designed self-report questionnaire of 15 items tapping the experience of the fighting" [26643]
Battlemind Training Satisfaction Survey (Castro et al)
"a survey with 10 items developed for this study measuring session utility, goals, and atmosphere” [86781]

Bayley Scales of Infant Development (Bayley)

BCSFR Screen (Boston Consortium of Services for Families in Recovery)
"The BCSFR Screen is designed specifically to be used by front-line substance abuse treatment staff to screen for possible PTSD and other mental health disorders." [33999]
UF: Boston Consortium of Services for Families in Recovery Screen

BCTTS Donation Experience Questionnaire
"a newly designed questionnaire [that] seeks to examine the details of the [organ] donation process specific to British Columbia" [84751]

Beavers-Timberlawn Family Evaluation Scale

Beck Anxiety Inventory (Beck et al)

Beck Depression Inventory (Beck et al)

Beck Hopelessness Scale (Beck et al)

USE: Hopelessness Scale (Beck et al)

Beck Youth Inventory of Emotional and Social Impairment
"BYI is a self-report scale with 5 sub-scales designed to identify current emotional states in children aged 7-14 years." [36713]

Befindlichkeits-Skala (Von Zerssen)

Before and Now Disaster Checklist (Milne)

Behavior and Symptom Identification Scale (McLean Hospital)
"This 24-item self-report scale uses a 5-point frequency or severity scale and assesses treatment outcome according to 5 symptom and functioning domains." [31051]

Behavior Assessment System for Children (Reynolds and Kamphaus)
UF: Child and Adolescent Self-Report of Personality

Behavior Check List (Cormier)
[used but not cited in 90836]

Behavior Checklist (Blount et al)
Behavior Checklist for Grief (Basoglu and Salcioglu)

“The BCG has 15 items measuring the severity of avoidance and ritualistic behaviors in the last week on an 0-3 scale.” [85375]

Behavior Problem Checklist (Quay and Peterson)

UF: RBPC

Revised Behavior Problem Checklist (Quay and Peterson)

Behavior Problem Index (Zill)

“Developed for the National Health Interview Survey...Items assess the extent to which the child is noncompliant and highly strung.” [23236]

Behavior Rating Inventory of Executive Function (Gioia et al)

“The BRIEF is a parent rating of children’s executive function...” [34213]

Behavior Rating Profile (Brown and Hammill)

“Ecological/behavioral assessment...with separate observation scales for teachers and parents, and self-report scales for the child’s attitudes and behaviors related to home, school, and peers” [21721]

Behavior Rating Scale (Niswander and Gordon)

Behavior Rating Scales (Burk)

“The BBRS are designed to identify patterns of pathological behavior shown by children in grades 1 to 9.” [84530]

Behavior Scale (Shen)

“The author developed [this 42-item scale] based on related instruments to assess college students’ behavior problems.” [32278]

Behavior Screening Questionnaire (Richman and Graham)

USE: Behavioural Screening Questionnaire (Richman and Graham)

Behavior... SEE ALSO: Behaviour...

Behavioral Acculturation Scale (Szapocznik et al)

Behavioral Activation for Depression Scale (Kanter et al)

“The BADS assesses the ability to engage in activities to achieve goals despite aversiveness.” [37720]

Behavioral Activation Scale (Carver and White)

Behavioral Activation Therapy for Depression Scale

“The BATS is modified from the Mental Health Collaborative Study Psychotherapy Rating Scale used in the NIMH Treatment of Depression Collaborative Research Program treatment outcome study.” [32416]

Behavioral and Emotional Rating Scale (Epstein and Sharma)

a 24-item questionnaire [81368]

Behavioral Approach Test

USE: Behavioral Avoidance Test

Behavioral Assessment of Speech Anxiety (Mulac and Sherman)

Behavioral Assessment of the Dysexecutive Syndrome (Wilson et al)
Wilson, B A; Alderman, N; Burgess, P; Emslie, H; Evans, J J. Behavioral Assessment of the Dysexecutive Syndrome (BADS). Bury St Edmunds, England: Thames Valley Test Company, 1996. [cited in 25499]

Behavioral Avoidance Test
The BAT "is an assessment strategy, not a specific instrument or exact set of procedures." For a description, see: McGlynn, F D, Behavioral Avoidance Test, in dbat 59-60. [cited in 02347]

UF: Behavioral Approach Test

Behavioral Change Questionnaire (McGarvey)
"a semistructured interview questionnaire" [21150] [used but not clearly cited in 21150]

Behavioral Coping Responses Scales (Norris et al)
[confusingly described and cited in 80742; name assigned by PILOTS Database staff]

Behavioral Dyscontrol Scale (Grigsby and Kaye)
"a measure of motor sequencing, motor-procedural learning, and the capacity to flexibly shift attention between information sets" [18008]

Behavioral Health Measure (CelestHealth Solutions)
"The BHM is a 20-item self-report questionnaire [measuring] the three domains of mental health treatment: well-being, psychological symptoms, and life functioning." [36307]

Behavioral Health Questionnaire (Kopta and Lowry)
"a 20-item self-report questionnaire that uses Likert rating scales to assess overall global mental health functioning" [36531]

Behavioral Health Screen (Diamond et al)
"The BHS is an Internet-based, comprehensive (although brief) screening tool for youths [that] screens in 13 domains by using 54 required items and 39 follow-up items." [38979]

Behavioral Health Screening Instrument
"This screen consists of standardized measures covering multiple domains, including demographics and military information, psychosocial history, current symptoms and behavior, and previous stressors." [81615]

Behavioral Indicator of Resilience to Distress (Lejuez et al)
a computerized behavioral task

Behavioral Inhibition Scale (Carver and White)
"designed to assess anxiety...contains seven items" [16140]

Behavioral Intent Scale (Slaby and Guerra)

Behavioral Intent Scale (Slaby and Guerra)

Behavioral Problems Index (Chase-Lansdale et al)

Behavioral Rating Attainment Test (Berea Children’s Home)
[cited in 10515 with date (1982) but without bibliographical reference]
**Behavioral Reward Scale**

"The BRS represents a uniform, system-wide aggregate rating of the participant's overall behavior on a daily basis within the program." [17028]

Soberman, G B; Greenwald, R; Rule, D L. A controlled study of eye movement desensitization and reprocessing (EMDR) for boys with conduct problems. *Journal of Aggression, Maltreatment and Trauma* 6(1): 217-236 (2002). [17028]

**Behavioral Risk Factor Surveillance Survey**

**Behavioral Role-Plays (Harbeck et al)**

Harbeck, C; Peterson, L; Starr, L. Whose fault is it?: victimized children's reaction to a sexual abuse prevention program. Manuscript in preparation, 1992. [cited in 05543]

**Behavioral Symptom Questionnaire (Wolff et al)**

"Questions focused on sleep and eating disturbances, deviant patterns of social interaction, affective disturbances, conduct disorders, and the like." [21591]

**Behavioral Symptoms Cross Reference List (Barol and Seubert)**

"a generic list of 32 possible indicators of PTSD in this population" [84335]

**Behavioral Systems Questionnaire (Furman and Wehner)**

**Behavioral Systems Questionnaire (Wehner and Furman)**

"used to assess participants' relational styles" [15552]

**Behaviour and Symptom Identification Scale (Eisen et al)**

USE: BASIS-32 (Eisen et al)

**Behaviour Changes Check-List (Sabhesan et al)**

**Behaviour Indicator Scale (Mirza et al)**

"a symptom check-list derived from conduct disorder diagnostic criteria in DSM-III-R" measuring "reported symptoms of depression, obsessive-compulsive disorder, anxiety, and conduct disorder" [20160]

**Behaviour Questionnaire (Jenkins et al)**

**Behavioural Inattention Test (Wilson et al)**

**Behavioural Screening Questionnaire (Richman and Graham)**

**Belief in an Unjust World Scale (Dalbert et al)**

**Belief in Personal Control - Revised Scale (Berrenberg)**

[cited as "Berrenberg, 1987" in 90618]

**Belief in the Just World Questionnaire (Rubin and Peplau)**

**Belief Inventory (Jehu)**

Belief Scale (Traumatic Stress Institute)
USE: Traumatic Stress Institute Belief Scale (Stamm et al)

Beliefs About Anger Measure (Day et al)
"The BAM was designed specifically to assess...beliefs about anger...It contains 14 items, 7 of which were thought to be applicable to violent offenders in general; the other 7 were more culturally specific." [81633]

Beliefs About Battered Women Questionnaire (Schuller et al)

Beliefs About Child Sexual Abuse Scale (Jehu et al)
a 17-item scale [80592]

Beliefs about Critical Components Scale (Kolko et al)
10 items, developed for this study

Beliefs About Medicine Scale (Bystritsky et al)
a 6-item scale [28326]
Wagner, A W; Bystritsky, A; Russo, J E; Craske, M G; Sherbourne, C D; Stein, M B; Roy-Byrne, P P. Beliefs about psychotropic medication and psychotherapy among primary care patients with anxiety disorders. Depression and Anxiety 21: 99-105 (2005). [28326]

Beliefs about Memory Questionnaire (Bennett and Wells)
"The BAMQ was designed...to measure both positive beliefs about the need for a complete memory of the trauma and negative beliefs about the consequences of not having a complete memory." [33902]

Beliefs about Paranoia Scale (Morrison et al)
"This is a 37-item questionnaire that examines individuals' beliefs about paranoia." [29722]

Beliefs About Psychotherapy Scale (Bystritsky et al)
an 8-item scale [28326]
Wagner, A W; Bystritsky, A; Russo, J E; Craske, M G; Sherbourne, C D; Stein, M B; Roy-Byrne, P P. Beliefs about psychotropic medication and psychotherapy among primary care patients with anxiety disorders. Depression and Anxiety 21: 99-105 (2005). [28326]

Beliefs About Psychotropic Medications and Psychotherapy (Bystritsky et al)

Beliefs About Substance Abuse Scale (Wright)
Wright, F. Beliefs About Substance Abuse Scale. Unpublished scale. [cited in 09357]

Beliefs About Voices Questionnaire (Chadwick et al)
"The BAVQ-R is a 35-item measure of people's beliefs about auditory hallucinations and their emotional and behavioural reactions to them." [31918]

Beliefs and Attitudes about Sleep Scale (Morin and Savard)
"The BASS is a 30-item self-report measure of sleep-related cognition." [18955]

Beliefs and Feelings Scale (Dohrenwend et al)
USE: Psychiatric Epidemiology Research Interview (Dohrenwend)

Bell Object Relations Reality Testing Inventory (Bell et al)
Bellevue Dissociative Disorders Interview for Children (Trujillo et al)

Bellevue Index of Depression

Bem Androgyny Scale
USE: Bem Sex-Role Inventory (Bem)

Bermond-Vorst Alexithymia Questionnaire
""The BVAQ consists of 5 subscales of 8 items each (4 indicative items and 4 contraindicative items)." [24138]

Bern Embitterment Questionnaire
USE: Berner Verbitterungsfragebogen (Znoj)

Berne Questionnaire of Well-Being

Berne-Basle Childbirth Inventory
[cited only as an “unpublished 32-item questionnaire” in 30310]

Berner Verbitterungsfragebogen (Znoj)
""It is a 20-item self-rating scale. 17 items are statements that are thought to be characteristic of embitterment. The remaining 3 items are statements that are thought to be characteristic of non-embitterment.” [30299]
UF: Bern Embitterment Questionnaire

Berneuter Personality Inventory
USE: Personal Inventory (Berneuter)
Beschwerdenliste (Von Zerssen)

Beth Israel Psychosomatic Questionnaire (Sifneos et al)

Bethesda Scale of Fracture Severity (Ponsford et al)
"This 4-point scale, developed by the present authors, was used to rate the severity of the worst fracture..." [32423]

Betrayal Detection Measure (Gobin and Freyd)
"we developed the Betrayal Detection Measure for the current study as an exploratory measure of participants' adult history of common betrayals that are not necessarily categorized as traumatic" [83310]

Betrayal Trauma Inventory (Freyd)
"The BTI assesses physical, emotional, and sexual abuse in childhood and some adulthood traumas....[It] was developed by building upon existing measures, particularly the Abuse Perpetration Inventory..." [16367]
Freyd, J J; DePrince, A P; Zurbriggen, E L. Self-reported memory for abuse depends upon victim-perpetrator relationship. *Journal of Trauma and Dissociation* 2(3): 5-16 (2001). [16367]

Beurteilsbogen zu Bereichen psychischer Belastung bei Tätigkeiten im Strassenbetriebsdienst (Portuné)
an "assessment questionnaire for areas of mental stress associated with highway maintenance tasks" [85292]

Bi-Directional Changes in Being Scale (Hiskey et al)

Bias Crime Type Screening Instrument (Rose and Mechanic)
"A screening instrument composed of 56 violent behaviors...46 [of which] were taken from the Violence Against Men/Women Scales developed by Marshall." [26256]

Biber Figure Learning Test
"designed to be a visual analog of the California Verbal Learning Test" [34170]
Glosser, G; Cole, L; Khatri, U; DellaPietra, L; Kaplan, E. Assessing nonverbal memory with the Biber Figure Learning Test - Extended in temporal lobe epilepsy patients. *Archives of Clinical Neuropsychology* 17: 25-35 (2002). [cited in 34170]

BI-CRO-39 Scales
USE: Brain Injury Community Rehabilitation Outcome-39 Scales (Powell et al)

Bicultural Stressors Scale (Romero and Roberts)

Bidimensional Acculturation Scale for Hispanics (Marín and Gamba)

Big Five Inventory (John and Srivastava)
"a 44-item measure of the Big Five personality traits" [25995]

Big Five Questionnaire (Caprara et al)
"a 132-item questionnaire measuring five domains (Extraversion, Agreeableness, Conscientiousness, Emotional Stability, and Openness to Experience)" [38757]

Bilingual PTSD Scale (Farrag)
"This measure is a symptom checklist based on the DSM-IV criteria..." [32808]

Biloxi Women’s Assessment Battery (Jones et al)
"used to assess multiple dimensions of well-being...comprised of 95 questions including...adapted version[s] of the Center for Epidemiologic Studies - Depression Scale [and] State-Trait Anxiety Inventory" [25699]
Jones, K R; Smith, S B; Root, L; Sison, G F. *Biloxi Women’s Assessment Battery*. Unpublished manuscript, 1994. [cited in 25699]
Binge Eating Disorder Measure (Spitzer et al)  
[used but not cited in 90477]

Binge Eating Scale (Gormally et al)  

Binghamton Childhood Abuse Screen  
"a new 36-item abuse measure" based on the Sexual Abuse Questionnaire (Lock et al) [80598]  
Castelda, B A; Levis, D J; Rourke, P A; Coleman, S L. Extension of the Sexual Abuse Questionnaire to other abuse categories: the initial psychometric validation of the Binghamton Childhood Abuse Screen. *Journal of Child Sexual Abuse* 16(1): 107-125 (2007). [80598; the BCAS appears on pp. 124-125]

Binois–Pichot Vocabulary Test  
[used but not cited in 35332]

Bio-Event Fear and Resilience Checklist (Bracha and Burkle)  
"a rapid assessment tool [for] triage management" [29071]  

Biografischer Fragebogen (Maercker)  
Maercker, A. Biografischer Fragebogen. Dresden, Germany: University of Technology, Department of Psychology, 1994. [cited in 14310]

Biographic Inventory for Diagnosis of Behavioral Disturbances (Jaeger et al)  
"a self-rating questionnaire with 97 items related to environment, history, and personality"  
Jaeger, R; Lischer, S; Muenster, B; Ritz, B. Biographisches Inventar zur Diagnose von Verhaltensstörungen (Handanweisung). Göttingen: Verlag für Psychologie (Hogrefe), 1976. [cited in 04995]  
UF: Biographisches Inventar zur Diagnose von Verhaltensstörungen (Handanweisung)

Biographical Information Questionnaire (Lange et al)  
"The BIQ was designed for Interapy as a screening device, obtaining personal information regarding age, substance abuse, the use of psychoactive medicine, occurrence of trauma, and current treatment." [22449]  

Biographical Memory Test  
USE Autobiographical Memory Test (Williams and Broadbent)

Biographisches Inventar zur Diagnose von Verhaltensstörungen (Handanweisung)  
USE: Biographic Inventory for Diagnosis of Behavioral Disturbances (Jaeger et al)

Birleson Depression Inventory  
USE: Depression Self-Rating Scale (Birleson)

Birth Experiences Scale (Ayers)  
"a modified version of [Slade et al's] Expectation and Experience of Birth Scale" [25775]  

BITE  
USE: Bulimic Investigatory Test Edinburgh (Henderson and Freeman)

BKSE (Janke et al)  
USE: Eigenschaftswörterliste (Janke and Debus)

Blame Attribution Inventory (Gudjonsson and Singh)  
"a scale developed to assess remorse in offenders" [29384]  

Blame Attribution Scale (Meyer and Taylor)  
UF: Attributions of Causality for Rape Scale (Meyer and Taylor)

Blameworthiness Questionnaire (Wilson et al)  
"The researchers developed a 5-item questionnaire to assess concepts related to prosecutors' perceived blameworthiness of the defendant."  
**Blast Exposure Screening Questionnaire (Schwab et al)**

**UF:** Defense and Veterans Brain Injury Center Blast Exposure Screening Questionnaire

**DVBIC Blast Exposure Screening Questionnaire**

**Blatt Menopausal Index**
"The BMI consists of 11 items asking respondents to rate the presence and severity of menopausal symptoms" [18699]

**Blatt Menopausal Index**
Blatt, M; Weisbader, H; Kupperman, H. Vitamin E and the climacteric syndrome. *AMA Archives of Medicine* 91: 792-799 (1953).

**Blessed Orientation-Memory-Concentration Test**

**BLIS Documentation of Bullying Intervention (Losey and Graham)**

**BLIS Suicide Assessment (Losey and Graham)**

**BLIS Threat Assessment (Losey and Graham)**

**Blishen Index**
an “indicator of socioeconomic status…based on the participant’s occupation” [28521]

**Bliss Dissociation Scale (Wogan)**

**Block Design Test**
[used but not cited in 26097]

**Block Span**
[used but not cited in 09641]

**Blumenthal Perceived Social Support Scale (Blumenthal et al)**

**BME Megasurvey (Larratt and Fowler)**
"The questionnaire consisted of 281 questions" [86659]

**Boat Inventory on Animal-Related Experiences (Boat)**
"a 17-item questionnaire designed to assess experiences with animals" [09430]

**Bodily Symptom Scale (Petterson et al)**

**Bodily Vigilance Scale (Schmidt et al)**
"a 4-item instrument…employed to assess panic-relevant attentional focus on interoceptive activity” [27783]

**Body Attitude Test (Probst et al)**

**Body Attitudes Questionnaire (Ben-Tovim and Walker)**
"The scale comprised 7 items that assessed respondents’ attitudes toward their physical attractiveness as well as how they perceive boys/guys to assess their physical attractiveness." [28149]

Body Cathexis Scale (Secord and Jourard)

Body Distortion Questionnaire (Fisher)

Body Dysmorphic Disorder Examination (Rosen and Reiter)
"used to assess body image complaints" either as clinical interview or 28-item self-report [30224]

Body Dysmorphic Disorder Questionnaire (Phillips et al)
"a brief...self-report measure that assesses the presence of current DSM-IV BDD" [35873]

Body Dysmorphic Symptoms Inventory (Buhlmann et al)
USE: Fragebogen körperdysmorpher Symptome (Buhlmann et al)

Body Esteem Scale (Franzoi and Shields)

Body Focus Questionnaire (Fisher)

Body Handling Questionnaire (Alexander and Wells)
USE: Flotta/Mortuary Questionnaire (Alexander)

Body Image Automatic Thoughts Questionnaire (Cash et al)
"a 52-item questionnaire developed to measure body image cognitions" [18031]

Body Image Avoidance Questionnaire (Rosen et al)
"a self-report measure of behavior consisting of 19 items that deal with the avoidance of various situations which are likely to provoke anxiety about physical appearance" [21580]

Body Image Detection Device (Ruff and Barrios)

Body Rating Scales for Adolescents (Sherman et al)

Body Satisfaction Scale (Berscheid et al)

Body Satisfaction Scale (Slade et al)
"based on the Body Cathexis Scale...designed to measure satisfaction/dissatisfaction with 16 body parts" [18031]

Body Sensations Questionnaire (Chambless et al)

Body Shape Questionnaire (Cooper et al)

Body Symptom Questionnaire (Reihman et al)

Body-Self Relations Questionnaire (Cash et al)
Bodymap (Rothschild)

Bogardus Social Distance Scale (Bogardus)

Bond Neurophysical Scale

Bonyad-e Janbazan Morbidity Index
"a formal index developed by the Bonyad-e Janbazan Foundation, a national organisation responsible for the social, physical and mental health and welfare of war-induced disabled veterans, civilians and their immediate families" [38674]
[used but cited only as a Web document in 38674]

Borderline Evaluation of Severity over Time (Blum et al)
"in which symptoms of BPD are grouped into 3 scales: thoughts and feelings, negative behaviors, and positive behaviors" [30034]

Borderline Personality Disorder Scale (Perry et al)

Borderline Personality Disorder Severity Index (Arntz et al)
Arntz, A; Van den Hoorn, M; Cornelis, J; Verheul, R; Van den Bosch, W; De Bie, A J H T. Reliability and validity of the Borderline Personality Disorder Severity Index. *Journal of Personality Disorders,* in press. [cited in 25447]

Borderline Personality Disorder Symptom Scale (Schmahl et al)
"a 10-item instrument for the assessment of borderline state symptoms" [26593]
[cited only as "Schmahl et al., in preparation" in 26593]

Borderline Personality Features Scale
[used but not cited in 36000]

Borderline Personality Inventory (Leichsenring)
USE: Borderline-Persönlichkeits-Inventar (Leichsenring)

Borderline Personality Organization
USE: Self-Report Instrument for Borderline Personality Organization (Oldham et al)

Borderline Personality Scale (Claridge and Broks)
USE: STQ Psychotic Traits Questionnaire (Claridge and Broks)

Borderline Personality Scale (Perry)
"A 52-item precursor of the Borderline Personality Disorder Scale" [01504]

Borderline Symptom List (Bohus et al)

Borderline Syndrome Index (Conte et al)

Borderline-Persönlichkeits-Inventar (Leichsenring)
"The BPI is a short true-false questionnaire containing 53 items [that] contains scales for assessing identity diffusion, primitive defense mechanisms, reality testing, and fear of closeness." [30138]
UF: Borderline Personality Inventory (Leichsenring)

Bormuth Grade Level
"uses word length in characters and sentence length in words to determine a grade-school level, blased on North American grades levels" [16616]
[used but not cited in 16616]

Bosnian Refugees in Chicago Questionnaire
[used but not cited in 92906]
Bosnian Trauma Questionnaire (Pavlovic)
a 21-item “local instrument” [32665]
Pavlovic, S. *Upitnik traume*. Tuzla, Bosnia and Herzegovina: University of Tuzla, Faculty of Medicine, 1998. [cited in 32665]

Boston Consortium of Services for Families in Recovery Screen
USE: BCSFR Screen (Boston Consortium of Services for Families in Recovery)

Boston Diagnostic Aphasia Examination

Boston Life Satisfaction Inventory (Smith et al)
Smith, A A; Niles, B L; King, L; King, D. Psychometric properties of the Boston Life Satisfaction Inventory among veterans with PTSD. Poster presented at the annual conference of the International Society for Traumatic Stress Studies, New Orleans, December 2001. [cited in 26080]

Boston Naming Test (Kaplan et al)

Boundary Questionnaire (Hartmann)
"a 145-item report that measures ‘thick’ and ‘thin’ boundaries, which refers to ego boundaries, interpersonal boundaries, group boundaries, and boundaries between sleep and wakefulness” [18029]

Bourdon Wiersma Selective Attention Task (Hänninen and Lindström)

Bowel Disease Questionnaire (Talley et al)

Bowel Symptom Questionnaire (Talley et al)
"a modified version of the Bowel Disease Questionnaire [that] incorporates questions that identify symptoms of dyspepsia” [21542]

Boyfriend Scale (Noll et al)
"this scale was developed...to assess the existence and nature of current romantic or boyfriend attachments” [15551]

Boyhood Gender Conformity Scale (Hockenberry and Billingham)

BPRS
USE: Brief Psychiatric Rating Scale (Overall and Gorham)

Bradburn Affects Balance Scale (Bradburn)
Bradburn, N. *The Structure of Psychological Well-Being*. Chicago: Aldine, 1969. [mpspa 84; cited in 00644 et al]

Bradford Somatic Inventory (Mumford et al)
"a 44-item inventory for psychosomatically expressed psychological distress” [07674]

Brain Injury Community Rehabilitation Outcome-39 Scales (Powell et al)
"measure the impact of brain injury on domestic, social, and psychological functioning in patients living in the community” [24647]

UF: BICRO-39 Scales
BrainCheckers Combat Stress Assessment (Reeves et al)
"a neuropsychological test system designed for use in operational and clinical military medical settings" [31416]
Reeves, D L; Elsmore, T; Wiederhold, M D; Wood, D P; Murphy, J A; Center, C; Spira, J L; Wiederhold, B K. Handheld computerized neuropsychological assessment in a virtual reality treatment protocol for combat PTSD. *Annual Review of CyberTherapy and Telemedicine* 5: 151-156 (2007). [31416]

Braver Aggressiveness Dimension Scale (Braver et al)

Breast Impact of Treatment Scale (Yurek et al)
"Patterned after the Impact of Events Scale, the 15-item BITS was developed to examine intrusive thoughts and avoidant reactions associated with breast changes" [22798]

Breath-Holding Task (Hajek et al)
"an index of physical distress [that] requires participants to hold their breath as long as they can" [84161]

Brecksville Semi-Structured Diagnostic Interview (Center for Stress Recovery)
Center for Stress Recovery. *Brecksville Semi-Structured Diagnostic Interview*. Brecksville, Ohio: Center for Stress Recovery, Veterans Administration Medical Center, 1986. [cited in 11030]

Bremen Event Checklist (Essau)
"used to assess occurrence of 55 events to self or significant others" [25706]
Essau, C A. *Angst und Depression bei Jugendlichen*. Habilitationschrift, University of Bremen (Germany), 2000. [cited in 25706]

BRFSS Interview
"a telephone survey of randomly selected non-institutionalized adults co-ordinated by the Centers for Disease Control and Prevention" [80945]

Brice Interview
Kotsovolis, G; Komninos, G. Awareness during anesthesia: how sure can we be that the patient is sleeping indeed? *Hippokratia* 13(2): 83-89 (2000). [35631; the Interview appears on p. 87]

Bridge Drawing (Hays and Lyons)
"The Bridge Drawing is a structured tool from the field of art therapy that has been found to be effective in diagnosis and therapy of adolescents." [18202]

Brief Adaptive Coping Scale (Sinclair and Wallston)
"items in this scale describe an active problem-solving and reappraisal coping pattern that reflects adaptive coping discussed in the literature." [81993]

Brief Adolescent Risk-Taking Scale (Martin et al)
Martin, G; Hazell, P; Sandercock, K; Giannakoureas, A. The Brief Adolescent Risk-Taking Scale: preliminary validation studies. Unpublished manuscript. [cited in 08605]

Brief Anger and Aggression Questionnaire (Maiuro et al)
"derived from the Buss-Durkee Hostility Inventory" [13749]

Brief Approach/Avoidance Coping Questionnaire (Finset et al)
"The BACQ is a 12-item questionnaire developed to measure general coping strategies of approach/avoidance." [34196]

Brief Betrayal Trauma Survey (Goldberg and Freyd)
"The BBTS is a 12-item self-report measure that assesses self-reported trauma history using behaviorally defined items [including] exposure to non-interpersonal trauma, witnessing violence, and direct interpersonal trauma." [18996]

Brief Big Five Personality Measure (Goldberg)

Brief Grief Questionnaire (Shear et al)

"a 5-item, self-administered questionnaire" [35265]

Brief Hopkins Psychiatric Rating Scale (Derogatis)

Brief Illness Perception Questionnaire (Broadbent et al)

Brief Index of Self-Actualization (Sumerlin and Bundrick)

a 40-item scale based on Maslow’s notion of self-actualization

Brief Index of Sexual Functioning (Leiblum and Rosen)

Brief Index of Sexual Functioning for Women (Taylor et al)

Brief Infant-Toddler Social and Emotional Assessment (Briggs-Gowan et al)

Brief Interview for Posttraumatic Disorders (Briere and Scott)

"It reviews all those symptoms associated with PTSD, acute stress disorder, and brief psychotic disorder with marked stressors.” [82996]

Brief Lifespan Trauma Checklist (Bolton et al)

"a five-measure item rationally derived to cover the high base rate of exposure to potentially traumatic events” [15875]
Bolton, E E; Litz, B T; Britt, T W; Adler, A; Roemer, L. Reports of prior exposure to potentially traumatic events and PTSD in troops poised for deployment. Journal of Traumatic Stress 14: 249-256 (2001). [15875; the Checklist appears on 254-255]

Brief Measure of Worry Severity (Gladstone et al)

Brief Mental Health Screen for Intimate Partner Violence Victims (Houry et al)

"to screen IPV victims for depressive symptoms, PTSD symptoms, and suicidal ideation” [32215]

Brief Michigan Alcoholism Screening Test (Pokorny et al)

Brief Mood Rating Scale (Diener and Emmons)

"consists of 4 adjectives describing positive affect and 5 adjectives describing negative affect” [27309]

Brief Multidimensional Measure of Religiousness and Spirituality (Idler et al)

"a 40-item, 14-scale inventory querying various aspects of religion and spirituality” [38359]

Brief Objective Neurobehavioral Detector

"The 16-item BOND is comprised of neurological examination tasks...” [35420]
Chapman, J C; Andersen, AM; Roselli, L A; Meyers, N M; Pincus, J H. Screening for mild traumatic brain injury in the presence of psychiatric comorbidities. Archives of Physical Medicine and Rehabilitation 91: 1082-1086 (2010). [35420]

Brief Pain Inventory (Cleeland)

"a short self-report tool designed to assess pain intensity (least, average, worse), the use of and amount of relief derived from prescribed pain medications, and pain-related interference with daily activities” [24682]
**Brief Pain Questionnaire (Stulemeijer et al)**

**Brief Panic Screen (Teng et al)**

"A brief clinician screening instrument developed for this study" [31227]

**Brief Physical and Sexual Abuse Questionnaire (Marshall et al)**

"This semistructured clinical interview developed by the authors, required approximately 15 minutes and provided a relatively brief method of recording retrospective childhood traumatic history." [09445]

**Brief Posttraumatic Stress Screening Scale (Kubany)**

"The BPSSS is a 5-item measure designed to screen for posttraumatic stress symptomatology” derived from the Distressing Event Questionnaire. [35108]

**Brief Psychiatric Rating Scale (Overall and Gorham)**

UF: BPRS

**Brief Psychiatric Rating Scale for Children (Overall and Pefferbaum)**

**Brief Psychotic Relative Scale**

[used but not cited in 35927]

**Brief PTSD DSM-IV Questionnaire (Fullerton et al)**

USE: DSMPTSD-IV Self-Report Measure (Fullerton et al)

**Brief PTSD Symptom Scale (O’Hare et al)**

"A 3-item PTSD scale derived from the PTSD Symptom Scale” of Foa et al [39785]

O’Hare, T; Shen, C; Sherrer, M. Validation of a brief PTSD scale for clients with severe mental illnesses. *Research on Social Work Practice* 22: 420-427 (2012). [cited in 39785; the Brief PSS-1 appears on p. 426]

**Brief Rating of Aggression by Children and Adolescents (Barzman et al)**

"An actuarial method of assessing the risk of aggressive behavior by hospitalized children and adolescents” [38497]

**Brief Reasons for Living Inventory (Ivanoff et al)**

"Adapted from the Reasons for Living Inventory (Linehan et al)” [02019]

**Brief Religious Coping Scale (Pargament et al)**

"This 14-item measure has a Positive Religious Coping Factor and a Negative Religious Coping Factor.” [18399]

**Brief Resilience Scale (Smith et al)**

**Brief Scale for Anxiety (Tyrer)**

**Brief Scale of Abusive Experiences (Martínez-Taboas and Bernal)**

"The BSAE is a 21-item self-report instrument created to assess a variety of abusive experiences throughout the life cycle of the participants." [82424]

**Brief Scale of Abusive Experiences (Martínez-Taboas)**

"The BSAE is a 21-item self-report instrument created to assess a variety of abusive experiences throughout the life cycle of the participants.” [18028]

Brief Scales for Anxiety and Depression (Goldberg et al)

Brief Screen for Adolescent Depression
[used but not cited in 92774]

Brief Screen for Anxiety Disorders
[used but not cited in 90315]

Brief Screen for Panic Disorder (Apfeldorf et al)
"based on participant responses to 4 items from the Anxiety Sensitivity Index" [26688]

Brief Screen for Posttraumatic Symptoms (Carlson)
"new name for the Posttraumatic Stress Scale [which] rates how often a client experiences the DSM-IV symptoms of PTSD" [20950]
Carlson, E. [Personal communication and unpublished data, cited in 20950]

Brief Screening Instrument for Detecting Depressive Disorders (Burnam et al)
Burnam, M A; Wells, K B; Leake, B; Landsverk, J. Development of a Brief Screening Instrument for Detecting Depressive Disorders. *Medical Care* 26: 775-789 (1988). [citied in 85899]

Brief Screening Instrument for PTSD (Liu et al)
"A 7-symptom instrument for PTSD screening...for young victims of natural disasters" [30874]
Liu, A; Tan, H; Zhou, J; Li, S; Yang, T; Sun, Z; Wen, S W. Brief screening instrument of posttraumatic stress disorder for children and adolescents 7-15 years of age. *Child Psychiatry and Human Development* 38: 195-202 (2007) [30874; instrument not definitively named; name assigned by PILOTS Database staff]
UF: Seven-Symptom Screening Instrument for PTSD (Liu et al)

Brief Self-Control Scale (Tangney et al)
"The BSCS is a self-report scale assessing individual differences in the area of trait self-control." [84002]

Brief Sexual Function Questionnaire for Men (Reynolds et al)

Brief Sexual Functioning Questionnaire (Wenninger and Heiman)
"A 9-item questionnaire was developed to assess level of sexual functioning...Part of the items were based on the Brief Index of Sexual Functioning for Women (Taylor et al) and the Brief Sexual Functioning Questionnaire for Men (Reynolds et al)." [14124]

Brief Smell Identification Test (Sensonics)
"a 12-item 'scratch-and-sniff' testing instrument" [34274]
[used but not usefully cited in 34274]

Brief Social Phobia Scale (Davidson et al)
"The BSPS is an 18-item scale that measures fear, avoidance, and physiological arousal symptoms of social phobia." [25583]

Brief Social Support Questionnaire (Sarason et al)

Brief Student Alienation Assessment
[used but not cited in 91868]

Brief Suicide Severity Rating Scale (Posner et al)
"This scale consists of two items: a rating of suicidal ideation...and a rating of suicidal behavior...using the Columbia Classification Algorithm of Suicide Assessment." [32137]

Brief Symptom Inventory (Derogatis and Spencer)
Brief Symptom Rating Scale (Lee et al)
"The BSRS is a self-report measure with 30 items rated from 0 to 4 on the basis of the degree of distress caused over the past week." [26279]

Brief Test of Adult Cognition by Telephone (Lachman and Tun)

Brief Test of Attention (Schretlen et al)

Brief Trauma Interview (Schnurr et al)
"A clinician-administered interview that we developed to be a sensitive and efficient method for determining whether an individual has experienced a traumatic event that meets the DSM-IV criteria specified for the diagnosis of PTSD...It is based on the Trauma Assessment for Adults (Resnick et al)." [24928]

Brief Trauma Questionnaire (Schnurr et al)
"a...self-report instrument designed to assess the number and types of traumatic events to which an individual has been exposed in life" [07340]
Schnurr, P P; Vielhauer, M J; Weathers, F; Findler, M. Brief Trauma Questionnaire. Unpublished instrument, National Center for PTSD (White River Junction, Vermont), 1999. [cited in 07340]

Brief Traumatic Brain Injury Screen (Schwab et al)
"In our efforts to identify mild TBI in troops returning to the United States, the Defense and Veterans Brain Injury Center has developed a two-question TBI screening tool." [3010]

Brief Traumatic Experiences Survey (Becker)
"The BBTS-P is a modified version of the adult self-report Brief Betrayal Trauma Survey that asks parents to report on a range of experiences that their children might have experienced..." [18145]

Brief Visuospatial Memory Test (Benedict)

Brief War Zone Scale
[used but not cited in 24158]

Brief War Zone Stress Exposure Scale for Women (Woods et al)

Brigance Essential Skills Test
[used but not cited in 22437]

Bristol Social and Adjustment Scale (Stott)

British Isles Lupus Assessment Group Disease Activity Index
"BILAG includes a total of 86 items and measures SLE-related disease activity in 8 organ-based components." [33122]

British Picture Vocabulary Scale (Dunn et al)

Brixton Test of Spatial Anticipation

Brown and Harris Contextual Rating System
USE: Contextual Rating System (Brown and Harris)
Brown Assessment of Beliefs Scale
"a 7-item, semistructured scale that assesses insight/delusionality in various disorders" [30122]

Brown Attention-Deficit Disorder Scales

Brown Self-Report Inventory
USE: Self-Report Inventory (Brown and Veldman)

Brown-Goodwin Assessment for Lifetime History of Aggression
USE: Assessment for Lifetime History of Aggression (Brown and Goodwin)

Bryce Life Events Inventory (Bryce and Walker)

Buddhist Beliefs and Practices Scale
[used but not cited in 91520]

Bulimia andRelated Eating Disorders Screen (Root and Fallon)

Bulimia Test (Smith and Thelan)
UF: BULIT

Bulimic Investigatory Test Edinburgh (Henderson and Freeman)
UF: BITE
BULIT
USE: Bulimia Test (Smith and Thelan)

Bull Disability Scale

Bully Scale ( Rigby and Slee)
"This six-item self-report scale is a measure of the tendency of students to engage in bullying others at school." [09832]

Bully-Victimization Scale (Reynold)
[used but not cited in 92025]

Bully/Victim Questionnaire (Olweus)

Bullying and Friendship Interview Schedule (Wolke et al)

Bullying at Work Questionnaire (Moreno-Jiménez et al)
Moreno-Jiménez, B; Rodríguez-Muñoz, a; Garrosa, E; Morante, M E. Antecedentes organizacionales del acoso psicológico en el trabajo: un estudio exploratorio. Psicothema 17: 648-653 (2005). [cited in 35181]

Bullying Behavior Scale ( Austin and Joseph)

Bullying Lethality Screening Tool ( Losey)

Burden Assessment Scale (Reinhard et al)
"This is a 19-item measure that evaluates burden in an objective way, that is the amendment of caring for someone with limitations imposed on the level of activities and resources of the caregiver." [39994]
Burden Interview (Zarit et al)
"a 22-item self-report inventory that examines burden associated with both functional/behavioral impairments and the home care situation" [08045]

Burn Concerns Questionnaire (Tedstone)
"a list of 15 main concerns of burn injured patients" [20602]

Burn Psycho-Somatic Morbidity Scale (Taal and Faber)
"a 24-item questionnaire" [20357]

Burn Specific Pain Anxiety Scale (Taal and Faber)
"a nine-item self-rating scale for the assessment of state-anxiety in burn patients" [09685]

Burn-Specific Health Scale (Munster et al)

Burnout Instrument (Malamed et al)
"contains 22 items which measure different facets of the burnout syndrome" [09737]

Burns Anxiety Inventory
[used but not cited in 80868]

Burns PTSD Scale
"The Burns PTSD Scale consists of 10 statements and asked patients to rate how much they have experienced the symptoms included in each statement during the past week on a 0 to 4 scale." [81782]
Burns, D D. *Therapist’s Toolkit: Comprehensive Assessment and Treatment Tools for the Mental Health Professional*. Stanford, California: Stanford University School of Medicine, Department of Psychiatry and Behavioral Sciences, 2002. [cited in 81782]

Bush-Francis Catatonia Rating Scale

Buss-Durkee Hostility Inventory
USE: Hostility-Guilt Inventory (Buss and Durkee)

Butcher Treatment Planning Inventory
[used but not cited in 91152]

Bystander Cartoons Test (Chandler)
"The CBCT was used to measure the extent to which children and adolescents were able to set aside privileged or personal knowledge and emotions and adopt the perspective of another person." [29064]

Bystander Stress Scale (Schneider)

Byumba Social Functioning Questionnaire
a list of "10 activities for men and 10 for women" [84576]

Child Behavior Checklist PTSD Subscale (Loeb et al)
"The proposed subscale, indicative of PTSD symptoms from the current preschool (ages 1.5-5 years) questionnaire, is comprised of 15 items." [85509]

Child Behavior Inventory (Boothby and Halprin)
"established to assess aggression, traumatic symptoms, and high-risk to pro-social behavior" [19652]

Child Behavior Inventory (Egeland and Deinard)
Egeland, B; Deinard, A. *Child Data*. Driven Processing Questionnaire (McKinnon et al)
Child Depression Inventory (Kovacs and Beck)
“A 27-item child self-report measure developed by Kovacs and Beck as a downward revision of the Beck Depression Inventory…” [01989]

Child Depression Rating Scale (Poznanski et al)
USE: Children’s Depression Rating Scale (Poznanski et al)

Child Diagnostic Interview for Borderlines (Greenman et al)
USE: Diagnostic Interview for Borderline Patients (Gunderson et al)

Child Dissociation Checklist (Putnam)
USE: Child Dissociative Checklist (Putnam)

Child Dissociative Checklist (Putnam)
UF: Child Dissociation Checklist (Putnam)

Child Drawing: Hospital (Clatworthy et al)
“a projective measure…developed…to measure child anxiety related to a hospital experience in children aged 5 to 11 years” [34853]

Child Empathy Test (Hanson and Scott)
“The CE Test was designed to assess sexual offenders’ capacity to distinguish between abusive and nonabusive interactions between adults and children.” [17117]

Child Experience Questionnaire (Ney)

Child Experiences with Adult Reactions to the WTC Disaster (DeVoe et al)

Child Exposure to Violence Checklist (Amaya-Jackson)
“a 33-item checklist adapted from the measure Things I’ve Heard and Seen” [22301]

Child Feedback Questionnaire (De Luca et al)
De Luca, R V; Boyes, D A; Grayston, A D; Romano, E. Sexual abuse: effects of group therapy on preadolescent girls. Manuscript submitted for publication, 1994. [cited in 08431]

Child Fernald Mental Experience Questionnaire
"modeled after Handford and coworkers’ [Three Mile Island Mental Experience Questionnaire]" [09752]

Child Game Participation Questionnaire (Bates and Bentler)
a “64-item parent-report measure”

Child Health and Illness Profile, Adolescent Edition (Starfield et al)
“The CHIP-AE is a nationally used instrument to measure adolescent physical and emotional health.” [31531]
Starfield, B; Riley, A W; Green, B F; Ensmering, M; Forrest, C B; Robertson, J; Ryan, S; Harris, S K. Manual for the Child Health and Illness Profile, Adolescent Edition (CHIP-AE). Baltimore: Johns Hopkins University, 2000. [cited in 31531]

Child Health Inventory (Rosen et al)

Child Health Questionnaire (Landgraf et al)
a "parent-report measure" [24828]
Child Health Questionnaire (Smith et al)
[developed for this study]

Child History Form (Sawyer et al)
The CHF is an unstructured interview that collects relevant abuse-related information that was developed for this treatment program." [80270]

Child History Questionnaire (Chattoor)
"The CHQ consists of 91 items and asks parents to describe their infants' medical and feeding histories." [23258]

Child Impact of Event Scale (Rennick)
"developed in this study as a modified version of an adult measure [the Impact of Event Scale] originally developed by Horowitz and colleagues" [91241]

Child Interview Schedule (Wodarski et al)
"The 71-item semistructured Child Interview Schedule, constructed by the authors for this study, incorporated 51 items (some in modified form) from the Child Assessment Schedule (Hodges, 1987)." Wodarski, J S; Kurtz, P D; Gaudin, J M; Howing, P T. Maltreatment and the school-age child: major academic, socioemotional, and adaptive outcomes. Social Work 35: 506-513 (1990). [02196]

Child Life Activity Form (Stehl et al)
"developed by our team to track contact and services provided to families by child life staff in the first month after diagnosis" [34024]

Child Life Events Screener (Carter and Briggs-Gowan)
"a parent-report questionnaire in which parents indicate whether and at what age their child experienced specific life events and whether they noticed a dramatic change in the child following the event(s)" [32439]

Child Life Events Survey (Johnson et al)
"This project-developed survey is based on [Sarason et al's Life Experiences Survey] and was designed to track events that occurred in the past year that may have had an impact on the child's psychological well-being." [16953]

Child Maltreatment History Self-Report (MacMillan et al)
"a self-administered questionnaire...used to assess the childhood history of physical and sexual abuse" [23881]

Child Maltreatment Interview (Rose and Abramson)
[used but not cited in 90961]

Child Maltreatment Interview Schedule (Briere)

Child Maltreatment Survey (Yang and Clum)
"developed for this study" [23969]
Yang, B; Clum, G A. Childhood stress leads to later suicidality via its effect on cognitive functioning. Suicide and Life-Threatening Behavior 30: 183-198 (2000). [23969]

Child Medical Fear Scale (Broome and Hellier)

Child Needs Assessment Toolkit (World Bank)
Child Neuropsychological History (Greenberg)

Child Perceived Self Control (Humphrey)
"11 items...to assess children’s perceptions of their ability to control their own anger" [82720]

Child Physical Abuse Scale (Briere and Runtz)
USE: Family Experiences Questionnaire (Briere and Runtz)

Child Physical Maltreatment Scale (Runtz)
Runtz, M. Coping strategies, social support, and recovery from physical and sexual abuse during childhood. Doctoral dissertation, University of Manitoba, 1991. [cited in 13798]

Child Play Therapy Instrument: Adaptation for Trauma Research (Chazan and Cohen)
[used but not cited in 92685]

Child Post-Traumatic Cognitions Inventory (Meiser-Stedman et al)
"The [25] items for the CPTCI were drawn primarily from [Foa et al’s] 33-item adult PTCI." [32817]
Meiser-Stedman, R; Smith, P; Bryant, R; Salmon, K; Yule, W; Dalgleish, T; Nixon, R D V. Development and validation of the Child Post-Traumatic Cognitions Inventory (CPTCI). Journal of Child Psychology and Psychiatry 50: 432-440 (2009). [32817; the CPTCI appears on p. 440]

Child Post-Traumatic Stress Reaction Index
USE: PTSD Reaction Index (Frederick)

Child Posttraumatic Stress Disorder Inventory (Bulut)
"constructed by modifying previous scales and by choosing highly predictive items from previous PTSD scales" [29785]

Child Posttraumatic Stress Scale (Johnson et al)
"a 17-item self-report measure based on the PDS [Foa’s Posttraumatic Diagnostic Scale] and modified to be developmentally appropriate for children 8 years of age or older" [22966]

Child Problem Behavior Checklist (Lochman et al)

Child Psychiatric Disorders Scale (Rutter)
[described only as "24 items from the Rutter (1987) scale" in 30091]

Child Psychological Maltreatment Scale (Khamis)
"a 20-item...scale designed to measure the repeated patterns of parental behavior that conveyed to children that they were worthless, flawed, unloved, unwanted, endangered or only of value in meeting another’s needs in the context of the Palestinian culture" [27243]

Child Psychosocial Distress Screener (Jordans et al)
"The CPDS consists of 7 items, 5 for the child and 2 for the teacher of the child.” [32030]

Child PTSD Checklist (Amaya-Jackson et al)
"a self-report scale that instructed participants to record, by way of free response, up to three potentially traumatic events and then to rate the degree to which each of the 17 symptoms of PTSD was present during the past month” [22256]

Child PTSD Reaction Index
USE: PTSD Reaction Index (Frederick)

Child PTSD Symptom Scale (Foa et al)
"The CPSS is a child version of the Posttraumatic Diagnostic Scale...designed to assess PTSD diagnosis and symptom severity in children ages 8 to 18 who had experienced a traumatic event.” [07396]
Child Rating Scale (Hightower et al)
Hightower, A D; Cowen, E L; Spinell, A P; Lotyczewski, B S; Guare, J C; Rohrbeck, C A; Brown, L P. the Child Rating Scale: the development and psychometric refinement of a socioemotional self-rating scale for young school children. School Psychology Review 16: 239-255. [cited in 01253]

Child Rating Scales of Exposure to Interpersonal Abuse (Praver)

Child Rearing Interview (Stouthamer-Loeber and Loeber)

Child Rearing Practices Scales (Sears et al)
Sears, R R; Maccoby, E E; Levin, H. Patterns of Child Rearing. New York: Row, Peterson, 1957. [cited in 00493]

Child Reconciliation Questionnaire (Adam)
an 8-item questionnaire assessing "children's openness to reconciliation" [29826]

Child Report of Parenting Behavior Inventory (Schaefer)

Child Report of Post-Traumatic Symptoms (Rubin and Greenwald)

Child Report of Treatment Issue Resolution (Nelson-Gardell)

Child Report of Witnessing IPV Scale (Allen et al)
4 items

Child Resiliency Questionnaire
[used but not cited in 91785]

Child Revenge Questionnaire (Adam)

Child Routines Questionnaire (Sytsma et al)

Child Severity of Psychiatric Illness Scale (Lyons)
"a 25-item, 4-point...chart review measure used to gather recent and historical information on psychiatric functioning" [23425] Lyons, J S: The Severity and Acuteness of Psychiatric Illness, Child and Adolescent Version. San Antonio: Psychological Corporation (Harcourt), 1995. [cited in 23425]

Child Sexual Abuse and Assault Survey (Katerndahl et al)

Child Sexual Abuse Delayed Disclosure Checklist (Somer and Szwarberg)

Child Sexual Abuse Initial Interview (McLeer)

Child Sexual Abuse Myth Scale (Collings)
15 items
Child Sexual Abuse Questionnaire (Bendixen et al)
Bendixen, M; Muus, K M; Schei, B. The impact of child sexual abuse: a study of a random sample of Norwegian students. 

Child Sexual Abuse Questionnaire (Walters et al)

Child Sexual Abuse Questionnaire (Williams and Gleaves)
"A sexual experiences questionnaire was developed for the purposes of this study...It assesses sexual experiences that females may have had before age 15." [18031]
Williams, T L; Gleaves, D H. Childhood sexual abuse, body image, and disordered eating: a structural modeling analysis. 

Child Sexual Abuse Severity Rating (Wright et al)
"The study questionnaire used a number of structured and semistructured items to elicit specific attributes of each mother's abuse history..." [28770]
Wright, M O; Forma-Loy, J; Fischer, S. Multidimensional assessment of resilience in mothers who are child sexual abuse survivors. 

Child Sexual Abuse Severity Scale (Fassler et al)
"an empirically derived, multidimensional...6-point severity scale" [28093]
Fassler, I R; Amodeo, M; Griffin, M L; Clay, C M; Ellis, M A. Predicting long-term outcomes for women sexually abused in childhood: contribution of abuse severity versus family environment. 

Child Sexual Assaults Scale (Koss et al)
"The Scale consists of 14 items that relate to sexual relations in varying degrees of coercion, threat, and so forth. Participants are asked to indicate whether they experienced one or more events during childhood and the identity of the perpetrator." [33476]

Child Sexual Behavior Checklist (Johnson)
"a list of 150 sexual and other related behaviors that is filled out by the parents or caretakers" [16035]

Child Sexual Behavior Inventory (Friedrich et al)
Purcell, J; Beilke, R L; Friedrich, W N. Sexualized behavior in sexually abused and non-sexually abused children. Poster presented at the American Psychological Association meeting, Washington, August 1986. [cited in 03061]
Friedrich, W N; Grambsch, P; Koverola, C; Hewitt, S; Damon, L; Lang, R; Wolfe, V V. The Child Sexual Behavior Inventory: a comparison of normal and clinical populations. Paper presented at National Symposium on Child Victimization meeting, Atlanta, April 1990. [cited in 03061]

Child Sexual Experience Questionnaire (Bartoi and Kinder)
"a 12-item inventory that screens for the presence of sexual abuse before the age of 16 years" [82845]
Bartoi, M G; Kinder, B N. Effects of child and adult sexual abuse on adult sexuality. 

Child Sexual Experiences Questionnaire (Higgins and McCabe)
[cited only as "Higgins & McCabe, 2001" in 91846]

Child Sexual Victimization Questionnaire (Risin and Koss)

Child Sleep Habit Questionnaire
[used but not cited in 86445]

Child Social Experience Questionnaire (Crick and Grotpeter)
"The CSEQ measures relational and overt victimization, including threats of harming a relationship, threats of harming physical well-being, and experiencing direct physical harm." [84048]
Crick, N R; Grotpeter, J K. Relational aggression, gender, and social-psychological adjustment. 

Child Soldiers Trauma Questionnaire (Klasen et al)
"a 19-item yes-no statement questionnaire" [34615]
Klasen, F; Oettingen, G; Daniels, J; Post, M; Hoyer, C; Adam, H. Posttraumatic resilience in former Ugandan child soldiers. 
Child Stress Disorders Checklist - Short Form (Bosquet Enlow et al)
a 4-item measure derived from Saxe et al’s 36-item Child Stress Disorders Checklist

Child Stress Disorders Checklist (Saxe et al)
a 36-item observer-report instrument that measures acute stress and posttraumatic symptoms in children” [25836]

Child Stress Reaction Checklist (Saxe et al)
USE: Child Stress Disorders Checklist (Saxe et al)

Child Suicide Potential Scale (Pfeffer)

Child Symptom Inventory (Gadow and Sprafkin)
"The CSI is a 97-item checklist that contains symptoms of 20 behavioral disorders...” [35810]

Child Trauma Screening Questionnaire (Kenardy et al)
"The CTSQ is a 10-item measure of child traumatic stress assessing 5 symptoms of reexperiencing and 5 symptoms of hyperarousal.” [31006]

Child Traumatic Reaction Index (Awadh et al)
"developed [for this study] based on the DSM-IV PTSD criteria” [20862]

Child Well-Being Scales (Magura and Moses)

Child Well-Being Survey (Bahrick et al)
a 35-item questionnaire that we developed to assess changes in ordinary behavior as a result of a traumatic event” [22102]

Child Witness to Violence Questionnaire
[used but not cited in 07732]

Child-Adult Relationship Experimental Index (Crittenden)

Child-Rearing Practices Report (Block)

Child’s Traumatic Exposure Questionnaire (Cohen)

Child’s Attitude Toward Father (Hudson)
USE: Clinical Measurement Package (Hudson)

Child’s Attitude Toward Mother (Hudson)
USE: Clinical Measurement Package (Hudson)

Child’s Perception of Therapeutic Relationship (Kendall)
a 10-item, 5-point scale which assesses perceptions of the quality of the therapeutic relationship” [22671]
Child’s Reaction to Traumatic Events Scale (Jones)
a revision of the Impact of Events Scale for children...a 15 item self-report measure designed to assess psychological responses to stressful life events" [wk 312]

Child’s Report Form
[used but not cited in 90010]

Child’s Social Readjustment Rating Scales (Coddington)
USE: Coddington Life Events Scale (Coddington)

Child/Teen Witness to Woman Abuse Questionnaire (Sudermann et al)

Childbirth Expectation Scale
[used but not cited in 93239]

Childbirth Self-Efficacy Inventory (Lowe)
"This scale was developed to assess a woman’s self-efficacy for coping with the birth experience, based on Bandura’s social cognitive theory." [23446]

Childbirth Trauma Index (Anderson)
"The [14-item] CTI was developed to determine specific indicators perceived by adolescents as influencing birth trauma." [39898]

Childbirth Trauma Interview Schedule (Nicholls and Ayers)
a semi-structured interview exploring "the experience of postnatal PTSD in couples and the perceived impact of postnatal PTSD on the couple’s relationship and their relationship with the baby" [30345; instrument is not named in article; name assigned by PILOTS Database staff]

Childhood Abuse and Neglect Questionnaire (Yargic et al)
"The CANQ is a short self-report questionnaire that gathers information on details of childhood abuse and neglect." [16338]

Childhood Adversity Checklist (Cohen et al)
"a 16-item checklist modified from a questionnaire developed by Kupfer and colleagues" [26900]

Childhood Antecedents Questionnaire (Reitsema-Street et al)

Childhood Anxiety Sensitivity Index (Silverman et al)
"The CSI is a widely-used 18-item measure..." [29467]

Childhood Asthma Control Test (Liu et al)
"The C-.ACT is a caregiver and child self-report measure of the child’s asthma control in the last month." [39368]
Liu, A H; Zeiger, R; Sorkness, C; Mahr, T; Ostrem, N; Burgess, S; Rosenzweig, J C; Manjunath, R. Development and cross-sectional validation of the Childhood Asthma Control Test. Journal of Allergy and Clinical Immunology 119(4): 817-825 (2007). [cited in 39368]

Childhood Attachment and Relational Trauma Screen (Frewen et al)
a computerized approach to measuring the relational-socioecological context within which childhood maltreatment occurs” [40234]
Frewen, P A; Evans, B; Goodman, J; Halliday, A; Boylan, J; Moran, G; Reiss, J; Schore, A; Lanius, R A. Development of a Childhood Attachment and Relational Trauma Screen (CARTS): a relational-socioecological framework for surveying attachment security and childhood trauma history. European Journal of Psychotraumatology 4: 20232 (2013). [40234]

Childhood Autism Rating Scale (Schopler et al)
**Childhood Behavior Questionnaire (Derryberry and Rothbart)**

**Childhood Dissociative Checklist (Birt)**
"adapted from the Childhood Dissociative Checklist (Putnam et al)" [09512]

**Childhood Dissociative Predictors Scale (Branscomb)**

**Childhood Emotional Support Scale (Irwin)**

**Childhood Environment Scale (Vaillant)**

**Childhood Experience of Care and Abuse (Bifulco et al)**

**Childhood Experiences of Violence Questionnaire (Walsh et al)**
"The CEVQ was designed as a survey instrument to assess self-report of childhood maltreatment experiences. The CEVQ does not measure childhood neglect. The CEVQ has 18 items...” [80209]
Wekerle, C; Miller, A L; Wolfe, D A; Spindel, C B. *Childhood Maltreatment*. Cambridge, Massachusetts: Hogrefe & Huber, 2006. [80209; the CEVQ appears on pp. 79-88]

**Childhood Experiences Questionnaire (Ferguson and Dacey)**
"a 30-item self-report measure which was specifically constructed for this study to assess abuse history" [09352]

**Childhood Experiences Questionnaire (Kessler and Bieschke)**
"The CEQ is a 54-item self-report questionnaire designed specifically for the present study to assess (a) levels of childhood sexual abuse, (b) age of onset of abuse, (c) severity of sexual abuse, and (d) degree of support received if the abuse was disclosed.” [21648]

**Childhood Experiences Questionnaire (Rosenbaum and Gearan)**
"this is a 29 item paper and pencil, self report questionnaire which was created for this study in order to examine the childhood experiences, behaviors, and parental relationships of partner aggressive men.” [31069]

**Childhood Experiences Questionnaire (Zanarini)**
Zanarini, M C. *Revised Childhood Experiences Questionnaire (CEQ-R)*. Belmont, Massachusetts: McLean Hospital, Harvard Medical School, 1992. [cited in 06370]
UF: Revised Childhood Experiences Questionnaire (Zanarini)

**Childhood Family Mealtime Questionnaire (Miller et al)**

**Childhood History Questionnaire (Goldberg et al)**
"9 questions on physical, sexual, and verbal abuse; alcohol history in the family; [and] drug addiction history in the family” [20758]

**Childhood History Questionnaire (Milner et al)**

**Childhood Interpersonal Violence Before Age 18 Scale**
[used but not cited in 27116]

**Childhood Interview (Harris et al)**
Childhood Life Events Interview (Sher et al)
"A 50-item structured interview, developed for this project" [09397]
Sher, K J; Gershuny, B S; Peterson, L; Raskin, G. The role of childhood stressors in the intergenerational transmission of alcohol use disorders. Journal of Studies on Alcohol 58: 414-427 (1997). [09397]

Childhood Maltreatment Interview Schedule (Briere)

Childhood Maltreatment Questionnaire (Demaré)
UF: Physical Abuse Questionnaire (Demaré)

Childhood Maltreatment Questionnaire (Transcultural Psychological Organization)
"A 13-item questionnaire...created for the purpose of [this] study" [27394]

Childhood Personality Scales (Cohen et al)

Childhood Physical Abuse Measure (Famularo)

Childhood Physical Abuse Scale (Wright et al)
"This 13-item scale, adapted from the Conflict Tactics Scale, includes items reflecting physical abuse and the threat of physical abuse during childhood." [84118]
Wright, C V; Collinsworth, L L; Fitzgerald, L F. Why did this happen to me?: cognitive schema disruption and posttraumatic stress disorder in victims of sexual trauma. Journal of Interpersonal Violence 25: 1801-1814 (2010). [84118]

Childhood Physical and Sexual Abuse Questionnaire
[used but not cited in 32799]

Childhood Physical Experiences Questionnaire (Hetzel and McCanne)
"A self-report measure adapted from Milner er al's Childhood History Questionnaire and Finkelhor's Survey of Childhood Sexual Experiences [i.e., Sexual Life Events Inventory]" [27528]

Childhood Physical Punishment Scale (Berger et al)
"Contains 23 items assessing disciplinary behaviors that could be considered abusive" [19448]

Childhood Post-Traumatic Stress Disorder — Parents Questionnaire (Pynoos and Nader)

Childhood PTSD Interview
[used but not cited in 90364]

Childhood PTSD Interview (Fletcher)
"This structured clinical interview...assesses whether a child meets each of the PTSD criteria...as well as whether the child warrants a diagnosis of PTSD." [22010]

Childhood PTSD Inventory (Famularo et al)

Childhood Sexual Abuse Interview (El-Bassel et al)
"Based on interview schedules created by Finkelhor and Sgroi...the CSAI is conducted with adults and elicits retrospective self-reports of sexual experiences that occurred prior to age 15" [32804]

Childhood Sexual Abuse Interview (Miller)

Childhood Sexual Abuse Interview (Wyatt)
USE: Wyatt Sex History Questionnaire (Wyatt)
Childhood Sexual Abuse Questionnaire (Peters and Range)
Modeled after [unidentified] work by Finkelhor and Russett.

Childhood Sexual Abuse Scale (Wright et al)
"This 8-term measure, adapted from Koss and Gidycz’s Sexual Experiences Survey, asks respondents about their sexual experiences before the age of 18, perpetrated by an individual at least 5 years older.” [84118]
Wright, C V; Collinsonworth, L M; Fitzgerald, L F. Why did this happen to me?: cognitive schema disruption and posttraumatic stress disorder in victims of sexual trauma. Journal of Interpersonal Violence 25: 1801-1814 (2010). [84118]

Childhood Sexual Abuse Stereotypes Scale (Zafar and Ross)
"developed to assess stereotypes of adult survivors of childhood sexual abuse” [40404]

Childhood Sexual Experiences Questionnaire (Schaaf and McCanne)

Childhood Sexual Experiences Questionnaire (Zaidi et al)
"collects a history of negative childhood sexual experiences using a grid with persons (potential perpetrators) along one axis and acts along the other” [17022]
Zaidi, L Y; Schnurr, P; Knutson, J F; Kriegler, J; Blake, D; Bremmer, D; Krinsley, K; Knight, J. Childhood Sexual Experiences Questionnaire. Unpublished instrument, 1991. [cited in 17022]

Childhood Sexual Experiences Scale (Coffey et al)

Childhood Sexual Experiences Scale (Runtz)
"reported the frequency of 9 nonconsensual sexual behaviors occurring before age 14” [82357]
Runtz, M G. Childhood Sexual Experiences Scale. Unpublished instrument, University of Victoria (Canada), 2002. [cited in 82357]

Childhood Sexual Experiences Survey (Arroyo et al)
a 15-item instrument adapted from the Wyatt Sex History Questionnaire

Childhood Sexual Trauma Questionnaire (Levitans et al)
"a true-false, self-report screening measure consisting of four items” [24159]

Childhood Sexual Victimization Questionnaire (Sandberg et al)
"questions intended to measure childhood sexual victimization prior to age 16 were adapted” from Finkelhor’s Sexual Life Events Inventory [14308]

Childhood Social Arena and Cognitive Sets
[used but not cited in 09422]

Childhood Social Network Questionnaire (Chan)

Childhood Stress Inventory (Sanders et al)
Sanders, B; McRoberts, G; Tollefson, C. Childhood stress and dissociation in a college population. Dissociation 2(1): 17-23 (March 1989). [02135]

Childhood Trauma and Well-Being Survey (Young et al)
"a questionnaire designed for the purposes of a larger study regarding memory for sexual abuse” [85463]

Childhood Trauma Chart Review Scale (Becker and Weine)
Becker, D F; Weine, S M. The Childhood Trauma Chart Review Scale. Unpublished research scale, Yale University School of Medicine, 1992. [cited in 13606]

Childhood Trauma Index (Green et al)
Children Fears Checklist (El Taib)

"The child rates 20 items on different fears as yes or no." [24438]

Childhood Trauma Interview (Fink et al)

"a brief structured interview" [04936]

Childhood Trauma Questionnaire (Bernet and Stein)

"a 28-item, retrospective, self-report questionnaire designed to assess five types of negative childhood experiences: sexual, emotional, and physical abuse, and emotional and physical neglect" [29621]

Bernet, C Z; Stein, M B.  Relationship of childhood maltreatment to the onset and course of major depression in adulthood.  Depression and Anxiety 9: 169-174 (1999).  [cited in 29621]

Childhood Trauma Questionnaire (Bernstein et al)

"a 70-item self-report instrument"

Childhood Trauma Questionnaire (Sheikh et al)

Sheik, J; Bail, G; Kravitz, J; et al.  The Childhood Trauma Questionnaire.  Stanford, California: Laboratory for Geriatric Anxiety Research, 1990.  [cited in 04733]

Childhood Trauma Reports (Evren et al)

"Childhood emotional, physical, and/or sexual abuses were screened using a [semistructured] history form based on definitions by Walker et al for emotional abuse and Brown and Anderson for physical and sexual abuse." [31137]

Childhood Traumatic Events Scale (Pennebaker and Susman)

Childhood Traumatic Events Scales-Revised (Lyons-Ruth and Block)

The CTES-R "rates severity of physical, sexual, and verbal abuse and witnessed violence revealed on the 1-hour narrative of the Adult Attachment Interview." [32502]

Childhood Trauma Reports (Evren et al)

"Childhood emotional, physical, and/or sexual abuses were screened using a [semistructured] history form based on definitions

Childhood Trauma Exposure Rating…instrument that contained 10 disaster impact items" [26791]

R "rates severity of physical, sexual, and verbal abuse and witnessed violence revealed on the 1-hour narrative of the Adult Attachment Interview." [32502]

Childhood Unwanted Sexual Events (Lange et al)

UF:  CHUSE

Childhood Violence Scale (Riggs et al)

Childhood War Exposure Questionnaire (Netland)

Childhood War Trauma Questionnaire (Macksoud)

UF:  War Trauma Questionnaire (Macksoud)

Children and Adolescents Protocol on Flood Impact (Kreuger and Stretch)

"self-reporting...instrument that contained 10 disaster impact items" [26791]

Children and Violence Neighborhood Coding System (Lewis et al)

"A coding system to evaluate children's drawings was developed in order to describe how children draw what goes on in their neighborhoods." [17670]

Children Fears Checklist (El Taib)

"The child rates 20 items on different fears as yes or no." [24438]

Children's Future Expectation Scale (Bryan et al)

Children of Alcoholics Life-Events Schedule (Roosa et al)

Children of Alcoholics Screening Test (Jones)

Children of Survivors Questionnaire (Rich)
[used but not cited in 92184]

Children's Aggression Scale (Halperin et al)

Children's Alexithymia Measure (Way et al)
a 14-item "parent/caregiver instrument for identifying alexithymia in children" [84532]
Way, I F; Applegate, E B; Cai, X; Franck, L K; Black-Pond, C; Yelsma, P; Roberts, E; Hyter, Y; Muliett, M.  Children's Alexithymia Measure (CAM): a new instrument for screening difficulties with emotional expression.  *Journal of Child and Adolescent Trauma* 3: 303-318 (2010).  [84532]

Children's Assumptive Worlds Scale (Bishop et al)

Children's Autobiographical Memory Inventory (Bekerian et al)
Bekerian, D; Dhillon, D; O'Neill, M H.  The Children's Autobiographical Memory Inventory.  Poster presentation at the Third International Conference on Memory, Valencia, Spain, 2001.  [cited in 32178]

Children's Automatic Thoughts Scale (Schniering and Rapee)
"The CATS is a 40-item self-report measure that assesses negative self-statements in children and adolescents..." [37164]

Children's Beliefs About Parental Divorce Scale (Kurdek and Berg)

Children's Cohesion Index (Vaage et al)
a self-report questionnaire for children [unnamed in article; name assigned by PILOTS Database staff]
Vaage, A B; Thomsen, P H; Rousseau, C; Wentzel-Larsen, T; Ta, T V; Hauff, E.  Paternal predictors of the mental health of children of Vietnamese refugees.  *Child and Adolescent Psychiatry and Mental Health* 5: 2 (2011).  [37440]

Children's Daily Stressor Scale (Miller et al)
"a measure of daily stressors affecting youth in eastern Sri Lanka" [83633]

Children's Empathic Attitudes Questionnaire
"a 16-item measure of adolescent's empathy" [92462]
[used but not cited in 92462]

Children's Fear Survey (Ramirez et al)
"a 34-item checklist assessing common fears, deprivation fears, social rejection fears, and animal fears" [36978]

Children's Function Impairment Questionnaire (Jordans et al)
"a 10-item questionnaire developed in Nepal using an adapted methodology described by Bolton and Tang" [36103]

Children's Integrated Stress and Coping Scale (Jose and Huntsinger)
"The [24-item] scale asked respondents to indicate the most violent event they have experienced in the past year and rate how often they used specified coping strategies in response to this event on a four-point scale." [31868]

Children's Inventory of Anger (Nelson and Finch)
"The ChIA is a 39-item standardized measure of children's anger, using a 4-point, visual aided Likert scale." [82344]
Children's Memory Scale (Cohen)

Children's Mental Health Checklist (Gordon et al)
"The CMHC, designed in response to the 1989 Loma Prieta earthquake in northern California, consists of 25 yes-or-no, adult-reported items." [35075]

Children's Paced Auditory Serial Addition Task (Dyche and Johnson)
UF: CHIPASAT

Children's Play Therapy Instrument (Kernberg et al)

Children's Post Traumatic Cognitions Inventory (Meiser-Stedman)
"The C-PTCI is a new adaptation of the adult PTCI (Foa et al) measuring trauma-related beliefs and appraisals. It comprises 25 items rated on a 4-point scale." [32016]

Children's Problem Checklist (Schinka)
"This instrument presents 32 statements about child behaviour and asks the mothers to indicate (yes/no) whether the description applies to her child." [34643]

Children's Response Styles Scale (Ziegert and Kistner)

Children's Responses to Trauma Inventory (Alisic et al)
USE: Schokverwerkingslijst voor Kinderen (Alisic et al)

Children's Self-Report Psychiatric Rating Scale (Beitchman et al)
"The SRQ is a 55-item self-report inventory used to detect and diagnose psychiatric symptoms in children." [83904]

Children's Sleep Habits Questionnaire (Owens et al)
"The CSHQ screens behaviourally based and medically based sleep problems." [38969]

Children's Social Behavior Scale (Crick)
"A teacher-rating measure of children's social behavior and social adjustment was constructed for use in the present research. - The CSBS-T consisted of 15 items, 7 of which assessed relational aggression, 4 that assessed overt aggression, and 4 that assessed prosocial behavior." [Crick, 2006]

Children's Stress Questionnaire (Byrne et al)
a 50-item "measure of the experience of stressors in children" [36127]

Children's Abuse-Specific Perceptions (Kolko and Berliner)
"The CASP was intended to elicit victims' attributions or perceptions of a specific abuse experience." [16465]

Children's Action Tendency Scale (Deluty)

Children's Aggressive and Prosocial Behavior Rating Scale (Zuzul et al)

Children's Anxiety Scale (Spence)
"This is a 38-item self-report scale, which provides an overall measure of anxiety." [28518]
Children's Apperception Test (Bellak and Bellak)
**UF:** CAT

Children's Assertive Behavior Scale (Michelson and Wood)

Children's Attributional Style Questionnaire (Kaslow et al)
**UF:** Attributional Style Questionnaire for Children [KASTAN] (Kaslow et al)

Children's Attributions and Perceptions Scale (Mannarino et al)

Children's Behavior Inventory (Burdock and Hardesty)

Children's Behavior Questionnaire (Rothbart and Derryberry)

Children's Behavioral Questionnaire (Rutter and Graham)
**UF:** Children's Health and Behavior Scale

Children's Chornobyl Anxiety Scale
"the sum of 15 items modeled after [the PTSSD Reaction Index] indicating degrees of concern about Chornobyl" [22233]
Bromet, E J; Goldgaber, D; Carlson, G; Panina, N; Golovakha, E; Gluzman, S F; Gilbert, T; Gluzman, D; Lyubsky, S; Schwartz, J E. Children’s well-Being 11 years after the Chornobyl catastrophe. *Archives of General Psychiatry* 57: 563-571 (2000). [22233]

Children's Chronic Trauma-Related Symptoms Inventory (Tay)
"The CCTRSI was developed to provide a screening instrument...for use with children who have been exposed to recurring trauma and reside in shelter settings." [91437]

Children's Competency Beliefs Scale (Weyer and Sandler)
"This five-item adaptation of the Child's Coping Efficacy Scale measures children's perceptions of their ability to handle problems arising from the trauma, as well as problems that may arise in other areas." [28463]

Children's Coping Assistance Checklist (Prinstein et al)

Children's Coping Questionnaire (Fedorowicz et al)
"an 81-item measure developed to assess self-reports of coping in school-aged children" [16066]
Fedorowicz, A E; Kerig, P K; Brown, C; Warren, M. *Children's Coping Questionnaire: development and factor structure*. Presented at the annual meeting of the American Psychological Association, New York, August 1995. [cited in 16066]

Children's Coping Strategies Checklist (Sandler et al)

Children's Depression Inventory (Kovacs)

Children’s Depression Rating Scale — Revised (Poznanski et al)
**USE:** Children's Depression Rating Scale (Poznanski et al)
Children's Depression Rating Scale (Poznanski et al)
UF: Child Depression Rating Scale (Poznanski et al)
Children's Depression Rating Scale — Revised (Poznanski et al)

Children's Dissociative Experiences Scale and Posttraumatic Symptom Inventory (Stolbach)

Children's Experience and Excitement Scale (Selner and Knutson)
"The CIES consists of 44 slides depicting children engaging in a range of activities." [19020]

Children's Experiences Questionnaire (Cole et al)

Children's Future Orientation Scale (Saigh)
"This self-report measure consists of 16 items tapping youths' perceptions of their future in four areas: family, work, friends, and general." [27929]

Children's Global Assessment Scale (Shaffer et al)

Children's Health and Behavior Scale
USE: Children's Behaviour Questionnaire (Rutter and Graham)

Children's Health Locus of Control Scale (Parcel and Meyer)
"CHLOC consists of 20 items that elementary school-aged children can respond to by either 'yes' (agree) or 'no' (disagree)"

Children's Hope Scale (Snyder et al)
Snyder, C R; Rapoff, M; Ware, L; Hoza, B; Pelham, W; Danovsky, M; Hieghber, L; Rubinstein, H; Stahl, K. The development of and validation of the Children's Hope Scale. Paper presented at the Kansas Conference in Clinical Child Psychology, Lawrence, October 1994. [cited in 07944]
UF: Hope Scale for Children (Snyder et al)

Children's Hospital of Philadelphia Self-Efficacy Scale
"This 46-item scale was developed to assess parental perceptions of self-efficacy specific to medical care." [23325]

Children's Hostility Inventory (Kazdin et al)

Children's Impact of Event Scale (Rennick and Johnston)
"The CIES is a modified instrument developed by the authors...for use with children in the current study. It is based on the Impact of Event Scale..." [24651]

Children's Impact of Traumatic Events Scale (Wolfe et al)
UF: CITES

Children's Internal-External Control Scale (Nowicki and Strickland)
USE: Nowicki-Strickland Internal-External Control Scale for Children (Nowicki and Strickland)
Children's Interview for Psychiatric Syndromes (Rooney et al)

"The ChIPS is a structured interview based on criteria of the DSM-IV that assesses 20 common psychiatric disorders in children and adolescents." [24541]

Children's Interview on Community Violence (Hill)

"a 20-item structured interview that ascertains information about violent incidents that children actually viewed in their communities as opposed to violence seen on television" [20896]

Children's Interview for Psychiatric Syndromes (Emery and O'Leary)

Emery, R E; O'Leary, K D. Children's perceptions of marital discord and behavior problems of boys and girls. "a measure of children's perceived parental conflict and acceptance from parents" [20376]

Children's Inventory of Social Support (Wolchik et al)

Children's Life Events Inventory (Monaghan et al)

Children's Manifest Anxiety Scale - Revised

USE: Revised Children's Manifest Anxiety Scale (Reynolds and Richmond)

Children's Manifest Anxiety Scale (Castenada et al)

Children's Memory Characteristics Questionnaire

"This questionnaire included 70 questions about the characteristics and nature of memory for a traumatic event and a 'very positive' experience. . . [It] was a version of the Memory Characteristics Questionnaire developed by Johnson et al and modified by Hyman et al." [17644]

Children's Negative Cognitive Error Questionnaire (Leitenberg et al)

"The CNCEQ is a 24-item self-report questionnaire to survey cognitive distortions related to catastrophization, personalization, overgeneralization, and selective abstraction" [26264]

Children's Nowicki-Strickland Internal-External Control Scale

USE: Nowicki-Strickland Internal-External Control Scale for Children (Nowicki and Strickland)

Children's Orientation and Amnesia Test (Ewing-Cobbs et al)

Children's Perception of Environmental Violence Scale (Hill and Noblin)

Children's Perception of Environmental Violence Scale (Hill and Noblin)

Children's Perception of Intergenational Conflict Scale (Grych et al)

Children's Perception of Intergenational Conflict Scale (Grych et al)

Children's Perception Questionnaire (Emery and O'Leary)

Children's Perception Questionnaire (Wurtele and Miller)

Children's Perceptual Alteration Scale (Evers-Szostak and Sanders)

Children’s Personality Questionnaire (Porter and Cattell)

Children’s Posttraumatic Stress Disorder Inventory (Saigh)
Saigh, P A. The development and validation of the Children’s Posttraumatic Stress Disorder Inventory. Paper presented at the meeting of the Association for the Advancement of Behavior Therapy, 1987. [cited in 01790]

Children’s Questionnaire (Barath)
"40 close-ended questions” [26897]

Children’s Reinforcement Survey Schedule (Clement and Richard)
"The RSS, administered by interview, asks the children to identify the people with whom they spend the most time, their favorite foods, the toys they use most often, and the places they spend the most time.” [19020]

Children’s Report of Exposure to Violence (Cooley et al)

Children’s Report of Parental Behavior Inventory (Schaefer)
USE: Parental Behavior Inventory (Schaefer)

Children’s Report of Parenting Behavior Inventory (Kolko and Kazdin)
"The 56-item CRPBI is a self-report measure completed by children for their mothers and fathers separately.” [21722]

Children’s Revised Impact of Event Scale (Smith et al)
"a newly-developed scale, adapted from the IES-8” [28121]

Children’s Self-Concept Scale
USE: Piers-Harris Children’s Self-Concept Scale (Piers and Harris)

Children’s Self-Efficacy for Peer Interaction Scale (Wheeler and Ladd)

Children’s Self-Efficacy Scale
[used but not cited in 90574]

Children’s Self-Image Scale (Rosenberg and Simmons)

Children’s Sentence Completion Test (Conger)
[used but not cited in 02339]

Children’s Social Desirability Questionnaire (Crandall et al)

Children’s Social Support Questionnaire (Bogat et al)
"The CSSQ yields measurements for the number and happiness with male and female peers...and nonpeers” [15551]
Bogat, G A; Chin, R; Sabbath, W; Schwartz, C. The Children’s Social Support Questionnaire (Technical Report #3). East Lansing: Michigan State University, 1985. [cited in 15551]

Children’s Somatization Inventory (Walker and Greene)

Children’s Stress Inventory (Lipp and Lucarelli)
USE: Escala de Stress Infantil (Lipp and Lucarelli)
Children's Stress Symptoms - Parent Report (Richters)
UF: Survey of Children's Stress Symptoms-Parent Report (Richters)

Children's Structured Clinical Interview for DSM-IV
UF: KID-SCID

Chinese Health Questionnaire (Cheng and Williams)
"The [12-item] CHQ-12 is a standardized screening instrument for psychiatric morbidity." [24130]

Chinese Individual Traditionality Scale (Yang and Huang)

Chinese Personality Assessment Inventory (Cheung et al)

Chinese Traditional Beliefs Scale (Yang and Wang)
"36 items in 6 factors...to assess the degree of participants' identification with Chinese traditional beliefs" [82708]

CHIP
USE: Coping Health Inventory for Parents (McCubbin et al)

CHIPASAT
UF: Children's Paced Auditory Serial Addition Task (Dyche and Johnson)

Chornobyl Anxiety Scale
a 15-item scale "adapted from the Modified Post-Traumatic Stress Disorder (PTSD) Reaction Index (Pynoos et al)" [23721]
Litcher, L; Bromet, E J; Carlson, G; Squires, N; Goldgaber, D; Panina, N; Golovakha, E; Gluzman, S. School and neuropsychological performance of evacuated children in Kyiv 11 years after the Chornobyl disaster. Journal of Child Psychology and Psychiatry and Allied Disciplines 41: 291-299 (2000). [23721]

Chornobyl Health Stress Scale
"an 8-item scale focused on the health effects of the Chornobyl disaster on mother and child, effects on future generations, and worries about eating or drinking contaminated food or milk" [22233]
Bromet, E J; Goldgaber, D; Carlson, G; Panina, N; Golovakha, E; Gluzman, S F; Gilbert, T; Gluzman, D; Lyubsky, S; Schwartz, J E. Children's well-being 11 years after the Chornobyl catastrophe. Archives of General Psychiatry 57: 563-571 (2000). [22233]

Christchurch Trauma Assessment (Fergusson et al)

Christensen Dietary Distress Inventory
[used but not cited in 90721]

Christian Orthodoxy Scale (Hunsberger)

Chronic Burden Scale (Gurung et al)
"a 21-item measure of difficulties experienced in the past month from a number of stressors" [83868]

Chronic Disease Score (Clark et al)
"a measure of chronic disease severity" [24589]
Clark, D O; Von Korff, M; Saunders, K; Baluch, W M; Simon, G E. A chronic disease score with empirically derived weights. Medical Care 33: 783-795 (1995). [cited in 24589]

Chronic Fatigue Syndrome Checklist (Chalder)
"a 24-item scale developed to assess the presence and severity of physical, cognitive, behavioral, and affective components of fatigue" [07601]
Chronic Fatigue Syndrome Questionnaire (Fukuda et al)

Chronic Health Problems Questionnaire (Farley et al)
"Inquired about health problems of women in prostitution" [18093]

Chronic Illness Appraisals Scale (Barakat and Wodka)
A 7-question scale "adapted for this study based on a prototype used in pediatric cancer survival research in order to assess perceptions of illness-specific threat". [35415]

Chronic Medical Conditions Checklist (Health Care for Communities Study)
Sturm, R; Gresenz, C; Sherbourne, C; Minium, K; Klap, R; Bhattacharya, J; et al. The design of health care for communities: a study of health care delivery for alcohol, drug abuse, and mental health conditions. *Inquiry* 36: 221-233 (19999). [cited in 19675]

Chronic Pain Definitional Questionnaire (Williams et al)

Chronic Pain Grade (Von Korff et al)
a 7-item scale

Chronic Respiratory Disease Questionnaire (Schünemann et al)

Chronic Respiratory Questionnaire (Williams et al)

Chronic Self-Destructiveness Scale (Kelley et al)

Chronic Stress Interview (Hammen et al)
"This interview probes four domains of interpersonal functioning: close friendships, social life, romantic relationships, and family relationships." [31602]
Hammen, C; Adrian, C; Burge, D; Jaenicke, C; Hiroto, D. Children of depressed mothers: maternal strain and symptom predictors of dysfunction *Journal of Abnormal Psychology* 96: 190-198 (1987). [cited in 31602]

Chronic Stress Scale (Norris and Uhl)

CHUSE
USE: Childhood Unwanted Sexual Events (Lange et al)

CICAD Drug Use Questionnaire

CIDI
USE: Composite International Diagnostic Interview (Robins et al)

Cincinnati Stress Response Schedule (Green et al)

Circumstances of Exposure to Death
USE: Characteristics and Exposure to Death (Brent and Moritz)

Circumstances of Exposure to Death (Brent et al)
"a semistructured interview" [32229]
Brent, D A; Perper, J A; Moritz, G; Allman, C; Schweers, J; Roth, C; Balach, L; Canobbio, R; Liotus, L. Psychiatric sequelae to the loss of an adolescent peer to suicide. *Journal of the American Academy of Child and Adolescent Psychiatry* 32:509-517 (1993). [03749; cited in 32229]

Circumstances, Motivation, Readiness, and Suitability Scales (De Leon and Jainchill)
CISD Evaluation Form (Sin et al)
"a self-administered [10 item] general evaluation form" [19745]

CITES
USE: Children's Impact of Traumatic Events Scale (Wolfe et al)

Civil Strife and Social Change in Lebanon Research Questionnaire (Khalaf and Nasr)
[used in 04554, but cited only as "unpublished research questionnaire, American University of Beirut, 1984"]

Civilian Mississippi Scale
USE: Mississippi Scale for Combat-Related PTSD (Keane et al)

CJDATS Intake Interview (Sacks et al)
Sacks, S; Melnick, G; Coen, C; Banks, S; Friedmann, P D; Grella, C; Knight, K; Zlotnick, C. CJDATS Co-Occurring Disorders: Screening Instrument (CODSI) for Mental Disorders (MD): a validation study. Criminal Justice and Behavior 34: 1198-1215 (2007). [cited in 32380]

Clarke Parent-Child Relations Questionnaire (Paitich and Langevin)

Classical Conditioning Paradigm (Olson and Fazio)
unnamed paradigm used "to assess conditioning for emotional material" [34107]; name assigned by PILOTS Database staff Olson, M A; Fazio, R H. Implicit attitude formation through classical conditioning. Psychological Science 12: 413-417 (2001). [cited in 34107]

Client Accident Interview Form (Heller)

Client Attachment to Therapist Scale
[used but not cited in 93225]

Client Cultural Competence Inventory (Switzer et al)
"The CCCI is a 12-item self-report measure that assesses a client’s perception of the cultural competency of mental health services..." [86257]

Client Diagnostic Questionnaire (Aidala et al)

Client Evaluation of Self and Treatment (Joe et al)

Client Observation (Laddis)
"This is a pilot rating scale...that consists of 5 items of observable behavior that are characteristic of behavioral crises in BPD and PTSD." [34757]

Client Perception Scale (Stalker and Fry)
"developed by the researchers to quantify changes in participants' feelings of shame and responsibility regarding the sexual abuse and feelings of self-acceptance" [20950]

Client Satisfaction Questionnaire (Larsen et al)

Client Satisfaction Questionnaire (Scott et al)
"developed for the current study" [27311]

Client Satisfaction Questionnaire (VA Puget Sound Health Care System)
"The CSQ is an unpublished 8-item, self-report questionnaire developed at VA Puget Sound Health Care System to assess satisfaction with the amount and quality of mental health care." [84088]
[used but not otherwise cited in 84088]
**Client Satisfaction Questionnaire-8 (Attkisson and Greenfield)**

**Client Satisfaction Survey (Damashek et al)**
"The questionnaire contains 18 items assessing clients' opinions about the services they received..." [86257]

**Client Self-Observation (Laddis)**
"This pilot rating scale...consists of 9 items concerning mental events underlying the observable behavior of Client Observation." [37457]

**Client Socio Demographic and Service Receipt Inventory (Chisholm et al)**
[used but not cited in 28162]

**Client Survey Receipt Inventory (Beecham and Knapp)**

**Client-Attorney Relationship Questionnaire (Child Custody Research Project)**
This is one of the "experimental measures developed by the Child Custody Research Project" of Harvard Medical School used in: Wolman, R; Taylor, K. Psychological effects of custody disputes on children. Behavioral Sciences and the Law 9: 399-417 (1991). [02646]

**Client's Perceptions Questionnaire (Edmond)**
"a semistructured interview schedule with 14 open-ended questions" [29958]

**Clinical Analysis Questionnaire (Krug)**

**Clinical and Demographic Interview (Islam-Zwart et al)**
"a semi-structured interview created by the authors" [19188]

**Clinical Anxiety Scale (Westhuis and Thyer)**
"The scale consists of 25 items that provide a clinical measure of anxiety, with higher scores suggesting higher anxiety." [23207]

**Clinical Assessment Form (Conte and Berliner)**
Conte, J R; Berliner, L. The impact of sexual abuse on children. Final report of NIMH project MH37133, October 1986. [cited in 02042]

**Clinical Data Form (Bradley et al)**
"The CDF assesses a range of variables relevant to demographics, diagnosis, and etiology." [19678]

**Clinical Data Form (Zittel Conklin and Westen)**

**Clinical Dementia Rating (Berg)**

**Clinical Diagnostic Interview (Edinburgh Trauma Service)**
"a clinical diagnostic interview that gives ICD-10 diagnoses" [38814]

**Clinical Diagnostic Interview (Westen and Muderrisoglu)**
"The CDI is a 2- to 3-hour systematic clinical interview designed to standardize the kind of interviewing approach typically used by experienced clinicians." [39570]
Clinical Ethnographic Interview (Saint Arnault and Shimabukuro)

"The CEI was developed [based on the DSM-IV Outline for Cultural Formation] to provide a user-friendly, engaging, ethnographically sound and thorough exploration of distress and help seeking across the life course." [39603]

Clinical Evaluation of Language Functions Screening Test (Semel and Wiig)

Semel, E; Wiig, E. Clinical Evaluation of Language Functions—Elementary and Advanced Level Screening Tests. Columbus, Ohio: Charles E. Merrill, 1980. [cited in 07798].

Clinical Evaluation of Language Fundamentals, Concepts, and Directions

[used but not cited in 25712]

Clinical Evaluation of Risk and Functioning Scale

"The CERF-R is an assessment tool designed by the clinician administrators of the Metro Suburban Area of the Massachusetts Department of Mental Health...for recording assessment of patients; current risk levels, functional abilities, and intensity of services provided." [29048]
Lambert, D R; McCorkle, B H; Fenby, B L; Patel, J N; Rubano, M; Vinter, P G. Clinical Evaluation of Risk and Functioning Scale—Revised (CERF-R). Westborough: MetroWest Area Office, Massachusetts Department of Mental Health, 1999. [cited in 29048, where the Scale appears on pp. 318-320]

Clinical Evaluation Protocol (Gardner)

"50 indicators for the child that are useful in assessing the traumatic effects of sex abuse and comparing such effects with other kinds of trauma to which abused children may be subjected" [18328]
Gardner, R A. Sex-Abuse Trauma?: Or Trauma from Other Sources? Cresskill, New Jersey: Creative Therapeutics, 2002. [18328; the Protocol appears on pp. 309-313]

Clinical Evaluation Record (Katz et al)

"a semi-structured interview" [81367]

Clinical Global Impression Scale (Guy)

UF: Clinical Global Inventory

Clinical Global Inventory

USE: Clinical Global Impression Scale (Guy)

Clinical Institute Withdrawal Assessment (Shaw et al)

Clinical Interview - Parent Report Form (Barkley)

"used to gather information regarding the child’s educational, medical, psychiatric, family, and social history" [82098]

Clinical Interview for Depression (Paykel)

Clinical Interview Schedule (Goldberg)

Clinical Measurement Package (Hudson)

UF: Child's Attitude Toward Father (Hudson)
Child's Attitude Toward Mother (Hudson)
Hudson Index of Self-Esteem
Hudson Scales
Index of Marital Satisfaction (Hudson)
Index of Parental Attitudes (Hudson)
Index of Peer Relations (Hudson)
Index of Self-Esteem (Hudson)
Index of Sexual Satisfaction (Hudson)

Clinical Mental Status Examination for Complex Dissociative Systems

USE: Mental Status Examination (Loewenstein)
Clinical Needs Assessment Instrument (Pfefferbaum et al)
“designed specifically for the 1995 Oklahoma City bombing” [21510]

Clinical Outcomes in Routine Evaluation
USE: CORE Battery

Clinical Rating Scale for the Circumplex Model of Marital and Family Systems (Olson and Killorin)

Clinical Risk Index for Babies (Cockburn et al)
Cockburn, F; Cooke, R W I; Gamsu, H; Greenough, A; Hopkins, A; McIntosh, N; Agstont, S A; Parrt, G I; Silverman, M; Shaw, I C L; Tarnow-Modit, W O. The CRIB (Clinical Risk Index for Babies) score: a tool for assessing initial neonatal risk and comparing performance of neonatal intensive care units. Lancet 342: 193-198 (1993). [cited in 40857]

Clinical Self-Rating Scales (Zerssen)
UF: Von Zerssen Complaints Checklist
Von Zerssen Depression Scale

Clinical Semi-Standardized Diagnostic Interview for PTED
Linden, M; Rotter, M; Baumann, K; Lieberei, B. Posttraumatic Embitterment Disorder: Definition, Evidence, Diagnosis, Treatment. Cambridge, Massachusetts: Hogrefe & Huber, 2007. [81670; the Interview appears on pp. 142-146]

Clinical Trauma Assessment (Ruch et al)
“The [19-item] CTA was designed to assess emotional, behavioral, and cognitive trauma by a clinician, based on the assumption that trauma experienced by victims of sexual assault would be reflected in their feelings, behaviors, and thought processes.” [80258]

Clinician Administered Assessment Interview for Adults (Falsetti et al)
USE: Potential Stressful Events Interview (Kilpatrick et al)

Clinician Administered PTSD Scale (Blake et al)
UF: CAPS

Clinician Administered PTSD Scale for Children (Nader et al)

Clinician Administered PTSD Scale, Child and Adolescent Version (Nader et al)
“a structured interview, modified from an adult version, [that] inquires about all DSM-IV PTSD symptoms, using developmentally appropriate language and visual aids” [22246]

Clinician Administered Traumatic Events Interview (Resnick et al)
Resnick, H S; Best, C L; Freedy, J R; Kilpatrick, D G. Clinician Administered Traumatic Events Interview. Unpublished assessment instrument, Crime Victim Research and Treatment Center, Department of Psychiatry and Behavioral Sciences, Medical University of South Carolina, Charleston, 1992. [cited in 13778]

Clinician Background Questionnaire (Najavits)
“a 30-item questionnaire designed to assess knowledge of some key points in the treatment of PTSD and SUD” [19892]
Najavits, L. Clinician Background Questionnaire. Unpublished scale, Harvard Medical School and McLean Hospital, 1992.

Clinician Beliefs Survey of Gulf War Symptoms (Richardson et al)
“consists of 19 self-report questions designed to assess beliefs about etiology, clinical course, and treatment in clinicians treating Gulf War veterans with chronic multisymptom illness” [23512]
Richardson, R D; Engel, C C; McFall, M; McKnight, K; Boehnlein, J K; Hunt, S C. Clinician attributions for symptoms and treatment of Gulf War-related health concerns. Archives of Internal Medicine 161: 1289-1294 (2001). [23512]
Clinician Rating of Behavioral Avoidance (Beidel et al)

"A 9-point Likert scale was used to rate the extent of the veteran's avoidance of situations associated with PTSD symptoms." [35248]
Beidel, D; C; Frueh, B; C; Uhde, T W; Wong, N; Mentrikoski, J M. Multicomponent behavioral treatment for chronic combat-related posttraumatic stress disorder: a randomized controlled trial. Journal of Anxiety Disorders, published online 19 September 2010 (DOI: 10.1016/j.janxdis.2010.09.006). [35248]

Clinician Self-Test on PTSD and Substance Abuse (Najavits)

"obtains descriptive variables on clinicians, including professional characteristics, personal characteristics, nd subjective professional characteristics" [19892]
Najavits, L. Clinician Self-Test on PTSD and Substance Abuse. Unpublished scale, Harvard Medical School and McLean Hospital, 1999.

Clinician Survey on PTSD and Substance Abuse (Najavits)

"consists of 40 items" [24360]
Najavits, L. Clinician Survey on PTSD and Substance Abuse. Unpublished measure, Harvard Medical School/McLean Hospital, 2000. [cited in 24360]

Clinician Time Tracking Form (Salloum and Storch)

"used to document all direct contact time with the parent and child" [85556]

Clinician-Administered Dissociative States Scale (Bremner et al)

"The CADSS is a 27-item scale with 19 subject-rated items and 8 items scored by an observer" [35722]

Clinician-Administered PTSD Scale for Schizophrenia (Gearon et al)

"The CAPS-S is a version of the CAPS adapted for use with patients with schizophrenia." [35722]

Clinicians' Trauma Reaction Survey (Thomas and Wilson)

"A questionnaire developed to assess empathic strains and countertransference reactions in the course of post-traumatic therapy" [19275]
Wilson, J P; Thomas, R B. Empathy in the Treatment of Trauma and PTSD. New York: Brunner-Routledge, 2004. [19275; the Survey appears on pp. 235-243]

Clock Drawing

[used but not cited in 91046]

Close Persons Questionnaire (Stansfeld and Marmot)

"This questionnaire assesses support received from and provided to nominated close persons." [36323]

Closure Scale (Beike and Wirth-Beaumont)

a 5-item scale that "assesses the amount an event continues to distress an individual" [85253]

Clyde Mood Scale

[used but not cited in 10797]

CMI Multitest

USE: Cutaneous Cell-Mediated Immunity Multitest (Institut Mérieux)

CNSIE

USE: Nowicki-Strickland Internal-External Control Scale for Children (Nowicki and Strickland)

Co-Dependency Assessment Inventory (Friel)

"measures 12 self-reported areas of concern about co-dependence in patterns of living and problem solving" [09337]
Friel, J C. Co-Dependency Assessment Inventory. Focus on Family, May-June 1985, pp. 20-21. [cited in 09337]

Co-Experiencing Community Violence (Linares and Cloitre)

"a measure modeled after the screening questions of the Crime Victimization Survey (Bureau of Justice Statistics)" [18584]

Co-Occurring Disorders Screening Instrument for Mental Disorders (Sacks et al)

Sacks, S; Melnick, G; Coen, C; Banks, S; Friedmann, P D; Grella, C; Knight, K; Zlotnick, C. CJDATS Co-Occurring Disorders: Screening Instrument (CODIS) for Mental Disorders (MD): a validation study. Criminal Justice and Behavior 34: 1198-1215 (2007). [cited in 32380]

Co-Occurring Joint Action Council Screening Tool

USE: COJAC Screening Tool
Co-Witnessing Community Violence (Linares and Cloitre)
"modeled after [Richters and Martinez's instrument Things I Have Seen and Heard]...included 11 questions about mother and child co-witnessing potentially traumatic events in their neighborhood in the past year" [18584]

Coach-Perceived Performance Rating
[used but not cited in 90983]

Cocaine Craving Questionnaire (Tiffany et al)
"assesses current craving for cocaine" [23243]

Cocaine Expectancy Questionnaire (Jaffe and Kilbey)

Cocaine Experience Questionnaire (Satel et al)

Cocaine Inventory (Bristol-Myers Squibb)
Bristol-Myers Squibb. Cocaine Inventory. Unpublished scale. [cited in 09357]

Cocaine Negative Consequences Checklist (Michaels et al)
"used to assess short-term and long-term adverse effects resulting from cocaine use" [33889]

Coddington Life Events Scale for Adolescents (Coddington)
USE: Coddington Life Events Scales (Coddington)

Coddington Life Events Scale for Children (Coddington)
USE: Coddington Life Events Scales (Coddington)

Coddington Life Events Scales (Coddington)
Coddington, R D. Life Event Scales for Children and Adolescents. [Available from author], 1981. [cited in 11164]
UF: Child's Social Readjustment Rating Scales (Coddington)
Coddington Life Events Scale for Adolescents (Coddington)
Coddington Life Events Scale for Children (Coddington)
Life Events Scales (Coddington)

Codependency Assessment Tool (Hughes-Hammer et al)
"contains 25 items that measure beliefs about the self and others" [80997]

Coercion Experience Scale (Bergk et al)
"The CES is an instrument to measure the psychological impact during psychiatric coercive interventions." [35376]
Bergk, J; Flammer, E; Steinert, T. "Coercion Experience Scale" (CES) -- validation of a questionnaire on coercive measures. BMC Psychiatry 10:5 (2010). [35376]

Cogniphobia Scale (Todd et al)
"designed to assess anxiety-based avoidant behavior with regard to cognitive exertion" [21084]
Todd, D D; Martelli, M F; Grayson, R L. The Cogniphobia Scale (C-Scale): a measure of headache impact. Unpublished test, 1998. [cited in 21084]

Cognition Checklist (Beck et al)

Cognition Scale (Abel and Becker)
Cognitive Abilities Test (Lohman and Hagen)
“The CogAT tests the general overall reasoning and problem-solving skills of students from kindergarten through Grade 12.” [30884]
[used but not usefully cited in 30884]

Cognitive Adaptation Index (Taylor)
[used but not cited in 92559]

Cognitive Adaptation Scale (Draucker)

Cognitive Appraisal Checklist (Gall and Evans)
“a list of 11 single-item adjectives and/or phrases...that are used to describe the nature of a stressful life event” [28892]

Cognitive Appraisal Inventory
[used but not cited in 90710]
UF: PRIMAPP

Cognitive Appraisal Measure (Frijda et al)

Cognitive Appraisal of Risky Events (Fromme et al)
“a 30-item survey...used to assess participants' perceptions of the risks, benefits, and personal expected future involvement in risky behaviors” [18419]

Cognitive Appraisal Questionnaire (Conway)
“based on an unpublished questionnaire developed by Prof. M. Conway” [24747]

Cognitive Appraisal Questionnaire (Lazarus and Folkman)

Cognitive Assessment of Minnesota

Cognitive Avoidance Questionnaire (Gosselin et al)
USE: Questionnaire d’Évitement Cognitive (Gosselin et al)

Cognitive Behavioral Assessment-2

Cognitive Behavioral Interview
[used but not cited in 31675]

Cognitive Complexity (Bieri)

Cognitive Control Battery (Santostefano)
UF: Fruit Distraction Test

Cognitive Coping Strategies Scale (Grootenhuis et al)
“The CCSS is a [22-item] instrument of disease-related cognitive coping [that] may be applied to children, adolescents, and young adults with any chronic disease.” [28023]
Stam, H; Grootenhuis, M A; Caron, H N; Last, B F. Quality of life and current coping in young adult survivors of childhood cancer: positive expectations about the further course of the disease were correlated with better quality of life. Psycho-Oncology 15: 31-43 (2006). [28023]

Cognitive Difficulties Scale (McNair and Kahn)
“a 39-item self-report questionnaire [assessing] self-perceived cognitive dysfunction” [23870]

Cognitive Distortion Scale (Briere)
Cognitive Distortions Scale (Najavits)
“The CDS is a 12-item measure designed to measure key cognitive distortions relevant to patients with the dual diagnosis of PTSD and substance use disorder.” [29540]

Cognitive Emotion Regulation Questionnaire (Garnefski et al)
“The CERQ is a 36-item questionnaire comprising 9 conceptually distinct subscales, each consisting of 4 items and each referring to what someone thinks after the experience of a threatening or stressful life event.” [27109]

Cognitive Errors Questionnaire (Lefebvre)

Cognitive Evaluation Protocol (McGuire et al)
“CEP is a computer touchscreen evaluation instrument with which subjects interact...CEP consists of 14 subtests that assess short-term and extended memory, attention, and functional capacities as well as mood (primarily depression).” [23159]

Cognitive Failures Questionnaire (Broadbent et al)
UF: CFQ

Cognitive Flexibility Scale (Martin and Rubin)
"The CFS is a 12-item measure that assesses one’s awareness that in any given situation there are alternative thoughts and behaviors that are possible, as well as the willingness to consider those alternatives." [37071]

Cognitive Interview (Fisher and Geiselman)
[cited in 90002 as Fisher and Geiselman, 1987]

Cognitive Intrusions Questionnaire (Freeston et al)

Cognitive Involvement Scale (Perse)

Cognitive Mental Status Examination
[used but not cited in 03454]

Cognitive Orientation Questionnaire (Kreitler and Kreitler)

Cognitive Processing of Trauma Scale (Williams et al)
"a 17-item scale to measure cognitive processing of traumatic experiences" [25188]
Williams, R W; Davis, M C; Milisap, R E. Development of the Cognitive Processing of Trauma Scale. Clinical Psychology and Psychotherapy 9: 349-360 (2002). [25188; the Scale appears on p. 360]

Cognitive Processing Questionnaire (Ehlers et al)
"developed through a series of studies carried out by the authors to assess data-driven versus conceptual processing of traumatic material” [25336]

Cognitive Processing Scale (McIntosh et al)
McIntosh, D N; Silver, R C; Wortman, C B. Religion’s role in adjustment to a negative life event: coping with the loss of a child. Journal of Personality and Social Psychology 65: 812-821 (1993).

Cognitive Processing Therapy Practice Survey
[used but not cited in 86801]

Cognitive Somatic Anxiety Questionnaire (Schwartz et al)

Cognitive Styles Inventory (Wells)
Cognitive Test Anxiety Scale (Cassady and Johnson)

"This is a 27-item measure developed to assess the tendency to exhibit anxious cognitions before, during, and after an exam." [34297]

Cognitive Therapy Scale (Young and Beck)

Cognitive Triad Inventory for Children (Kaslow et al)

"The CTI-C is a 36-item self-report measure that assesses self-perceived competencies and global self-worth in children and adolescents." [84049]

Cognitive-Affective Severity Scale (Krakow et al)

Krakow, B; Melendrez, D; Warner, T D; Clark, J O; Sisley, B N; Dorin, R; Harper, R M; Leahigh, L K; Lee, S A; Sklar, D; Hollifield, M. Signs and symptoms of sleep-disordered breathing in trauma survivors: a matched comparison with classic sleep apnea patients. Journal of Nervous and Mental Disease 194: 433-439 (2006). [28901]

Cognitive-Behavioral Avoidance Scale (Ottenbreit and Dobson)

"The CBAS is a 31-item self-report instrument that assesses avoidance strategies." [35518]

Cognitive-Somatic Anxiety Questionnaire (De Good and Tait)

Cohn-Kanade Facial Expression Database

The database consists of 100 university students who were videotaped while performing a series of 23 facial displays, 6 of which were of basic emotions. [38637]

COJAC Screening Tool

"a 9-item screening tool for co-occurring disorders" [37161]

UF: Co-Occurring Joint Action Council Screening Tool

Cole Coherence Inventory

"the CCI is a 7-point Likert-type, 12-item measure that addresses perceived clarity of thoughts and feelings regarding a stressful life event..." [82609]
Cole, B; Garofalo, J P; Henderson, B N. The psychometric properties of the Cole Coherence Inventory. Journal of Traumatic Stress, "in development". [cited in 82609]

Collaborative Psychiatric Epidemiology Surveys

[used but not cited in 92950]

Collaborative Study Psychotherapy Rating Scale

Collateral Interview (Miller and Marlatt)

"a 15-minute telephone interview with a significant other" [34989]

Collective Efficacy Measure (Benight)

"A 12-item measure of collective efficacy was developed [to measure] how well [participants] felt the community could currently manage the community-wide responses to a future disaster." [18790]
[18790; the Measure appears on p. 419]

Collective Self-Esteem Scale (Luhtanen and Crocker)

College Adjustment Scales (Anton and Reed)

College Event Scale (Marx et al)

College Student Health Survey (University of Minnesota)
"The CSHS...was designed to serve as a surveillance tool to monitor the health of Minnesota's college students." [37152] [used but cited only as a web document in 37152]

College Student Life Events Schedule (Sandler and Lakey)

College Students Life Events Scale (Levine)
Levine, M. *College Students Life Events Scale*. Buffalo: State University of New York, 1980. [cited in 22752]

Collett-Lester Fear of Death Scale

Color-A-Person Body Image Test
[used but not cited in 90920]

Colorado Adolescent Rearing Inventory (Crowley et al)

Colored Analogue Pain Scale (Brigham et al)

Columbia Baseline Demographic Form
"demographic information, including childhood experiences such as a history of physical or sexual abuse before age 15" [20405] [used but not cited in 20405]

Columbia Demographic and Treatment History Interview

Columbia Impairment Scale (Bird et al)

Columbia Suicide History Form
"semistructured instrument that elicits information about lifetime suicide attempts, the method employed, medical lethality, precipitants, and surrounding circumstances" [24288] Brodsky, B S; Oquendo, M; Ellis, S P; Haas, G L; Malone, K M; Mann, J M. The relationship of childhood abuse to impulsivity and suicidal behavior in adults with major depression. *American Journal of Psychiatry* 158: 1871-1877 (2001). [24288]

Columbia University Rating Scale

Combat Direct Experiences (Novaco et al)
"8 newly created items were used to index the frequency of exposure to attacks common to OEF-OIF war theater." [37970] Novaco, R W; Swanson, R D; Gonzalez, O J; Gaehm, G A; Reger, M D. Anger and postcombat mental health: validation of a brief anger measure with U.S. soldiers postdeployed from Iraq and Afghanistan. *Psychological Assessment*, in press (DOI: 10.1037/a0026636). [37970]

Combat Evaluation Scale (Shalev et al)
"assesses subjects' perceptions of 12 elements of the unit's function before and during combat" [20535] Shales, A Y; Peri, T; Rogel-Fuchs, Y; Ursano, R J; Marlowe, D. Historical group debriefing after combat exposure. *Military Medicine* 163: 494-498 (1998) [20535]

Combat Experience Log (Lee et al)

Combat Experience Questionnaire (Figley)
USE: Vietnam Veteran Survey (Figley)
Combat Experience Questionnaire (Wilson and Krauss)
USE: Vietnam Era Stress Inventory (Wilson and Krauss)

Combat Experience Scale (Burgess)

Combat Experience Scale (Hunt)
"developed for the study"

Combat Experience Scale (McNally et al)
"The CES is a rationally-derived, 22-item questionnaire based on the Peacekeeping Incidents and Experiences Scale." [85210]

Combat Experience Scale (Villereal)
"an eight-item scale...developed by the author" [20371]

Combat Experiences and Specific Stressors Questionnaire (Wilson and Krauss)
USE: Vietnam Era Stress Inventory (Wilson and Krauss)

Combat Experiences Scale
"The CES is a 33-item measure that assesses exposure to combat." [92884]
[used but not cited in 92884]

Combat Experiences Scale (King and King)
USE: Deployment Risk and Resilience Inventory (King et al)

Combat Experiences Survey (Walter Reed Army Institute of Research)
"a 36-item scale that measures combat intensity based on frequency and type of combat experiences" [39135]
[used but not cited in 39135]

Combat Exposure Index (Janes et al)

Combat Exposure Scale (Egendorf)
USE: Combat Exposure Scale (Legacies of Vietnam)

Combat Exposure Scale (Foy and Mueser)
USE: Combat Exposure Scale (Lund et al)

Combat Exposure Scale (Foy et al)
USE: Combat Exposure Scale (Lund et al)

Combat Exposure Scale (Friedman et al)

Combat Exposure Scale (Hoge et al)
"Combat exposure among post-Iraq soldiers was assessed using 29 items" [28969]

Combat Exposure Scale (Keane et al)
"a 7-question self-report scale" [35232]

Combat Exposure Scale (Legacies of Vietnam)

UF: Combat Exposure Scale (Egendorf)
Combat Scale (Egendorf)
Combat Scale (Laufer et al)
Combat Scale Revised (Gallops et al)
Combat Scale Revised (Laufer et al)
Laufer Combat Scale (Laufer et al)
Revised Combat Scale (Gallops et al)
**Combat Exposure Scale (Lund et al)**

UF: Combat Exposure Scale (Foy et al)
Combat Exposure Scale (Foy and Mueser)
Vietnam Experience Scale (Lund et al)

**Combat Exposure Scale (MHAT)**
16 items

**Combat Exposure Scale (Neria et al)**
"a specially designed self-report scale consisting of 23 items tapping war experiences" [22017]

**Combat Exposure Scale (Rosenheck et al)**
"The CES is a 34-item scale designed to assess presence and frequency of prominent war zone stressors." [09566]

**Combat Guilt Scale (Henning and Frueh)**
"This 18-item scale was created for the present study as an exploratory measure of combat guilt severity." [09948]

**Combat Index (Boulanger and Kadushin)**

**Combat Intensity Scale**
[used but not cited in 90269]

**Combat Loss Questionnaire**
[used but not cited in 91156]

**Combat Rating Scale (Center for Policy Research)**

**Combat Readiness Morale Questionnaire**
"widely used in the Israeli Army and also adapted for use with U.S. troops" [26748]

**Combat Scale (Egendorf)**
[used but not cited in 90269]

**Combat Scale (Laufer et al)**
[used but not cited in 91156]

**Combat Scale Revised (Gallops et al)**
[used but not cited in 90269]
Combat Trauma Art Therapy Scale (Lande et al)
"The CATS consisted of 62 items aimed to detect common themes associated with war time experiences." [35905]
Lande, R G; Tarpley, V; Francis, J L; Boucher, R. Combat Trauma Art Therapy Scale. The Arts in Psychotherapy 37: 42-45 (2010). [35905]

Combat-to-Home Transition Scale (Adler et al)
"a 16-item scale...that measures positive and negative aspects of returning home from combat” [85503]

Combined Alliance Short Form (Hatcher et al)
"The CASF is a measure of therapeutic alliance that was developed through a factor analysis of three major alliance measures (the California Psychotherapy Alliance Scales, the Working Alliance Inventory, and the Helping Alliance Questionnaire)..." [27169]

Commitment Inventory (Stanley and Markman)

Common Behavior Problems Inventory (Lapouse and Monk)
"This questionnaire was adapted for the present study from the list of children's most frequent behavior problems developed by Lapouse and Monk.” [25453]

Communal Support Beliefs Scale (Toubiana et al)
"8 items referring to the current level of perceived support” [82139]

Communal Traumatic Experience Inventory (Weine et al)
"a 30-item, clinician-administered questionnaire”

Communication Conflict Instrument (Brown et al)

Communication Danger Signs Scale (Stanley and Markman)
"used to assess problematic communication patterns” [34420]

Communication of Diagnosis Questionnaire (McGarvey)
"a semistructured questionnaire that inquires about the context in which the patient became informed about their diagnosis of cancer” [21150]
[used but not clearly cited in 21150]

Communication Questionnaire (Lichtman)

Communications Pattern Questionnaire (Christensen and Sullaway)
"assesses perception of problem-solving interactions” [26362]
Christensen, A; Sullaway, M. Communications Pattern Questionnaire. Unpublished instrument, University of California, Los Angeles, 1984. [cited in 26362]

Community and Interpersonal Connectedness Scale (Dorahy et al)
"The CICS was designed specifically for this study, It contains 5 items that assess the degree to which participants feel emotionally connected to their family, friends and community.” [31609]
Dorahy, M J; Corry, M; Shannon, M; MacSherry, A; Hamilton, G; McRobert, G; Elder, R; Hanna, D. Complex PTSD, interpersonal trauma and relational consequences: findings from a treatment-receiving Northern Irish sample. Journal of Affective Disorders 112: 71-80 (2009). [31609]

Community Assessment of Psychic Experiences (Stefanis et al)
"This validated self-report questionnaire measures the lifetime prevalence of psychotic-like experiences on a frequency scale ranging from ‘never’ to ‘nearly always’. " [36776]
Stefanis, N C; Hanssen, M; Smimis, N K; Avramopoulos, D A; Evdokimidis, I K; Stefanis, C N; et al. Evidence that three dimensions of psychosis have a distribution in the general population. Psychological Medicine 32: 347-358 (2002). [cited in 36776]
Community Assessment of Resilience Tool (Pfefferbaum et al)
"a screening tool used to assess 7 areas of community resilience related to participants’ perceptions of their community’s ability to deal with problems” [35742]
Pfefferbaum, R L; Pfefferbaum, B; Wyche, K F; Norris, F; Klomp, R; Reissman, D. The Community Assessment of Resilience Tool (CART): Survey Instrument. Oklahoma City: University of Oklahoma Health Sciences Center, Terrorism and Disaster Center, 2006. [cited in 35742]

Community Attitudes Questionnaire (Hugo et al)
[instrument not named in source; name supplied by PILOTS Database staff]

Community Attitudes to Mental Illness Scale (Taylor and Dear)
"The CAMI measures attitudes in the general population about mental illness and has 40 items covering 4 sub-scales including: Authoritarianism, Benevolence, Social Restrictiveness, [and] Community Mental Health Ideology.” [35791]

Community Cohesion Interview (Pérez-Sales)
"a 19-item semi-structured interview…specifically designed for…the cultural context of El Salvador” [26946]

Community Experience Survey
"An abbreviated form of the Survey of Children's Exposure to Community Violence”
USE: Survey of Children’s Exposure to Community Violence (Richters and Saltzman)

Community Experiences Questionnaire (Schwartz and Proctor)
"a self-report assessment of exposure to violence in the community, newly developed for this study” [22774]

Community Integration Questionnaire (Willer et al)
"The CIQ is a 15-item measure that was designed to index functioning in the home, social settings, and productivity contexts following TBI!” [21712]

Community Oriented Programs Environment Scale (Moos)

Community Participatory Evaluation Tool
"A tool…that encapsulated community standards for children’s well being and proper development in a wide variety of circumstances” [19759]

Community Readiness Model (Edwards et al)
"This model assesses 6 dimensions: knowledge about the issue, existing efforts related to the issue, knowledge of efforts, leadership, resources, and community climate.” [85822]

Community Reintegration of Servicemembers (Resnik et al)
"The CRIS is a new measure of community reintegration developed to be a veteran-specific outcome measure”, comprising 3 subscales: Extent of Participation (50 items), Perceived Limitations (54 items), and Satisfaction with Participation (47 items). [36353]

Community Services Questionnaire (Dillenburger et al)
"designed for this study”

Community Survey Questionnaire (Earls)

Community Trouble Making Questionnaire (Sells et al)
"This instrument of precipitation of disruptive behavior was developed for this study” [26049]
Sells, D; Styron, T; Shahar, G; Chinmab, M; Davidson, L. Predictors of community adjustment in a sample of patients with severe mental illness. Manuscript submitted for publication, June 2002. [cited in 26049]
Community Violence Exposure Survey (Saltzman et al)  
"The CVES is a 25-item self-report inventory of community violence exposure adapted from the widely used Survey of [Children's] Exposure to Community Violence (Richters and Saltzman)" [23920]  
Saltzman, W R; Layne, C M; Steinberg, A M. Community Violence Exposure Survey (CVES). Unpublished test, University of California, Los Angeles, 1998. [cited in 23920]

Community Violence Modified Scale  
"this 34-item questionnaire is based on a brief measure of community violence used by Dailey et al" [18141]  

Community Violence Scale (Foy et al)  
Foy, D W; Guevara, M V; Camilleri, A J; Leskin, G; Layne, C M; Gaba, R J; Raia, J; Wood, J L. Community violence. In: Miller, D J (ed.). Handbook of Posttraumatic Stress Disorders. In press. [cited in 20163]

Community Violence Survey (Thomson et al)  

Comparative Psychotherapy Process Scale (Blagys et al)  
"The CPPS is a measure of psychotherapy process designed to assess therapist activity, process variables, and psychotherapy techniques used and occurring during the therapeutic hour." [27169]  
Blagys, M D; et al. Manuscript submitted for publication, 2004? [cited in 27169]

Compass of Shame Scale (Elison et al)  
"The CoSS measures 4 behavioral coping responses to shame": avoidance, withdrawal, attack self, and attack other [40525]  

Compassion Fatigue Self Test for Practitioners (Figley)  

Compassion Fatigue/Satisfaction Scale  
[used but not cited in 91242]

Compassion Satisfaction and Fatigue Test  
USE: Compassion/Satisfaction Fatigue Test for Helpers (Stamm and Figley)

Compassion/Satisfaction Fatigue Test for Helpers (Stamm and Figley)  
a "66-item self-report...used to measure secondary traumatic stress and role satisfaction" [16712]  

UF: Compassion Satisfaction and Fatigue Test

Compassionate Love Scale (Sprecher and Fehr)  
"21 items with a single score that assesses compassionate or altruistic love" [87358]  

Competence Scale (Bezinovic)  

Competent Behavior Scale  
USE: Teacher-Child Rating Scale (Hightower et al)

Competing Set Test (Block and Block)  

Complementary Medicine Use Scale (Richardson et al)  
40 items  

Complex Figure Test (Rey)  
Rey, A. L'examen physiologique dans les cas d'encephalopathie traumatique. Archives de Psychologie 28: 286-339 (1941). [apan 149]  
UF: Rey-Osterrieth Complex Figure
Complex PTSD Questionnaire for Trauma Survivors (Williams)

Complex Reaction Time Task
"a measure of motor-related speed of information processing" [14470]

Complex Reactionmeter Drenovac Series
"a system of electronic psychodiagnostic instruments" [08993]
[used but not cited in 08993]

Complicated Grief Assessment (Zhang et al)
"a clinician administered semi-structured interview for assessing CG...based on the self-report Inventory of Complicated Grief" [31623]

Complicated Grief Assessment Scale (Prigerson et al)
"This is a standard 12-item instrument that assesses the traumatic grief reactions within the previous one month." [37780]

Complicated Grief Module (Einsle et al)

Complicated Grief Module (Horowitz et al)
"The 27 items of the CGM measure intrusions of sudden images of the deceased, avoidance of thoughts, experiences as well as partially numbing emotions and inhibiting themes related to the deceased person as well as maladaptation." [37679]

Complicated PTSD Inventory
[used but not cited in 90243]

Component Work Sample Series

Composite Abuse Scale (Hegarty et al)
"self-report scale of experience of domestic violence in the past 12 months, consisting of 46 statements" [09118]

Composite Dream Rating Scales (Siegel)
"133 discrete themes" [14604]

Composite International Diagnostic Interview (Robins et al)
Robins, L N; Wing, J; Witchen, H U; Heizer, J E; Babor, T F; Burke, J D; Farmer, A; Jablenski, A; Pickens, R; Regier, D A; Sartorius, N; Towle, L H. The Composite International Diagnostic Interview (CIDI): an epidemiologic instrument suitable for use in conjunction with different diagnostic systems and in different cultures. Archives of General Psychiatry 45: 1069-1077 (1988). UF: CIDI

Composite International Diagnostic Interview Post-Traumatic Stress Disorder Module (Peters et al)

Composite International Diagnostic Interview Substance Abuse Module (Robins et al)
Robins, L N; Cottler, L B; Babor, T F. The WHO/ADAMHA Composite International Diagnostic Interview—Substance Abuse Module (SAM). St. Louis: [n.p.], 1983. [cited in 21235]

Composite International Diagnostic-Screener (Wittchen et al)
Composite Symptoms Checklist (Saint Arnault and Shimabukuro)
"a 130-item multidimensional symptom measure adapted from standardized somatic, affective, and interpersonal checklists" [39603]

Compound Core Beliefs Questionnaire (Apsche et al)

Comprehension of Consent and Coercion Scale (Gibson and Humphrey)
[used but not cited in 93678]

Comprehensive Addiction Severity Index-Adolescents (Meyers)
"modeled after the Addiction Severity Index" [07803]

Comprehensive Addictions and Psychological Evaluation (Hoffman)
"The CAAPE is a structured diagnostic assessment interview compatible with DSM-IV-TR criteria for 8 Axis I and 6 Axis II disorders." [37103]

Comprehensive Assessment of At Risk Mental States (Yung et al)
"a semi-structured interview designed to assess the ultra high risk [for psychosis] criteria" [34603]
Yung, A R; Yuen, H P; McGorry, P D; Phillips, L; Kelly, D; Dell'Olio, M; Francey, S; Cosgrave, E; Killackey, E; Stanford, C; Godfrey, K; Buckby, J. Mapping the onset of psychosis — the Comprehensive Assessment of At Risk Mental States (CAARMS). Australian and New Zealand Journal of Psychiatry 39: 964-971 (2005). [cited in 34603]

Comprehensive Assessment of Defense Style (Laor et al)
"assesses the child's use of defensive behavior in the face of challenging stressful situations" [23463]

Comprehensive Assessment of Satisfacation with Care (Bredart et al)

Comprehensive Assessment of Symptoms and History (Andreassen et al)

Comprehensive Child Maltreatment Scales (Higgins and McCabe)
Higgins, D J; McCabe, M P. The development of the Comprehensive Child Maltreatment Scales. Manuscript submitted for publication, [1999?]. [cited in 15305, where the Comprehensive Child Maltreatment Scale for Adults is published]

Comprehensive Clinical Evaluation Program for Gulf War Veterans

Comprehensive Drinker Profile (Miller and Marlatt)

Comprehensive Effects of Alcohol Questionnaire (Fromme et al)
"The CEO-A is a 38-item self-report measure that asks respondents about the expected effects that consuming alcohol will have for them." [39465]

Comprehensive Occupational Therapy Evaluation Scale (Brayman et al)

Comprehensive Personality and Affect Scales (Lubin and Van Whitlock)
"The COPAS is a self-report instrument that provides a measure of multiple dimensions of personality and affect." [81070]

Comprehensive Psychopathological Rating Scale (Åsberg et al)
Comprehensive Quality of Life Scale (Cummins)

"The COMQOL is a 35-item self-report questionnaire that utilizes both objective and subjective measures for quality of life within seven domains: Material Well-being; Health; Productivity; Intimacy; Safety; Place in Community; and Emotional Well-being." [24771]

Cummins, R. The Comprehensive Quality of Life Scale (ComQol), 4th ed. Melbourne: School of Psychology, Deakin University, 1994. [cited in 24771]

Comprehensive Sexual Assault Assessment Tool
[cited confusingly in 80165]

Comprehensive Suicide Risk Assessment
[used but not cited in 39289]

Comprehensive TBI Evaluation (Veterans Health Administration)

Comprehensive Test of Phonological Processing (Wagner et al)
"The CTOPP measures phonological processing skills, including phonological awareness, phonological memory, and rapid automatized naming." [82336]

Wagner, R; Torgesen, J K; Rashotte, C. Comprehensive Test of Phonological Processing. Austin, Texas: Pro-Ed, 1999. [cited in 82336]

Comprehensive Trail Making Test (Reynolds)
"The CTMT consists of a timed pencil-and-paper task divided into five parts or trails that operationally define additional important basic and complex components of executive function not seen in the commonly used Trail Making A and B tasks." [29815]

Comprehensive Trauma Interview (Barnes et al)
"A semistructured interview that queries specific traumatic experiences across several domains" [37659]

Comprehensive Trauma Interview (Horowitz)
"The CTI is a semistructured interview...that seeks to elicit factual information concerning traumatic or upsetting life events as well as subjective responses to those events." [15084]

Comprehensive Trauma Inventory (Hollifield et al)
a 164-item "empirically developed instrument that measures war-related events in community-dwelling refugees" [28084]

Hollifield, M; Eckert, V; Warner, T D; Jenkins, J H; Krakow, B; Ruiz, J; Westermeyer, J J. Development of an inventory for measuring war-related events in refugees. Comprehensive Psychiatry 46: 67-80 (2005). [28084]

Comprehensive Treatment History Interview (Miller)
Miller, W R. Comprehensive Treatment History Interview. Unpublished manuscript, University of New Mexico, 1994. [cited in 24827]

Compulsive Activity Checklist (Foa et al)
A 38-item questionnaire version of the Obsessive-Compulsive Interview (Marks et al)

Compulsive Sexual Behavior Inventory (Coleman et al)

Computer Assisted Maltreatment Inventory (DiLillo et al)
"The CAMI is a web-based instrument designed to assess maltreatment history from adults age 18 and over." [34564]

DiLillo, D; Hayes-Skelton, S A; Fortier, M A; Perry, A R; Evans, S E; Messman Moore, T L; Walsh, K; Nash, C; Fauchier, A. Development and initial psychometric properties of the Computer Assisted Maltreatment Inventory (CAMI): a comprehensive self-report measure of child maltreatment history. Child Abuse and Neglect 34: 305-317 (2010). [34564]

Computer-Administered Spatial Span
"A newly developed visual attention span and working memory measure" [91279]

Computer-Assisted Maltreatment Inventory (DiLillo et al)
"The CAMI is a Web-based, self-report questionnaire designed to assess a broad range of childhood maltreatment experiences, including sexual abuse, physical abuse, psychological abuse, and neglect." [80883]

DiLillo, D; Hayes, S; Fortier, M A; Perry, A R; Evans, S; Messman-Moore, T L; et al. Comprehensive assessment of child maltreatment history: development and initial psychometric evaluation of the Computer-Assisted Maltreatment Inventory (CAMI). Manuscript submitted for publication, 2006. [cited in 80883]
Computer-Assisted Psychosocial Assessment-II (Barnard et al)

Computerized Aptitude Test for Children (Pépin and Loranger)
USE: Test d’Aptitude Informatisé (Pépin and Loranger)

Computerized Assessment of Response Bias Test (Allen and Cox)
"specifically designed to assess feigning, symptom exaggeration, and malingering" [21710]

Computerized Diagnostic Interview Schedule for DSM-III-R

Computerized Diagnostic Interview Schedule for DSM-IV (Cottler et al)
"The C-DIS-IV is a structured interview designed to establish the presence or absence of major psychiatric disorders as defined by the DSM-IV." [40101]
Cottler, L B; Bucholz, K K; Compton, W M; North, C S; Rourke, K M. Diagnostic Interview Schedule for the DSM-IV (DIS-IV). St Louis; Washington University, 2000. [cited in 40101]

Computerized Neurocognitive Battery - Penn

Computerized PTSD Scale (Richard)
a computerized, self-administered version of the Clinician-Administered PTSD Scale

Computerized Severity Index (Horn et al)
"Using clinical data abstracted from medical records, the CSI provides an overall maximum severity score for each patient that is based on the severity of all existing disease states." [20002]
Horn, S D; Sharkey, P D; Buckley, J M; Backofen, J E; Averill, R F; Horn, R A. The relationship between severity of illness and hospital length of stay and mortality. Medical Care 29: 305-317 (1991). [cited in 20002]

Concentration Performance Test (Düker and Lienert)
USE: Konzentrations-Leistungstest (Düker and Lienert)

Concern for Children Scale

Concern for Others Scale
a 10-item scale that "measures the child’s feeling of concern for, and desire to help other people (prosocial behavior)" [36103]

Concerns About Retirement Scale (Potter et al)
"This [16-item self-report] measure assesses the extent to which retirement or impending retirement has created worry or distress." [39562]
Potter, C M; Kaiser, A P; King, L A; King, D W; Davison, E H; Seligowski, A V; Brady, C B; Spiro, A. Distinguishing late-onset stress symptomatology from posttraumatic stress disorder in older combat veterans. Aging and Mental Health (published online, 2012; DOI: 10.1080/13607863.2012.717259). [39562]

Concreteness of Thinking Questionnaire (Ehring et al)
"The CTQ was developed for this study to assess the participants' perception of how concrete their thinking was during the manipulation." [32151]

Condition Inventory and Fear Features
[used but not cited in 34265]

Condom Use Attitudes (Brown et al)
"8 items related to perceived reactions to condoms" [39890]

Condom Use Self-Efficacy Scale (Lawrence et al)
Conflict and Emotional Disorders at Age 17 (Sanford et al)

Conduct Disorder Questionnaire (Brown et al)
"The CDQ is a DSM-III-R/DSM-IV-based measure consisting of a structured interview querying lifetime rates of conduct disorder and anti-social personality disorder behaviors." [16622]

Confidence in Pain Management Scale (Shugarman et al)
"constructed... to assess self-efficacy" [36544]
Shugarman, L R; Goebel, J R; Lanto, A; Asch, S M; Sherbourne, C D; Lee, M L; Rubenstein, L V; Wen, L; Meredith, L; Lorenz, K A. Nursing staff, patient, and environmental factors associated with accurate pain assessment. Journal of Pain and Symptom Management 40: 723-733 (2010). [36544]

Confidence Scale (Schwartz et al)
"a self-report measure which asks the subject to rate confidence in ability to cope with aspects of encounters with children" [85898]

Confidence, Familiarity, and Anxiety in Disclosing Measure (O’Kearney et al)
"developed for this study" [85898]

Confidence/Temptation Scales (Kennedy)
"The CTS is a [36-item] measure of self-efficacy for leaving a violent relationship, developed and patterned after the construct as it is used in the transtheoretical model of change." [22300]

Conflict Behavior Questionnaire (Robin and Foster)

Conflict in Adolescent Dating Relationships Inventory (Wolfe et al)
"a 35-item measure of physical, verbal, and sexual abuse relating to adolescent dating partners" [23217]
Wolfe, D A; Scott, K; Reitzel-Jaffe, D; Wekerle, C; Grasley, C, Pittman, A L. development and validation of the Conflict in Adolescent Dating Relationships Inventory. Psychological Assessment, in press. [cited in 23217]

Conflict in Relationships Inventory (Wolfe et al)
"The CRI Inventory is a 60-item instrument that uses a 3-point scale to measure the frequency of physically, sexually, and emotionally abusive behaviors engaged in by the respondent toward a dating partner over the past year." [15827]
Wolfe, D A; Reitzel-Jaffe, D; Gough, R; Wekerle, C. Conflict in Relationships Inventory. Unpublished measure, University of Western Ontario, 1994.

Conflict in Relationships Questionnaire (Wolfe et al)
Wolfe, D A; Reitzel-Jaffe, D; Gough, R; Wekerle, C. Conflicts in Relationships: Measuring Physical and Sexual Coercion among Youth. London, Ontario: Youth Relationships Project, Department of Psychology, University of Western Ontario, 1994. [cited in 20225]

Conflict Over Child Rearing Scale (Snyder)
This is a subscale of the Marital Satisfaction Inventory.
USE: Marital Satisfaction Inventory (Snyder)

Conflict Resolution Inventory (McFall)

Conflict Resolution Strategies Scale
[used but not cited in 20562]

Conflict Scale (Haning et al)
9 items "used to assess conflict between sexual partners" [86646]

Conflict Tactics Scale for Children (Straus)
[cited only as “Straus, 1985” in 91188]

Conflict Tactics Scales (Straus)
Conflict Tactics Scales-Revised (Hornung et al)

Conflicts and Problem-Solving Scales (Kerig)
"assesses several dimensions of conflict, such as frequency, verbal and physical aggression, as well as child involvement, or triangulation, in the parents' conflicts" [14746]

Confusion Assessment Method for the Intensive Care Unit

Confusion, Hubbub, and Order Scale (Matheny et al)
"The CHAOS is a 15-item questionnaire assessing characteristics of noise, confusion, clutter, frantic activities, and disorganization in the household." [40277]

Congestive Heart Failure Index (Polanczyk et al)

Connection to the Gay or Lesbian Community Scale (Szymanski et al)

Conners Adult ADHD Rating Scales
"This 26-item scale [in the Short Version] assesses the core symptoms of ADHD, plus some related problem areas." [28521]

Conners Parent Questionnaire
USE: Conners Teacher Rating Scale (Conners)

**Conners Parent Rating Scale**
"consists of 80 items and contains subscales for anxiety, attention deficit, and externalizing behaviors" [82720]

Conners Teacher Rating Scale (Conners)

**UF:** Abbreviated Conners Teacher Rating Scale
Conners Parent Questionnaire
CTRS
Hyperkinesis Index

Connor-Davidson Resilience Scale
a 25-item scale

Consequences of Screening Tool (Lock)
"The COST is a multidimensional questionnaire that measures the effect of being asked IPV screening questions; it was developed for this study." [32865]

Consequences of Work-Related Traumatic Events Scale (Alden and Laposa)
"The CWTE was developed...to assess work-related consequences following emotionally distressing emergency room events.” [31597]

Conservation of Resources - Evaluation (Hobfoll and Lilly)
"used to measure the degree to which women had experienced global resource losses during the most recent 3 months” [19489]
Consistency Questionnaire (Peace and Porter)
“This questionnaire was designed for use in the present research, and was intended to assess consistency in the details of memory reports.” [27167]

Consonant Trigrams Test (Peterson and Peterson)

Constructive Thinking Inventory (Epstein and Meier)
“a 32-item scale that measures coping abilities not associated with intelligence” [06759]

Consultation Evaluation Form (Nelson et al)
“This form is a 28-item satisfaction measure that assesses practitioners’ opinion of consultations.” [86256]

Consumer Perceptions of Care (Clark et al)
5-item scale that “assesses perceptions of choice in services, including choice to leave services without being punished” [32997]
Clark, C; Young, M S; Jackson, E W; Graeber, C; Mazelis, R; Kammerer, N; et al. Consumer perceptions of integrated trauma-informed services among women with co-occurring disorders. *Journal of Behavioral Health Services and Research* 35: 71-90 (2008). [cited in 32997]

Consumer Satisfaction Survey (Bray and Kehle)
“originally developed...to assess students' perceptions and acceptability of an intervention to ameliorate stuttering” [81092]

Consumer Satisfaction Survey (Group Health Association of America)

Consumption and Generation of Social Support Scale (Bertera)
“12-item measure of perceptions of social support received in the past few months” [35106]

Contemporary Topics Questionnaire (Lerner et al)

Content Analysis of Dreams Scale (Hall and Van de Castle)
[used but not cited in 90671]

Content Analysis of Verbatim Explanations Technique (Schulman et al)
“CAVE involves extracting causal attributions from event narratives and rating those attributions using trained judges blind to both the event and symptom status of participants.” [08684]

Contextual Memory Test (Toglia)

Contextual Priming Paradigm (Chun and Jiang)
unnamed paradigm used “to measure learning effects” [34107]; name assigned by PILOTS Database staff

Contextual Rating System (Brown and Harris)

Contingencies of Self-Worth Scale (Crocker and Wolfe)
“consists of 35 items that measure an individual’s basis of self-worth” [82531]

Continuing Bonds with the Deceased (Field)
“This is a 16-item measure assessing the ongoing relationship with the deceased.” [83597]

Continuing Emotional Involvement Scale (Dutton and Painter)
“a 20-item measure adapted from [scales by] Kitson and NiCarthy” [09805]
Continuous Performance Test (Conners)

Continuous Performance Test (Gray)
"a measure of working memory" [38222]

Continuous Performance Test (Kay)

Continuous Performance Test (Loong)

Continuous Performance Test (Seidman et al)
"The Seidman CPT is an auditory continuous performance task that involves listening to a series of letters read out loud and tapping one’s finger in response to specific rules, varying by condition. It satisfactorily differentiates between children who have ADHD and healthy control children." [33089]

Contour Integration Test (Kovacs et al)
"It consists of 15 cards which contain varying numbers of Gabor elements against a uniform gray background." [28156]

Control Atitudes Scale (Moser and Dracup)
"This [4-item] instrument was developed specifically to measure the degree to which individuals perceive situational control (and conversely, helplessness) related to their heart disease." [34383]

Control Attributes and Expectations Questionnaire (Clements)
"a modified version of the Attributional Style Questionnaire [developed] to assess perceived control over actual life events, confidence in control perceptions, and expectations of control for future use" [15117]

Control Preferences Scale (Degner and Sloan)
"assessed the participant’s preference for involvement in decisions about the patient’s medical care" [31365]

Control Scale (Whitaker et al)
a 7-item "personality-based/dispositional measure relating to a child’s perceived control over the future" [35597]

Controllability Awareness Inventory (Todrank Heth and Somer)
"measures the tendency to respond [to daily life situations] based on an awareness of the controllability of potential outcomes" [18721]

Controllability Beliefs Scale (Dagnan et al)
"includes items that concern whether the carer believes that the person being cared for is able to control the behaviour and items that concern whether the carer believes the behaviour to be motivated by hostile intentions" [32885]

Controlled Oral Word Association Test (Benton)
UF: Benton Controlled Oral Word Association
Controlling Behavior Scale (Tutty et al)
"a list of seven statements...regarding a variety of control situations commonly reported by abuse victims" [21566]

Cook-Medley Hostility Scale (Cook and Medley)
a hostility scale based on the MMPI, attributed to Cook and Medley (1954)

Coolidge Axis II Inventory
Coolidge, F. *The Coolidge Axis II Inventory*. Clermont, Florida: Synergistic Office Solutions, m.d. [cited in 20213]

Coping Checklist (Billings and Moos)
"measure the time that parents and children are engaged in coordinated joint attention" [35788]

COPE Inventory (Carver et al)
USE: Coping Orientations to Problems Experienced Inventory (Carver et al)

Copenhagen Burnout Inventory
"The CBI is a 19-item self-report inventory measuring three types of burnout: personal, work, and patient burnout." [35093]

Copenhagen Psychosocial Questionnaire

Coping Activities Checklist (Wadsworth et al)
"The 12-item CAC assessed coping activities specific to the events of September 11th..." [30315]
Wadsworth, M E; Gudmundsen, G R; Raviv, T; Ahlqvist, J A; McIntosh, D N; Kline, G H; Rea, J G; Burwell, R A. Coping with terrorism: age and gender differences in effortful and involuntary responses to September 11th. *Applied Developmental Science* 8(3): 143-157 (2004). [30315]

Coping and Change Questionnaire (Joseph et al)

Coping and Perceptions of Recovery (Sattler et al)
a 22-item measure

Coping and Stress Profile (Olson et al)
cited as "Olson, Stewart, & Wilson, 1992" in 90055

Coping Behaviors Questionnaire (Vázquez et al)
"An 8-item questionnaire was designed to assess coping behaviors that were used to deal with the consequences of the terrorist attack." [30725]
Vázquez, C; Hervás, G; Pérez-Sales, P. Chronic thought suppression and posttraumatic symptoms: data from the Madrid March 11, 2004 terrorist attack. *Journal of Anxiety Disorders*, published online 5 February 2008. [30725]

Coping Cartoon Test (Punamäki)
"It consists of 20 pictures illustrating traumatic and stressful scenes in children’s life in war zones." [30090]

Coping Checklist (Billings and Moos)
To produce this unnamed 32-response, 4-point scale, the authors "revised and expanded an earlier coping assessment procedure" i.e., the Coping Reactions Inventory.

Coping Effectiveness Scale (Blechman et al)

Coping Efficacy Questionnaire (Jones and Ollemdick)
"devised [for this research], modeled after one used by Ayers, Sandler, West, and Roosa" [16987]
Coping Efficacy Scale (Sandler et al)
“Beliefs about one’s ability to effectively handle problems were measured using a 7-item scale” [82143]

Coping Health Inventory for Parents (McCubbin et al)
McCubbin, M A; McCubbin, H; Nevin, R; Cauble, A E. CHIP—Coping Health Inventory for Parents, Form D. Madison: University of Wisconsin, 1983.
McCubbin, M A; McCubbin, H; Patterson, J; Cauble, A E; Wilson, L; Warwick, W. CHIP—Coping Health Inventory for Parents: an assessment of parental coping patterns in the care of the chronically ill child. Journal of Marriage and the Family 45: 359-370 (1983). [cited in 03403]
UF: CHIP

Coping Humor Scale (Martin and Lefcourt)
"a seven-item scale designed...to assess the degree to which people report intentionally using humor as a means of coping with stressful events" [08857]

Coping in Captivity Scale (Neria et al)
"owing to the lack of a valid and reliable standardized measure that assesses coping in captivity, we constructed a 24-item self-report questionnaire based on literature review and clinical interviews with ex-POWs." [80931; scale name assigned by PILOTS Database staff]

Coping in the Home and School Environments (Dempsey)
"a checklist...to indicate the frequency with which students 'usually used' strategies to cope at home and school when they 'felt stressed' (24 items for home, the same 24 for school)" [27471]

Coping Inventory (Horowitz and Wilner)

Coping Inventory (Wills)
"Each item [of 54 items] is rated on a 5-point scale indicating the frequency with which a particular coping strategy is used for handling specific problems.” [29900]

Coping Inventory for Stressful Situations (Endler and Parker)

Coping Inventory for Task Stressors (Matthews and Campbell)

Coping Mechanisms Questionnaire (Holaday and Smith)
Holaday, M; Smith, A. Coping skills training: evaluating a training model. Journal of Mental Health Counseling 17: 360-367 (1995) [13346].

Coping Methods Checklist (Alexander and Wells)
"This 8-item list identifies which methods were used and with what degree of self-reported success.” [23227]

Coping Orientations to Problems Experienced Inventory (Carver et al)
UF: COPE Inventory (Carver et al)

Coping Questionnaire (Kendall and Marrs-Garcia)

Coping Questionnaire (Mazelis et al)
[used and confusingly cited in 30660]

Coping Questionnaire (McCrae)
50 items "specifically written...to cover the major mechanisms identified in a review of the literature" [01648]
UF: Questionnaire of Coping Responses
Coping Questionnaire (Novaco)

Coping Questionnaire (Pruchno et al)
"A self administered questionnaire [that] aids in evaluating one’s (1) acceptance of assistance in coping, (2) emotion-focused coping patterns, and (3) problem or instrumental-focused coping styles" [18292]

Coping Questionnaire for Sexually Abused Children (King et al)
"This 15-item instrument was developed by the authors to measure children’s perceived ability to cope with abuse-related symptoms and specific anxiety-producing situations."

Coping Resources Inventory (Billings and Moos)

Coping Resources Inventory (Hammer and Marting)

Coping Resources Questionnaire (used but not cited in 92077)

Coping Resources Self-Assessment (Unger et al)

Coping Response Profile (Bugen and Hawkins)

Coping Responses Inventory (Moos)

Coping Responses of Rescue Workers Inventory (McCammon et al)
"Based upon Lazarus and Folkman’s cognitive stress appraisal theory and a re-wording of Horowitz and Wilner’s Coping Responses Inventory..." [14633]

Coping Scale (Ehlers)
[used but not usefully cited in 31880]

Coping Scale (Elderly Care Research Center)
USE: Elderly Care Research Center Coping Scale (Kahana and Kahana)

Coping Scale (Harnish et al)
"Contains 24 items covering six different coping styles" [29491]

Coping Scale (Khamis)

Coping Scale for Adults (Frydenberg and Lewis)

Coping Scale for Children and Youth
[used but not cited in 91004]

Coping Self-Efficacy Scale (Delahaij et al)
"We constructed a new coping self-efficacy scale appropriate for basic military training to measure perceived capability to cope with and perform well during a stressful military exercise...The scale consisted of 11 items which were based on Bandura’s definition of self-efficacy."
**Coping Self-Efficacy Scale for Trauma (Benight)**

"The CSE is a 20-item questionnaire that assesses self-reported belief in competency to manage demands associated with trauma recovery..." [40322]
[cited only as "personal communication" in 40322]

**Coping Skills Questionnaire (El-Bassel et al)**

"developed by the investigators to measure positive and negative coping behavior...geared specifically for the study population (female offenders)" [07569]

**Coping Skills Questionnaire (Porshabaz)**

"this scale is a short inventory and includes 19 items concerning different coping skills applied by people in crisis and harsh environment" [33129]

**Coping Skills Test Abridged**
[used but not cited in 92879]

**Coping Strategies and Resources Inventory (Berman and Turk)**

**Coping Strategies Inventory (Bober et al)**

"The CSI is composed of two sections: (a) beliefs that trauma therapists hold regarding which coping strategies will lead to lower levels of secondary trauma and (b) time available for engaging in coping strategies." [28207]

**Coping Strategies Inventory (Tobin et al)**

Tobin, D L; Holroyd, K A; Reynolds, R V. User's manual for the Coping Strategies Inventory. Unpublished manuscript, Department of Psychology, Ohio University, Athens, 1984. [cited in 04058]

**Coping Strategies Matrix (Burgess)**

**Coping Strategies Questionnaire - Revised (Riley and Robinson)**

"The CSQ-R is an assessment of coping strategies that individuals use in response to pain. The questionnaire includes 6 subscales that assess specific coping strategies." [37791]

**Coping Strategies Questionnaire (Rosenstiel and Keefe)**

**Coping Strategies Scales (Beckham and Adams)**

**Coping Strategy Indicator (Amirkhan)**

**Coping Strategy Inventory (Lazarus and Folkman)**

**Coping Strategy Questionnaire (Alexander)**

"a measure that reflected my own observations and what officers reported to me about how they had coped" [15960]

**Coping Strategy Scale (Bell)**

"an 18-item scale [that] taps two types of coping strategies: emotional-focused (11 items) and behavior-focused (7 items)" [86219; instrument not named in article, name assigned by PILOTS Database staff]

**Coping Style Questionnaire (Joseph et al)**

UF: General Coping Questionnaire (Joseph et al)
Coping Style Questionnaire (Roger et al)

Coping Style Scale
[used but not cited in 17606]

Coping Style Scale (Xiao)
“This scale mainly measures four coping strategies: positive cognition, avoidant coping, social support seeking, and abreaction coping.” [40359]

Coping Styles and Strategies Inventory
[used but not cited in 90093]

Coping Styles Questionnaire (Plutchik)
USE: Albert Einstein College of Medicine Coping Styles Questionnaire (Plutchik)

Coping Styles Scale (Huang et al)
"designed specifically for measuring the coping strategies of secondary school students" [37233]

Coping Wheel (Shalit and Carlstedt)
"It is a semi-projective instrument that captures the extent to which the individual feels that s/he can control different factors of his/her life, in relation to their perceived importance, and positive or negative evaluation." [28224]

Coping with Burns Questionnaire (Willebrand et al)
"a [33-item] questionnaire for measuring coping following burn injury"

Coping with Cancer: Group Activities and Support (Geise-Davis and Speigel)
"developed specifically for use with cancer patients to assess respondents' access to and use of group support" [23459]
Geise-Davis, J; Speigel, D. Coping with Cancer: Group Activities and Support. Unpublished measure, Department of Psychiatry and Behavioral Sciences, Stanford University School of Medicine, 1998. [cited in 23459]

Coping with Community Violence Exposure (Rosario et al)
“We developed an inventory...to measure how youths cope behaviorally with the exposure to community violence that they had experienced.” [30618]

Coping with Harassment Questionnaire (Fitzgerald)

Coping with Health Injuries and Problems (Endler and Parker)

Coping with Illness Scale (Murphy et al)
“The CWI is a 31-item scale scored into 5 subscales that measures coping behaviors pertaining to illness.” [80171]

Coping with Separation Inventory (McCubbin and Dahl)
McCubbin, H I; Dahl, B B. *Coping with Separation Inventory*. San Diego: Naval Health Research Center, 1975. [cited in 00085]

Coping with Terror Scale (Somer et al)
an 8-item instrument intended “to adjust the measurement of coping to the specific context of the Al-Aqsa Intifada” [19452]
Somer, E; Ruvio, A; Soref, E; Sever, I. Terrorism, distress and coping: high versus low impact regions and direct versus indirect civilian exposure. *Anxiety, Stress, and Coping* 18: 165-182 (2005). [19452]

Coping with Terror Scale (Stein et al)
a 29-item “multifaceted inventory of coping...applicable to a wide range of terrorist threat-related contexts” [37690]
Stein, N R; Schorr, Y; Litz, B T; King, L A; King, D W; Solomon, Z; Horesh, D. Development and validation of the Coping with Terror Scale. *Assessment* (published online 2011; DOI: 10.1177/1073191111411668). [37690]

Coppel Index of Social Support (Coppel)
USE: Index of Social Support (Coppel)
Copy Figure Test (Gurvits) "a compilation of seven previously described figures" [25334]

CORE Battery "The CORE is a 34-item questionnaire designed as a pan-theoretical measure of state in psychotherapy and counselling. The items cover well-being, life functioning, risk to self and others and symptoms including depression, anxiety, somatic problems and intrusive experiences" [24660]
Evans, C; Mellor-Clark, J; Margison, F; Barkham, M; Audin, K; Connell, J; McGrath, G. CORE: clinical outcomes in routine evaluation. Journal of Mental Health 9: 247-255 (2000). [cited in 24620]

UF: Clinical Outcomes in Routine Evaluation

Core Beliefs Inventory (Cann et al) "a brief measure of disruption of the assumptive world developed for use in applied research and clinical settings" [83721]
Cann, A; Calhoun, L G; Tedeschi, R G; Kilmer, R P; Gil-Rivas, V; Vishnevsky, T; Danhauer, S. The Core Beliefs Inventory: a brief measure of disruption in the assumptive world. Anxiety, Stress, and Coping 23: 19-34 (2010). [83721]

Core Bereavement Items (Burnett et al) Burnett, P; Middleton, W; Raphael, B; Martinek, N. Measuring core bereavement phenomena. Psychological Medicine, in press. [cited in 09826]

Core Clinical Characteristics Measure (NCTSN) "a clinician-administered interview measure developed by the National Child Traumatic Stress Network" [40816]
[used but not cited in 40816]

Core Components Questionnaire (Najavits) "assessed 42 coping skills and 24 core concepts associated with Seeking Safety” [29501]
Najavits, L M. Core Components Questionnaire. Unpublished measure, Harvard Medical School/McLean Hospital, 1995. [cited in 29501]

Core Conflictual Relationship Theme Method (Luborsky) "an objective operationalization of an individual’s central relationship patterns and tendencies" [22325]

Core Self-Evaluations Scale (Judge et al) "the CSES is a 12-item scale based on the concept of core self-evaluations as a higher-order construct composed of self-esteem, generalized self-efficacy, locus of control, and neuroticism.” [33152]

Coren Inventory of Lateral Preference (Coren et al) "checks hand, foot, eye, and ear preference" [09497]

Cornell Index (Weider et al) "a modification of the original Cornell Selectee Index...adapted to a civilian population” [09444]
Weider, A; Wolff, H G; Brodman, K; Mittelmann, D; Wechsler, D. Cornell 2. New York: Psychological Corporation, 1949. [cited in 09444]

UF: Cornex (Weider et al)

Craig Handicap Assessment and Reporting Technique

UF: CHART

Craniofacial Index (Fricton and Schiffman)
"Instrument for assessing jaw pain and dysfunction" [40381]

Craving Beliefs Questionnaire
[used but not cited in 90926]

Creative Experiences Questionnaire (Merckelbach et al)
"The CEQ is a 25-item measure that is based on Wilson and Barber’s listing of fantasy proneness characteristics." [25415]

Creative Imagination Scale (Wilson and Barber)

UF: Inventory of Childhood Imaginings (Wilson and Barber)

Creativity Test (Abraham)
USE: Abraham Creativity Test

Credibility of Therapy Questionnaire (Borkovec and Nau)

Credibility of Treatment Questionnaire (Tarrier et al)
"consisted of 5 items each rated on a 7-point scale asking how credible the treatment appeared and how successful the patient expected it to be” [21783]

Credibility Scale (Addis and Carpenter)

Credibility/Expectancy Questionnaire (Borkovec and Costello)
"a questionnaire...which derives two factors: Expectancy for Change and Treatment Credibility" [14687]

Crime Avoidance Questionnaire (Zoellner et al)
"The CAQ is a 38-item questionnaire that measures the degree to which the victim avoids a trauma-related situation. 23 Items were derived from the Rape Aftermath symptom Test and 15 items are derived from the Mobility Inventory of Agoraphobia.” [22057]

Crime Impact Social Support Inventory (Davis et al)
"Drawn in part from the Inventory of Socially Supportive Behavior (Barrera et al).”

Crime Incidence Battery (National Crime Survey)
Crime-Related Post-Traumatic Stress Disorder Scale (Saunders et al)
UF: SCL-90-R Crime-Related PTSD Scale

Crisis in Family Systems - Revised (Shalowitz et al)
Shalowitz, M U; Berry, C A; Rasinski, K A; Dannhausen-Brun, C A. A new measure of contemporary life stress: development, validation, and reliability of the CRISYS. Health Services Research 33: 1381-1402 (1998). [cited in 34543]
UF: CRISYS

Crisis Interview (Hadi and Llabre)
"a structured crisis interview...developed by the investigators"

Crisis Support Instrument (Brown et al)

Crisis Support Scale (Joseph et al)
"A respondent-based questionnaire...based on and developed from the Crisis Support Instrument"

Crisis Symptom Checklist (Briere and Runtz)

CRI SYS
USE: Crisis in Family Systems - Revised (Shalowitz et al)

Criteria for Traumatic Stress Disorder (Zero to Three)
UF: Alternative Criteria for Traumatic Stress Disorder (Zero to Three)

Criteria-Based Content Analysis
"The modified CBCA evaluates children's ability of stating their experience based on 4 criteria: (1) quantity of details, (2) contextual embedding, (3) description of interaction, and (4) specific detailed description of an open-ended event." [36334] [used but not clearly cited in 36334]

Critical Incident Checklist (Hirokawa et al)
"a 9-item...self-rating checklist" [19554]

Critical Incident Exposure Scale (Weiss et al)

Critical Incident History Questionnaire (Weiss et al)
"The CIHQ assesses exposure to each of 34 police-related critical incidents" [23505]
Weiss, D S; Brunet, A; Best, S R; Metzler, T; Liberman, A; Rogers, C; Neylan, T C; Fagan, J A, Marmar, C R. The Critical Incident History Questionnaire: a measure of cumulative exposure to critical incidents. Manuscript submitted for publication, 2001. [cited in 23505]

Critical Incident Inquiry (Monnier et al)
"It asks respondents to indicate the number of times each of 24 events has occurred in the past 2 months." [29355]

Critical Incident Technique
[used but not cited in 90858]

Critical Life Event Survey (Johnson)

Critical Life Events Scale
USE: Social Readjustment Rating Scale (Holmes and Rahe)

Critical Thinking Questionnaire (Sharpe and Herbert)
"The CTQ was created by combining items from two established critical thinking measures and another critical thinking source...to better target critical thinking skills relevant to psychology." [30102]
Sharp, I R; Herbert, J D. The role of critical thinking skills in practicing psychologists' use of empirically supported vs. novel treatments. Manuscript in preparation, 2007. [cited in 30102]
Croatian Stress Scale

Crohn’s Disease Activity Index (Rankin et al)

Cross Racial Identity Scale (Vandiver et al)
[cited only as “Vandiver et al, 2001” in 91837]

Crovitz Handedness Questionnaire (Crovitz and Zener)

Crovitz Word Technique

Crown-Crisp Experiential Index (Crown and Crisp)

CSA - Symptom Inventory (Hulme and Agrawal)
“The CSA-SI is a symptom checklist consisting of 29 physical and 22 psychosocial symptoms.” [18137]
Hulme, P A; Agrawal, S. Patterns of childhood sexual abuse characteristics and their relationships to other childhood abuse and adult health. Journal of Interpersonal Violence 19: 389-405 (2004). [18137]

CSA Needs Assessment Survey (Margolin)
two surveys, one for professionals and one for clients

CSEI
USE: Self-Esteem Inventory (Coopersmith)

CTRS
USE: Conners Teacher Rating Scale (Conners)

Cube and Paper Test (Gilbertson)
“an untimed measure of visuospatial function in a multiple-choice format without a praxic component” [30025]

Cue Reaction Questionnaire (Taft et al)
“an 11-item measure designed for the present study to assess the effectiveness of the priming stimulus application” [29763]

Cued Recall Test (Holmes et al)
14 items

Cuestionario de Afrontamiento (Basabe et al)

Cuestionario de Apoyo Social (Bernal)
“12 Likert-style items, which evaluate the quality, quantity, and variety of social support that the person had received in the last year” [40761]

Cuestionario de Auto-Reportaje
USE: Self-Reporting Questionnaire (Harding et al)

Cuestionario de Depresión (Sandin et al)
“a 16-item questionnaire...for the rapid assessment of clinical depression, as opposed to mere depressive mood” [40424]

Cuestionario de Estrés Postraumático (López Gonzalez and Gimeno Navarro)
Cuestionario de Estrés Traumático Secundario (Moreno et al)
Moreno, B; Morante, M E; Rodríguez, A; Garrosa, E. Secondary traumatic stress as psychosocial emergent risk. *Psychology and Health* 19(Supplement): 118 (2004). [cited in 31325]
UF: Secondary Traumatic Stress Measure (Moreno et al)

Cuestionario de Reactividad al Estrés (González de Rivera)
USE: Indice de Reactividad al Estrés (González de Rivera)

Cuestionario de Satisfacción Laboral (Meliá and Peiró)
Meliá, J L; Peiró, J M. Cuestionario de Satisfacción Laboral S10/12. *Psicología de la Seguridad*, 1989. [cited in 36260 only as an online document]
UF: Job Satisfaction Questionnaire (Meliá and Peiró)

Cuestionario de Síntomas del TEPT Adaptado al 11M (Moya-Albiol and Occhi)

Cuestionario de Sucesos Vitales (Sandin and Chorot)
"The CSV is a list of 62 life events that covers a broad range of life experiences." [18230]

Cuestionario de Sucesos Vitales Estresantes (Pelechano)

Cuestionario para Traumatismos Craneales (Jurado et al)
Jurado, M A; Bartumeus, F; Junqué, C. Secuelas neuropsicológicas en los traumatismos craneoencefálicos: relación entre el déficit objetivo y subjetivo. *Neurología* 8: 91-98 (1993). [05424; the questionnaire appears on p. 94]

Cuestionario Psicosocial para el Apoyo en Crisis
This consists of: Beck Depression Inventory (Beck et al); General Health Questionnaire (Goldberg); Life Event and Difficulty Schedule (Brown and Harris). Cited in: Pucheu Regis, C; Sánchez Báez, J J; Padilla Galina, P. Planificación en salud mental en desastres. In: Lima, B; Gavira, M (ed.), *Consecuencias Psicosociales de los Desastres: La experiencia Latinoamericana*, pp. 145-157. Chicago: Hispanic American Family Center, 1989. [11691]
USE: [instruments named above]

Cultural Adaptation Scale (Rumbaut)

Cultural Bereavement Schedule (Eisenbruch)

Cultural Competence Self-Evaluation Form (Marsella)
"a self-evaluation form for assessing cultural competence with regard to a specific client" [85029]

Cultural Formulation Interview (Bäärnhielm et al)
a semi-structured clinical interview based on DSM-IV’s Outline for Cultural Formation

Cultural Genogram
[used but not cited in 93271]

Cultural Life Style Inventory (Mendoza)
[used but not cited in 92175]

Cultural Questionnaire for Children (Jagers and Owens-Mock)
"The CQC was designed...to measure an Afrocultural social ethos that is defined as a combination of spiritual, communal, and affective orientations of people of African descent." [19203]

Culturally Competent Sociodemographic Questionnaire: Criminal Offenders (Maschi)
Maschi, T. The Culturally Competent Sociodemographic Questionnaire: Criminal Offenders (Maschi). Unpublished measurement instrument, Fordham University Graduate School of Social Services, 2008. [cited in 86719]

Culturally Informed Functional Assessment
[used but not cited in 93271]
Culture Fair Test (Cattell and Cattell)

"The CFT is a measure of fluid intelligence that contains 50 items organized into 4 different nonverbal tasks. It is designed to minimize the influence of verbal comprehension, education level, and culture on the evaluation procedure." [30415]

Cattell, R B; Cattell, A. *Test of "g": Culture Fair*. Champaign, Illinois: Institute of Personality and Ability Testing, 1960. [cited in 30415]

Culture Free Self-Esteem Inventories

USE: Battle Self-Esteem Inventory (Battle)

Culture-Fair Intelligence Scale

USE: Grundintelligenztest Skala 2 (Weiss)

Culture-Related Stress Scale (Jeon et al)

"The CRSS is composed of 11 items regarding stressful experiences related to cultural differences between North and South Korea." [87385]

Cumulative Illness Rating Scale (Linn et al)

Cumulative Illness Rating Scale (Miller et al)

Cumulative Trauma Disorders Measure (Kira et al)

"this 15-item measure...is an index measure that covers 13 different symptoms..." [82453]

Cumulative Trauma Measure (Kira et al)

"this measure has items that describe 22 kinds of traumatic experiences..." [82453]

Cumulative Trauma Scale (Kira et al)

Kira, I A; Lewandowski, L A; Templin, T; Ramaswamy, V; Ozkan, B; Mohanesh, J. Measuring cumulative trauma dose, types, and profiles using a development-based taxonomy of traumas. *Traumatology* 14(2): 62-87 (2008). [82453; the Scale (Short Form) appears on pp. 80-85]

Curative Climate Instrument (Fuhriman et al)

a 15-item scale measuring "therapeutic factors of group cohesion and catharsis" [38660]

Fuhriman, A; Drescher, S; Hanson, E; Henrie, R; Rybicki, W. Refining the measurement of curativeness: an empirical approach. *Small Group Behavior* 17: 186-201 (1986). [cited in 38660]

Curiosity and Exploration Inventory (Kashdan et al)

Curious Experiences Survey (Goldberg)

"The CES is a 31-item scale measuring dissociation. [It] is a revision of the Dissociative Experiences Scale." [38112]

Current Abuse Scale (Draucker)

Current Adjustment Rating Scale (Berzins et al)

Current Alcohol and Drug Use History (Addictions Research Foundation)

Addictions Research Foundation. *Youth and Drugs: An Educational Package for Professionals* [draft]. Toronto: Addictions Research Foundation, 1990. [cited in 07653]

Current Attachment Relationships (Allen et al)

"assesses the extent of social support in secure attachments" [23534]

Allen, J G; Hunttoo, J; Fultz, J; Stein, H; Fonagy, P; Evans, R B. A model for brief assessment of attachment and its application to women in inpatient treatment for trauma-related psychiatric disorders. *Journal of Personality Assessment* 76: 421-447 (2001). [23534; the questionnaire appears on p. 427]
Current Illness Checklist (Maia et al)
"this is a 10-item list of reported diseases..." [84905]
Maia, A; McIntyre, T; Pereira, G; Fernandes, E. Current Illness Checklist. Unpublished instrument, Department of Psychology, University of Minho (Portugal), 2001. [cited in 84905]

Current Life Functioning Form (Leon et al)
"An instrument constructed for this investigation"

Current Maladaptive Adolescent Behavior Inventory (Johnson)

Current Pain and Pain History Questionnaire (Pagé et al)
"created for the purpose of this study" [33259]

Current Sexual Behavior Questionnaire (Feldman-Summers et al)

Current Stressors Scale (Nicholson)
"The CSS was devised for this project. The scale consists of 24 items devised from clinical experiences with the population being studied." [09107]

Current Stressors/Adversities Checklist (Litz et al)
"The [13-item] CSAC is designed to measure the extent to which respondents are currently troubled or concerned by common life stressors..." [38138]
Litz, B T; King, L A; King, D W; Orsillo, S M; Friedman, M J. Warriors as peacekeepers: features of the Somalia experience and PTSD. Journal of Consulting and Clinical Psychology 65: 1001-1010 (1997). [cited in 38338]

Hoier, T S. Curtis Center Interview Schedule. Unpublished manuscript, West Virginia University, Department of Psychology, 1986. [cited in 02922]

Customary Drinking and Drug Use Record (Brown et al)
"The CDDR assesses use of the following substances: beer, wine, hard liquor, marijuana, amphetamines, barbiturates, hallucinogens, cocaine, inhalants, and opiates." [16622]

Cutaneous Cell-Mediated Immunity Multitest (Institut Mérieux)

UF: Cell-Mediated Immunity Multitest
CMI Multitest
Multitest CMI

Cybernetic Battery of Conative Tests for Children

D Scale
USE: Dogmatism Scale (Rokeach)

DAACL
USE: Depression Adjective Check Lists (Lubin)

Daily Activities Questionnaire (Shipherd and Beck)
"This open-ended questionnaire asked participants to write a description of their activities during a typical day." [29181]

Daily Caregiving Diary (Bacon et al)
"The DCD is derived from variables within the transactional stress model. [It] consisted of four subscales: (1) Stress, (2) Appraisals, (3) Daily Coping, and (4) Caregiving Gains." [34340]
Daily Coping Assessment (Stone and Neale)
"a self-report scale measuring the frequency of use of different coping strategies in response to past and present stressors” [81788]

Daily Drinking Questionnaire (Collins et al)
"provides information about alcohol consumption on each day of a typical week” [29560]

Daily Drug-Taking Questionnaire (Parks)
"assesses 14 different drug categories for both a typical and peak week in the past 90 days” [80925]

Daily Events Survey (Butler et al)

Daily Hassles Scale (Kanner et al)
USE: Hassles Scale (Lazarus and Cohen)

Daily Hassles Scale (Seidman et al)
"This [28-item] measure was developed for use with an urban adolescent sample to directly assess areas of hassles...likely to be experienced by some low-income, urban adolescents.” [21892]

Daily Health Record (Verbrugge)
"contains questions about a single day’s health and mood” [33136]

Daily Inventory of Stressful Events (Almeida et al)
"The DISE is a semistructured telephone interview that documents the occurrence of stressful events, as well as descriptive information related to their duration, timing, and the impact on the participant.” [38645]

Daily Prediction Scale (Gerwe)
"a clinical self-report tool that helps shape positive behavior, identifies external and internal triggers for high-risk behavior, and provides valuable data for clinical documentation” [86817]

Daily Rating of Severity of Problems Form (Endicott and Harrison)

Daily Record Form (Baum et al)
Baum, A; Breslin, F C; O’Keeffe, M; Ratliff-Crain, J; Burrell, L. The Daily Record Form: a brief measure of daily perceived stress and psychosomatic complaints. Anxiety, Stress, and Coping 7: 375-384 (1994). [cited in 28800]

Daily Sleep Activities Log (Thompson et al)
Thompson, K E; Hamilton, M; West, J A. Group treatment for nightmares in veterans with combat-related PTSD. National Center for PTSD Clinical Quarterly 5(4): 13-17 (1995) [13012; cited in 29793]

Daily Spiritual Exercises (Underwood)
"assesses levels of spirituality according to items that indicate experiences rather than beliefs or behaviors” [27139]

Daily Spiritual Experience Scale
[used but not cited in 92279]

Daily Stress Inventory (Brantley et al)

Daily Stress Scale (Reeder et al)
USE: Subjective Stress Scale (Reeder et al)
Daily Stressors Inventory (Paardekooper et al)

"a questionnaire…to measure the daily problems in a refugee situation" [21211]

Danger Assessment (Campbell)

Danger Expectation Scale (Gursky and Reiss)

Dangerous Situations in the Vietnam-Amercia War Questionnaire
USE: History of Vietnam-America War Experiences Questionnaire

Danish Gulf War Study Questionnaire

Danish National Health and Morbidity Survey

Danish Youth Survey
"The main objective of the survey was to describe the overall well-being of young people in Denmark, with a particular focus on early and illegal sexual experiences." [82169]

Darryl (Neugebauer et al)

Dartmouth Assertive Community Treatment Scale

Dartmouth Assessment of Lifestyle Instrument (Rosenberg et al)
"a client self-report measure…specifically developed for this population [of severely mentally ill patients]" [23514]

Dartmouth Coop Functional Health Assessment Charts (Nelson et al)

DASH Questionnaire (Hudak et al)
"The DASH is a 30-item patient-generated disability/symptom scale concerning the patient’s health status during the preceding week." [32791]

Data-Driven Processing Scale (Ehlers)
"This eight-item scale assesses the extent to which participants primarily engaged in surface level, perceptual processing during assault." [08962]

DATAR Anxiety Scale

DATAR Depression Scale

Dating and Sexual Activity Questionnaire (Shapiro and Schwarz)
Dating and Sexual Activity Questionnaire (Zeanah)  
"adapted from questions developed by Zeanah" [09062]  

Dating Behavior Interview (Koss)  
"The Dating Behavior Interview consisted of 48 questions designed to cover various social history areas that could operate as situational factors in a potential sexual assault. The interview format was based on Johnson's Dating Behavior Survey." [28829]  

Dating Behavior Survey (Yeater et al)  
"a measure of dating and social behaviors including number of lifetime sexual partners and frequency of unprotected sex" [40309]  

Dating History Questionnaire (Flanagan and Furman)  
"administered to obtain information about participants’ current dating statuses and dating behaviors" [15552]  

Dating Violence Scale (Foshee)  

DATOS Intake Questionnaire  
"a three hour intake and psychosocial assessment interview at the time of treatment admission" to the Drug Abuse Treatment Outcome Studies [19098]  

Dattelner Kinderschmerzfragebogen  
[used but not cited in 31564]

Davidson Trauma Scale  
USE: Self-Rating Traumatic Stress Scale (Davidson)

Davis Interpersonal Reactivity Index (Davis)  

Day-to-Day Stress Scale (Watson)  
"Unpublished scales...developed by the senior author"  

Day/Night Task  
an executive function task for children  
[used but not clearly cited in 85554]

Days Out of Role (McLennan)  
"Two items...assessed the number of days in the last month that participants were unable to engage in their usual activities because they were too unwell to do so." [34022]  

Deactivation Uncertainty Scale (Stetz et al)  
"Deactivation uncertainty was measured with a [4-item] scale created for the present study" [80955]  

Dealing with Illness Inventory (Namir et al)  

Death Anxiety Questionnaire (Conte et al)  

Death Anxiety Scale (Templer)  
Death Attitudes Profile (Wong et al)
"a 32-item measure of 5 death attitudes" [19676]
Wong, P T P; Reker, G T; Gesser, G. Death Attitudes Profile — Revised. A multidimensional measure of attitudes toward death.

Death Imagery Scale (Ryneearson)
"a self-report measure of death-related imagery (reenactment, rescue, revenge, or reunion)" [81322]

Death Perspectives of War Veterans (Spilka et al)

Decision Power Index (Blood and Wolfe)

Decision Tree for the DSM-III-R (First et al)

Deepwater Horizon Psychosocial Assessment
"The Deepwater Horizon Psychosocial Assessment comprised sections measuring sociodemographics, Hurricane Katrina impact, oil spill concerns and disruption, resilience and life satisfaction, and mental health." [85841]

Deese-Roediger-McDermott Task

Defeat Scale (Gilbert and Allan)
"consists of 16 items assessing perceptions of defeat including those of failed struggle and low social rank" [38846]

Defence Coping Questionnaire (Bond et al)
USE: Self-Report of Defensive Styles (Bond et al)

Defence... SEE ALSO: Defence...

Defense and Veterans Brain Injury Center Blast Exposure Screening Questionnaire
USE: Blast Exposure Screening Questionnaire (Schwab et al)

Defense and Veterans Brain Injury Center Clinical Tracking Form
"a structured clinical interview" [36374]
[used but not cited in 36374]

Defense Automated Neurobehavioral Assessment
"The Defense Automated Neurobehavioral Assessment (DANA) is a new neurocognitive assessment tool that includes a library of standardized cognitive and psychological assessments, with three versions that range from a brief 5-minute screen to a 45-minute complete assessment. DANA is written using the Android open-source operating system and is suitable for multiple mobile platforms." [87541]

Defense Mechanism Inventory (Gleser and Ihilevich)

Defense Mechanism Manual (Cramer)

Defense Mechanism Rating Scales (Perry)
"The DMRS is an observer-rated method similar to the qualitative Proposed Defense Axis in Appendix B of DSM-IV. Each of 30 defenses is identified whenever it occurs in the interview." [29287]
Defense Mechanism Test (Kragh)

Defense Style Questionnaire (Andrews et al)
UF: Defensive Style Questionnaire (Andrews et al)

Defense Styles Questionnaire (Bond)

Defense... SEE ALSO: Defence...

Defensive Functioning Scale (DSM-IV)
“a clinician-rated measure of defensive functioning” [28723]

Defensive Style Questionnaire (Andrews et al)
USE: Defense Style Questionnaire (Andrews et al)

Defining Issues Test (Rest)
UF: Revised Defining Issues Test

Delayed Stress Reactions Scale (Hatanaka et al)
“13 items similar to those used for assessing stress reactions during the coverage, which were designed to measure stress responses 2-3 months after the traumatic experience” [83706]

Delftse Vragenlijst (Appels)

Deliberate Adjustment Strategies Questionnaire (Orner et al)
"a measure of coping" [19917]
Orner, R J; King, S; Avery, R; Bretherton, R; Stolz, P; Omerod, J. Coping and adjustment strategies used by emergency services staff after traumatic incidents: implications for psychological debriefing, reconstructed early intervention and psychological first aid. *Australasian Journal of Disaster and Trauma Studies*, 2003(1) [17714]

Deliberate Self-Harm Inventory (Gratz)
"The DSHI is a behaviorally based 17-item self-report inventory" [82882]

Delighted-Terrible Scale (Andrews and Withey)
"a seven-point scale ranging from delighted to terrible" [mh, 195]

Delinquency Measure (Brezina)

Delinquent Behavior Inventory (National Longitudinal Study of Children and Youth)

Delirium Rating Scale (Trzepacz et al)
"The DRS is a 10-item clinician-rated scale” [27294]

Delis-Kaplan Executive Function System

Delusion Assessment Scale (Meyers et al)
Delusions Inventory (Peters et al)
"This is a 21-item self-report scale designed to measure delusional ideation in the normal population (i.e., a measure of psychosis-proneness)." [29722]

Delusions-Symptoms-States Inventory (Bedford and Foulds)

Demands of Immigration Scale (Aroian et al)
"a 22-item index that taps demands related to loss, novelty, language difficulties, occupational adjustment, discrimination, and not feeling at home" [33280]

Dementia Rating Scale (Mattis)

Demi HIV Stigma Scale (Demi)
"used to measure the degree of stigma experienced by participants regarding their HIV diagnoses" [27747]

Demographic and Abuse History Questionnaire

Demographic and Abuse Severity Questionnaire (Clements and Sawhney)
"The DASQ is a 10-item, self-report inventory designed for the purposes of this study." [15117]

Demographic and Childhood Experiences Questionnaire (Marmion and Lundberg-Love)
"This instrument was developed by the authors and include the types of questions that would typically be used in a clinical interview intended to probe for a history of various forms of childhood trauma/abuse." [82311]
Marmion, S L; Lundberg-Love, P K. PTSD symptoms in college students exposed to interparental violence: are they comparable to those that result from child physical and sexual abuse? Journal of Aggression, Maltreatment and Trauma 17(3): 263-278 (2008). [82311]

Demographic and Clinical Screener Questionnaire (Davis et al)
"A questionnaire was developed by the investigators which assessed typical demographic information/variables as well as 46 additional questions designed to provide a broad overview of functioning coping, and living situations following Hurricane Katrina." [35801]

Demographic and Disaster Work Exposure Questionnaire (McCaslin et al)
"designed by the Disaster Mental Health Institute in consultation with a focus group of Red Cross volunteers who had responded to the terrorist attacks" [27710]

Demographic and Marital History Questionnaire
"a 12-item instrument" [24848]

Demographic and Sexual Abuse Questionnaire (Murthi et al)
based in part on Finkelhor's sexual victimization questionnaire [80104]

Demographic and Sexual Abuse Questionnaire (Sablatura)

Demographic and Treatment History Form (Hien and Zimberg)
"a structured 62-item interview" [28117]
Demographic and Treatment History Questionnaire (Schechter et al)
“consisting of 33 items” [27307]
Schechter, D S; Zeana, C H; Myers, M M; Brunelli, S A; Liebowitz, M R; Marshall, R D; Coates, S W; Trabka, K A; Baca, P; Hofer, M A. Psychobiological dysregulation in violence-exposed mothers: salivary cortisol of mothers with very young children pre- and post-separation stress. *Bulletin of the Menninger Clinic* 68: 319-336 (2004). [27307]

Demographic Information Questionnaire (Polusny et al)
“a brief pencil and paper inventory” [33103]

Demographic Psychosocial Inventory (Ritsner et al)

Demographic Questionnaire (Astin et al)
“a 51-item questionnaire, developed...for use in research with domestic violence” [28032]

Demographic, Assault and Psychiatric History Interview Schedule (Frank et al)

Demographics Interview (Cicchetti and Carlson)
Cicchetti, D; Carlson, V. Demographics Interview. Unpublished measure, University of Minnesota, 1979. [cited in 87533]

Demography of Forced Migration Questionnaire
"Used to assess detailed information about demography, health, and traumatic experiences” [26733]

Demoralisation Scale (Kissane et al)
a self-report scale

Demoralization Scale (Harlow)
Harlow, L L. Psychometric investigation of a scale to measure demoralization. Paper presented at American Psychological Association annual meeting, Boston, August 1990. [cited in 15564]

DemTect
[used but not cited in 31687]

Dental Anxiety Inventory (Stouthard et al)

Dental Anxiety Questionnaire (Greenberg et al)
[used but not cited in 37676]

Dental Anxiety Scale (Corah)
"a widely used measure for dental trait anxiety” [21304]

Dental Cognitions Questionnaire (De Jongh et al)

Dental Experience Survey (Hays and Stanley)

Denver Youth Survey Scales (Huizinga and Esbensen)

Denyes Self-Care Agency Instrument (Denyes)

Depersonalization Severity Scale (Simeon et al)
"a 6-item interviewer-administered scale that assesses severity of depersonalization” [15997]
Deployed Member Well-Being (McNulty)  
“based on the Family Member Well-Being Tool developed by McCubbin et al” [28778]  

Deployment Distress Scale (Rosen)  

Deployment Events Scale (Hoge et al)  
"The 34-item Deployment Events Scale was developed from previous Walter Reed Army Institute of Research measures of deployment experiences.” [81976]  

Deployment Risk and Resilience Inventory (King et al)  
"a collection of measures for studying the deployment-related experiences of military personnel and veterans” [18950]  
UF:  Combat Experiences Scale (King and King)  

Deployment Stressor Scale (Bartone et al)  
“composed of nine items” [28775]  

Deployment Stressors Checklist (Van Zuiden et al)  
"a 13-item checklist specifically developed for the present study” [35308]  
Van Zuiden, M; Geuze, E; Willemen, H L D M; Vermetten, E; Maas, M; Heinjen, C J; Kavelaars, A. Pre-existing high glucocorticoid receptor number predicting development of posttraumatic stress symptoms after military deployment.  American Journal of Psychiatry, published online 15 November 2010 (DOI: 10.1176/appi.ajp.2010.10050706).  [35308; the Checklist appears as an online supplement]  

Deployment-Related Emotions Questionnaire (Gonzalez)  
"a self-report measure of veterans' anger at self, anger at others, shame, guilt, and pride” [93148]  
Gonzalez, O I.  Development and initial validation of the Deployment-Related Emotions Questionnaire (DREQ) and exploratory examination of the relationships between military deployment, anger, shame, and psychopathology.  Ph.D. dissertation, University of California, Irvine, 2011.  [93148]  

Deployment-Related Stressor Scale (Booth-Kewley et al)  
"This scale [constructed for the purposes of this study] consisted of 11 questions about stressors Marines might experience during deployment...” [83692]  

Depressed States Checklist (Teasdale and Cox)  

Depression Adjective Check Lists (Lubin)  
UF:  DACL  
Depression Adjective Checklist  
Depressive Adjective Check List (Levitt and Lubin)  

Depression Adjective Checklist  
USE:  Depression Adjective Check Lists (Lubin)  

Depression Anxiety Stress Scales (Lovibond and Lovibond)  
"specifically designed to distinguish between symptoms of depression, anxiety, and tension—stress” [21077]  

Depression Case Formulation Interview (Wells)  
Wells, A.  Metacognitive Therapy for Anxiety and Depression.  New York: Guilford Press, 2009.  [82992; the Interview appears on p. 280]  

Depression Health Beliefs Inventory (Edlund et al)  
"used to measure perceptions about depression treatment, including barriers , need, and effectiveness” [35489]  
Depression in the Medically Ill (Parker et al)

Depression Interview and Structured Hamilton (ENRICHD)

"The DISH is a semistructured interview that was developed for ENRICHD to diagnose current depressive episode in cardiac patients according to DSM-IV criteria, to determine the severity of depression using the 17-item Hamilton Rating Scale for Depression (HAM-D), and to screen for other psychiatric disorders." [32141]
Freedland, K E; Skala, J A; Carney, R M; Raczyński, J M; Taylor, C B; Mendes de Leon, C F; Ironson, G; Youngblood, M E; Krishnan, K R; Veith, R C. The Depression Interview and Structured Hamilton (DISH); rationale, development, characteristics, and clinical validity. Psychosomatic Medicine 64: 897-905 (2002). [cited in 32141]

Depression Interview Schedule (Alem et al)

[used and ambiguously cited in 25524]

Depression Outcomes Module (Smith et al)

"The DOM is used primarily to assess the process of care, patient characteristics, and outcomes of care for patients with major depressive disorder in primary care settings and in both inpatient and outpatient specialty care settings." [hpm 213]

Depression Proneness Inventory (Alloy et al)

"The DPI is a 10-item self-report measure of vulnerability to depressive reactions to stress." [28142]
Alloy, L; Hartlage, S; Metalsky, G; Abramson, L. The Depression Proneness Inventory: a brief, face-valid scale of vulnerability to depressive reactions in response to stress. Unpublished manuscript, Temple University, 1987. [cited in 28142]

Depression Questionnaire (Alem et al)

Birleson Depression Inventory

UF: Birleson Depression Inventory

Depression Self-Rating Scale for Children (Birleson)

USE: Depression Self-Rating Scale (Birleson)

Depression Symptom Checklist

[used but not cited in 90950]

Depression Symptom Inventory

[used but not cited in 38246]
Depression Symptom Rating (Keller et al)

"DSR scores...are based on the number of depressive symptoms and extent of impairment" [37514]
Keller, M B; Lavori, P W; Friedman, B; Nielsen, E; Endicott, J; McDonald-Scott, P; Andreasen, N C. The Longitudinal Interval Follow-Up Evaluation. Archives of General Psychiatry 44: 540-548 (1987). [cited in 37514]

Depression-Happiness Scale (McGreal and Joseph)

"A measure of subjective well-being that focuses upon negative and positive affect, [containing] 25 items representing cognitive, affective, and somatic experiences" [19911]

Depression Scale D-92

"The Questionnaire consists of 22 questions with 4 offered answers to each question which point to different stages of depressiveness (from 1 to 4 points)." [26895]

Depressive and Anxious Avoidance in Prolonged Grief Questionnaire (Boelen and Van den Bout)

"The DAAPGQ was specifically constructed for the current study to examine the role of depressive and anxious avoidance..." [35022]

Depressive Experience Scale

"This scale is a measure of depressive styles, self-critical and dependent, as well as self-efficacy." [21191]

Depressive Experiences Questionnaire (Blatt et al)

"A 66-item self-report questionnaire to assess depressive experiences in the lives of depressed patients that are not necessarily regarded as clinical symptoms of depression" [21857]
Blatt, S J; Schaffer, C E; Bers, S A; Quinlan, D M. Adolescent Depressive Experiences Questionnaire. Unpublished research manual, Yale University, 1990.
UF: Adolescent Depressive Experiences Questionnaire (Blatt et al)

Depressive Personality Disorder Inventory (Huprich et al)

"The DPDI is a 41-item, Likert-type questionnaire that assesses for [DSM-IV] depressive personality." [28731]

Depressive Symptomatology Scale (Pearlin et al)

Depressiveness Scale (Zerssen)

UF: Depression Scale (Zerssen)

Deprivation-Enhancement Fantasy Patterns (May)

Derogatis Sexual Functioning Inventory (Derogatis)
Originally published in 1975, revised in present form 1978. [dbat 173]
UF: DSFI
Sexual Functioning Inventory (Derogatis)

Derogatis Stress Profile
[used but not cited in 90142]

Derogatis Symptom Checklist 90
USE: Symptom Checklist 90 (Derogatis et al)
Derogatis Symptom Checklist 90-R
USE: SCL-90-R (Derogatis)

Derriford Appearance Scale

DES Interview
USE: Structured Interview for Disorders of Extreme Stress (Van der Kolk et al)

Description and Clarification Interview Schedule for Reported Sexual Abuse (Lobel)

Descriptor Differential Scale (Gracely and Kwilosz)
"The DDS is a self-report paper-and-pencil questionnaire, in which the respondent rates the intensity and unpleasantness of their pain relative to verbal descriptors of pain." [37198]

Desert Storm Reunion Survey (Wolfe et al)
[11916]
UF: Operation Desert Storm Reunion Survey (Wolfe et al)

Desert Storm Trauma Questionnaire (Southwick et al)
[04217]
UF: Operation Desert Storm Trauma Questionnaire (Southwick et al)

Design Charts for Color-Blindness (Ishihara)

Design Fluency Test (Jones-Gorman and Milner)

Desirability of Control Scale (Spielberger)

Desire for Control Scale (Burger)

Desire for Vengeance Scale (Skitka)
"a four-item face-valid [scale]" [09571]

Detailed Assessment of Posttraumatic States (Briere)
"assesses for the full DSM-IV-TR criteria for PTSD, as well as substance abuse, suicidality, and peritraumatic and trauma-specific dissociation" [17222]
Detailed Assessment of Posttraumatic Stress (Briere)
"assesses for the full DSM-IV-TR criteria for PTSD, as well as substance abuse, suicidality, and peritraumatic and trauma-specific dissociation" [17222]

Details of Threat Questionnaire (Freeman et al)
"The DoT Questionnaire was designed...to assess the content of persecutory delusions in order to develop an understanding of the distress associated with such beliefs." [32492]
Freeman, D; Garety, P A; Kuipers, E. Persecutory delusions: developing the understanding of belief maintenance and emotional distress. Psychological Medicine 31: 1293-1306 (2001). [cited in 32492]

Detention Experiences Checklist (Steel et al)
a 60-item "checklist of common experiences in detention" based on the format of the Postmigration Living Difficulties Questionnaire [27572]
Steel, Z; Momartin, S; Bateman, C; Hafshejani, A; Silove, D M; Everson, N; Roy, K; Dudley, M; Newman, L; Blick, B; Mares, S. Psychiatric status of asylum seeker families held for a protracted period in a remote detention centre in Australia. Australian and New Zealand Journal of Public Health 28: 527-536 (2004). [27572]

Detention Locus of Control Scale (Perkel)

Detention Symptoms Checklist (Steel et al)
"a list of 9 stress symptoms adapted from [the Harvard Trauma Questionnaire]" [27572]
Steel, Z; Momartin, S; Bateman, C; Hafshejani, A; Silove, D M; Everson, N; Roy, K; Dudley, M; Newman, L; Blick, B; Mares, S. Psychiatric status of asylum seeker families held for a protracted period in a remote detention centre in Australia. Australian and New Zealand Journal of Public Health 28: 527-536 (2004). [27572]

Detroit Area Study Discrimination Questionnaire

Detroit Area Survey of Trauma
"a computer-assisted, telephone-structured interview was used." [27823]

Detroit Tests of Learning Aptitude (Hammil)

Development and Well-Being Assessment (Goodman et al)
an "extensive suite of interviews, questionnaires and rating techniques for generating psychiatric diagnoses" [27904]

Development Interview (DiBiase)

USE: NIMH Diagnostic Interview Schedule for Children

Diagnostic Inventory for Depression
[used but not cited in 21794]

Diagnostic Inventory of Personality and Symptoms (Vincent)

Diagnostic Predictive Scale (Lucas et al)
"a screening tool [for] current mental health problems (probable psychiatric disorder)" [19713]
Lucas, C P; Zhang, H; Fisher, P W; Shaffer, D; Regier, D A; Narrow, W E; Bourdon, K; Dulcan, M K; Canino, G; Rubio-Stipec, M; Lahey, B B; Friman, P. The DISC Predictive Scales (DPS): efficiently screening for diagnoses. Journal of the American Academy of Child and Adolescent Psychiatry 40: 443-449 (2001). [cited in 19713]

Diagnostic Profile (Freud)

Diagnostic Role Playing Test (Johnson)
"The DRPT requires subjects to spontaneously imagine and then improvise a scene involving three characters." [85972]

Diagnostic Role Playing Test for Alexithymia (James)

Diagnostic Scale for Incest Survivors (Pearce and Lovejoy)
Diagnostic Schedule for Eating Disorders

Diagnostic Sensations Questionnaire (Sanderson et al)
"used to assess DSM-IV panic attack symptoms immediately postchallenge" [30979]

Diagnostisches Interview bei psychischen Störungen im Kindes- und Jungesalter
USE: Kinder-DIPS

Diagnostik-System für Psychische Störungen im Kindes- und Jugendalter (Döpfner and Lehmkuhl)
"A diagnostic system for mental disorders in childhood and adolescence...Symptoms of depression are assessed on a 29-item checklist; symptoms of anxiety on a 31-item checklist." [27265]
UF: DISYPS-KJ

Diagnostisches Kurz-Inventar bei Psychischen Störungen (Margraf et al)
USE: Anxiety Disorders Interview Schedule (DiNardo et al)

Diagnostisches Kurz-Inventar bei psychischen Störungen (Margraf)
"the Mini-DIPS consists of a structured interview enabling the clinician to screen for mental disorders according to DSM-IV and ICD-10 criteria." [82561]
UF: Mini-DIPS

Diary Compliance Scale (Davies and Clark)

Dichotic-Listening Task (Hugdahl)
"The DL task is a well-established measure of attention and executive impairment." [36059]

Dickman Impulsivity Inventory

DID Index (Zywiak)
An scale of the Self-Description Inventory "developed by the author to identify females with dissociative identity disorder" [90250]
Zywiak, W H. Testing the Self-Description Inventory’s ability to identify individuals with dissociative identity disorder. Doctoral dissertation, State University of New York at Buffalo, 1996. [90250]

Didactic Questionnaire (Najavits)

Differential Emotions Scale
"a 37-item, self-report measure with 12 subscales" [08506]

Differential Personality Questionnaire
USE: Multidimensional Personality Questionnaire (Tellegen)

Differentialization of Self Inventory (Skowron and Friedlander)
"The DSII is a 43-item self-report inventory that measures the degree of autonomous functioning within interpersonal relationships." [83818]

Differentialization of the Self Scale (Appel)
"This scale measures three dimensions of differentiation of the self, as perceived by an individual, concerning his relation with his spouse..." [32459]

Differentielle Affektskala (Merten and Krause)
**Difficult Behavior Questionnaire (Institute of Psychiatry)**

"an instrument, based on a questionnaire developed at the Institute of Psychiatry, London, designed to screen for HSS [hyperphagic short stature] symptoms, and questionnaires enquiring more generally about progress and behaviour at school" [21341]

**Difficult Life Circumstances Scale (Booth et al)**

"The original 28-item binary scale was developed to assess chronic, current family stressors, rather than stress resulting from significant life changes." [27790]

**Difficulties in Emotion Regulation Scale (Gratz and Roemer)**

"The DERS is a 36-item measure that assesses individuals’ typical levels of emotion dysregulation across six domains." [82521]

**Digit Span**

[used but not cited in 09641]

**Digit Span Distractibility Test**

**Digit Symbol Substitution Test (Oswald and Fleischman)**

**Digit Symbol-Coding**

[used but not cited in 31356]

**Digit Vigilance Test**

**Dimensional Assessment of Personality Problems - Basic Questionnaire (Schroeder et al)**

"a questionnaire designed to assess personality disordered individuals" [20531]

**Dimensional Change Card Sort Task (Frye et al)**

**Dimensions of Anger Reactions Scale (Novaco)**

"a seven-item self-report scale listing dimensions of anger reactions" [06346]

**Dimensions of Attention Questionnaire (Pekala)**

**Dimensions of Depression Profile (Harter and Nowakowski)**

"addresses five aspects of depression"

**Dimensions of Social Support Scale (Schaefer et al)**

UF: Social Support Scale (Schaefer et al)

**Dimensions of Stressful Events Rating Scale (Fletcher)**

"The DOSE is a 29-item rating scale completed by a clinician...and which delineates the traumatizing dimensions of stressful events." [29797]

Fletcher, K. *Dimensions of Stressful Events (DOSE) Rating Scale*. Worcester: University of Massachusetts Medical Center, 1996. [cited in 29797]
Dimensions of Temperament Survey (Lerner et al)
UF: DOTS
DOTS-R
Revised Dimensions of Temperament Survey (Windle and Lerner)

Direct Assessment of Functional Status (Lowenstein et al)
“DAFS is a behaviorally-based measure which assesses a broad array of functional activities required for daily living” [18292]
Lowenstein, D A; Amigo, E; Duara, R; Guterman, A; Hurwitz, D; Berkowitz, D; Berkowitz, N; Wilkie, F; Weinberg, G; Black, B; Gittelman, B; Eisdorfer, C. A new scale for the assessment of functional status in Alzheimer’s disease and related disorders. Journal of Gerontology 4: 114-121 (1989). [cited in 18292]

Direct Child Assessment Self-Description Questionnaire (ECLS-K)

Direct Observation Form
USE: Child Behavior Checklist (Achenbach and Edelbrock)

Directed Forgetting Task
[used but not cited in 28054]

Directive Approach Questionnaire (York)
"designed to examine the extent to which the social worker is directive toward the client" [40700]

DIS
USE: NIMH Diagnostic Interview Schedule (Robins et al)

DIS-Q
USE: Dissociation Questionnaire (Vanderlinden et al)

Disability Application Appraisal Inventory (Sayer et al)
"a self-report inventory developed to assess beliefs and attitudes about the disability application process” [26444]
Sayer, N A; Spoon, M; Nelson, D; Nugent, S. Development and psychometric properties of the Disability Application Appraisal Inventory. Submitted for publication, 2003. [cited in 26444]

Disability Benefits Questionnaire (USDVA)
a series of questionnaires "designed to streamline the claims rating process by the Veterans Benefits Administration” [38570]

Disability Profile (Schneier et al)
"clinician-rated instrument with items assessing current and most severe lifetime impairment due to social phobia in eight domains" [22315]
Schneier, F R; Heckelman, L R; Garfinkel, R; Campeas, R; Fallon, B A; Gitow, A; Street, L; Del Bene, D; Liebowitz, M R. Functional impairment in social phobia. Journal of Clinical Psychiatry 53: 322-331 (1994). [cited in 22315]

Disability Rating Index (Salen et al)
"The DRI comprises 12 questions about ordinary activities..." [36200]

Disability Rating Scale (Rappaport et al)
"a general measure of functional motor and living skills” [31033]

Disapproval of Deviancy Scale (Dervic et al)
"from the School Health Study” [33019]

Disaster Behavioural Responses (Weisaeth et al)
Disaster Experiences Questionnaire (Scheeringa and Zeanah)

"This 21-item interview was created for this study to capture descriptive data about the unique experiences of the Hurricane Katrina disaster." [32405]

Disaster Impact Scale (Sahin et al)
a 21-item questionnaire

Disaster Personal-Experiential Questionnaire (Miles et al)

Disaster Severity Scale (De Boer)

"The DSS assesses the severity of disasters using 7 dimensions" [36710]

Disaster Stress Questionnaire (Weinrich)

Disaster Stress Reaction Assessment (Demí and Miles)

"Items derived from the text of [DSM-III]"

Disaster Stress Self-Assessment (Speckhard)

"a two-page survey [that] included 30 closed-ended items designed to reflect the [DSM-IV] diagnostic criteria for acute stress disorder" [23449]

Disaster-Helper Self-Efficacy Scale (Gelkopf et al)

Disaster-Related Psychological Screening Test (Chou et al)

"DRPST was designed to collect background information on residents and check for psychological symptoms resulting from disaster-related psychiatric disorders (including 17 items for PTSD and 9 items for MDE) according to DSM-IV criteria." [81150]

Disaster-Related Stressors Measure (Reilly et al)

"developed by the researchers in order to describe experiences that occurred to participants within one month after the storm in order to better understand specific stressors they may have endured" [33883]

Reilly, K H; Clark, R A; Schmidt, N; Benight, C C; Kissinger, P. The effect of post-traumatic stress disorder on HIV disease progression following hurricane Katrina. AIDS Care 21: 1298-1305 (2009). [33883; instrument not named in article; name assigned by PILOTS Database staff]

Disclosure of Trauma Questionnaire (Müller et al)
USE: Fragebogen zum Offenlegen der Traumaerfahrungen (Müller et al)

Discomfort Intolerance Scale (Schmidt et al)

"The DIS is a 5-item self-report measure...that was used to assess discomfort intolerance, or the ability to tolerate physically aversive stimuli." [34071]

Discord Control and Coping Questionnaire (Rossman and Rosenberg)

"23-item forced-choice measure that asks children to rate the extent to which one of two options is 'a little' or 'a lot' like themselves" [16066]

Discrimination Stress Scale (Flores et al)

A 14-item scale "which assesses perceived racial/ethnic discrimination in everyday life due to ethnic minority status" [34567]

Dissociation Scale (Briere and Runtz)

"This measure contains a list of potential physical disabilities that MS patients commonly suffer." [18689]

Dissociation Scale (Briere and Runtz)

Dissociation Questionnaire (Vanderlinden et al)

Dissociation Questionnaire (Elsesser and Sartory)

Disorganizing Pover

Disorders of Extreme Stress Inventory (Van der Kolk et al)

Disorganizing Poverty Interview

Dispositional Resilience Scale (Bartone)

Disorganizing Poverty Interview

Disorganizing Poverty Interview

Dissatisfaction Scale (Shapiro et al)

Disorganizing Poverty Interview

Disorganizing Poverty Interview

Dissociation Questionnaire (Elsesser and Sartory)

"It was designed for use in the present study and consists of the DSM-IV criteria of dissociative symptoms, i.e., 13 items...rated on a 4-point scale": [30185]

Dissociation Questionnaire (Vanderlinden et al)

Dissociation Scale (Bernstein and Putnam)

Dissociation Scale (Briere and Runtz)

Dissociation Scale (Briere and Runtz)

Dissociation Research Scale (Sanders)

Dissociation Scale (Bernstein and Putnam)

Dissociation Scale (Briere and Runtz)

Dissociation Scale (Briere and Runtz)
Dissociation Scale (Ray et al)

"we developed a short scale for assessing dissociative experiences" [29172]

Ray, W J; Odenwald, M; Neuner, F; Schauer, M; Ruf, M; Wiembruch, C; Rockstroh, B; Elbert, T. Decoupling neural networks from reality: dissociative experiences in torture victims are reflected in abnormal brain waves in left frontal cortex. Psychological Science 17: 825-829 (2006). [29172]

Dissociation Sensitivity Index (Leonard et al)

"The DSI is a 22-item questionnaire measuring the degree of fear people would have if they experienced a number of dissociative symptoms, may of which are adapted from the DES." [81126]

Dissociation, Analgesia, Immobility, and Tension Scale (Stiglmayr et al)

USE: Dissoziations-, Analgesie-, Immobilitäts- und Spannungsskala (Stiglmayr et al)

Dissociative Behaviors Checklist (Armstrong et al)

Armstrong, J G; Laurenti, M B; Loewenstein, R J. Dissociative Behaviors Checklist—II. Unpublished instrument, Sheppard and Enoch Pratt Hospital, Towson, Maryland, 1991. [cited in 03610]

Dissociative Continuum Scale

[used but not cited in 91806]

Dissociative Disorders Interview Schedule (Ross et al)

Dissociative Experiences During Sexual Behavior Scale (Hansen et al)

"a 42-item scale ... assessing sexual problems experienced by individuals with histories of sexual trauma” [86558]

Hansen, N B; Brown, L J; Tsatkin, E; Zelgowski, B; Nightingale, V. Dissociative experiences during sexual behavior among a sample of adults living with HIV Infection and a history of childhood sexual abuse. Journal of Trauma and Dissociation 13: 345-360 (2012). [86558]

Dissociative Experiences Questionnaire (Marmar)

[unpublished document cited in 01892]

Dissociative Experiences Scale (Bernstein and Putnam)

UF: Dissociation Scale (Bernstein and Putnam)

Dissociative Features Profile (Silberg)

a two-part measure “developed to help uncover dissociative pathology in children and adolescents” [13503, appendix]

Dissociative Processes Scale (Harrison and Watson)

Harrison, J A; Watson, D. Dissociative processes in normal-range functioning. Unpublished manuscript, University of Iowa, 1996. [cited in 18625]

Dissociative Questionnaire

[used but not cited in 90945]

Dissociative Regression Scale (Tinnin)

"unvalidated scale to measure presence of dissociative regression in relation to DES scores” [16674]

Tinnin, L. Dissociative Regression Scale. Unpublished instrument, West Virginia University School of Medicine, 1994. [cited in 16674]

Dissociative Table Technique (Fraser)

"involves visualization of one's other ego-states” [18140]

Dissociative Trance Disorder Interview Schedule (Ross et al)

"we developed a structured interview...in order to gather standardized on possession states and related experiences, including classical culture-bound syndromes...” [40141]

Dissociative Violence Interview (Simoneti et al)

"constructed for the current project to evaluate a range of dissociative experiences that might occur in the context of intimate partner violence” [15555]

Dissoziations-, Analgesie-, Immobilitäts- und Spannungsskala (Stiglmayr et al)

"The DAISDS is a self-rating [22-item] questionnaire integrating elements of the Dissociative Experience Scale with items from the Fragebogen zu dissoziativen Symptomen, the German adaptation of the DES, and items from the Somatoform Dissociation Questionnaire (SDQ-20)." [21166]

Stiglmayr, C E; Bohus, M J; Richter, H; et al. Dissociations-, Analgesie-, Immobilitäts- und Spannungsskala. Unpublished scale. [cited in 21166]

UF: Dissociation, Analgesia, Immobility, and Tension Scale (Stiglmayr et al)

Distress-Spannungs-Skala Akut (Stiglmayr et al)

"a self-rating instrument to assess present-time dissociative features" [31668]

Distance Communication Comfort Scale (Schneider)

"This questionnaire...contains 27 statements relating to the comfort level with 3 different types of communication: face-to-face, by videoconference, and by telephone." [32026]

Distraction Questionnaire (Ehring et al)

"50 questions...assessing general knowledge" [33571]

Distress and Illness in Navajo Experience (Csordas et al)

"a series of open-ended interviews developed for use in this project" [31135]

Csordas, T J; Storck, M J; Strauss, M. Diagnosis and distress in Navajo healing. *Journal of Nervous and Mental Disease* 196: 585-596 (2008). [31135]

Distress at End of Study Questionnaire (Lyons-Ruth et al)

Lyons-Ruth, K; Choi-Kain, L; Pechtel, P; Bertha, E; Gunderson, J. Perceived parental protection and cortisol responses among young females with borderline personality disorder and controls. *Psychiatry Research* 189: 426-432 (2011). [37725]

Distress Evaluation Scale for Treatment (Devilly)

"This is an 8-item, rationally nased, measure of the distress and intrusiveness of the technique utilised during the therapeutic experience." [14687]

Distress Scale (Greenwald et al)

"...a 27-item questionnaire in the same format as the BSI [Brief Symptom Inventory (Derogatis and Spencer)]" Greenwald, E; Leitenberg, H; Cado, S; Tarran, M J. Childhood sexual abuse: long-term effects on psychological and sexual functioning in a nonclinical and nonstudent sample of adult women. *Child Abuse and Neglect* 14: 503-513 (1990). [02027]

Distress Scale (Margraf and Schneider)

Margraf, J; Schneider, S. *Panik*, 2nd ed. Berlin: Springer-Verlag, 1990. [cited in 06198]

Distress Thermometer (Holland)

"The DT is a brief self-report screening tool that measures sources of distress and distress levels over the past week." [29026]

Distress Tolerance Scale (Simons and Gaher)

"a 15-item self-report measure, in which respondents indicate on a 5-point Likert-type scale the extent to which they believe they can experience and withstand distressing emotional states" [84161]

Distress/Endorsement Validation Scale (Devilly)

"a 10-item scale which endeavours to measure treatment distress and participant endorsement of therapy protocols used in clinical research" [27475]

Distressing Aspects of Your Child’s Diabetes Scale (Horsch et al)

"developed specifically for the purposes of the present study to find out how distressing mothers perceived different aspects of their child’s diabetes to be, and to identify which aspect of their child’s diabetes classified as the traumatic stressor according to DSM-IV-TR" [81284]

PILOTS Database Instruments Authority List

**Distressing Event Questionnaire (Kubany et al)**
“a brief instrument for assessing PTSD according to criteria provided in DSM-IV” [22293]

**Distressing Events in Labour Questionnaire**
[used but not cited in 90007]

**Distrust of Authorities Scale (Bromet et al)**
“7 items on distrust of governmental, media, medical, and Chornobyl-related organizations” [31314]
Bromet, E; Gluzman, S; Schwartz, J; Goldgaber, D. Somatic symptoms in women 11 years after the Chornobyl accident: prevalence and risk factors. Environmental Health Perspectives 110(Supplement 4): 625-629 (2002). [cited in 31314]

**Disturbances of Attachment Interview (Smyke and Zeanah)**
“a 12-item semistructured interview of the parent that permits observations to be made simultaneously if the child is present” [35121]
Smyke, A; Zeanah, C H. Disturbances of Attachment Interview. New Orleans: Department of Psychiatry, Tulane University School of Medicine, 1999. [cited in 35121]

**Disturbing Dream and Nightmare Severity Index (Krakow et al)**
“revised version of Nightmare Frequency questionnaire” [24606]

**DISYPS-KJ**
USE: Diagnostik-System für Psychische Störungen im Kindes- und Jugendalter (Döpfner and Lehmkuhl)

**Diversity Sociodemographic Questionnaire: Criminal Offenders (Maschi)**
[used but not usefully cited in 86719]

**Divorce Dysfunctional Attitudes Scale (Lakey et al)**
18 items, "modeled after the Dysfunctional Attitudes Scale (Weissman and Beck)" [23681]
Lakey, B; Drew, J B; Anan, R M; Sirl, K; Butler, C. Social-cognitive factors in adults’ emotional adjustment to divorce. Manuscript submitted for publication, 1999. [cited in 23681]

**Divorce Events Schedule for Children (Sandler et al)**
Sandler, I N; Wolchik, S A; Braver, S L; Fogas, B S. Stability and quality of life events and psychological symptomatology in children of divorce. Unpublished manuscript, Arizona State University, 1988. [cited in 01247]

**Dizziness Handicap Inventory (Jacobson and Newman)**

**DKB-35 (Joraschky and Pöhlmann)**

**Documentation, Tracing and Reunification Protocol (Boothby and Halprin)**

**Dogmatism Scale (Rokeach)**
Rokeach, M. Political and religious dogmatism: an alternative to the authoritarian personality. Psychological Monographs 70 (Whole No. 425) (1956). [mpsa 562]
UF: D Scale
Rokeach Dogmatism Scale

**Domestic Child Abuse Experience Questionnaire (Lev-Wiesel)**
"assesses one’s family background and abusive experiences during childhood" [38931]

**Domestic Conflict Inventory (Margolin et al)**
"a 51-item questionnaire that includes items representing physical aggression, verbal aggression, and various forms of anger and withdrawal that may be exhibited in marriage" [22746]
Margolin, G; Burman, B; John, R S; O’Brien, M. Domestic Conflict Inventory. Unpublished instrument, University of Southern California, 1990. [cited in 22746]
Domestic Safety Assessment (Larkin et al)

"Derived from the Abuse Assessment Screen (McFarland et al), the DSA inquires about feelings of safety at home, and controlling behaviors, threats, physical violence, or forced unwanted sexual contact by an intimate partner or family member." [30390]

Domestic Violence Coping Self-Efficacy Measure (Harding et al)

"This 50-item questionnaire assesses participants' perceived ability to cope with effects of domestic violence..." [17998]

Domestic Violence Inventory (Ewart)

Domestic Violence Inventory (Sonkin)

[used but not clearly cited in 34983]

Domestic Violence Scale (Hussein)

"35 statements...to measure domestic violence" [18349]

Domestic Violence Service Provider Survey (Murray and Welch)

"a new survey instrument...created for this study" [84392]

Domestic Violence-Related Skills Scale (Haupoa Program)

"a 12-item counselor rating checklist" [82052]

Domestic Violence/Abuse Screen

[used but not cited in 83924]

Dominic (Valla)

Dot Counting Test (Binks et al)

"a simple cognitive test used to identify individuals who may be exaggerating the severity of their psychological difficulties (i.e., malingering)" [30304]

Dot Probe Task

[used but not cited in 91058]

DOTS

USE: Dimensions of Temperament Survey (Lerner et al)

DOTS-R

USE: Dimensions of Temperament Survey (Lerner et al)

Double-Bind Test (Phillips)

Draw a Person Picking an Apple from a Tree

a "drawing directive" [26233]

Draw a Story (Silver)

Draw-A-Man Test

USE: Draw-A-Person Test (Goodenough)

Draw-A-Person Questionnaire (Karp)

A version of the Draw-A-Person Test in which "subjects were asked to imagine their drawings to be real people and to fill out a questionnaire" [05047]

**Draw-A-Person Test (Goodenough)**

UF:  Draw-A-Man Test
Goodenough-Harris Drawing Test (Harris)
Test of Psychological Maturity (Harris and Goodenough)

**Draw-A-Person: Screening Procedure for Emotional Disturbance (Naglieri et al)**

**Draw-a-Tree (Hammer)**
USE:  House-Tree-Person Test (Buck)

**Dream and Nightmare Enquiry (Howard et al)**
"examines eleven areas of normal dreaming, nightmares, and night terrors, as experienced in adulthood and as recalled from childhood" [21294]
Howard, C; Claridge, G; Davis, C; Clark, K. Nightmare distress, nightmare content, and schizotypy. Paper submitted to *Dreaming*. [cited in 21294]

**Dream Quality Questionnaire (Bódizs et al)**

**Dream Questionnaire (Haraldsson)**
"consisted of five questions intended to assess the amount of dream recall, and control and awareness of the dreaming process" [25958]

**Dream Rating Scale for Combat-Related PTSD (Eposito et al)**
Eposito, K; Benitez, A; Barza, L; Mellman, T. Evaluation of dream content in combat-related PTSD. *Journal of Traumatic Stress* 12: 681-687 (1999). [14811]

**Dream Recall Frequency Scale (Schredl)**

**Dream Research Questionnaire (Bulkeley and Kahan)**
"the participants were asked 12 questions about their reactions to the events of September 11 and its impact if any on their sleep and dreams" [32063]

**Dresdner Körperbildfragebogen (Pöhlmann et al)**

**Drinker Inventory of Consequences (Miller et al)**
"This 50-item self-report inventory assesses the level of longterm negative consequences of alcohol in the following domains: physical, interpersonal, intrapersonal, social responsibility, and impulse control." [17759]

**Drinking and Driving Scale (Donovan)**

**Drinking Context Scale (O'Hare)**
"The 9-item DCS, developed with youthful problem drinkers, is used to measure excessive drinking in three situations: convivial drinking, intimate drinking, and drinking to cope with negative emotions." [30255]

**Drinking Habits Questionnaire (Cahalan et al)**
"assesses the type, amount, and frequency of alcohol consumption" [19881]
Drinking Motives Measure (Cooper et al)
"a 15-item self-report instrument that measures three drinking motives: coping with negative affect, enhancing positive affect, and social motives" [16098]

Drinking Motives Questionnaire (Cooper)

Drinking Practices Questionnaire (Cahalan et al)
USE: Cahalan Drinking Habits Questionnaire

Drinking Refusal Self-Efficacy Questionnaire - Revised (Oei et al)
"The DRSEQ-R is a 19-itemmeasure that asks respondents to rate their confidence that they could resist drinking alcohol in a variety of situations." [39465]

Drinking Styles Questionnaire (Christiansen et al)

Drinking to Cope with Negative Affect Scale (Cooper et al)
a 5-item scale [28110]

Driving Anger Expression Inventory (Deffenbacher et al)

Driving Anger Scale (Deffenbacher)

Driving Behavior Questionnaire (Parker et al)
Parker, D; Reason, J T; Manstead, A S R; Stradling, S. Driving errors, driving violations and accident involvement. Ergonomics 38: 1036-1048 (1995). [cited in 37962]

Drug Abuse Screening Test (Skinner)

Drug Abuse Screening Test for Adolescents (Martino et al)
"a 27-item self-report screening instrument that directly queries adolescents about any adverse consequences that they may have experienced secondary to drug use" [22301]

Drug and Alcohol Use Questionnaire (Weiss)
"used...to provide descriptive information about patients' drug of choice and first drug use" [21159]

Drug and Alcohol Use Survey for Adolescents (Rotheram-Borus et al)

Drug Attitude inventory (Awad)
a measure of "subjective medication satisfaction" [26592]

Drug Free Schools Outcome Study Questions
"from the Drug Free Schools and Communities Act of 1986" [37982]
[used but not otherwise cited in 37982]

Drug Involvement Scale for Adolescents (Eggert et al)

Drug Usage Scale (Ertl et al)
"developed for the study" [34436]
Drug Use and Risk Behavior Questionnaire (El-Bassel et al)
“to assess drug and alcohol use in the past 6 months” [32804]

Drug Use Motives Measure (Mueser et al)

Drug Use Questionnaire (Daigneault et al)

Drug Use Questionnaire (DiClemente et al)

Drug Use Questionnaire (Hien and First)
"a 61-item drug history interview" [22433]
Hien, D A; First, M. Drug Use Questionnaire. Unpublished scale, New York State Psychiatric Institute, 1991. [cited in 22433]

Drug Use Scale (Drake et al)

Drug Use Screening Inventory (Tarter)

Drug-Induced Extrapyramidal Symptoms Scale

Drug-Taking Confidence Questionnaire (Annis and Martin)

Drug/Alcohol Screening Test
"a 32-item scale" [used but not cited in 81322]

DSFI
USE: Derogatis Sexual Functioning Inventory (Derogatis)

DSM Scale for Depression (Roberts et al)
“based on DSM-IV, with 27 items for identifying depressive symptoms” [30459]

DSM Screen for Gambling Problems (National Opinion Research Center)
“a...34-item measure of DSM-IV criteria” [80068]
Gerstein, D; Murphy, S; Toce, M; Hoffmann, J; Palmer, A; Johnson, R; et al. Gambling Impact and Behavior Study. Chicago: University of Chicago, 1999. [cited in 80068]

DSM-III-R Checklist (Helzer et al)
"a semistructured, computerized clinical interview” [20387]

DSM-IV Field Trial Questionnaire for Dissociative Disorders of Childhood
"This is a questionnaire developed by the American Academy of Child and Adolescent Psychiatry and the dissociative disorder study group of the task force on DSM-IV." [24254]
[used but not cited in 24254]

DSM-IV PTSD Field Trial Assessment Protocol (Kilpatrick et al)
[cited in 09756 as "Kilpatrick et al., unpublished data"]
**DSMPTSD-III-R Self-Report Measure (Ursano et al)**

"The DSMPTSD-III-R and DSMPTSD-IV are self-report measures structured to meet DSM-III-R and DSM-IV diagnostic criteria for PTSD, using a multimatrix approach to increase the specificity of the measures [by adding 12 items to the Impact of Event Scale and Symptom Checklist 90-R]."

Ursano, R J; Fullerton, C S; Kao, T C; Bhartiya, V R. Longitudinal assessment of posttraumatic stress disorder and depression after exposure to traumatic death. *Journal of Nervous and Mental Disease* 183: 36-42 (1995) [05243]

Fullerton, C S; Ursano, R J; Epstein, R S; Crowley, B; Vance, K L; Craig, K J; Baum, A. Measurement of posttraumatic stress disorder in community samples. *Nordic Journal of Psychiatry* 54: 5-12 (2000). [22265]

**DSMPTSD-IV Self-Report Measure (Fullerton et al)**

"The DSMPTSD-III-R and DSMPTSD-IV are self-report measures structured to meet DSM-III-R and DSM-IV diagnostic criteria for PTSD, using a multimatrix approach to increase the specificity of the measures [by adding 12 items to the Impact of Event Scale and Symptom Checklist 90-R]."

Fullerton, C S; Ursano, R J; Epstein, R S; Crowley, B; Vance, K L; Craig, K J; Baum, A. Measurement of posttraumatic stress disorder in community samples. *Nordic Journal of Psychiatry* 54: 5-12 (2000). [22265]

UF: Brief PTSD DSM-IV Questionnaire (Fullerton et al)

**Dual Diagnosis Assessment Tool (Evans and Sullivan)**

an interview guide to evaluate "the alcohol/drug use pattern as it interrelates with any coexisting psychiatric disorder" [15015] Evans, K; Sullivan, J M. *Treating Addicted Survivors of Trauma.* New York: Guilford Press, 1995. [15015; the Dual Diagnosis Assessment Tool is printed on pp. 263-266]

**Dual Focus Test (Block and Block)**

**Duke Activity Status Index**

**Duke Global Rating Scale for Posttraumatic Stress Disorder**

"measures the severity and improvement of PTSD and all three symptom domains according to predefined anchor points on a scale from 1 to 7" [09434]

[used but not cited in 09434]

**Duke Health Profile (Parkerson et al)**

"a 17-item, self-report instrument containing measures of depression, self-esteem, and general health" [20287]

UF: Duke-UNC Health Profile (Parkerson et al)

**Duke Mental Health Study Inventory**

"The DMHS queries six-month history of mental and substance abuse problems." [28785]

Blazer, D G; George, L K; Landerman, R; Pennybacker, M; Melville, M L; Woodbury, M; Manton, K G; Jordan, K; Locke, B. Psychiatric disorders: a rural/urban comparison. *Archives of General Psychiatry* 42: 651-656 (1985). [cited in 28785]

**Duke Religion Index**

[used but not cited in 91563]

**Duke Religious Index (Koenig et al)**

"The DRI is a 5-item self-report scale that assesses 3 domains of religiosity: organizational religious activities, non organizational religious activities, and intrinsic religiosity." [39374]

**Duke Severity of Illness Scale (Parkerson et al)**

**Duke Social Support and Stress Scale (Parkerson)**

"The DUSOSCS rates family and non-family relationships in terms of the amount of support they provide and the amount of stress they cause." [mh 142]

**Duke Social Support Index (Landerman et al)**

**Duke Structured Interview for Sleep Disorders**

"The DSISD is an instrument developed to assist in ascertaining DSM-IV and International Classification of Sleep Disorders sleep disorder diagnoses." [36068]

Duke-UNC Functional Social Support Questionnaire (Broadhead et al)

Duke-UNC Health Profile (Parkerson et al)
USE: Duke Health Profile

Duncan Socioeconomic Index (Stevens and Featherman)

Dundee Stress State Questionnaire (Matthews et al)

Duration of Untreated Psychosis Scale
USE: Royal Park Multidiagnostic Instrument for Psychosis

Dutch Children's Responses to Trauma Inventory (Eland and Kleber)
“...a 26-item self-report questionnaire for children between the ages of 8 and 18” [30931]
Eland, J; Kleber, R. The Dutch Children's Responses to Trauma Inventory. Utrecht, The Netherlands: Institution for Psychotrauma, 1996. [cited in 30931]

Dutch Eating Behavior Questionnaire
[used but not cited in 92467]

Dutch Personality Questionnaire
USE: Nederlandse Persoonlijkheids Vragenlijst (Luteijn et al)

Dutch PTSD Scale (Hovens et al)
UF: Nederlandse PTSS-zelfbeoordelingsschaal (Hoivens et al)

Dutch Selective Sleep Grading Scale (De Graaf)
UF: Subjective Sleep Grading Scale
Subjective Slaap Schaal (De Graaf)

Dutch Symptom Checklist (Arrindell and Ettema)

Dyadic Coping Questionnaire (Bodenmann)
“...This 55-item questionnaire assesses dyadic coping and communication under conditions of stress.” [35398]
Dyadic Parent-Child Interaction Coding System
The DPICS is a behavioral observation system designed to assess the utility of parent-child social interactions. [38134]

Dyadic Sexual Communication Scale (Catania)

Dyadic Sexual Regulation Scale (Catania)

Dyadic Trust Scale (Larzelere and Huston)

DYS Assessment Interview (McMackin)
"a semistructured interview developed...for the current study" [22256]

Dysexecutive Questionnaire (Burgess et al)
"The VEX is a 20-item questionnaire for assessing cognitive, behavioral and emotional problems that characterise a frontal lobe or dysexecutive syndrome." [17003]
Burgess, P W; Alderman, N; Wilson, B A; Evans, J J; Emelie, H. The Dysexecutive Questionnaire. In: Wilson, B A; Alderman, N; Burgess, P; Emslie, H; Evans, J J (ed.), The Behavioural Assessment of the Dysexecutive Syndrome. Fiempton, England: Thames Valley Test Company, 1996. [cited in 17003]

Dysfunction Analysis Questionnaire (Pershad et al)

Dysfunctional Attitude Scale (Weissman and Beck)

SEE ALSO: Attitudes to Emotional Expression Scale (Williams et al)

Dysfunctional Sexual Behavior Scale (Briere and Runtz)
"a self-report instrument that taps behaviors judged as being representative of some sexually abused individuals" [14072]
Briere, J; Runtz, M. Differential adult TR disorders" [39494]

Dysphoric Affect Scale (Zanarini et al)
"a self-report measure [that] assesses 50 affects or cognitions that represent the inner states typical of borderline patients" [37951]

Dysregulation Inventory (Mezzich et al)
"a self-report measure designed to assess three aspects of dysregulation (emotional/affective, behavioral, and cognitive) in adolescents" [31453]

e-PASS (Klein)
"an online self-report diagnostic tool that assesses for 21 DSM-IV-TR disorders" [39494]
Klein, B. e-PASS. Unpublished data, September 2010. [cited in 39494]

Early Adolescent Temperament Questionnaire (Capaldi and Rothbart)

Early Childhood Inventories (Gadow and Sprafkin)

Early Childhood Trauma Self-Report (McDermott et al)
"a 20-item child self-report measure and a 12-item parent-report measure" [18914]
**Early Functional Abilities (Heck et al)**

"The Early Functional Abilities (EFA) is a 10-item questionnaire that assesses a patient's early functional abilities and is normally used in rehabilitation. The EFA scale consists of four functional areas with a total of 20 items."

**Early Home Environment Interview (Lizardi et al)**

"A semistructured interview that assesses five aspects of the early home environment before age 18: loss, physical abuse, sexual abuse, and the quality of the relationship with each parent." [24272]

**Early Infant Temperament Questionnaire (Medoff-Cooper et al)**

"The EITQ was designed to assess behavior characteristics between 1 and 4 months of age. It was modeled after the Revised Infant Temperament Questionnaire..." [34030]

**Early Intervention Developmental Profile (Rogers and D'Eugenio)**

"Contains 299 age-normed items...provides developmental norms in areas of perception/fine motor, cognition, gross motor, social/emotional, and language development" [28536]

**Early Life Events Questionnaire (Huprich)**

"The ELEQ is an unpublished, 7-item, true-false format questionnaire" [28731]

**Early Life Experiences Scale (Gilbert et al)**

"The ELES is a 15-item scale that measures emotional family memories." [86679]

**Early Life Stress Questionnaire (Gatt et al)**

A 19-item questionnaire that "assessed exposure to specific early life stressors before 18 years of age." [34390]

**Early Maladaptive Schemas Questionnaire (Hautekeete et al)**

USE: Questionnaire de Schémas Cognitifs (Hautekeete et al)

**Early Memories Test (Mayman)**

**Early Psychosis File Questionnaire**

"A specifically-designed file audit tool" [33985]

**Early Recollection Rating Scale (Altman)**

**Early Sexual Experiences Checklist (Miller et al)**

"Lists 10 sexual incidents" [84047]

**Early Sexual Experiences Survey (Bartoi and Kinder)**

"A standardized measure of child sexual abuse" [81229]

**Early Trauma Inventory (Bremner et al)**

"A 56-item interview for the assessment of physical, emotional, and sexual abuse, as well as general traumatic experience (including items which range from parental loss to natural disaster)." [22814]

Kriegler, J; Blake, D; Schnurr, P; Bremner, J D; Zaidi, L Y; Krinsley, K. Early Trauma Interview. Unpublished interview, 1992. [cited in 07174]

Bremner, J D; Vermotten, E; Mazure, C M. Development and preliminary psychometric properties of an instrument for the measurement of childhood trauma: the Early Trauma Inventory. *Depression and Anxiety* 12: 11-12 (2000). [22814]

**PILOTS Database Instruments Authority List**

167
Earthquake Experience Questionnaire (Hizli et al)
"This 54-item form had 3 subsections." [32319]

Earthquake Experiences Questionnaire (Sahin et al)
USE: Psychosocial Assessment Battery (Stuvland)

Earthquake Experiences Scale (Wang et al)
"An 8-item scale measuring the types of experiences most likely to occur in an earthquake was constructed ... The Deployment Risk and Resiliency Inventory was used as a model for scale development." [35192]

Earthquake Exposure and Postearthquake Environment Survey (Dogan)
[used but not cited in 85072]

Earthquake Exposure Checklist (Chang et al)
"The EEC consists of 30 questions designed to assess subjective aspects of the earthquake... and life events... and personal injury during the earthquake." [24456]
Chang, H-L; Chang, T-C; Lin, T-Y; Kuo, S-S. Psychiatric morbidity and pregnancy outcome in a disaster area of Taiwan 921 earthquake. Psychiatry and Clinical Neurosciences 56: 139-144 (2002). [24456]

Earthquake Exposure Index for Youths (Chen et al)
"The self-report 10-item EEIV is modified from the Earthquake Exposure Index of Chen et al..." [25283]

Earthquake Exposure Questionnaire (Asarnow et al)
"assessed objective aspects of the EQ (e.g., damage to residence, injuries), subjective appraisals of threat and vulnerability, and post-EQ adversities...[it was] designed to inquire about the stressors that were typically associated with the Northridge EQ" [21092]
Asarnow, J; Glynn, S; Pynoos, R S; Nahum, J; Guthrie, D; Cantwell, D P; Franklin, B. When the earth stops shaking: earthquake sequelae among children diagnosed for pre-earthquake psychopathology. Journal of the American Academy of Child and Adolescent Psychiatry 38: 1016-1023 (1999). [21092]

Earthquake Exposure Questionnaire (Horan et al)
"This self-report scale was developed for the current study to obtain an objective measure of exposure to the Northridge earthquake. The scale consisted of 21 yes or no questions covering various aspects of exposure to the earthquake and its consequences." [29610]
Horan, W P; Ventura, J; Mintz, J; Kopelowicz, D; Cantwell, D P; Franklin, B. Stress and coping responses to a natural disaster in people with schizophrenia. Psychiatry Research 151: 77-86 (2007). [29610]

Earthquake Hazard Questionnaire (Atwood et al)
Atwood, D; Clark, L V; Veneziano, L. The effect of various media on responses to the New Madrid earthquake prediction as moderated by sociodemographic and personality characteristics. Paper presented at the Research Conference on Public and Media Responses to Earthquake Forecasts, Edwardsville, Illinois, May 1991. [cited in 04820]

Earthquake Self-Report Questionnaire (Ekşi et al)
"The research team constructed a 20-item questionnaire including demographic characteristics and a list of earthquake-related events." [30766; instrument not named; name supplied by PILOTS Database staff]

Earthquake Trauma Exposure Scale (Goenjian and Steinberg)
"designed...to assess the degree to which an individual has been exposed to threat or loss" [26832]
Goenjian, A; Steinberg, A. The psychological consequences of the earthquake in Athens and possible interventions. Symposium conducted at the 'Efksini Poli', Athens, 1999. [cited in 26832]

Earthquake Trauma Questionnaire (Stuvland)
USE: Psychosocial Assessment Battery (Stuvland)

EASI (Buss and Plomin)
"a temperament questionnaire assessing negative emotionality" [26240]

East African Refugee Questionnaire (Jaranson et al)
"We developed a comprehensive closed-ended questionnaire [comprising] 188 questions with 537 response items adapted from published studies and the authors' clinical and research experiences. The questionnaire elicited biographical information; current and earlier life circumstances; health status; and experiences of violence, deprivation, and physical or psychological trauma and torture." [35261; instrument not named in source, name assigned by PILOTS Database staff]
Jaranson, J M; Butcher, J; Halcón, L; Johnson, D R; Robertson, C; Savik, K; Spring, M; Westermeyer, J. Somali and Oromo refugees: correlates of torture and trauma history. American Journal of Public Health 94: 591-598 (2004). [35261]
East-West Spiritual Beliefs Scale (Davidson et al)
"The EWSBS is a 13-item self-rated scale...used to measure spiritual beliefs." [82462]

EAT
USE: Eating Attitudes Test (Garner and Garfinkel)

Eating Attitudes Test (Garner and Garfinkel)
UF: EAT

Eating Disorder and Self-Destructive Behavior Checklist
[used but not clearly cited in 39006]

Eating Disorder Diagnostic Scale (Stice et al)

Eating Disorder Evaluation Scale (Vandereycken)

Eating Disorder Examination (Cooper and Fairburn)

Eating Disorder Examination-Questionnaire (Beglin and Fairburn)

Eating Disorders Family History Interview (Strober)
"a structured clinical interview" [21069]

Eating Disorders Inventory (Garner et al)

Eating Disorders Questionnaire (Mitchell et al)

Eating Expectancies Inventory (Hohlstein et al)
"This instrument contains 34 items measuring five learned expectations for reinforcement from eating and dieting:" [28894]

Eating in Response to Trauma (Harrington et al)
9 items measuring "potential ways in which might use eating to cope with trauma" [28894]

Échelle Cognitive d’Attachement aux Benzodiazépines (Pélissolo et al)

Échelle Comportementale d’Anxiété et de Peurs (Vera)
"The ECAP is a 79-item self-report form for assessing the fears of children and adolescents and the symptoms of DSM-IV anxiety disorders." [21692]
UF: Anxiety and Fear Behavior Scale (Vera)

Échelle d’Humeur Dépressive (Jouvent)
[used but not cited in 35332]
Échelle d’Attitudes par Rapport à la Violence Socio-Politique (Sadlier)
"une échelle...créée spécifiquement pour cette recherche" [22473]

Échelle d’Événements de Vie (Ferreri)
"37 items" [23744]

Échelle de Depression (Choquet et al)
"utilisée en France dans une enquête nationale sur les adolescents" [81383]

Echelle de l’Autonomie de l’Adolescent
USE: Adolescent Autonomy Scale

Échelle de Téléprésence en Videoconference (Bouchard and Robillard)
"administered...to assess the extent to which participants had the impression of 'being with' the therapist during their most recent videoconferencing session" [32026]
UF: Videoconferencing Telepresence Scale (Bouchard and Robillard)

Échelle du Vécu de l’Insertion et de l’Isolament (Spitz et al)
5 items

Échelle du Vécu de la Gestion du Travail Universitaire (Spitz et al)
10 items

Ecocultural Family Interview (Weisner et al)

Ecological Momentary Assessment
"EMA can be used to obtain frequent samples of symptoms and behavior in the person’s environment in near-real time." [38857]
[used but not clearly cited in 38857]

Economic Strain Scale (Pearlin et al)

Edinburgh Handedness Inventory (Oldfield)

Edinburgh Postnatal Depression Scale (Cox et al)
UF: Brief Edinburgh Depression Scale

Edmonton Symptom Assessment System

Educational Degree Behaviors Self-Efficacy Scale (Gloria)
Gloria, A M. Psychological factors influencing the academic persistence of Chicano undergraduates. Doctoral dissertation, Arizona State University, 1993. [cited in 40079]

Effectiveness in Obtaining Resources Scale (Sullivan and Bybee)
"a measure designed for use with battered women" [80162]

Effects of Drinking Scale (Simpson et al)
"consists of 107 different possible effects of drinking" [25468]

Effects of War Inventory (Kimhi and Shamai)
8 items "pertaining to perceived war effects' [83727]
Efficacy of Help-Seeking Scale (Eckenrode)
"a 6-item scale measuring attitudes toward help seeking" [34799]

Effort-Reward Imbalance Questionnaire (Siegrist et al)
Siegrist, J; Starke, D; Chandola, T; Godin, I; Marmot, M; Niedhammer, I; Peter, R. The measurement of effort-reward imbalance at work: European comparisons. *Social Science and Medicine* 58: 1483-1489 (2004). [cited in B5455]

EFT Checklist (Paivio)
"The EFT Checklist was developed for this study to assess adherence to intervention principles [of Emotion Focused Therapy]." [15864]

Egna Minnen Betroffande Uppfostran
USE: EBHU (Perris et al)

Ego Development Scale (Loevinger)

Ego Function Assessment (Bellak et al)

Ego Identity Scale (Tan et al)

Ego Impairment Index (Perry and Viglione)

Ego Strength Questionnaire (Barron)

Ego-Resiliency Scale (Block and Kremen)
a 14-item scale used to assess psychological resilience [06771]

Eigenschaftswörterliste (Janke and Debus)
"the adjective checklist EWL [is] a multidimensional mood-states questionnaire" [36747]

UF: BKSE (Janke et al)

Eight-Item Treatment-Outcome Post-Traumatic Stress Disorder Scale (Davidson and Colket)
"drawn from the Structured Interview for PTSD (Davidson et al)"

UF: TOP-8

Einstellungs- und Verhaltensfragebogen (Janke and Hüppe)

UF: Attitude and Behavior Questionnaire (Janke and Hüppe)

Ekel-Pilotfragebogen (Vogt)
[used but not cited in 83750]

Ekman Facial Recognition Test
"measures the ability to accurately identify emotional expressions in other people’s faces" [83273]

Elaboration and Dyselaboration Manual (Horowitz et al)
Horowitz, M J; Milbrath, C; Reidbord, S P; Stinson, C H; Fridhandler, B; Redington, D J; Wolf, D. *Elaboration and Dyselaboration Manual*. Unpublished manuscript, 1989. [cited in 05938]

Elder Abuse Vignette Scale (Hudson and Carlson)
Elderly Care Research Center Coping Scale (Kahana and Kahana)
UF: Coping Scale (Elderly Care Research Center)

Elders Life Stress Inventory (Aldwin)
"a list of 31 stressful life events" [14653]

Electrically Activated Recorder (Mehl et al)
"an event-sampling tool designed for the naturalistic assessment of acoustic behavioral traces" [25995]

Elements of Elder Abuse Scale (Hudson and Carlson)
Hudson, M F; Carlson, J. Elder abUSE: its meaning to middle-aged and older adults - Part I: instrument development. Journal of Elder Abuse and Neglect 6: 29-54 (1994). [05264; the Scale appears on p. 52]

Elmore Scale of Anomie (Elmore)

Embedded Figures Test

EMBU (Perris et al)
"abbreviated from the original Swedish title" [04597]
UF: Egna Minnen Betraffande Uppfostran
Memories of Childhood Rearing Inventory (Ross et al)
Own Memories of Child-Rearing Experience Scale (Ross et al)

EMDR Fidelity Scale (Korn et al)
"used to assess EMDR treatment adherence" [85068]

EMDR Headache Treatment Intake Form (Konuk et al)

Emergency Medical Service Work Experience Questionnaire (Nortje et al)
"This questionnaire was designed for the present study [and] assessed the frequency of exposure to a list of 33 duty-related traumatic experiences." [27693]

Emery Questionnaire for Predisposing Variables (Emery)

Emotion Attribution Task (Blair and Cipolotti)
"In this task, the participants are asked to read 58 short stories describing emotional situations and to describe what the main protagonists might feel in that situation." [38333]

Emotion Dysregulation Scale (Weston and Bradley)
"a 24-item self-report scale adapted from the clinician-rated Affect Regulation and Experience Q-Sort Questionnaire" [36592]

Emotion Expression List (Médecins Sans Frontières)
"The EEL was set up to better understand the way emotions are expressed in Aceh culture, as well as the perception people have on some psychological disturbances." [81249]
Emotion Face Assessment Task (Hariri et al)
Hariri, A R; Mattay, V S; Tessitore, A; Kolachana, B; Fera, F; Goldman, D; Egan, M F; Weinberger, D R. Serotonin transporter genetic variation and the response of the human amygdala. Science 297: 401-403 (2002). [cited in 29138]

Emotion Management Index (Zeman and Shipman)
"developed...to assess several aspects of children's emotion regulation” [14468]

Emotion Profile Index (Plutchik and Kellerman)

Emotion Protocol (Shimomitsu and Theorell)
"an instrument aimed at measuring emotions in studies of psychophysiology and psychosomatics” [26600]

Emotion Questionnaire (Vernon)
"included 5 scales: anger, fear, guilt, sadness, and shame” [82111]

Emotion Recognition Task (Montagne et al)
"a computer task...to evaluate the recognition of emotional facial expressions” [35568]
Montagne, B; Kessels, R P; De Haan; E H; Perrett, D I. The Emotion Recognition Task: a paradigm to measure the perception of facial emotional expressions at different intensities. Perceptual and Motor Skills 104: 589–598 (2007). [cited in 35568]

Emotion Regulation Checklist (Shields and Cicchetti)
"a 24-item rating scale that assesses children’s capacities for emotional self-regulation” [22774]

Emotion Regulation Questionnaire
USE: Sense of Emotional Control Questionnaire (Znoj et al)

Emotion Regulation Questionnaire (Gross and John)
"The 10-item ERQ assesses individual differences in two emotion regulation strategies: emotion suppression and cognitive reappraisal.” [29558]

Emotion Regulation Scale (Hinton et al)
"We have created a 10-item Likert-type scale that assesses the patients ability to distance from a number of dysphoric affects...and the ability to distance from dysphoric emotions induced by particular situations...” [33298]

Emotion Scale (Zivcic)
USE: Mood Scale (Zivcic)

Emotion Thermometer (Obanion and Veronen)
UF: Fear Thermometer

Emotional Abuse Questionnaire (Rushe et al)
"the EAQ is a project-designed, partner-report measure. It contains 66 items pertaining to threatening, controlling, degrading, and sexually abusive behaviors done in the past by the spouse.” [23975]

Emotional and Physical Abuse Questionnaire (Carlin et al)
"This scale consists of 32 abuse items that range in severity from relatively common to relatively severe forms of abuse.” [21393]
Carlin, A S; Kemper, K; Ward, N G; Sowell, H; Gustafson, B; Stevens, N. The effects of differences in objective and subjective definitions of childhood physical abuse on estimates of its incidence and relationship to psychopathology. Child Abuse and Neglect 18: 393-399 (1994). [cited in 21393]

Emotional and Psychological Distress Scale (Weinberger and Schwartz)

Emotional Approach Coping Scale (Stanton et al)
Emotional Availability Scales (Biringen et al)

“The EAS consists of 4 measures of the emotional availability of the parent toward the child (sensitivity, structuring, intrusiveness, and hostility) and 2 measures of the child toward the parent (responsiveness to parent and involvement of parent).” [32920]

Emotional Avoidance Questionnaire (Taylor et al)

“The EAQ is a 20-item self-report measure that assesses emotional avoidance as a multifaceted construct that includes the avoidance of positive and negative emotions, social concerns about displaying emotions, and negative beliefs about emotions.” [36067]

Emotional Barometer
[used but not cited in 85200]

Emotional Condition Scale (Bezinovic)
[unpublished instrument, used but not cited in 13861]

Emotional Contagion Scale
[used but not cited in 90594]

Emotional Control Questionnaire (Roger and Nesshoever)

Emotional Disclosure Protocol (Pennebaker)

Emotional Eating Scale (Arnow et al)
a 25-item scale “used to assess the extent to which various emotions produce a desire to eat” [23023]

Emotional Empathic Tendencies Scale (Mehrabian and Epstein)
a 33-item self-report scale

Emotional Expression and Processing Scale (Stanton et al)
16 items

Emotional Expressivity Scale (Kring et al)

Emotional Facial Action Coding System

Emotional frailty Scale (Caprara et al)
"The EFS measures and assess the frailty degree of the respondent using 30 items...” [40658]
Caprara, C V; Perugini, M; Barbaranelli, C; Pastorelli, C. Emotional Frailty Measurement Scale. Florence: O.S., 1983. [cited in 40658]

Emotional Indicator Scoring System for Human Figure Drawings
USE: Emotional Indicators (Koppitz)

Emotional Indicators (Koppitz)
Kopitz, E M. Psychological Evaluation of Children’s Human Figure Drawings. New York: Grune & Stratton, 1968. [cited in 00990]

Emotional Intelligence Scale (Schutte et al)
"The EIS consists of 33 items” [85944]

Emotional Intensity Scale
[used but not cited in 92376]
Emotional Maturity Rating Form (Bessell)
Tilden, R S. Predicting marital adjustment with level of object relations, romantic love, and emotional maturity. Doctoral dissertation, United States International University, 1989. [cited in 21633]

Emotional Numbing Scale
[used but not cited in 91098]

Emotional Problem Scales
[used but not cited in 91699]

Emotional Quotient Inventory (Bar-On)
"the EQ-i examines an individual’s social and emotional strengths and weaknesses" [publisher]

Emotional Reaction Checklist (Long and Jackson)
"This 20-item adjective checklist from the Past Experiences Questionnaire was developed to assess emotional reactions to child sexual abuse." [81241]

Emotional Reaction to Accident Inventory
USE: ERA-Inventory (Lidvall et al)

Emotional Reactivity and Numbing Scale (Orsillo et al)
"The ERNS consists of 66 items describing the emotional response a participant may have to an emotion eliciting event or experience." [30039]

Emotional Recognition Test (Kohler et al)
"The ER contains 40 colored pictures of faces expressing four different emotions or no emotion." [31939]
Kohler, C G; Turner, T; Stolar, N M; Bilker, W B; Brensinger, C M; Gur, R E; Gur, R C. Differences in facial expressions of universal emotions. *Psychiatry Research* 128: 235-244 (2004). [cited in 31939]

Emotional Response Scale (Pole)
"The ERS was developed by the first author to assess self-reported emotional reactions to the startling sounds." [14536]

Emotional Self-Awareness Questionnaire (Killian)

Emotional Self-Disclosure Scale (Snell et al)
"This scale contains 40 questions covering eight subscales: Depression, Happiness, Jealousy, Anxiety, Anger, Calmness, Apathy, and Fear." [26677]

Emotional Structural Preparedness Worksheet (Gusman et al)

Emotional Support Scale (Butler et al)

Emotional Well-Being (Turner)

Emotional-Attentional-Blink Paradigm (Most et al)

Emotionalitätseinventar-Befinden (Ulrich and Ulrich de Muynck)

Emotionality, Activity, Sociability, and Impulsivity Temperament Survey (Earls et al)
**Emotionally Valenced Word Priming Task (Kerns and Berenbaum)**

**Emotions and Beliefs After Trauma Scale (Livonou et al)**
Livonou, M; Basoglu, M; Marks, I M; De Silva, P; Noshirvani, H; Lovell, K; Thrasher, S. Beliefs, sense of control and treatment outcome in post-traumatic stress disorder. *Psychological Medicine* 32: 157-165 (2002). [24794]

**Emotions During the Assault Scale (Dunmore et al)**
"Participants rated the extent to which they experienced each of a list of 23 emotions during the assault..." [29384]

**Emotions Questionnaire (Smith et al)**
"The EMO was constructed for this study on the basis of existing literature on traumatic countertransference. It contained 5 items on awareness of countertransference reactions and 13 items in 3 subscales relating to role reactions, negative emotions, and distancing." [81404]

**Emotions Rating Scale**
[used but not cited in 92653]

**Empathy for Women Test (Hanson and Scott)**
"The EFW Test assessed sexual offenders' ability to distinguish sexually abusive and nonabusive interactions between men and women." [17117]

**Empathy Index (Bryant)**
[used but not cited in Simmer-Dvonch dissertation]

**Empathy Picture System (Geday et al)**

**Empathy Questionnaire (Baron-Cohen et al)**
"The [50-question] EQ was designed to examine empathy competences." [38333]

**Empathy Scale (Burns et al)**
"a measure of the patient's perception of the quality of the therapeutic relationship" [32155]

**Empirically-Supported Treatments Questionnaire (Allen et al)**
A list of 15 interventions was presented to respondents. [86253]

**Empowerment Questionnaire (Albertyn)**
Albertyn, R. Conceptualisation and measurement of the empowerment of workers: an educational perspective. Doctoral dissertation, Stellenbosch University, 2000. [cited in 19455]

**Empowerment Scale (Rogers et al)**
"a 23-item scale" [19752]

**Empowerment Scale (Zimmerman et al)**
"designed to measure the respondent's sense of control over personal and community decisions" [30986]

**EMS Demographic Questionnaire (Cowan)**
a "researcher-created" scale [93252]

**End-of-Treatment Questionnaire (Najavits)**
Endicott Work Productivity Scale (Endicott and Nee)
"a 25-item self-report measure, designed to assess the work functioning of participants" [25419]

Endler Multidimensionality Anxiety Scales (Endler et al)
"The EMAS-Trait scale was formerly called the S-R Inventory of General Trait Anxiousness, and the EMAS-State scale was formerly called the Present Affect Reactions Questionnaire." [03871]
UF: Present Affect Reactions Questionnaire
S-R Inventory of General Trait Anxiousness

Enhanced Post-Deployment Screening Process (Canadian Forces)
"The EPDS process consists of completion of a confidential (though not anonymous) health questionnaire, followed by an in-depth interview with a mental health clinician." [40817]
[used but not cited in 40817]

Enrich Scale for Marital Quality
"This [105-item] questionnaire assesses potential problems and strengths of relationships" [08698]
Olson, D H; Fournier, D G; Druckman, J M. ENRICH. In: Olson, D H; Porter, J; Bell, R (ed.). Adaptability and Cohesion Scales (FACES II), pp. 46-68. St Paul, Minnesota: University of Minnesota, Department of Family Social Science, 1982. [cited in 08698]
ENRICHD Social Support Instrument
"a 5-item scale constructed from items from other well-validated support scales found to be individually predictive of death in cardiac patients"

Enright Forgiveness Inventory (Enright)

Entrapment Scale (Gilbert and Allan)
"consists of 16 items assessing perceptions of being trapped by external or internal stressors" [38846]

Entrevista Semiestructurada sobre Maltrato Doméstico (Echeburúa et al)
Echeburúa, E; Corral, P; Sarasua, B; Zubizarreta, I; Saucá, D. Entrevista Semiestructurada sobre Maltrato Doméstico. Unpublished instrument, 1994. [cited in 29416]

Environmental Mastery Scale (Ryff)
[used but not cited in 91727]

Environmental Reward Observation Scale (Armento and Hopko)
"The EROS is a 10-item measure that assesses exposure to environmental rewards deemed essential for increasing response-contingent positive reinforcement." [37497]

Environmental Worry Scale (Bowler and Schwarzer)

EORTC Quality of Life Questionnaire
"30-item questionnaire developed by the European Organization for Research and Treatment of Cancer (EORTC) Study Group" [21628]
UF: QLQ-C30

EP-Skalen (Schneewind et al)
[cited only as "Schneewind et al., 1985" in 19166]

EPAQ
USE: Extended Personal Attitudes Questionnaire (Spence et al)

EPI
USE: Eysenck Personality Inventory (Eysenck and Eysenck)

Episodic Dyscontrol Scale (Monroe)
EPQ
USE: Eysenck Personality Questionnaire (Eysenck and Eysenck)

Epstein Feelings Inventory (Mehrabian and Epstein)

Epworth Sleepiness Scale

ERA-Inventory (Lidvall et al)

UF: Emotional Reaction to Accident Inventory

Erectile Dysfunction Inventory of Treatment Satisfaction (Althof et al)

Erica-Method (Sjolund)
USE: Lowenfeld World Technique (Lowenfeld)

Eriksen Flanker Task
[a cognitive processing task used but not clearly cited in 86560]

Erikson Psychosocial Stage Inventory (Rosenthal et al)

Erotic Preference Examination Scheme (Freund)

Erwin Identity Scale (Erwin and Delworth)

UF: Scale of Identity (Erwin and Delworth)

Escala de 24 de Clima Emocional (De Rivera)
[used but not clearly cited in 84801]

Escala de Adaptación (Echeburúa and Corral)

UF: Scale of Adaptation (Echeburúa and Corral)

Escala de Apreciación de Estrés (Fernandez and Mielgo)
"This scale is composed of a list of 53 items corresponding to 53 possible life events referred to health, relationships, lifestyle, and economic and social issues." [84528]

UF: Scale of Stress Perception (Fernandez and Mielgo)

Escala de Autoconcepto (Martorell et al)
"The AC Questionnaire assesses children and adolescents’ self-concept in different contexts. It contains 38 self-reported items with 4 alternative answers." [34892]

UF: AC Questionnaire (Martorell et al)

Self-Concept Questionnaire (Martorell et al)

Escala de Avaliação da Resposta ao Acontecimento Traumático (McIntyre and Ventura)
"developed by the authors based on the DSM-IV diagnostic criteria for PTSD and validated for the Angolan population" [83937]

UF: PTSD Scale for Adolescents (McIntyre and Ventura)

Escala de Clima Emocional (Paéz et al)

Escala de Clima Social (De Rivera)
[used but not clearly cited in 84798]

Escala de Conductas de Autocuidado para Psicólogos Clínicos (Guerra et al)
Guerra, C; Rodriguez, K; Morales, G; Betta, R. Validación inicial de la Escala de Conductas de Autocuidado para Psicólogos Clínicos. [cited only as “in press” in 36160]
Escala de Gravidad de Síntomas del Trastorno de Estrees Postraumático (Echeburúa et al)
UF: Scale of Severity of Posttraumatic Stress Disorder Symptoms (Echeburúa et al)

Escala de Inadaptación (Echeburúa and Corral)
[used but not cited in 29416]

Escala de Ruminación (Paéz et al)

Escala de Satisfação com o Suporte Social (Pais-Ribeiro)
"a [15-item] measure of perceived social support for healthy and clinical populations" [39994]
UF: Satisfaction with Social Support Scale (Pais-Ribeiro)

Escala de Síntomas Somáticos (Sandín and Chorot)
"the short form...includes 17 items related to bodily sensations that usually states of anxiety and panic" [40424]
Sadín, B; Chorot, P. Escala de Síntomas Somáticos. Poster presented at the 3rd Congress on Psychological Assessment, Barcelona, Spain, September 1991. [cited in 40424]

Escala de Stress Infantil (Lipp and Lucarelli)
"The ESI is made up of 35 items addressing the following reactions to stress: physical, psychological, psychological with a depression component, and psycho-physiological." [33994]
UF: Children’s Stress Inventory (Lipp and Lucarelli)

Escape Scale (Cernovsky)

Essay Evaluation Form
"8 Likert questions on a 7-point scale" [26502]
[used but not cited in 26502]

Essen Trauma Inventory
USE: Essener Trauma-Inventar

Essener Fragebogen für Eltern in Trennungs- und Scheidungssituationen
[used but not cited in 19166]

Essener Trauma-Inventar
"The ETI assesses various aspects of traumatic events and both posttraumatic disorders, namely PTSD and Acute stress Disorder, according to criteria provided in DSM-IV." [81099]
Tagay, S; Erim, Y; Stoelk, B; Möllering, A; Mewes, R; Senf, W. Das Essener Trauma-Inventar (ETI) - ein Screeninginstrument zur Identifikation traumatischer Ereignisse und posttraumatischer Störungen. Zeitschrift für Psychotraumatologie, Psychotherapiewissenschaft, Psychologische Medizin 5(1): 75-89 (2007). [81099]
UF: Essen Trauma Inventory

Established Populations for Epidemiological Studies of the Elderly

Estimation Scale for Engagement of Children in Group Work (Ajdukovic)

Esuba Survey (Roe-Sepowitz et al)
"The Esuba survey was created by the researchers to obtain information regarding family issues, risk taking behaviors, and criminal behaviors. It is a self-administered questionnaire with primarily dichotomous answer options." [81415]

Ethnocentrism Scale (Scheepers et al)
[scale used but not named in 30389; name assigned by PILOTS Database staff]

EUMP (Cremniter and Coq)
"a 33 item scale [that] allows for the description of the early and delayed psychological consequences of trauma" [33007]
[unpublished instrument used but not otherwise cited in 33007]

Euro-D Scale
USE: European Depression Scale
EUROHIS Quality of Life Scale
"an 8-item...instrument covering the following 4 domains: psychological, physical, social, and environmental quality of life"
[85203]

European Addiction Severity Index
"The EuropASI has been developed on the basis of the American Addiction Severity Index.” [30306]

European Community Respiratory Health Survey [used but not clearly cited in 36253]

European Depression Scale
"contains 12 items that specify recent depressive symptoms” [83944]
UF: Euro-D Scale

European Social Survey [used but not clearly cited in 84775]

UF: EuroSCORE

EuroQol (Brazier et al) "a simple, standardised instrument that measures health-related variables of the quality of life” [26644]

Evacuation Experience Questionnaire (Foster and Davis) "contains questions relating to current demographic information, and questions relating specifically to evacuation experiences” [30842]
Foster, D; Davies, S. Evacuation Experience Questionnaire. Unpublished instrument. [cited in 30842]

Evacuation Life Events Scale (Slone et al) "The 12-item scale was constructed to measure children's exposure to the different possible types of evacuation events...” [82952]

Evaluation of Contributing Factors (Fricton and Chung) "The questionnaire was used to evaluate the contributing factors of TMD patients; it consists of 4 sections, including emotions behaviors, cognitions and socialities.” [40381]

Evaluation of Lifetime Stressors (Krinsley et al) "a protocol consisting of a questionnaire and follow-up interview [providing] a comprehensive, multidimensional assessment of traumatic events across the lifetime” [15805]

Evaluation of Risks Scale (Sicard et al) "an instrument originally designed for measuring risk-taking propensity in French military forces” [84369]
Evaluation of Termination Status (Wolfe et al)

UF: Parent Evaluation of Termination Status
Therapist Evaluation of Termination Status

Evaluation of the Behavioral Health Interview (Sipos et al)
"4 items assessed soldiers' experiences with their behavioral health interview." [86551]
Sipos, M L; Foran, H M; Crane, M L; Wood, M D; Wright, K M. Postdeployment behavioral health screening: face-to-face versus virtual behavioral health interviews. *Military Medicine* 177: 525-530 (2012). [86551]

Evaluation of Traumatic Memories (Stoll et al)
"a structured and validated questionnaire evaluating different categories of traumatic memory" [25984]

Evaluation of Treatment Interview (Carroll et al)
"given after the last group session to address satisfaction with the clinician and the number of sessions and to identify helpful aspects of the treatment" [32555]

Evaluation Questionnaire (Lange et al)
"The EIQ was designed for this study to gather subjective information from the participants about Internet-mediated treatment." [22449]

Evaluation Ranking Scale (Attkisson et al)

Event Cost Questionnaire (Warda and Bryant)

Event Experience and Proximity Questionnaire (Schwarz et al)

Event Probability Questionnaire (Warda and Bryant)

Event Recall Exercise (Sheldon et al)

Event Related Ruminaton Inventory (Cann et al)
"a scale focused on repeated thinking about a specific event" [84565]

Event Scale (Dyregrov et al)
"a 15-item scale designed to assess the nature and extent of exposure to war events" [19812]

Event Severity Scale
[86551]

Events and Circumstances Survey (Lauten et al)

Everyly Behavioral Stress Inventory

Everstine Life Stress Index
USE: Everystine Trauma Response Index (Everstine)
Everstine Trauma Response Index (Everstine)
UF: Everstine Life Stress Index

Everyday Discrimination Scale (Williams et al)
"9 items that capture negative community interactions such as differential treatment, threats, or abuse" [34282]

Everyday Memory Scale (Crook and Larabee)

Everyday Problem Checklist (Vingerhoets et al)
USE: Alledaagse Problemen Lijst (Vingerhoets et al)

Everyday Problems Scale (Burks and Martin)

Everyday Stressors Index (Hall et al)

Evidence-Based Practice Attitudes Scale (Aarons)
"The EBAS is a 15-item inventory of beliefs regarding evidence-based practice in psychology." [30768]

Evidence-Based Practice Questionnaire (Jette et al)
"The EBQ consists of 51 items designed to assess a wide array of self-reported EBP practices, opinions, behaviors, and perceived barriers." [30768]
Jette, D; Bacon, K; Batty, C; Carlson, M; Ferland, A; Hemingway, R; Hill, J C; Ogilvie, L; Volk, D. Evidence-based practice: beliefs, attitudes, knowledge, and behaviors of physical therapists. Physical Therapy 9: 786-805 (2003). [cited in 30768]

Evidence-Based Practices Questionnaire (Dorsey et al)
a 54-item questionnaire "developed by our team...used to assess awareness of EBPs and actual referrals to EBPs" [86254]

Executive Clock Drawing Task (Royall et al)

Executive Interview (Royall et al)
"The EXIT25 is a 25-item assessment of executive function..." [38779]

Exercise Habits Questionnaire Revised (Zvolensky)
"The EHQ-R is a self-report measure used to obtain information about participants’ engagement in ... 29 different physical activities." [36962]

Exercise History Questionnaire (Hodge)
"designed...to collect information about participants’ past and current exercise habits, in particular, information regarding the type, amount, and intensity of regular physical exercise" [81092]

EXeter Identity Transitions Scales (Haslam et al)
"three measures assessing the sense of belonging, connection, and support associated with their group memberships" [38883]

Existential Anxiety Questionnaire (Weems et al)
"The EAQ is a [13 item ] true-false rating scale designed to assess the broad domains and subconcepts outlined in Tillich’s work." [39501]

Existential Depression Scale
USE: Minnesota Multiphasic Personality Inventory (Hathaway and McKinley)
Exorcism Experiences Questionnaire for MPD Patients (Bowman)

EXPAGG Scale

Expanded Attributional Style Questionnaire (Peterson and Villanova)
USE: Attributional Style Questionnaire (Peterson and Seligman)

Expanded Health Symptom Checklist
USE: Health Symptom Checklist (Wolfe et al)

Expectancies Questionnaire (Shaw et al)
“assessed patient and therapist treatment expectancies” [38743]

Expectancy of Therapeutic Outcome Questionnaire (Foa et al)
a 4-question, 9-point scale that measured the perceived credibility of each active treatment” [24652]

Expectation and Experience of Birth Scale (Slade et al)
“This list of 10 adjectives provides a measure of valence. Women are asked to rate how accurately each adjective describes their labor and delivery from 1 to 10.” [37846]

Expectation and Experience of Birth Scale (Slade et al)

"This list of 10 adjectives provides a measure of valence. Women are asked to rate how accurately each adjective describes their labor and delivery from 1 to 10." [37846]

Expectation and Experience of Birth Scale (Slade et al)

"This list of 10 adjectives provides a measure of valence. Women are asked to rate how accurately each adjective describes their labor and delivery from 1 to 10." [37846]

Expectation and Experience of Birth Scale (Slade et al)

"This list of 10 adjectives provides a measure of valence. Women are asked to rate how accurately each adjective describes their labor and delivery from 1 to 10." [37846]

Expectation and Experience of Birth Scale (Slade et al)

"This list of 10 adjectives provides a measure of valence. Women are asked to rate how accurately each adjective describes their labor and delivery from 1 to 10." [37846]

Expectation and Experience of Birth Scale (Slade et al)

"This list of 10 adjectives provides a measure of valence. Women are asked to rate how accurately each adjective describes their labor and delivery from 1 to 10." [37846]

Expectation and Experience of Birth Scale (Slade et al)

"This list of 10 adjectives provides a measure of valence. Women are asked to rate how accurately each adjective describes their labor and delivery from 1 to 10." [37846]

Expectation and Experience of Birth Scale (Slade et al)

"This list of 10 adjectives provides a measure of valence. Women are asked to rate how accurately each adjective describes their labor and delivery from 1 to 10." [37846]
Experience of Intrusions Scale (Salters-Pedneault et al)
"The EIS is a five-item measure that assesses the frequency, unpredictability, and unwantedness of intrusive thoughts, as well as the interference and distress caused by the intrusions, each on a five-point Likert-type scale." [82615]

Experience of Sexual Harassment Index (Fineran and Bolen)
"12 questions inquired about frequency of sexual harassment victimization." [80589]

Experience of Shame Scale (Andrews et al)
"The ESS is a 25-item scale assessing three different domains of shame: characterological, behavioural, and bodily shame." [30056]

Experience of Stress Scale
[used but not cited in 24433]

Experience Sampling Method (Csikszentmihalyi and Larson)

Experience Sampling Method (Delespaul)
"ESM is structured diary approach assessing thoughts, mood, and context in daily life." [29206]

Experienced Unrealness Scale (Boelen)
"The EUS is a 5-item measure...to tap a sense of 'unrealness' about the loss, defined as a subjective sense of uncertainty or ambivalence about the irreversibility of the separation." [32483]
Boelen, P A. A sense of "unrealness" about the death of a loved-one: an exploratory study of its role in emotional complications among bereaved individuals. Applied Cognitive Psychology, in press. [cited in 32483]

Experienced Well-Being Questionnaire (Dirken)
USE: VOEG (Dirken)

Experiences in Close Relationships Scale (Hazan and Shaver)
"The ECR is a 48-item questionnaire designed to assess adult attachment with respect to romantic partners." [16956]
Hazan, C; Shaver, P R. Experiences in Close Relationships Scale. Buffalo: Department of Psychology, State University of New York, 1990. [cited in 16956]

Experiences of Discrimination Scale (Krieger et al)

Experiences of Therapy and Childhood Sexual Abuse Questionnaire (Read et al)
"a postal questionnaire” developed for this study [80100]
Read, J; McGregor, K; Coggan, C; Thomas, D R. Mental health services and sexual abuse: the need for staff training. Journal of Trauma and Dissociation 7(1): 33-50 (2006). [80100]

Experiences of Workplace Violence Measure (Brough)
"a 6-item measure designed for the purpose of this research" [19638]

Experiences Questionnaire (Sappington et al)
22-item questionnaire "developed for this study in order to have a single measure which looked at child abuse, date abuse, and emotional problems” [09296]

Experiences with Violence Survey (CRAV)
"The EVS was developed by members of the Center for Research on Aggression and Violence at the University of Arkansas (CRAV) for the present study to assess experiences of witnessing, being the victim of, or perpetrating sexual or physical assault prior to and after the age of 18.” [80761]

Experiencing Scale (Klein et al)
"This scale is an empirically derived observer-rated instrument assessing experiential involvement in a therapeutic interaction along a 7-point scale." [23719]
Experiencing the Vietnam Veterans Memorial Scale
[used but not cited in 92120]

Experiential Avoidance Scale (Reddy et al)
"The EAS, comprised of 14 items, was designed specifically to supplement the 9-item Acceptance and Avoidance Questionnaire [80096]

Experiential Haemorrhage Inventory (Hiskey)
"details the extent to which one has changed following an event" [91555]
Hiskey, S. Intrusive experiences and psychological adjustment following trauma. Ph.D. dissertation, University of Essex (United Kingdom), 2003. [91555]

Experiential Haemorrhage Negotiation Scale (Hiskey)
"speaks to the process through which event based changes are accommodated” [91555]
Hiskey, S. Intrusive experiences and psychological adjustment following trauma. Ph.D. dissertation, University of Essex (United Kingdom), 2003. [91555]

Exposure Questionnaire (Jones)
"An exposure questionnaire was created. Nine questions about specific details of the bank robbery were included.” [18276]

Exposure Questionnaire (Lavi)
"This questionnaire assessed participants’ exposure to terror events, it consisted of 28 items, each of which refers to an event that Israeli youths encountered in the current wave of terror...” [27929]

Exposure Questionnaire (Nader et al)
10 "questions about children's direct and indirect exposure to war conditions” [04281]

Exposure Scale for Child Soldiers (Raundalen)

Exposure Therapy Revised Feedback Questionnaire
[used but not cited in 29501]

Exposure to a Terror Act (Ben-Zur et al)
"Respondents were asked to cite the terror event occurring in Israel during the preceding four years that affected them the most, from a list of examples of the most widespread types of acts.” [38737]

Exposure to Abusive and Supportive Environments Parenting Inventory (Nicholas and Bieber)
"The 70-item EASE-PI contains six scales...which measure retrospective accounts of parental behaviors...” [08863]
Nicholas, K B; Bieber, S L. Assessment of perceived parenting behaviors: the Exposure to Abusive and Supportive Environments Parenting Inventory (EASE-PI). Journal of Family Violence, in press. [cited in 08863]

Exposure to Community Violence Scale (Suglia et al)

Exposure to Conflict Scale (Shields et al)
"designed for the present study...this is a variation of the Stress Impact Questionnaire, which was developed [by Somasundaram and Sivayokan] to assess war trauma and its consequences in Sri Lanka’s general population” [21773]

Exposure to Inter-Adult Anger (Cummings)

Exposure to Political Violence Inventory (Haj-Yahia)
"The EPVI measured individual and household exposures to interactions with the occupation forces or settlers that directly or indirectly threatened human security as reported by the participant.” [33907]
Exposure to Sexual Attention Scale (Whealin)
"This instrument, developed for the purpose of this study, assesses the frequency with which participants received different types of unwanted sexual attention, ranging from sexual comments and leers to verbal coercion." [16959]

Exposure to Stressful Events at Work Questionnaire (Weiniger et al)
"developed for this study" [30159]

Exposure to Terror and Post Traumatic Stress Questionnaire (Braun-Lewensohn et al)
"We designed this questionnaire to comprehensively assess subjects' exposure from a multidimensional perspective along with self-reported post traumatic stress symptoms." [33180]
Braun-Lewensohn, O; Celestin-Westreich, S; Celestin, L-P; Verleye, G; Verté, D; Ponjaert-Kristoffersen, I. Coping styles as moderating the relationships between terrorist attacks and well-being outcomes. *Journal of Adolescence* 32: 585-599 (2009). [33180]

Exposure to Terror Scale (Bleich et al)
"a list of situations reflecting the degree of exposure to terror during the last three years" [30698]

Exposure to Terrorism Questionnaire (Dickstein et al)
"Terror-related exposure was assessed using 6 items similar to those contained in previous studies examining terror exposure among Israelis." [38106]
Dickstein, B D; Schorr, Y; Stein, N; Krantz, L H; Solomon, Z; Litz, B T. Coping and mental health outcomes among Israelis living with the chronic threat of terrorism. *Psychological Trauma: Theory, Research, Practice, and Policy* (published online 15 August 2011). [38106]

Exposure to the WTC Disaster Checklist (DeVoe et al)

Exposure to Trauma Scale (Bokszczanin)
"derived from the scale used by Vernberg et al" [82140]
Bokszczanin, A. Parental support, family conflict, and overprotectiveness: predicting PTSD symptom levels of adolescents 28 months after a natural disaster. *Anxiety, Stress, and Coping* 21: 325-335 (2008). [82140; the Scale appears on p. 335]

Exposure to Traumatic Events Scale (McCallin)
"a 27-item, life event scale designed to be administered in Vietnamese with items relevant to events experienced in refugee settings" [23718]

Exposure to Traumatic War Events (Palmieri et al)
"This instrument...contains 4 items" [83727]

Exposure to Traumatic War Zone Situations Checklist (Bramsen et al)
"A list of 13 items referring to potentially traumatic situations during deployment" [18959]

Exposure to Violence Checklist (Spellman)
"The EVC was developed for the project to assess exposure to direct and indirect violence." [22476]

Exposure to Violence Index (Espino)
UF: Index of Exposure to War Violence

Exposure to Violence Inventory (Selner-O'Hagan et al)
Exposure to Violence Probe (Stein et al)

“This measure is comprised of 8 items that assess the level of exposure to witnessing or being a victim of community violence.” [35736]

Exposure to Violence Questionnaire (Gladstein et al)

Exposure to Violence Scale (Singer et al)

“This EVS produces a witnessed violence scale, a personal victimization scale, and a weapon-related violence scale.” [37464]

Exposure to Violence Screening Measure (Weist et al)

“The EVS produces a witnessed violence scale, a personal victimization scale, and a weapon-related violence scale.” [37464]

Weist, M D; Saimone, E; Youngstrom, E; Myers, C P; Warner, B S; Varghese, S; Dorsey, N. A clinically useful screening instrument to assess the degree of exposure to violence in youth. Child Psychiatry and Human Development, in press. [cited in 21145]

Exposure to Violence Questionnaire (Reynolds and Mazza)

“Exposure to Violence Questionnaire (Reynolds and Mazza) is a self-report instrument measuring fire experiences” [19325]

Exposure to War Stressors Questionnaire (Smith et al)

“Exposure to War Stressors Questionnaire (Smith et al) is a 32-item questionnaire “developed specifically for this project to assess different types of exposure to the World Trade Center” attack” [81368]

Smith, P; Perrin, S; Yule, W; Berianda, M; Stuvland, R. Exposure to War Stressors Questionnaire. Unpublished scale, 1998. [cited in 40117]

Exposure to Violence Checklist (Straker et al)

“Exposure-to-Violence Checklist (Straker et al) is a 14-item checklist developed for children ages 10 and older to be completed during interviewing with health or mental health providers, or both.” [23953]

Exposure, Loss, and Displacement Inventory (Keane et al)

“Exposure, Loss, and Displacement Inventory (Keane et al) is a self-report measure designed to assess the degree of exposure to community violence experienced by adolescents. The 14 items on the EVQ use a yes-no format.” [21145]

Keane, A; Jepson, C; Pickett, M; Robinson, L; McCorkle, R. Exposure, Loss, and Displacement Inventory. Unpublished instrument, University of California, Los Angeles, 2001. [cited in 21145]

Expression of Emotions Scale (Balswick)

“Expression of Emotions Scale (Balswick) is a 14-item measure designed to assess the degree of exposure to inner-city violence among adolescents.” [21145]

Expressive One-Word Picture Vocabulary Test (Gardner)

“Expressive One-Word Picture Vocabulary Test (Gardner) is a self-report instrument measuring the presence or absence of crisis and commitment in both ideological and interpersonal identity content domains” [22307]

Expressive Representations of Aggression (Campbell et al)

“Expressive Representations of Aggression (Campbell et al) is a self-report scale ‘reflecting the presence or absence of crisis and commitment in both ideological and interpersonal identity content domains’” [22307]

Extended Grief Inventory (Layne et al)

“Extended Grief Inventory (Layne et al) is a 28-item self-report assessment of grief symptoms developed for children ages 8 to 18” based on the Grief Screening Scale. [27676]

Layne, C M; Savjak, N; Saltzman, W R; Pynoos, R S. Extended Grief Inventory. Unpublished instrument, University of California, Los Angeles, 2001. [cited in 27676]

Extended Objective Measure of Ego Identity Status (Grotevant and Adams)

“Extended Objective Measure of Ego Identity Status (Grotevant and Adams) is a self-report measure that assesses the presence or absence of crisis and commitment in both ideological and interpersonal identity content domains” [22307]

Family Sexuality Questionnaire (Wherry et al)

Family Socio-economic Adversity Index (Brezo et al)
"developed for this study...reflects the quality of the family environment" [31134]

Family Stereotypes Card Sort (Graham-Bermann and Brescoll)
"The FSCS is a 40-item Likert scale self-report measure of child's ratings of stereotyped beliefs about power and violence in the family." [15065]

Family Strains Index (McCubbin and Patterson)
"a 10-item self-report measure designed to assess changes and life events that can leave a family susceptible to the effect of a subsequent stressor or change" [27699]

Family Strengths Index (Olson et al)
Olson, D H; Larsen, A S; McCubbin, H I. Family strengths. In: Olson, D H; McCubbin, H I; Barnes, H; Larsen, A S; Muxen, M; Wilson, M (ed.). *Family Inventories*, pp. 78-92. St. Paul: University of Minnesota, 1985. [cited in 02733]

Family Stress Checklist (Murphy et al)

Family Stress Measure (McCubbin and Patterson)
a 10-item measure that "assessed stressful events during the past 12 months" [80256]

Family Stress Reaction Inventory (Wexler and McGrath)
"A brief self report questionnaire designed...to assess emotional and physical reactions to the current military separation [i.e., the Persian Gulf War]" [80256]

Family Structure Profile
[used but not cited in 90709]
Family Support Scale (Barath)

Family Support Scale (Dunst et al)

Family System Test (Gehring)
USE: Familiensystemtest (Gehring)

Family Time and Routines Index (McCubbin et al)
"The FTRI is a 32-item measure of family activities and the value that a family places on these activities..." [85021]

Family Tree Questionnaire (Mann et al)

Family Violence Against Older Women Scale (Paranjape et al)
"This scale consists of 29 items that assess the presence and severity of FV that older women have experienced during their adult life..." [32660]

Family Violence Questionnaire (Wall)
"The FVQ was constructed of items from a variety of previously validated instruments including the Conflict Tactics Scale (CTS) of Straus, the Attitudes Toward Wife Abuse Survey (AWA) of Burt and the Acceptance of Interpersonal Violence Scale (Burt)." [90619]

Family War Stressor Scale (Barath)
"a 25-item check-list" [06522]

Family Wellbeing Checklist
"documents the history of stressful family life events, trauma, and social support experienced during the last six months, and during the lifetime of the child" [15066]
[used but not cited in 15066]

Family Worries Scale (Graham-Bermann)
"The FWS is a 20-item self-report measure of worries and concerns that children have about people in their families." [15065]

Family-of-Origin Environment Scale (Harlow)
"consists of six items that focus on individuals’ perceptions of the atmosphere in their family-of-origin while growing up" [15564]
Whitmire, L E; Harlow, L L; Quina, K; Morokoff, P J. Childhood Trauma and HIV: Women at Risk. Philadelphia; Brunner/Mazel, 1999. [15564; the Scale appears on p. 166]

Family-of-Origin Questionnaire (Katerndahl et al)
"developed for this study [to describe] the household environment throughout childhood" [19222]

Family-of-Origin Scale (Hovestadt et al)

Family-Work Conflict Scale (Netemeyer et al)
"The FWC scale is a 5-item scale designed to measure the level to which family obligations interfere with work duties." [40103]

Famous Events Questionnaire (Squire et al)

Famous Events Test
[used but not cited in 22723]
FAS Test
[used but not cited in 39452]

Fatalism Scale (Khamis)
"6 items...constructed specifically for the purposes of this study, it measures perception of the traumatic event and association with fatalism..." [31948]

Fatalism Scale (Neff and Hoppe)

Father Involvement with Child (Runyan et al)
"used to assess the female caregiver’s perception of the extent and quality of the father or father figure’s involvement in the child’s life" [19022]
[used but not intelligibly cited in 19022]

Father-Offspring Relationship Questionnaire (Vissmeh)
"made up of 20 questions in Farsi" [83595]

Fatherhood Scale (Dick)
"a new 64-item Likert-type instrument designed by the researcher to measure an adult’s perception of his/her relationship with his/her father during their growing-up years" [18387]

Fathering Activities Questionnaire (Williams and Finkelhor)

Fatigue Assessment Questionnaire (Glaus)

Fatigue Impact Scale (Fisk and Doble)
"a 40-item scale examining an individual's perception of their functional limitations caused by fatigue over the past month" [33057]
Fisk, J D; Doble, S E. Construction and validation of a fatigue impact scale for daily administration (D-FIS). Quality of Life Research 11: 263-272 (2002). [cited in 33057]

Fatigue Questionnaire (Chalder et al)
"a self-report measure...consisting of 11 items covering the physical and mental aspects of fatigue" [07601]

Fatigue Scale for Motor and Cognitive Functions (Penner et al)

Fatigue Self-Efficacy Scale
"a 5-item scale measuring the belief that one can control symptoms of fatigue" [32280]

Fatigue Severity Scale

Fatigue Symptom Inventory (Hann et al)

Faux Pas Text (Baron-Cohen et al)

Favorable Attitude Toward Drug Use Scale
a 4-item scale developed by the Center for Substance Abuse Prevention (COPA Project)
Favorite Kind of Day
a “drawing directive” [26233]

FBL
Use: Freburger Beschwerdenliste (Fahrenberg)

FDNY-WTC Exposure Intensity Index (Prezant et al)
"categorized exposure based on first arrival at the WTC site" [32493]

Fear and Avoidance Questionnaire (Basoglu et al)
"The FAQ was devised for the purposes of the project and included 35 activities or trauma reminders, each self-rated for the intensity of associated fear." [25648]

Fear Anger Neutral Test
"a short version of the Facial Emotions for Brain Activation Test" [31939]
[used but not cited in 31939]

Fear Assessment (Apsche et al)

Fear Assessment Thermometer Scale (Wurtele et al)

Fear Checklist
[used but not cited in 20562]

Fear of Anger Scale (Hinton et al)
"To assess the role of FOA in generating an ataque, we added two fear of anger items..." [33299]

Fear of Cancer Relapse/Recurrence (Kornblith)
"consists of 5 items that assess patients' beliefs and anxieties about their disease recurring" [84337]

Fear of Consequences of Condom Negotiation Scale (Wingood and DiClemente)
"a 7-item scale" [83895]

Fear of Crime Measure (Norris and Kaniasty)

Fear of Death During Trauma Scale (Gershuny)
"The FDDT was comprised of four items that assessed the degree to which participants feared for their lives during the trauma.” [25328]
Gershuny, B S. Structural models of psychological trauma, dissociative phenomena, and distress in a mixed-trauma sample of females: relations to fears about death and control. Doctoral dissertation, University of Missouri, 1999. [cited in 25328]

Fear of Death Questionnaire (Greenberg et al)
[used but not cited in 37676]

Fear of Death Scale (Hensle)

Fear of Flying Questionnaire (Bornas et al)
"30 items describe different flying-related situations” [19747]
Bornas, X; Tortella Feliu, M; Garcia de la Banda, G; Fullana Rivas, M A; Llabres, J. Validación factorial del cuestionario de miedo a volar. Análisis y Modificación de Conducta 25: 885-907 (1999). [cited in 19747]

Fear of Flying Scale (Haug et al)
"consists of 21 items describing situations representative for air travel” [19747]
Fear of Flying Scale (Mühlberger et al)
USE: Allgemeine Flugangstfragebogen (Mühlberger et al)

Fear of Future Violent Events at Work Scale (Rogers and Kelloway)

Fear of Harm Scale (Richters and Martinez)
"This 13-item scale assesses the respondent's fear of being the victim of violence in their homes and/or neighborhoods, the impact of such fear on their daily activities, and the measures they have taken to protect themselves from violence." [28080]

Fear of Husband Scale (Schlee et al)
"an 11-item fear scale was developed for this project" [09667]

Fear of Intimacy Questionnaire (Sheehan)

Fear of Intimacy Scale (Descutner and Thelen)
"a 35-item self-report measure designed to assess a person's anxiety about close relationships with another" [13926]

Fear of Losing Control During Trauma Scale (Gershuny)
"The FLCDT was comprised of three items that assessed the degree to which participants feared lacking control during the trauma." [25328]
Gershuny, B S. Structural models of psychological trauma, dissociative phenomena, and distress in a mixed-trauma sample of females: relations to fears about death and control. Doctoral dissertation, University of Missouri, 1999. [cited in 25328]

Fear of Loss of Vigilance Questionnaire (Tsao and Craske)
"The FLOVQ is a 14-item self-report instrument that assesses the extent to which an individual is distressed by situations that involve a loss of vigilance." [34950]

Fear of Negative Evaluation Questionnaire (Watson and Friend)

Fear of Pain Questionnaire (Sperry-Clark et al)
"The FPQ-III consists of 30 questions that address a patient's fear of minor pain, severe pain, and medical pain." [27027]
[confusingly cited in 27027]

Fear of Partner Scale (Kar and O'Leary)
"This scale was designed specifically for this study in order to measure overall fear of partner and fear related to specific physically aggressive behaviors." [83837]
Kar, H L; O'Leary, K D. Gender symmetry or asymmetry in intimate partner victimization?: not an either/or answer. Partner Violence 1: 152-168 (2010). [83837]

Fear of Progression Questionnaire (Herschbach et al)

Fear of Recurrence Questionnaire (Northouse)
"a 22-item scale" [27872]

Fear of Recurrence Scale (Gumley and Schwantnauer)
"The FoRSe consists of 29 items generated from participants' idiosyncratic early signs of psychosis." [33500]

Fear of Relapse/Recurrence Scale (Kornblith)
"five-item scale devised by Kornblith" [27872]
Fear of Terrorism Scale (Shigemura et al)
"The questionnaire included questions to obtain demographic information and to assess the current degree of the fear of terrorism as well as depression." [35638; instrument unnamed in article; name supplied by PILOTS Database staff]

Fear Questionnaire (Marks and Mathews)
[apa; dbat 294; cited in 10850]
UF: Fear Questionnaire (Marks and Mathews)
Marks and Mathews Fear Questionnaire

Fear Reaction Scale

Fear Survey (Marks and Mathews)
USE: Fear Questionnaire (Marks and Mathews)

Fear Survey Schedule (Arrindell et al)

Fear Survey Schedule (Geer)
UF: Fear Survey Schedule II

Fear Survey Schedule (Lang and Lazovik)
UF: Fear Survey Schedule I

Fear Survey Schedule (Tasto et al)

Fear Survey Schedule (Veronen and Kilpatrick)
USE: Modified Fear Survey (Kilpatrick and Veronen)

Fear Survey Schedule (Wolpe and Lang)
UF: Fear Survey Schedule III

Fear Survey Schedule for Children - Revised (Ollendick)
"A revised version of an inventory devised by Scherer and Nakamura in 1968" [dbat 218]
Ollendick, T H. The Fear Survey Schedule for Children—Revised. Unpublished manuscript, Indiana State University, Department of Psychology, 1978. [cited in 02922]
UF: Revised Fear Survey Schedule for Children (Ollendick)

Fear Survey Schedule I
USE: Fear Survey Schedule (Lang and Lazovik)

Fear Survey Schedule II
USE: Fear Survey Schedule (Geer)

Fear Survey Schedule III
USE: Fear Survey Schedule (Lang and Lazovik)

Fear Thermometer
USE: Emotion Thermometer (Obanion and Veronen)

Fear Video Memory Interview (Quas and Lench)
Feather Task (Feather)

Features of the Event Questionnaire (Lowinger and Solomon)
"Constructed for the present study based on clinical knowledge gathered by therapists treating persons who have caused the death of others in motor vehicle accidents through negligence. The questionnaire contains 32 items on the circumstances of the accident: the trial, and the punishment." [29215]

Fecal Incontinence Severity Index (Rockwood et al)
"The FISI measures both type and frequency of incontinence." [35119]
Rockwood, T H; Church, J M; Flsheiman, J W; Kane, R L; Mavrantonis, C; Thorson, A G; et al. Patient and surgeon ranking of the severity of symptoms associated with fecal incontinence: the Fecal Incontinence Severity Index. Diseases of the Colon and Rectum 42: 1525-1532 (1999). [cited in 35119]

Feeding Resistance Scale (Chatoor et al)
"This scale was developed for the current study. It includes 20 statements that describe the infant’s behaviors during feeding situations." [23258]

Feeding Scale (Chatoor et al)
"A global rating scale that includes 46 items that describe mothers’ behaviors, infants’ behaviors, and the quality of mother-infant interactions during feeding” [23258]

FEEL-Test
USE: Facialy Expressed Emotion Labeling (Kessler et al)

Feeling Bad Scale (Lewis et al)

Feelings About This Child (Friedrich)
"This 6-item measure was created...to assess an adult caretaker’s perceptions regarding a child." [31444]

Feelings and Behaviour Questionnaire (Harrison and Murphy)
"compiled from the literature on sexual assault and clinical experience of those factors indicative of coping" [21127]
Harrison, J M; Murphy, S M. A care package for managing female sexual assault in genitourinary medicine. International Journal of STD and AIDS 10: 283-289 (1999). [21127]; the Questionnaire is printed on p. 287

Feelings of Inadequacy Scale (Janis and Field)
UF: FIS

Feelings Scale (Swan)
7-item scale that "assessed subjective appraisal of the most significant sexual harassment experience" [32677]
Swan, S. Explaining the job-related and psychological consequences of sexual harassment in the workplace: a contextual model. Doctoral dissertation, University of Illinois at Urbana-Champaign, 1997. [cited in 32677]

Female Sexual Function Index (Rosen et al)
"a 19-item questionnaire" [28449]

Femininity and Masculinity Trait Indices (Barak and Stern)
[used but not cited in 92348]

Fetal Health Locus of Control Scale (Labs and Wurtele)

FHI
USE: Family Hardiness Index (McCubbin et al)

Fibromyalgia Impact Questionnaire (Burckardt et al)
Fibromyalgia Survey Questionnaire
[used but not clearly cited in 40633]

Fight Scale (Flores et al)
20 items

Figley PTSD Interview
USE: Vietnam Veterans Questionnaire (Figley and Stretch)

Figley Rating Scale
[used but not cited in 01474]

Figley Scale for Combat Posttraumatic Stress Disorder
USE: Vietnam Veterans Questionnaire (Figley and Stretch)

Figley Stress Scale
USE: Vietnam Veterans Questionnaire (Figley and Stretch)

Figley Vietnam Survey
USE: Vietnam Veteran Survey (Figley)

Figure Classification Test
[used but not cited in 26097]

Figure Drawing Tests
[used but not cited in 00081]

Figure-Background Discrimination Test (Cronholm)

FILE
USE: Family Inventory of Life Events and Changes (McCubbin et al)

Filial Problem Checklist (Horner)
"The FPC, a 108-item parent-rated instrument, allows parents to indicate the adjustment of their children in problematic situations..." [35075]

Filial Responsibility Scale for Youth (Jurkovic et al)
"The FRS-Y is a self-report instrument consisting of a total of 34 items with three subscales: Instrumental Caregiving, Emotional Caregiving, and Fairness." [19796]

Film Scale (Heiman and Rowland)
"a 17-item self-report questionnaire [that] measures perception of sexual arousal" [83502]

Financial Capacity Instrument (Marson et al)

Financial Strain Index (Ali and Avison)

Finding Meaning in Suffering Measure (Reed)
[used but not cited in 91727]

Fine Motor Activity Test (Grünberger)

Finger Oscillation Test
[used but not cited in 09457]

Finger Tapping Test (Halstead)
Fire Aftermath Coping Efficacy Measure (Langley and Jones)

"A 7-item scale...developed for this study in order to look at children's and adolescents' recovery from wildfires." [27620]

Fire Belief Questionnaire (Davies and Clark)

"A 10-item self-report inventory designed for the study." [09261]

Fire Emergency Behavioral Situations Scale (Jones)

Fire Impact Questionnaire (Scher)

"The FIQ was developed specifically for this study. It assesses direct and indirect impact of wildfires on the respondent's life. The FIQ consists of 23 yes/no questions." [33324]

Fire-Related Traumatic Experiences Questionnaire (Jones and Ollendick)

"A semistructured interview" [16987]
Jones, R T; Ollendick, T H. The Fire-Related Traumatic Experiences Questionnaire. Unpublished manuscript, Virginia Polytechnic Institute and State University, 1996. [cited in 16987]

Firefighter Coping Self-Efficacy Scale (Lambert et al)

"A new [20-item] measure developed to assess firefighters' perceived competence in managing stressful and traumatic experiences encountered on the job." [85932]

Firefighter Experiences Survey (Del Ben et al)

"The FES was developed for this study to assess the types and frequencies of calls to which firefighters respond and the impact of these calls and associated potentially traumatic events." [40248]
Del Ben, K; Scotti, J; Fortson, B; Chen, Y; Guriel, J. The Firefighter Experiences Survey (Del Ben et al). Unpublished manuscript, West Virginia University, 2005. [cited in 40248]

Firestone Assessment of Self-Destructive Thoughts

[used but not cited in 90926]

Firestone Voice Scale for Violence (FVSV)

[used but not cited in 90926]

FIRM

USE: Family Inventory of Resources for Management (McCubbin et al)

FIS

USE: Feelings of Inadequacy Scale (Janis and Field)

FISC:

USE: Family Informant Schedule and Criteria (Mannuzza et al)

Five Facet Mindfulness Questionnaire (Baer et al)

"The FFMQ is a 39-item self-report measure of five facets of mindfulness derived from a factor analysis of five existing mindfulness measures." [34248]

Five Factor Model Rating Form (Mullins-Sweatt et al)

"The FFMRF contains 30 questions [measuring] the Big Five personality traits..." [85253]

Five Factor Wellness Inventory (Myers and Sweeney)

[used but not cited in 93394]

Five Minute Monologues

[used but not cited in 92171]

Five Minute Speech Sample (Magana et al)

Five-Factor Personality Inventory (Hendriks)

"The FFPI consists of 100 items; 20 are designed to measure each of the following five factors: extraversion, agreeableness, conscientiousness, emotional stability, and intellect/autonomy." [22297]
Five-Point Test (Regard et al)
a test of "nonverbal fluency" [34821]

FKV
USE: Freiburger Fragebogen zur Krankheitsverarbeitung (Muthny)

Flashback Frequency Questionnaire (Duke et al)
"The FFQ was developed for this study and is designed to assess the frequency and occurrence of flashbacks in trauma survivors." [30277]

Flashback Severity Scale (Hinton et al)
"used...to assess the severity of flashbacks associated with both neck-focused and orthostatic-induced panic" [19663]

Flashbulb Memory Questionnaire (Candel et al)

Flesch Reading Ease Index
"computes readability based on the average number of syllables per word and the average number of words per sentence" [16616]

Flesch-Kincaid Grade Level Index
[used but not cited in 24267]

Flicker-Fusion Test (Milfeldt)

Flinn Infant Security Scale
[used but not cited in 90836]

Flood Exposure Scale (Smith and Freedy)
a six-item scale developed for this study

Flood Impact Survey (Stout and Knight)
"developed for this study" [20351]

Florence Psychiatric Interview (Faravelli et al)
"a semi-structured clinical interview that is made up of a combination of known rating scales and includes almost all of the symptoms considered by DSM-IV" [26658]
Faravelli, C; Bartolozzi, D; Cecchi, C; CIMminiello, L; Cosci, F; D'Adamo, D; Di Matteo, C; Di Primio, C; Fabbri, C; Lo Iacono, B; Paionni, A; Perone, A; Rossi, S; Scarpati, M A; Serana, A; Taberna, A. The Florence Psychiatric Interview. International Journal of Methods in Psychiatric Research 10: 157-171 (2001). [cited in 26658]

Freiburger Persönlichkeitsinventar
USE: Freiburg Personality Inventory (Fahrenberg et al)

Freiburger Screening Bogen
[used but not cited in 85295]

Frenchay Activities Index
"The FAI ... reports on the performance of 15 daily life activities" [38985]
Turnbull, J C; Kersten, P; Habib, M; McLellan, L; Mullie, M A; George, S. Validation of the Frenchay Activities Index in a general population aged 16 years and older. *Archives of Physical Medicine and Rehabilitation* 81: 1034-1038 (2000). [cited in 38985]

Frequency of Delinquency Behavior (Loeber and Dishion)
"The FDB is a measure of self-reported delinquency behavior." [81409]

Frequency of Family Coping Behaviors (Kosciulek)
[cited as "Kosciulek, 1994" in 90050]

Frequency of Partner Communication Scale (Sales et al)
"composed of 5 items that assess adolescents' frequency of communicating with a male sex partner" [83895]
**Frequency of Traumatic Events Questionnaire (Marais)**

"For the purpose of the present study, a work-related trauma questionnaire with 55 items was developed, in order to determine the frequency of traumatic exposures experienced by the 50 journalists." [29877]

**Frequency, Intensity, and Burden of Side Effects Rating (Wisiniewski et al)**

"self-reported" [31155]

**Friedman Affect Scale**

**Friedman Belief Scale**

**Friedman Quality of Life Scale**

**Friedman Well-Being Scale**

**Friend Support Scale**

[used but not usefully cited in 38350]

**Friends Support for Abstinence Scale (Humphreys et al)**

"an 8-item scale designed to measure friends' support of recovery efforts." [40263]

**Friendship Quality Questionnaire (Bukowski)**

8 items

**Friendship Questionnaire (Bierman and McCauley)**

**Fruit Distraction Test**

USE: Cognitive Control Battery (Santostefano)

**Frustration and Aggression Test for the Disabled (Pachalska)**

"This test consists of 10 simple line-art drawings depicting situations in daily life that are known to be troublesome for patients recovering from stroke." [29951]

**FS Test (Holmquist)**

USE: Förändring och Stabilitet (Holmquist)

**FSS...**

USE: Fear Survey Schedule...

**Fulfillment of Child's Material Needs Scale (Khamis)**

"a measure of the extent to which parents agreed or disagreed that the family had enough money to meet child's needs..." [27243]

**Function Status Index (Reynolds et al)**

Functional Assessment Measure (Hall)

"The FAM is a 30-item measure that includes the 12-item Functional Independence Measure, and indexes motor, cognitive, and psychosocial functioning following traumatic brain injury." [21953]

UF: FAM (Hall)

Functional Assessment of Cancer Therapy - Breast Cancer (Brady et al)

"The FACT-B measured quality of life in physical, social, emotional, functional domains, and breast cancer concerns during the past week." [37937]

Functional Assessment of Cancer Therapy Scale (Cella et al)

"a multidimensional 27-item instrument that measures four dimensions of quality of life including physical, social/family, emotional, and functional well-being" [81235]

Cella, D F; Tulsky, D S; Gray, G; Sarafian, B; Linn, E; Bonomi, A; Silberman, M; Yellen, S B; Winicour, P; Brannon, J. The Functional Assessment of Cancer Therapy Scale: development and validation of the general measure. *Journal of Clinical Oncology* 11: 570-579 (1993). [cited in 81235]

Functional Assessment of Chronic Illness Therapy - Breast Cancer Version

[used but not cited in 91564]

Functional Assessment of Chronic Illness Therapy - Fatigue Scale

[used but not cited in 37937]

Functional Assessment of Chronic Illness Therapy - Spirituality Well-Being Scale

12 items

Functional Assessment of Chronic Illness Therapy (Cella)

"The Functional Assessment of Chronic Illness Therapy - General (FACT-G) is a 27-item self-report measure that assesses four domains of quality of life: physical, emotional, functional, and social/family well-being." [28682]

Functional Assessment of HIV Infection Quality of Life Measurement System (Cella and Bonomi)

Functional Assessment of Self-Mutilation (Lloyd et al)

"The FASM was designed to assess the methods, frequency, and functions of self-reported nonsuicidal self-injury." [36613]

Functional Assessment Questionnaire

"The FAQ is a 15-item measure of the impact of head injury symptoms on everyday activities." [37625]

[used but not cited in 37625]

Functional Assessment Rating Scale (Ward and Dow)

"The FARS is a 17-item instrument developed to assess biopsychosocial symptomatology in patients with severe mental illnesses, especially psychotic disorders." [23164]

Ward, J C; Dow, M G. *The Functional Assessment Rating Scale*. Tampa: University of South Florida, Department of Community Mental Health, 1994. [cited in 23164]

Functional Asthma Severity Scale (Roser et al)

"This 6-item self-report questionnaire assesses the degree to which asthma interferes with daily activities" [28015]

Functional Bowel Disorder Illness Severity Index (Drossman et al)

"developed...for the purpose of stratifying patients for treatment trials" [21836]

Functional Cognitive Assessment Scale (Kounti et al)

"The FUCAS...examines executive function in daily life activities..." [33969]

**Functional Comorbidity Index (Groll et al)**
Groll, D L; Bombardier, C; Wright, J G. The development of a comorbidity index with physical function as the outcome. *Journal of Clinical Epidemiology* 58: 595-602 (2005). [cited in 32893]

**Functional Disability Inventory (Walker and Greene)**
"a 15-item measure of children's general physical functioning" [36282]

**Functional Disability Scale (MacKenzie et al)**
"a modification of an activities of daily living scale developed by MacKenzie et al" [20523]

**Functional Impairment Checklist (Lam et al)**
"a self-reported instrument designed as a functional assessment tool for SARS survivors" [34939]

**Functional Impairment Scale for Active Duty Service Members and Veterans (Marx et al)**
Marx, B P; Schnurr, P P; Rodriguez, P; Holowka, D W; Lunney, C; Weathers, F; Sloan, D M; Keane, T M. Development of a Functional Impairment Scale for Active Duty Service Members and Veterans. Symposium presented at the annual meeting of the International Society for Traumatic Stress Studies, Atlanta, 2009. [cited in 37567]

**Functional Impairments Questionnaire (Bleich et al)**
"This 20-item questionnaire was specifically designed to assess functional impairments related to psychiatric disorder." [27873]

**Functional Independence Measure (Hamilton and Granger)**
Hamilton, B; Granger, C. *Guide for the Use of the Uniform Data Set for Medical Rehabilitation*. Buffalo: Research Foundation of the State University of New York, 1990. [cited in 22671]

**Functional Independence Measure (Wright)**
"The FIM measures independent performance in motor and cognitive skills in addition to the Activities of Daily Living..." [40065]
[cited only as online document in 40065]

**Functional Life Scale (Sarno et al)**

**Functional Limitations Battery (RAND Health Insurance Experiment)**
Stewart, A; Ware, J; Brook, R. *Construction and Scoring of Aggregate Functional Status Measures*, vol. 1. Santa Monica, California: RAND Corporation, 1982. [cited in 09843]
UF: RAND Health Insurance Experiment Functional Limitations Battery

**Functional Limitations Profile (Bregner et al)**

**Functional Outcomes of Sleep Questionnaire (Weaver et al)**
Weaver, T E; LaiZner, A M; Evans, L K; Maislin, G; Chugh, D K; Lyon, K; et al. An instrument to measure functional status outcomes for disorders of excessive sleepiness. *Sleep* 20: 835-843 (1997). [cited in 23460]

**Functional Rating Scale for Symptoms of Dementia**
"The FRSSD estimates the assessment of daily functioning in 14 activities of daily living. The FRSSD is completed by the caregiver..." [33969]

**Functional Status Examination (Dikmen et al)**
"The FSE is a 10-domain functional outcome measure designed to describe outcomes in the TBI population." [35948]

**Functional Status Questionnaire (Jette et al)**
Functional Vision Screening Questionnaire (Horowitz et al)
"a 15-item index used to indicate whether or not difficulty is experienced in specific functional areas" [80744]

Functions of Self-Criticizing/Attacking Scale (Gilbert et al)
"This measure consists of 21 items examining the functions of why people self-criticize." [33244]

Fundamental Impairment Questionnaire (Lucas et al)
"assesses reported changes in functioning in four domains (e.g., academic functioning, social and family relationships, and after school activities)" [19014]

Fundamental Interpersonal Relations Orientation (Schutz)

Future Cueing Task (Williams et al)
The FCT was used to measure the specificity with which participants imagine their future. [38833]
Williams, J M G; Ellis, N C; Tyers, C; Healy, H; Rose, G; MacLeod, A K. The specificity of autobiographical memory and imageability of the future. Memory and Cognition 24: 116-125 (1996). [cited in 38833]

Future Events Questionnaire (LONGSCAN)
"The FEQ is a 12-item measure assessing expectations about future events." [38125]
Knight, E D; Smith, J S; Martin, L M; Lewis, T; LONGSCAN Investigators. Measures for Assessment of Functioning and Outcomes in Longitudinal Research on Child Abuse, vol. 3: Early Adolescence. Available online at the LONGSCAN website. [cited in 38125]

Future Events Test
[used but not cited in 91454]

Future Imaginings Task (Maccallum and Bryant)
"This task followed Williams et al and required participants to imagine specific events that could take place in their future in response to 5 positive and 5 negative cues." [37029]

Future Outlook Inventory (Gunn and Pearman)

Future Time Perspective Inventory (Gjesme)

Future Time Perspective Inventory (Heimberg)

Futuristic Optimistic Orientation Scale (Kira et al)
"This 2-item scale tests the ability to look to the future optimistically and perceive adversity as an opportunity to grow" [82453]

G-OM Exit Questionnaire (Gerwe)

G-OM Lifespan Chart (Gerwe)
"an overview sheet with a timeline that helps the participant pinpoint significant lifespan events (whether positive or negative, the feelings and physical responses associated with each event, and the behaviors enacted when the event occurred" [86817]

GAD Case Formulation Interview (Wells)
Wells, A. Metacognitive Therapy for Anxiety and Depression. New York: Guilford Press, 2009. [82992; the Interview appears on p. 277]

GAD Questionnaire (Roemer et al)
USE: Generalized Anxiety Disorder Questionnaire (Roemer et al)
Galveston Orientation and Amnesia Test

Gamblers’ Beliefs Questionnaire (Steenbergh et al)
"has 21 items to evaluate cognitive distortions related to gambling" [35588]

Gambling Cognitions Questionnaire (Petry)
[used but not cited in 35588]

Gambling Experiences Measure (Ledgerwood and Petry)
"has 18 items to measure psychological experiences of problem gamblers on a 5-point scale" [35588]

Gambling Self-Efficacy Questionnaire (May et al)
"has 16 items to assess perceived confidence in controlling gambling behavior in specific situations” [35588]

Gang Affiliation Index (Layne)
"Each of 13 true/false items assesses a specific gang-related behavior” [17023]
Layne, C. Effects of community violence on minority high school students. Ph.D. dissertation, University of California, Los Angeles, 1996: [90127]

Gang Violence Post-Traumatic Stress Disorder Questionnaire (Purnell)

Gardner Children’s Projective Battery

Gastrointestinal Panic Module (Hinton et al)
"a structured interview [used] to assess for the presence of GIP” [30772]
Hinton, D E; Chihean, D; Fama, J M; Pollack, M H; McNally, R J. Gastrointestinal-focused panic attacks among Cambodian refugees: associated psychopathology, flashbacks, and catastrophic cognitions. *Journal of Anxiety Disorders* 21: 42-58 (2007). [30772]

Gay Affect and Life Events Scale (Rosser and Ross)

Gaza Traumatic Event Checklist (Abu Hein et al)
Abu Hein, F; Qouta, S; Thabet, A; El Sarraj, E. Trauma and mental health of children in Gaza. *British Medical Journal* 306: 1130-1131 (1993). [04413, cited in 20956; however the Checklist is not mentioned in this publication]

Gender Based Emotional Constriction (Lisak et al)
"This 20-item questionnaire was designed for this study to assess the degree to which a subject endorses beliefs about masculinity which serve to constrict his emotional experience and expressiveness.” [13291]

Gender Expression Measure for Sexual Minority Women (Lehavot et al)
a 15-item scale with 3 subscales: Appearance, Gender Roles, and emotional Expression

Gender Identification Conflict Scale (Solowey)
Solowey, ?. *Gender Identification Conflict Scale*. Unpublished manuscript, 1985. [cited in 02212]

Gender Inequities Scale (Khamis)
“an 8-item scale that measures children’s perceptions of fairness regarding parents’ gender preferences” [27243]

Gender Role Assessment Schedule-Adult (Ehrhardt and Meyer-Bahlburg)

Gender Role Assessment Schedule-Child (Meyer-Bahlburg and Ehrhardt)
Gender Role Conflict Scale
[used but not cited in 93321]

Gender-Related Stressors
[used but not cited in 91263]

General Ability Measure for Adults
[used but not cited in 91390]

General Accident Questionnaire
"With 28 aspects, it tests various accident aspects (preparedness for the accident, traumatic experience intensity, accident duration, the loss of close persons and property in the accident)." [80816]
Opalic, P. Qualitative and Psychometric Research of Refugees and Traumatised Subjects in Belgrade. Giessen, Germany: Psychosozial-Verlag, 2005. [80816]

General Behavior Inventory (Depue et al)
"The GBI was designed to assess an individual's likelihood of risk for bipolar disorder." [39973]

General Belief in a Just World Scale (Dalbert et al)

General Competence Expectancy Test (Schwarz)
USE: Generalisierte Kompetenzerwartung (Schwarzer)

General Conflict Tactic Index
USE: Global Appraisal of Individual Needs (Dennis)

General Coping Questionnaire (Joseph et al)
USE: Coping Style Questionnaire (Joseph et al)

General Demographic Questionnaire (Klaric et al)
"structured specifically for the purpose of this study" [31619]

General Domestic Violence Questionnaire (Sprah)
"for violence exposure and help seeking screening...was developed as comparable instrument to the Eurobarometer survey" [32977]

General Expectancy for Negative Mood Regulation Scale (Catanzaro and Mearns)
"The NMR is a 30-item self-report inventory that assesses expectancies about the ability to alleviate negative moods." [32436]

General Family Functioning Index (Christchurch Health and Development Study)

General Health Measure (Stermac et al)
"designed for this study...8 questions about general health"

General Health Questionnaire (Goldberg)
UF: GHQ; GHQ-28; GHQ-60; etc.

General Health Rating Index (Ware)
Ware, J E. The General Health Rating Index. In: Wenger, N K; Mattson, M E; Furberg, C D; Elinson, J (ed.). Assessment of Quality of Life in Clinical Trials of Cardiovascular Disease, pp. 184-188. New York: Le Jacq, 1984. [cited in 02939]
General Health Scale (Belloc et al)

General Help-Seeking Questionnaire (Wilson et al)
"The GHSQ assesses help-seeking intentions for psychological distress from a variety of sources." [87375]

General Information Questionnaire (Friedland and Dawson)
"developed for the study" [07397]

General Information Questionnaire (Kalebic Jakupcevic and Ajdukovic)
"constructed for this study to collect the data on self-reported socio-demographic characteristics of the parents ... also included questions on family relations" [36059]

General Information Questionnaire (Kleim and Ehlers)
"adapted...to assess demographic characteristics" [82587]

General Inventory Questionnaire for Disasters (Raphael et al)

General Life Events Schedule for Children (Sandler et al)

General Mental Distress Index
USE: Global Appraisal of Individual Needs (Dennis)

General Neuropsychological Deficit Scale (Reitan)
USE: Neuropsychological Deficit Scale (Reitan)

General Oral Health Assessment Index
12 items "consisting of 3 components of oral health: physical, psychosocial, and pain or discomfort" [33359]
UF: Geriatric Oral Health Assessment Index

General Overseas Military Stressors (Maguen et al)
"This 8-item measure was used to evaluate generic, low-magnitude stressors that soldiers are exposed to in any overseas military deployment." [26748]

General Psychological Distress Scale (King et al)
a 10-item scale [unnamed in article; name assigned by PILOTS Database staff]

General Psychosocial Interview (Arcel and Marusic)
Arcel, L T; Fohnegovic-Smalc, V; Kozaric-Kovacic, D; Marusic, A. *Psycho-Social Help to War Victims: Women Refugees and Their Families*. Copenhagen: IRCT, 1995. [12780; the interview appears on pp. 142-150]

General Self-Efficacy Scale (Scholz et al)

General Shame Questionnaire (Feiring et al)
"developed for this research...indexed shame for everyday events" [15550]

General Symptoms and Fear Questionnaire (Hallam and Hafner)

General Technical Test (Montague et al)
USE: Army Classification Battery (Montague et al)
General Temperament Survey (Watson et al)
- “a 90-item true-false scale that yields three factor analytically derived scales reflecting relatively stable personality dimensions” [21324]

Generalized Anxiety Disorder Scale (Wells) USE: Global Appraisal of Individual Needs (Dennis)

General Violence Scale (Gondolf)
- "originally developed...to create a typology of batterers based on a cluster analysis of victim-reported variables" [29196]

Generalized Anxiety Disorder Questionnaire (Roemer et al)

General Well-being Questionnaire (Cox et al)
- "The questionnaire was developed as a measure of two indices of sub-optimum health ['worn-out' and 'up-tight and tense']." [40256]

General Well-Being Scale (Neff and Husaini)

General Well-Being Schedule (Dupuy)

Generalized Anxiety Disorder Questionnaire (Roemer et al) USE: GAD Questionnaire (Roemer et al)
- "The GADQ-IV is a 9-item self-report questionnaire that was designed to provide an analogue diagnosis of GAD based on the DSM-IV criteria for GAD." [31942]

Generalized Anxiety Disorder Scale (Wells)
- Wells, A. *Metacognitive Therapy for Anxiety and Depression*. New York: Guilford Press, 2009. [82992; the GADS-R appears on pp. 269-270]

Generalized Anxiety Disorder Severity Scale (Shear et al)
Generalized Anxiety Disorder-7 Scale (Spitzer et al)

Generalized Expectancy of Success Scale (Fibel and Hale)
"This scale consists of 30 items that measure individuals' perceptions of whether they can attain their personal goals. It is related to anxiety, negative cognition, depression, and suicidal ideation." [23207]

Generalized Self-Efficacy Scale (Schwarzer and Jerusalem)
"The GSS is a 10-item measure" [80594]

Generalized Trust Scale (Couch et al)
"a 20-item inventory that measures one's trust orientation toward people in general" [86222]

Generalized Workplace Abuse Questionnaire (Nawyn et al)
"The GWA instrument is a 29-item measure which assesses five conceptual constructs: verbal aggression, disrespectful/demeaning behaviors, isolation/exclusion, threats/bribery, and physical aggression." [25207]

Generalized Workplace Harassment Questionnaire (Rospenda and Richman)
a 29-item "measure...developed to address five conceptual dimensions: verbal aggression, disrespectful behavior, isolation or exclusion, threats or bribes, and physical aggression" [82709]

Generic Job Stress Questionnaire (NIOSH)
"used to evaluate job stresses and social support" [38731]

Genital Examination Distress Scale (Gully et al)

George Washington University Universal Violence Prevention Screening Protocol (Dutton et al)
USE: Universal Violence Prevention Screening Protocol (Dutton et al)

Georgia Criterion Reference Test
"a test of basic academic skills" [29106]
[used but not cited in 29106]

Geriatric Depression Scale (Yesavage et al)

Geriatric Mental State Diagnostic Scale (Copeland et al)

Geriatric Oral Health Assessment Index
USE: General Oral Health Assessment Index

German National Health Interview and Examination Survey

German Pain Coping Questionnaire
USE: Fragebogen zur Erfassung der Schmerzverarbeitung (Geissner)

German Vocabulary Test (Schmidt and Metzler)
USE: Wortschatztest (Schmidt and Metzler)

Gernsbacher Homograph Paradigm (Gernsbacher et al)
"use[s] homographs to examine activation and inhibition of one meaning in favor of the other meaning of a word" [24740]
Gerwe Assessment Questionnaire for Behavioral Health
“an exercise in identifying the most predominant current feeling states, associated physical symptoms, and related behavioral responses of the individual, their approximate period of origin, and the approximate percentage of time these symptoms are generated within each current 24-hour period” [86817]

Getting Along Scale
[used but not cited in 91770]

Gewaarwordingenlijst (Lange et al)
a 7-item screening device for psychotic disorder
UF: Screening Device for Psychotic Disorder (Lange et al)

GHQ
USE: General Health Questionnaire (Goldberg)

Giessener Beschwerdebogen (Brähler and Scheer)
UF: Health Complaints Rating Scale (Brähler and Scheer)

Glasgow Assessment Schedule (Livingstone and Livingstone)

Glasgow Coma Scale (Teasdale and Jennett)

Glasgow Meningococcal Septicaemia Prognostic Score

Glasgow Outcome Scale (Horne and Schemitsch)

Global Adjustment Scale
[used but not cited in 90948]

Global Appraisal of Individual Needs (Dennis)
“GAIN is a comprehensive, standardized biopsychosocial assessment battery that was designed to integrate the collection of clinical and research data for substance abuse treatment.” [17185]
UF: General Conflict Tactic Index
General Mental Distress Index
General Victimization Index
Substance Frequency Index
Substance Problem Index
Traumatic Stress Index

Global Assessment of Functioning Scale
[used but not cited in 90206]

Global Assessment of Psychosocial Disability
“The GAPD is derived from Axis VI on the multiaxial presentation of the ICD-10, and is comparable to Axis V on the DSM-IV multiaxial formulation. The GAPD score is based on functioning in domains of personal motivation, school performance, family relations, peer relations, and occupational functioning.” [37222]

Global Assessment of Recent Stress Scale (Linn)
"evaluates stress perception of recent life changes”
Global Assessment of Relational Functioning
"The GARF was developed to provide a measure of the quality of functioning in relationships analogous to the measure of individual functioning provided by the GAF [Global Assessment of Functioning] or SOFAS [Social and Occupational Functioning Scale]." [34681]

Global Assessment of Severity
[used but not cited in 08333]

Global Assessment Scale (Endicott et al)

Global Assessment Scale for Children
[used but not cited in 13361]

Global Assessment Tool (U.S. Army)
"The GAT is a self-report questionnaire designed to measure the psychosocial well-being of soldiers of all ranks and experience in four domains identified as important in the Comprehensive Soldier Fitness program: emotional fitness, social fitness, family fitness, and spiritual fitness." [35721]

Global Clinical Impression Scale
[used but not cited in 06912]

Global Deterioration Scale (Reisberg et al)
"A behaviorally anchored scale used to assess functional ability in subjects with early and advanced cognitive impairment" [27382]

Global Distress Scale (Mason and Killian)
"A 15 item ... self-report inventory to investigate the nature of manifest symptomatology" [26171]
[cited confusingly in 26171]

Global Flight Anxiety
"A seven-step single-item ordinal self-assessment scale" [03120]

Global Health Status/QoL Scale
[used but not cited in 39710]

Global Rating Scales of Mother-Infant Interaction

Global Ratings of Essays About Trauma (Klest and Freyd)
"We developed a code to assess global aspects of participants' essays, in an attempt to determine whether particular characteristics of these essays influence the effectiveness of the writing intervention." [81253]

Global Registry of Acute Coronary Events (Fox et al)
"The GRACE score is an empirically derived prognostic risk index based on clinical predictors available at the time of an acute coronary syndrome." [36902]
Fox, K A A; Dabbous, O H; Goldberg, R J; Pieper, K S; Eagle, K A; Van de Werf, F; et al. *Prediction of risk of death and myocardial infarction in the six months after presentation with acute coronary syndrome: prospective multinational observational study (GRACE).* British Medical Journal 333: 1091 (2006). [cited in 36902]

Global Responsive Behaviors Coding Guide (Maisel et al)
"used...to code the degree of understanding, validation, and caring displayed by each partner" [40678]

Global Screening Questions (Smyth)

Global Severity Index
USE: Symptom Checklist 90 Revised (Derogatis)

Global Social Adjustment Score
[used but not cited in 38743]
Global Threat Appraisal
[used but not cited in 20831]

Glover Numbing Scale (Glover et al)
Glover, H; Ohlde, C; Silver, S; Packard, P; Goodnick, P; Hamlin, C L. The Numbing Scale: psychometric properties, a preliminary report. Anxiety 1: 70-79 (1994). [05186]

Glover Vulnerability Scale (Glover)

Go/No-Go Task (Luria)

Goal Attainment Scaling (Kiresuk and Sherman)

Goal Disturbance Questionnaire (Boersma et al)
"This scale was developed from a taxonomy identified by Ford and Nichols [that] attempts to describe the basic content of the purposes, desires and concerns that motivate human behaviour." [29631]

Goal Facilitation Inventory (Maes et al)
"This scale was based on the work of M.E. Ford and attempts to measure the basic content of the purposes that motivate human behavior." [19453]
Maes, S; Ter Doest, L; Gebhardt, W A. The Goal Facilitation Inventory: factor structure and psychometric properties. Unpublished manuscript, Leiden University (The Netherlands), 2002. [cited in 19453]

Goals Questionnaire (Maccallum and Bryant)
"This task was based on Emmons’s measure of personal strivings. Participants were asked to list 5 personal goals that they felt were currently important for them.” [37029]

God Locus of Health Control Scale (Wallston et al)

Goldberg Anxiety and Depressive Scale (Goldberg)
"two subscales of nine items each...derived from a 60-item psychiatric assessment schedule using latent trait analysis” [07674]

Golombok Rust Inventory of Marital State (Rust et al)
Rust, J; Bennum, J; Crowe, M; Golombok, S. The Golombok Rust Inventory of Marital State (GRIMS). Sex and Marital Therapy 1: 55-60 (1986). [cited in 20038]

Golombok-Rust Inventory of Sexual Satisfaction (Golombok and Rust)
UF: GRISS
Inventory of Sexual Satisfaction (Golombok and Rust)

Goodenough-Harris Drawing Test (Harris)
USE: Draw-A-Person Test (Goodenough)

Gordon Diagnostic Unit
"The Gordon Box is an assessment of attention that includes assessments of vigilance and distractibility” [27881]
Gordon, M; Mcclure, F D; Post, E M. Interpretive Guide to the Gordon Diagnostic Unit. Syracuse, New York: Gordon Systems, 1986. [cited in 27881]

Gordon Test of Imagery Control (Gordon)
"a 12-item scale which measures capacity to manipulate mental images” [08405]

Gorsuch Adjective Checklist (Gorsuch)
"a 33 item instrument which categorizes God image according to 9 factors” [15561]
Gospel Oak Questionnaire (Harwood et al)
"a 12-item list of major adverse events" [32729]

GoStop Impulsivity Paradigm (Dougherty et al)

Gottfried-Brane-Steen Scale
USE: Rating Scale for Dementia Syndromes (Gottfries et al)

Gottschalk-Gleser Content Analysis Scales (Gottschalk and Gleser)

Gough Rating Scale
used to elicit "numerical estimates of pain intensity" [39862]

Graded Naming Test (McKenna and Warrington)

GRADIR (Berger and Knezevic)
"[an] inventory of the state and relations in the family...this questionnaire contains 218 items" [17263]
[used but not cited in 17263]

Gratitude Adjectives Checklist (Emmons and McCullough)
"a 3-item measure" [28014]

Gratitude Questionnaire (McCullough et al)
"the six item GQ-6 assesses general feelings of thankfulness and gratitude toward perceived benefactors" [27746]

Grief and Mourning Status Interview and Inventory (Rando)
"This 29-item scale is designed to test one's search for meaning of a loss of a loved one." [36483]

Grief Assessment Scale (Basoglu and Salcioglu)
"a self-rated scale, which includes 20 items based on the diagnostic criteria for complicated grief proposed by Prigerson et al..." [85375]

Grief Behavior Questionnaire (Somer et al)
"The GBQ-R contains 10 items on a 6-point Likert scale and was specifically adapted for this research sample..." [85948]

Grief Cognitions Questionnaire (Boelen et al)
"a 38-item questionnaire" [19788]

Grief Experience Inventory (Sanders et al)
Grief Experience Questionnaire (Barrett and Scott)
"a 55-item, Likert scale self-administered questionnaire that was developed specifically to measure grief after suicide, focused on the previous 2- to 3-week period" [22396]

Grief Experiences Scale (Murphy)
"a 25-item [scale]...developed by the principal investigator for this study" [14632]

Grief Inventory (Grant Consortium)
"70 items divided into seven topic areas...developed by the William T. Grant Consortium on Adolescent Bereavement" [06274]

Grief Measurement Scale (Jacobs et al)

Grief Questionnaire (Steel)
a 5-item scale with "a focus on interpersonal grief" [38471]
[used but cited only as personal communication in 38471]

Grief Reaction Index (Lennon et al)
a 12-item measure designed to assess common grief symptoms including numbness, denial and preoccupation with the deceased" [23835]

Grief Reaction Inventory (Pynoos et al)
Pynoos, R; Nader, K; Frederick, C; Gonda, L; Stubmer, M. Grief reactions in school age children following a sniper attack at school. *Israel Journal of Psychiatry and Related Sciences* 24: 53-63 (1987). [cited in 01754; the Inventory appears on p. 55]
UF: UCLA Grief Reaction Inventory

Grief Recovery Questions (Lehman et al)
"eight questions about participants’ perception of their grief" [22703]

Grief Screening Scale (Layne et al)
"The GTMQ is a 6-item questionnaire tapping catastrophic misinterpretations of what would happen on confrontation with the reality of the loss and loss-related emotions as well as more general fear of one’s own grief reactions." [34207]

Griffiths Scale
"a psychomotor evaluation" [27273]

Grip Strength Test
[used but not cited in 09457]

GRISS
USE: Golombok-Rust Inventory of Sexual Satisfaction (Golombok and Rust)

Groningen Activity Restriction Scale (Kempen et al)
"This consists of 18 items each describing an (instrumental ) activity of daily living. [32800]

Groningen Intelligence Test
USE: Groninger Intelligentie Test

Groningen Social Disabilities Schedule (Wiersma et al)
Groninger Intelligentie Test
UF:  Groningen Intelligence Test

Groninger Sleep Quality Scale

Grooved Pegboard Test

Gross Motor Function Classifications System (Palisano et al)

Group Climate Questionnaire (MacKenzie)

Group Dynamics Evaluation Scale (Roberts)
Roberts, L.  A Treatment Manual for Therapy Groups with Survivors of Childhood Incest.  Madison, Wisconsin: Rape Crisis Center, 1987.  [10103; the Scale appears in Appendix 2, pp. 63-65]

Group Environment Scale (Moos)
"measures group atmosphere with subscales of cohesion, leader support, task orientation, and order and organization" [80924]

Group Leadership Behavior Inventory (DePalma et al)

Group Participation Evaluation Questionnaire (Hernandez et al)
Hernandez, A; Ruble, C; Rockmore, L; McKay, M; Messam, T; Harris, M; Hope, S.  An integrated approach to treating non-offending parents affected by sexual abuse.  Social Work in Mental Health 7: 533-555 (2009).  [82906]

Group Selection Questionnaire (Cox et al)
"The initial 14-item version of the GSQ was designed to tap three constructs: Expectancy, Ability to Participate, and Deviant Social Skills..." [39436]

Group Satisfaction Questionnaire (Flannery-Schroeder and Kendall)
"designed for use in the present study...ten 5-point questions assessing the degree to which a child liked other group members” [22671]

Group Technique Adherence Scale (McCallum et al)
"consists of 14 items (7 interpretive and 7 supportive)” [32181]

Group Therapy Alliance Scale (Pinsof and Catherall)

Grünerberger Alphabetical Cancellation Test
USE:  Alphabetischer Durchstreichstest (Grünerberger)

Grundintelligenztest Skala 2 (Weiss)
UF:  Culture-Fair Intelligence Scale
Gudjonsson Suggestibility Scale (Gudjonsson)

Guiao Socio-Demographic Data Questionnaire (Guiao)

Guide to Clinical Assessment of Sexual Harassment and/or Discrimination Complaints (New Jersey Psychiatric Association)

Guided Exercise for Telling the Story of Sexual Abuse (DeYoung and Corbin)

Guild Memory Test (Gilbert et al)

Guilt and Shame Container Drawing
[used but not cited in 92974]

Guilt Attitude Scale
[used but not cited in 90594]

Guilt Inventory (Kugler and Jones)

Guilt Inventory (Laufer and Frey-Wouters)
Laufer, R S; Frey-Wouters, E. War trauma and the role of guilt in post-war adaptation. Paper presented at the annual meeting of the Society for Traumatic Stress Studies, Dallas, October 1988. [cited in 07116]

Gulf War Experiences Questionnaire (Boyd et al)
"The respondents were asked 50 war experience questions regarding how much they believed they were exposed to a wide range of environmental hazards during their deployment such as blowing sands, oil-fire smoke, and chemical warfare.” Boyd, K C; Hallman, W K; Wartenberg, D; Fiedler, N; Brewer, N T; Kipen, H M. Reported exposures, stressors., and life events among Gulf War Registry veterans. *Journal of Occupational and Environmental Medicine* 45: 1247-1256 (2003). [cited in 32994]

Gulf War Medical Symptoms Questionnaire (Hallman et al)

Gulf War Symptom Survey (Haley et al)

Gun Possession Scale

Gun Stages Inventory
"a 4-dimensional Stages of Change measure assessing veterans’ readiness to change firearm keeping behavior” [91615] [used but not cited in 91615]

Gutman’s Scale
[used but not cited in 21861]

Guttman Scale

Guy’s/Age Concern Survey

GWB
USE: General Well-Being Schedule (Dupuy)

H-T-P Test
USE: House-Tree-Person Test (Buck)
Habit Questionnaire (Resnick and Weaver)
“the HQ is an 11-item measure designed to assess types of self-injurious behaviors.” [18228]
Resnick, H A; Weaver, T L. Habit Questionnaire. Unpublished measure, Medical University of South Carolina, 1994. [cited in 18228]

Habitual Sleep Questionnaire (Morgan et al)

Hachinski Ischemia Scale

HADStress Screen (Westermeyer et al)
"This screen is based on the current presence versus absence of the following 4 symptoms: frequent headache (H), appetite change (A), dizziness or faintness (D), and sleep problems (S)." [35157]
Westermeyer, J; Campbell, R; Lien, R; Spring, M; Johnson, D R. HADStress: a somatic screen for posttraumatic stress in Somali refugees. Psychiatric Services, in press, 2010. [cited in 35157]

Haldane Battery
[used but not cited in 11298]

Hallucination Scale (Launay and Slade)

Hallucinogen Rating Scale (Strassman et al)
"The HRS consists of 100 items, with individual items assessing one of six factors: somaesthesia; affect; volition; cognition; perception; and intensity. [33282]

Hälsobladet (Ekblad et al)
"developed for newly arrived refugees in the introduction phase in the community and includes 15 questions about stress-symptoms and trauma exposure" [24200]

Halstead Impairment Index
[used but not cited in 09457]

Halstead-Reitan Neuropsychology Battery (Halstead and Reitan)
[for description of contents, see apan 143]
UF: Category Test (Halstead)
Neuropsychological Test Battery (Halstead)

Halstead-Wepman Aphasia Screening Test
[used but not cited in 24905]

Hamburg-Wechsler Intelligenztest für Erwachsene-Revision (Tewes)
UF: HAWIE

Hamburger Neurotizismus- und Extraversionsskala für Kinder und Jugendliche
[used but not properly cited in 40468]

Hamilton Anxiety Scale
USE: Hamilton Rating Scale for Anxiety (Hamilton)

Hamilton Depression Scale
USE: Hamilton Rating Scale for Depression (Hamilton)

Hamilton Rating Scale for Anxiety (Hamilton)
UF: Hamilton Anxiety Scale
Hamilton Rating Scale for Depression (Hamilton)
UF: Hamilton Depression Scale

Hand Injury Severity Scoring System (Campbell and Kay)

Hand Preference Demonstration Test (Soper et al)
"The test consists of 8 items that are intended to assess participants' hand preferences over a wide range of activities." [31367]

Hand Test (Wagner)
[cited in 01128]

Handedness Questionnaire (Raczkowski et al)
HANDS (Baer et al)
USE: Harvard Department of Psychiatry Depression Scale

Hannover Score for Polytrauma Outcome
"The HASPOC...was developed to classify the status of rehabilitation of polytraumatized patients. Briefly, it consists of a self-assessment part that contains a detailed patient questionnaire on individual, social, financial, professional, and medical items and a provider report that summarized the results of a physical examination and a questionnaire by a physician." [37192]
UF: HASPOC

Happiness Scale
"used in large surveys as a crude measure of avowed happiness" [23829]
[ambiguously cited in 23829]

Happy Faces Scale (Field et al)

Harassment in Abusive Relationship: A Self-Report Scale (Brockmeyer and Sheridan)
"The HARASS is a 19-item Likert-style self-report instrument with a dual response of frequency and perceived severity." [81857]

Hardiness Scale (Bartone et al)
USE: Health Symptom Checklist (Bartone et al)

Hardiness Scale (Kobasa and Puccetti)

Hardiness Test (Personal Views Survey)
[used but not cited in 90731]

Hare P-SCAN
a 30-item instrument "administered to screen applicants with clinically significant psychopathic traits" [40332]

Harkavy-Asnis Suicidal Survey (Harkavy-Friedman and Asnis)

Harsh Discipline Scale (Khamis)
"6 items [measuring] children's perception of parental rearing practices" [27243]

Harter Perceived Competence Scale
USE: Self-Perception Profile for Children (Harter)

Health Practice Index (Fukuda et al)

Health Practices Questionnaire (Belloc and Breslow)

Health Problems Checklist (Schinka)
"a 236-item questionnaire assessing health status in 13 domains" [09555]

Health Professions Stress Inventory (Wolfgang)
"The HPSI is a 30-item scale designed to measure stress in the health profession." [25378]

Health Questionnaire (Jenkins)

Health Resources Inventory (Gesten)

Health Responses Scale (Brown)

Health Risk Appraisal (University of Michigan)
"a 59-item self-report instrument that assesses family medical history and current health behavior practices such as smoking and dietary habits" [18247]

Health Risk Assessment II (U.S. Army)
a screening battery that “combines traditional health risk assessment items with standardized mental health screening scales” [82860]
Gahm, G A; Swanson, R D; Lucenko, B A; Reger, M A. History and implementation of the Fort Lewis Soldier Wellness Assessment Program (SWAP). *Military Medicine* 174: 721-727 (2009). [82860]

Health Scale (Kira et al)
"this 12-item measure...is generally based on the taxonomy of health problems of ICD-9-CM codes for selected general medical conditions." [82453]

Health Scale (Spence)

Health Screening System (Kovera et al)
Kovera, C A; Anger, W K; Campbell, K A; Binder, L M; Storzbach, D; David, K L; Rohlman, D S. Computer-administration of questionnaires: a Health Screening System (HSS) developed for veterans. *Neurotoxicology and Teratology* 18: 511-518 (1996). [21032]

Health Services Research Questionnaire (Chitwood et al)

Health Services Use Questionnaire (Kilić)
"This questionnaire was a modified and adapted version of a self-report instrument used in the Mental Health Profile of Turkey study. It assesses presence of post-earthquake psychological problems and type of presenting complaint." [31335]
[used but not clearly cited in 31335]

Health Services Utilization Form
[used but not cited in 22851]

Health Status Inventory (Solomon)

Health Status of Vietnam Veterans Telephone Interview
Health Status Questionnaire (Kazis et al)

Health Status/Health Behaviors Scale (Murphy)
"a 68-item self-report health, health behaviors, and health care use questionnaire developed by the primary investigator for the current study" [22016]
Murphy, S A; Johnson, C; Cain, K C; Das Gupta, A; Dimond, M; Lohan, J; Baughner, R. Broad-spectrum group treatment for parents bereaved by the violent deaths of their 12- to 28-year-old children: a randomized controlled trial. *Death Studies* 22: 209-235 (1998). [22016]

Health Survey of Canadian Forces Personnel
Includes scales drawn from several other instruments

Health Survey of Military Personnel
[a survey of British personnel, used but not cited in 28336]

Health Symptom Checklist (Bartone et al)
"a 20-item measure assessing aspects of physical health and well-being"
UF: Physical Symptom Checklist (Bartone et al)
Symptom Checklist (Bartone et al)

Health Symptom Checklist (Runtz)
"The HSC was developed for this study and was based partially on [Attanasio et al’s] Psychosomatic Symptom Checklist, SUNYA Revision...[it contains] a total of 54 health symptom items" [16957]

Health Symptom Checklist (Vickers and Hervig)
"This 23-item checklist consists of yes/no items that query whether the participant had experienced each somatic complaint during the previous month.” [22739]

Health Symptom Checklist (Wolfe et al)
"The 52-item expanded HSC used in this study is a synthesis of several published checklists from other studies of military populations. The HSC measures the frequency of 52 health symptoms...over the past 30 days.” [21634]
UF: Expanded Health Symptom Checklist

Health Utilities Index

Health-Related Quality of Life Scale (CDCP)

Healthcare Experiences Interview (Green et al)
"This semistructured, qualitative interview was designed for the study.” [86225]
Green, B L; Kaltman, S I; Chung, J Y; Holt, M P; Jackson, S; Dozier, M. Attachment and health care relationships in low-income women with trauma histories: a qualitative study. *Journal of Trauma and Dissociation* 13: 190-208 (2012). [86225]

Healthcare Productivity Survey (Gillespie et al)
"a 29-item instrument with four scales developed to measure the perceived change in work productivity after exposure to a stressful event” [37287]

Healthy Days Measure (CDCP)

Hearing Disability Questionnaire (Lutman et al)
Heart Surgery Questionnaire (Freedland et al)

"An experimental measure, the HSQ was developed for this study to assess perceived psychological impact of CABG surgery." [32155]

Freedland, K E; Skala, J A; Carney, R M; Rubin, E H; Lustman, P J; Dávila-Román, V G; Steinmeyer, B C; Hogue, C W.

Heartland Forgiveness Scale (Thompson et al)

"the 18-item HFS measured dispositional forgiveness or the adaptive framing of perceived transgressions such that one is no longer negatively attached to it." [27746]

Heaton Story and Figure Learning Subtest

Hebrew University Database Questionnaires

a series of structured questionnaires developed for this project

Agid, O; Shapira, B; Zislin, J; Ritsner, M; Hanin, bB; Murad, H; Troudart, T; Bloch, M; Heresco-Levy, U; Lerer, B. Environment and vulnerability to major psychiatric illness: a case control study of early parental loss in major depression, bipolar disorder and schizophrenia. Molecular Psychiatry 4: 163-172 (1999). [21248]

Hedonic Deficit and Interference Scale (Frewen et al)

"The HDIS was designed and administered to directly assess negative affect interference (i.e., secondary negative affective responses to positive stimuli and events) in addition to, and distinct from, hedonic deficits (i.e., difficulties in experiencing positive affect)." [86449]

Heidelberger Dissoziations-Inventar (Brunner et al)

Brunner, R; Resch, F; Parzer, P; Koch, E. Heidelberger Dissoziations-Inventar (HDI). Frankfurt/Main: Swets Test Services, 1999. [cited in 31402]

Helkimo Anamnestic and Clinical Dysfunction Index

Heller Resiliency Scan

HELP Questionnaire (Herpes Resource Center)

Help-Seeking Questionnaire (Sabina et al)

"developed for this study" [85937]

Help-Seeking Stigma Questionnaire

[used but not cited in 81118]

Helping Alliance Questionnaire (Luborsky et al)

Helping Alliance Scale (Priebe and McCabe)

[used but not cited in 28162]

HELPs Questionnaire (Picard et al)

"A brief, preliminary screening tool developed by a team of head trauma specialists, the HELPS questionnaire is designed for use by professionals not trained in neurology to identify patients in need of in-depth neuropsychological assessment." [24274]

Henry Ittleson Centres Family Interaction Scales

USE: Family Interaction Scale (Beherens at al)

Herth Hope Index

"The HHI is a 12-item scale used to assess the overall hope level of breast cancer patients." [82610]

Heterosexual Harrassment, Rejection, and Discrimination Scale (Szymanski)
"The HHRD consists of 14 items reflecting the frequency with which LGBs report having experienced discrimination because they are LGB in the past year." [36336]

Heterosexual Behavior Inventory (Bentler)

Heterosexual Perceptions Questionnaire (Kowalski)
"measures a broad range of women's dating behaviors" [17192]

Heterosexual Relationships Scale (Hall et al)
A 12-item scale that "measures attitudes about the power of men in society to which girls and boys may subscribe" that "was developed with an adolescent sample" [80589]

Heterosocial Perception Survey (McDonel and McFall)

High Magnitude Stressor Events Structured Interview (Kilpatrick et al)

High Risk Injection Practices Questionnaire
"developed for use by the National Institute on Drug Abuse (NIDA) Clinical Trials Network to assess injection practices, including sharing and cleaning of needles and works" [29354]

High Risk Model of Threat Perception (Wickramasekera)

High School Personality Questionnaire (Cattell et al)

High School Study Questionnaire
[used but not cited in 82803]

High-K Strategy Scale (Giosan)
"HKSS is a 26-item scale tapping into various indicators of high-K strategy. These indicators include upward mobility, health and attractiveness, social capital, or risk consideration." [33130]

Hill Interaction Matrix
[used but not cited in 90770]

Hinting Task (Bell et al)
"The Hinting Task was devised to measure both social inference and theory of mind abilities of people with severe mental illness." [36791]
Bell, M; Bryson, G; Greig, T; Corcoran, C; Wexler, B E. Neurocognitive enhancement therapy with work therapy effects on neuropsychological test performance. Archives of General Psychiatry 58: 763-768 (2001). [cited in 36791]

Hispanic Stress Inventory (Cervantes et al)
Cervantes, R C; Padilla, A M; Salgado de Snyder, N. The Hispanic Stress Inventory: a culturally relevant approach toward psychosocial assessment. Unpublished manuscript, 1989. [cited in 01979]

Historia Personal de Abusos Sexuales (López et al)
"Diseñada por nosotros para esta investigación" [09286]
Historical Loss Associated Symptoms Scale (Whitbeck et al)
"made up of 12 items each specifying a potential symptom" [30844]

Historical Loss Scale (Whitbeck et al)
"consists of 13 items each listing a type of loss" [30844]

Histories of Physical and Sexual Abuse Questionnaire (Meyer et al)
"a standardized questionnaire of histories of abuse among women with serious and persistent mental illness"

History of Abuse Form (Kisiel and Lyons)
"included items abbreviated from [*Wolfe et al’s History of Victimization Form*] and incorporated variables associated with severity of sexual abuse in the literature" [23245]

History of Bulimia Questionnaire (McShane and Zirkel)

History of Psychosocial Stressors (Scotti et al)
"a 59-item measure of potentially traumatic events" [14539]
Scotti, R J; Ruggiero, K J; Rabalais, A; Parker, L; Smith, T; Del Ben, K. History of Psychosocial Stressors: conceptualization, utilization, validity, and test-retest reliability. Poster presented at the 34th annual convention of the Association for Advancement of Behavior Therapy, New Orleans, November 2000. [cited in 14539]

History of Sexual Abuse Questionnaire (McKelvey and Mao)

History of Traumatic Event Exposure Scale (Freedy et al)
11 items

History of Unwanted Sexual Contact (Koverola et al)
Koverola, C; Proulx, J; Hanna, C; Battle, P; Chohan, M. History of Unwanted Sexual Contact. Unpublished manuscript, University of Manitoba, Winnipeg, 1992. [cited in 06462]

History of Victimization Form (Wolfe et al)

UF: History of Victimization Questionnaire (Wolfe et al)

History of Victimization Questionnaire (Resick)
"a 56-item measure that extensively surveys adult and childhood exposure to victimization using face-valid questions" [20842]

History of Victimization Questionnaire (Wolfe et al)
USE: History of Victimization Form (Wolfe et al)

History of Vietnam-America War Experiences Questionnaire
"a personal history of Vietnam-America war experiences was collected...This included information gathered on dangerous situations, military experiences, and personal feelings. ...developed from Rasmussen’s work" [23145]

UF: Dangerous Situations in the Vietnam-America War Questionnaire
Military Experiences in the Vietnam-America War Questionnaire

History of Violence Questionnaire (AMANI Trust)
"a structured interview covering detention, torture, political activity, violence against other family members, and disappearances...developed from Rasmussen’s work" [23145]

History of Violence Witnessed by Child Questionnaire (Lehmann and Wolfe)

"a 13-item measure documenting the frequency of assaults witnessed and the duration of time a child witnessed violence” [09512]

History of Witnessed Violence Measure (LONGSCAN)

"This project-developed measure assesses youth’s exposure to 8 forms of violence varying in severity, and included many of the root experiences from the Things I’ve Heard and Seen Scale.” [38125]
Knight, E D; Smith, J S; Martin, L M; Lewis, T; LONGSCAN Investigators. Measures for Assessment of Functioning and Outcomes in Longitudinal Research on Child Abuse, vol. 3: Early Adolescence. Available online at the LONGSCAN website. [cited in 38125]

HIT-6
USE: Headache Impact Test (Bayliss and Batenhorst)

HIV Dementia Scale (Power et al)

"The HDS is a brief, quantitative instrument used to screen for the presence and severity of cognitive impairment. The HDS consists of 4 items which test motor speed, memory, constructional praxis and executive function.” [32809]

HIV Knowledge Scale (Brown et al)

HIV Risk-Taking Behavior Scale (Ward et al)

HIV Self-Efficacy Scale (Lawrence et al)

"assesses practical skills (e.g., the ability to acquire and carry condoms)” [22641]

HIV-Preventive Communications Skills Scale

HIV-Related Fatigue Scale (Barroso and Lynn)

"a Likert-type 56-item self-report measure assessing several aspects of fatigue” [33367]

HIV-Specific Stressors Scale (DeMarco et al)

HIV/AIDS Knowledge Test (Koopman et al)

HJL-Inventory (Jonsson and Levi)

Hogan Empathy Scale (Hogan)

Hogan Grief Reaction Checklist (Hogan et al)

"an empirically defined instrument developed to better understand the normal process of bereavement” [23306]

Hogan Personality Inventory (Hogan and Hogan)

Hogan Sibling Inventory of Bereavement

"The HSIB consists of 46 questions divided into 2 subscales. The first subscale measures the level of personal growth [sic] (22 items) and the second the level of general grief (24 items).” [23669]

Holden Psychological Screening Inventory (Holden)

"a brief, 36-item self-report questionnaire [measuring] psychiatric symptomatology, social symptomatology, and depression” [22728]
Holocaust Empathy Scale (Shortt and Pennebaker)
"...designed for this experiment..."

Holocaust Experience Questionnaire (Bauman)
"created to identify modes of transmission through survivor’s Holocaust experience and second generation’s symptoms” [91601]

Holocaust Survivor Exposure Questionnaire (Van der Hal-Van Raalte et al)
"In this questionnaire participants answered demographic and specific Holocaust survival-related questions.” [30724]

Holocaust-Related Imagery Scale
"evaluating dreams, associations, and psychological symptoms” [92215]
[used but not cited in 92205]

Holtzman Ink Blot Technique
[used but not cited in 03492]

HOME
USE: Home Observation for Measurement of the Environment (Caldwell and Bradley)

Home and Community Exposure to Violence and Trauma Questionnaire
[used but not cited in 91284]

Home and Community Social and Behavior Scales (Merrell)
"The HCSBS...measures social competence and antisocial behaviors in school-age (ages 5-18 years) children." [34213]

Home Environment Interview (Robins et al)

Home Environment Interview for Children (Reich and Earls)

USE: Impact of Event Scale (Horowitz et al)

IFF (Lowman)

Illinois Family Study Child Well-Being Interview
"The IFS-CWB is a five-year panel study that includes all participants in wave 1 of the IFS who had a child at least 3 years of age or younger that was identified as the ‘target child’ at the time of the initial IFS interview….The IFS-CWB survey included measures on the health and well-being of the target child, access to and utilization of necessary services, and various aspects of parenting and parent-child interactions." [83300]

Illinois Rape Myth Acceptance Scale (Payne et al)
Illinois Test of Psycholinguistic Ability (Kirk et al)

Illness Attitude Scale (Kellner)
“consists of 9 subscales designed to assess fears, attitudes, and beliefs associated with abnormal illness behavior and hypochondriacal concerns” [24025].
Kellner, R. *Abridged Manual of the Illness Attitudes Scale*. Albuquerque: Department of Psychiatry, University of New Mexico School of Medicine, 1987. [cited in 24025]

Illness Behaviour Questionnaire (Pilowsky)

UF: Whitely Index

Illness Cognition Questionnaire (Evers et al)
an 18-item questionnaire "developed for chronic diseases to explore three generic illness cognitions around helplessness, acceptance and the perceived benefits of the illness" [36599].

Illness Intrusiveness Ratings Scale
"developed to measure illness- and treatment-induced objective or perceived interference with 13 life domains considered important to quality of life” [22315].

Illness Perceptions Questionnaire (Weinman et al)
"The IPQ is a self-report inventory designed to assess the five dimensions of the Self-Regulation Model.” [27607]

Illness Worry Scale (Robbins and Kirmayer)
9 items assessing hypochondriac concerns” [31314].

Image Desensitization Rating Scale
[used but not usefully cited in 30709]

Images Interview (Speckens et al)
"designed for the purpose of this study” [30309].

IMAGES of the Ideal Spouse (Anderson et al)

Imaginal Processes Inventory (Singer and Antrobus)

Imaginary Friends Questionnaire (Silberg)
a 13-item true/false questionnaire
Silberg, J (ed.), *The Dissociative Child: Diagnosis, Treatment, and Management*, p. 333. Lutherville, Maryland: Sidran Press, 1996. [13514, which includes the text of the instrument]

Imagination Inventory
"consists of 15 items comprising three subscales: predicted imagining; play history; history of involvements (in non-hypnotic activities)” [99295].

Imber Trust Scale (Imber)
Immediate and Delayed Memory Tasks (Dougherty et al)
"The IMT is a computerized go/no-go measure that resembles a continuous performance test but with additional demands on inhibitory control, working memory, and sustained attention." [38811]

Immediate and Delayed Story Recall Tests (Capitani et al)
"they evaluate the ability to recall a short story immediately after narration and after an interfering task" [35251]

Immediate Post-Concussion Assessment and Cognitive Testing Battery (Iverson et al)
"ImPACT is a validated computer-administered neuropsychological test battery consisting of 5 test modules, which test attention, verbal and visual memory, processing speed, and reaction time, with a summary measure for each." [37625]
UF: ImPACT (Iverson et al)

Immediate Postpartum Questionnaire (Romito et al)
"Questions...included social and demographic characteristics, pregnancy intendedness, the woman’s health and health behavior during and prior to the pregnancy, childbirth, the health of the baby, and experience of violence." [82554]
Romito, P; Molzan Turan, J; Neiandt, T; Lucchetta, C; Pomicino, I; Scrimin, F. Violence and women’s psychological distress after birth: an exploratory study in Italy. Health Care for Women International 30: 160-180 (2009). [82554]

Immediate Reactions and Experience Questionnaire (Marmar and Weiss)
USE: Peritraumatic Dissociation Experiences Questionnaire (Marmar and Weiss)

Immediate Reactions to the Accident Scale (Tyan and Weiss)
"This self-report scale, designed for the current study, contains 26 items examining the immediate reaction of subjects to the current event." [07470]

Immediate Stress Response Checklist (Fein et al)
"The ISRC is a 26-item, verbal questionnaire designed to evaluate the key features of acute stress responses in the immediate posttrauma period." [23700]

Immediate Stress Scale (Warheit et al)
USE: Hurricane Stress Measures (Warheit et al)

Immersion Questionnaire (Zimand et al)
"a measure that assesses how absorbed subjects become during exposure sessions" [30493]
Zimand, E; Anderson, P A; Rothbaum, B O; et al. Immersion Questionnaire. Decatur, Georgia: Virtually Better, 2001. [cited in 30493]

Immigration Related Stressors Scale (Ritsner et al)
"35-item inventory of demographic variables and self-reported psychosocial atressors...specially developed for the present study" [09312]

ImPACT (Iverson et al)
USE: Immediate Post-Concussion Assessment and Cognitive Testing Battery (Iverson et al)

Impact Message Inventory (Kiesler)
"The IMI contains 90 items associated with personal reactions to another individual." [21387]

Impact of Cancer Scale (Zebrack et al)
"an 81-item measure designed to assess the impact of cancer on survivors’ lives" [84337]

Impact of Cancer Version 2 Survey (Crespi et al)
"The [37-item] IOCv2 assessed the positive life changes and negative impacts attributed to the cancer experience." [37568]
Impact of Childhood Experiences Questionnaire (Devine et al)
"3 open-ended questions regarding the impact of having a serious and/or chronic illness as a child" [35807]

Impact of Childhood Sexual Abuse Questionnaire (Margolin)

Impact of Earthquake Event Scale
[used but not cited in 26872]

Impact of Event Scale - 8 (Dyregrov and Yule)
"The IES-8 is an 8-item self-report instrument designed to measure 2 of the 3 symptom clusters associated with DSM-IV PTSD: intrusion and avoidance." [35784]

Impact of Event Scale - Revised (Weiss et al)

Impact of Event Scale (Horowitz et al)

Impact on Exams Questionnaire (Hermans et al)
"The IExQ was developed for the purpose of this study. The scale consists of 13 items that assess the psychological impact of the exam results." [31614]

Impact of Race-Related Events (Loo et al)
"The IRE was constructed to assess for DSM-IV PTSD symptoms associated with specific negative race-related events." [27501]

Impact of Race-Related Events Questionnaire
[used but not cited in 24158]

Impact of Racism Scale (Sanders Thompson)

Impact of Traumatic Stressors Interview Schedule (Kazak et al)
"a relatively brief, semi-structured interview format that assesses seven clinically relevant dimensions of patients' and families' illness experiences" [09633]

Impact on Family Scale (Stein and Jessop)
"a measure of the impact of pediatric disability on the family" [21576]
Stein, R E K; Jessop, D T.  *PACTSPapers/AECOM: Tables Documenting the Psychometric Properties of a Measure of the Impact of Chronic Illness on a Family*.  Bronx, New York: Department of Pediatrics, Albert Einstein College of Medicine, 1985.  [cited in 21576]
Stein, R E K; Riessman, C K.  The development of an impact-on-family scale: preliminary findings.  *Medical Care* 18: 465-472 [cited in 21684]

Impact on Friends Scale (Ahrens and Campbell)

Impact on School Performance Scale (Yule and Dyregrov)
The [17-item] ISPS was developed to address teachers’ need for a measure of the effect of traumatic experiences on school performance.  [40117]
Yule, W; Dyregrov, A.  Impact on School Performance Scale (ISPS).  [cited only as a Web document in 40117]

Impaired Control Questionnaire (Sitharthan et al)
[used but not cited in 13523]
Implicit Association Test (Greenwald et al)

"The Implicit Association Test uses the speed at which respondents can make judgments that involve pairs of concepts to evaluate the relative ease with which the respondent can associate those concepts." [84553]

Implicit Association Test (Rüsch et al)

Impulsive Aggression Quick Screen (Stanford et al)
"The IAQS is a self-report checklist measuring the symptoms of impulsive aggression [and is] a combination of the diagnostic criteria for intermittent explosive disorder and the irritability subscale of the Buss Durkee Hostility Index." [33223]

Impulsive Aggression Scale (Carlson)
[cited only as "unpublished data" in 26745]

Impulsive Behavior Scale (Rossotto et al)
"The IB is a 14-item self-report questionnaire that assesses the frequency of impulsive behaviors such as suicide gestures, self-mutilation, and shoplifting." [24224]

Impulsiveness Scale (Borgatta)
a 5-item scale

Impulsiveness/Irritability Measure (Spence et al)

Impulsiveness/Premeditated Aggression Scale (Stanford et al)
"The IPAS is a 30-item self-report questionnaire that measures past impulsive and premeditated aggression." [82314]

Impulsivity Control Scale (Plutchik and Van Praag)
a 15-item self-report scale designed to assess impulsivity that is independent of aggressive behavior" [21350]

Impulsivity Questionnaire (Eysenck et al)

Impulsivity Scale (Barratt)
USE: Barratt Impulsivity Scale (Barratt)

In-Depth Interview (Hollifield et al)
"developed to collect data about the range, type, and importance of war events, the range, type, and importance of symptoms; and the perceived relationship of events to symptoms; as well as information about potential moderators of the effects of war events such as shame and guilt, and information about resilience." [28084]
Hollifield, M; Eckert, V; Warner, T D; Jenkins, J H; Krakow, B; Ruiz, J; Westermeyer, J J. Development of an inventory for measuring war-related events in refugees.  *Comprehensive Psychiatry* 46: 67-80 (2005). [28084]

In-Depth Interview for Sexual Harassment (Fitzgerald et al)
Fitzgerald, L F; Magley, V J; Swan, S. The In-Depth Interview Schedule: assessing psychological, organizational, and health-related outcomes for sexual harassment victims.  Paper presented at the annual meeting of the Association for Women in Psychology, Portland OR, March 1996. [cited in 22670]

Incest Attributions Questionnaire
[used but not cited in 90348]

Incest Experiences Questionnaire (Draucker)

Incest History Questionnaire (Courtois)

Incest Survivor Scale (Sherman)
Incest Survivors’ Aftereffects Checklist (Blume)

Incidence and Impact of Maltreatment Questionnaire (Brothers et al)
Brothers, S J; Dawson, B; Purvis, B; Kerby, D; Shaevel, B.  Incidence of various types of child maltreatment.  Paper presented at the meeting of the Mississippi Psychological Association, Biloxi, September 1988.  [cited in 12903]

Incident Classification Interview (Kilpatrick and Veronen)
USE:  Incident Report Interview (Kilpatrick et al)

Incident Exposure Scale (Marmar et al)
"a rescue operations stress exposure questionnaire consisting of 31 items, self-reported" [12850]

Incident Questionnaire (Jenkins)
"modified from other disaster studies"

Incident Report Interview (Kilpatrick et al)
UF:  Incident Classification Interview (Kilpatrick and Veronen)

Incident-Related Stressors Scale (McLeod and Cooper)
a 28-item measure

Inclusion of Other in the Self Scale (Aron et al)
"The IOS is a pictorial measure of closeness in which the respondent selected one of seven Vennlike diagrams..." [82347]

Income and Public Assistance Questionnaire
"The 5-item IPAQ...measures the participant's monthly income and the source of monthly income..." [27133]
[used but not cited in 27133]

Incomplete Figures Test
[used but not cited in 09641]

Incomplete Sentence Test
[used but not cited in 20319]

Inconsistent Nurturing as Control Theory Scale (Reed)
"a new quantitative measure...designed to quantitatively operationalize the INCT and assess whether functional family members take a controlling, nurturing, or inconsistent support approach to deal with their veteran's PTSD behavior" [93560]

Index of Clinical Stress (Abell)

Index of Core Religious Experience (Kass et al)
"assesses experiences of a higher power and spiritual experiences" [20395]

Index of Explosive Anger (Silove et al)
Silove, D; Brooks, R; Steel, C R B; Steel, Z; Hewage, K; Rodger, J; Soosay, I.  Explosive anger as a response to human rights violations in post-conflict Timor-Leste.  Social Science and Medicine 69: 670-677 (2009).  [34022]

Index of Exposure to Terror (Somer et al)
"The IET included several aspects of exposure to terror in Israel." [19452]
Somer, E; Ruvio, A; Soref, E; Sever, I.  Terrorism, distress and coping: high versus low impact regions and direct versus indirect civilian exposure.  Anxiety, Stress, and Coping 18: 165-182 (2005).  [19452]

Index of Exposure to War Violence
USE:  Exposure to Violence Index (Espino)
**Index of Functioning (McLennan)**
"measured difficulties undertaking daily living tasks (Pursuing livelihoods, home duties, or other routine activities) in the month prior to interview" [83703]

**Index of General Affect (Campbell et al)**

**Index of Health Related Quality of Life (Rosser)**

**Index of Marital Satisfaction (Hudson)**
USE: Clinical Measurement Package (Hudson)

**Index of Parent Participation/Hospitalized Child (Melnyk)**
"a 36-item dichotomous instrument" [09054]

**Index of Parent Support during Intrusive Procedures (Melnyk)**
"a 16-item dichotomous scale" [09054]

**Index of Parental Attitudes**
USE: Clinical Measurement Package (Hudson)

**Index of Parental Behaviour (Melnyk et al)**
"This observational measure [of interaction in the neonatal intensive care unit] consists of 17 items..." [32920]

**Index of Peer Relations (Hudson)**
USE: Clinical Measurement Package (Hudson)

**Index of Personal Relations (Bennett)**
a self-administered 12-item scale [80589]

**Index of Psychological Abuse (Sullivan et al)**

**Index of Race-Related Stress**
[used but not cited in 91452]

**Index of Religiousness (Zuckerman)**
3 items

**Index of Self-Esteem (Hudson)**
USE: Clinical Measurement Package (Hudson)

**Index of Self-Regulation of Emotion (Mendolia)**
"The ISE measures dispositional repressive coping styles [and] is based on the Marlowe-Crowne Social Desirability Scale and the Taylor Manifest Anxiety Scale." [33266]

**Index of Sexual Satisfaction (Hudson)**
USE: Clinical Measurement Package (Hudson)

**Index of Social Position (Hollingshead)**

**Index of Social Solidarity (Hawdon and Ryan)**
"Our measure taps the extent to which respondents felt they are part of the Virginia Tech community." [87085]
Hawdon, J; Ryan, J. Well-being after the Virginia Tech mass murder: the relative effectiveness of face-to-face and virtual interactions in providing support to survivors. Traumatology 18(4): 3-12 (2012). [87085; measure not named in text; name assigned by PILOTS Database staff]
Index of Social Support (Coppel)
UF: Coppel Index of Social Support (Coppel)
Social Support Scale (Coppel)

Index of Spouse Abuse (Hudson and McIntosh)

Index of Stressful Life-Events
"Twenty-two dichotomously scored variables describing stressful life-events not related to the military mission, covering physical health, interpersonal losses, conflicts, professional, financial or legal problems, accidents, or exposure to violence, were used to create an Index of Stressful Life-Events" [16612]

Index of Well-Being (Campbell et al)

Index of Well-Being (Ochse)

Index of Well-Being (Ochse)

Index of Stressful Life-Events
"Twenty-two dichotomously scored variables describing stressful life-events not related to the military mission, covering physical health, interpersonal losses, conflicts, professional, financial or legal problems, accidents, or exposure to violence, were used to create an Index of Stressful Life-Events" [16612]

**Individual Coping Questionnaire**
a "French instrument...used to evaluate the parents' coping" [31259]  
[used but confusingly cited in 31259]

**Individual Coping Questionnaire (Bodenmann)**
"This questionnaire has been developed on the basis of the COPE, and it is made up of a set of 23 items yielding 6 subscales." [35398]  

**Individual Demographic Questionnaire (Bride et al)**
[used but not cited in 92452]

**Individual Experiences Survey (Jurgens et al)**
"This survey consists of 17 items...created to assess children’s experiences of a tornado." [82114]  

**Individual Styles of Coping Questionnaire (Peck)**
Peck, R F. A Manual for the Individual Styles of Coping Questionnaire. Austin, Texas: Research and Development Center for Teacher Education, Department of Educational Psychology, 1981. [cited in 01740]

**Indochinese Psychiatric Program Family Questionnaire (Boehnlein et al)**

**Infancy Trauma Interview**
"The ITI is a 46-item semistructured interview designed to elicit a report on traumatic experiences in childhood (before age 14)" [23687]  

**Infant Behavior Questionnaire (Rothbart)**

**Infant Characteristics Questionnaire (Bates et al)**

**Infant Feeding Behaviors - Rater Checklist (Benoit and Green)**
"An early version of the IFB-R was used for this study and consisted in a 40-item checklist used by a trained coder to identify and quantify infants' maladaptive behaviors at meal times." [22957]  

**Infant Temperament Scale (Carey)**

**Infant Traumatic Stress Questionnaire (Bogat et al)**
"The ITSQ is an 8-item questionnaire designed by the study authors based on 3 of the 4 general criteria for diagnosis of Traumatic Stress Disorder in the Diagnostic Classification: 0-3." [28208]  

**Infant-Toddler Social and Emotional Assessment (Carter and Briggs-Gowan)**
"The ITSEA is a 166-item parent-report questionnaire designed to assess social-emotional problems and competencies in 12- to 36-month-olds." [32439]  

**Infant/Toddler Symptom Checklist (DeGangi)**
"a 58-item parent-report measure...used to assess the child’s sensitivity to inner and outer stimuli" [31185]  

**Informant Questionnaire on Cognitive Decline in the Elderly**
UF: IQCODE

**Informant Trauma Questionnaire (Picken et al)**
"We designed the ITQ to assess care coordinators' knowledge about patients' trauma experiences and the current impact." [35175]  
Picken, A L; Berry, K; Tarrier, N; Barrowclough, C. Traumatic events, posttraumatic stress disorder, attachment style, and working alliance in a sample of people with psychosis. Journal of Nervous and Mental Disease 198: 775-778 (2010). [35175]
Information Processing Questionnaire (Smerecnik et al)

Information Questionnaire (Frisch and MacKenzie)
Frisch, M B; MacKenzie, C. Information questionnaire. Unpublished manuscript, Baylor University, 1986. [cited in 02892]

Infrequency-Posttraumatic Stress Disorder Scale (Elhai et al)
USE: MMPI-2 Infrequency-Posttraumatic Stress Disorder Scale (Elhai et al)

Initial Client Questionnaire (Delancey Street Foundation)

Initial Evaluation Form (Fabrega et al)
Fabrega, H; Mezzich, J E; Mezzich, A C. Adjustment disorder as a marginal or transitional illness category in DSM-III. Archives of General Psychiatry 44: 567-572 (1987). [cited in 26488]

Initial Interview (Riggs et al)
UF: Assault Reaction Interview (Riggs et al)
PTSD Diagnosis and Severity Interview (Riggs et al)

Initial IPV Screening Questionnaire (McCloskey and Grigsby)

Initial Medical Evaluation Form (U.S. Department of Defense)
"a 29-section 477-page document" used to examine Vietnam-era repatriated prisoners of war [87404]
[used but not cited in 87404]

Initial Screening Questionnaire (Denny)

Initial Subjective Reactions Scale
USE: Potential Stressful Events Interview (Kilpatrick et al)

Initial Trauma Review for Adolescents (Briere)
"This semistructured interview allows the clinician to cover the primary forms of trauma potentially experienced by adolescents (i.e., those between the ages of 12 and 21)." [86173]
Briere, J N; Lanktree, C B. Treating Complex Trauma in Adolescents and Young Adults. Thousand Oaks, California: Sage Publications, 2012. [86173; the ITR-A appears on pp. 195-200]

Initial Trauma Review-3 (Briere and Scott)
"This is a behaviorally anchored, semi-structured interview that allows the clinician to assess most major forms of trauma exposure." [82996]

Initials Preference Task (Nuttin)
"The IPT is an index of implicit self-esteem that is based on the assumption that peoples' initials are closely connected to the self and that a persons rating of self-related objects can be used to infer implicit self-evaluations." [34844]

Injured Workers Survey (Hennigar)
"a brief, effective self-report tool that screens for psychosocial distress, in particular for characteristic symptoms of PTSD" [23404]

Injuries Scale
[used but not cited in 90378]

Injury Adjustment Survey (Burgess et al)
"a 16-item self-report measure originally developed to meet a requirement of the commission on Accreditation of Rehabilitation Facilities (CARF)" [09384]
Injury Checklist (Sullivan et al)

"Women were asked to rate the frequency of specific injuries that occurred as a result of abusive behavior by any past partners." [399008]

Injury Distress Index (Victorson et al)

"designed to assess self-reported distress responses after traumatic physical injury" [32047]

Injury Severity Score (Baker et al)

Injury/Illness Sensitivity Index (Taylor)

"The ISI is an 11-item measure designed to assess fear of illness and/or injury." [26688]

Injustice Experiences Questionnaire (Sullivan et al)

"The IEQ is a 12-item scale that asks respondents to indicate the frequency with which they experience different thoughts concerning the sense of unfairness in relation to their injury on a 5-point scale with the endpoints (0) never and (4) all the time." [33329]

Inner Core Scale (Pritt)

"a seven-item [scale] developed for this study" [20257]

Inner Experience Questionnaire (Brock et al)

"The [24-item] IEQ was developed to include 3 subscales, reflecting the three self capacities [affect tolerance, self-worth, and inner connection]" [80097]

Inpatient Multidimensional Psychiatric Scale (Lorr)

Insight Scale (Markova and Berrios)

"represents aspects of self-knowledge relevant to the patient’s illness, including areas such as hospitalization, mental illness, change in self, and control over the situation" [16615]

Insomnia Index (Lerdal et al)

"derived from three diagnostic criteria of the ICD-10" [84159]

Insomnia Severity Index (Bastien et al)

"formerly Sleep Impairment Index" [24606]

Bastien, C H; Vallieres, A; Morin, C M. Validation of the Insomnia Severity Index as an outcome measure for insomnia research, Sleep Medicine 2: 297-307 (2001). [cited in 24606]

SEE ALSO: Sleep Impairment Index (Morin et al)

Insomnia Severity Scale (Krakow et al)

Krakow, B; Melendrez, D; Warner, T D; Clark, J O; Sisley, B N; Dorin, R; Harper, R M; Leahigh, L K; Lee, S A; Sklar, D; Hollifield, M. Signs and symptoms of sleep-disordered breathing in trauma survivors: a matched comparison with classic sleep apnea patients. Journal of Nervous and Mental Disease 194: 433-439 (2006). [28901]

Institute for Pregnancy Loss Questionnaire

Institute of Living Scale
USE: Shipley Institute of Living Scale (Shipley)

Institutional Betrayal Questionnaire (Smith and Freyd)
"a 10-item questionnaire that assesses institutional betrayal and involvement" [87380]
Smith, C P; Freyd, J J. Institutional betrayal: violations of members’ trust surrounding incidents of sexual assault. Poster presented at the 28th annual meeting of the International Society for the Study of Trauma and Dissociation, Montreal, 2011. [cited in 87380]

Institutional Child Abuse Processes and Coping Inventory (Flanagan-Howard et al)
"The ICAPCI is a 43-item instrument developed within the context of the present study to assess psychological processes and coping strategies theoretically purported to be associated with institutional abuse, institutional rearing, stress and coping in the face of childhood adversity, and clerical abuse." [36412]
Flanagan-Howard, R; Carr, A; Shevlin, M; Dooley, B; Fitzpatrick, M; Flanagan, E; Tierney, K; White, M; Daly, M; Egan, J. Development and initial validation of the Institutional Child Abuse Processes and Coping Inventory among a sample of Irish adult survivors of institutional abuse. Child Abuse and Neglect 33: 586-597 (2009). [cited in 36412]

Institutional Victimization Questionnaire (Walsh et al)
"based on the Sexual Experiences Survey" [86197]

Instrument for Stress-Oriented Job Analysis (Semmer and Dunckel)
USE: Stressbezogene Arbeitsanalyse (Semmer and Dunckel)

Instrument pour Mesurer l’ASE (Cyr and Frappier)
"Different aspects of childhood sexual abuse were measured with the ASE. This instrument is based on the Incest History Questionnaire (Courtois) and on the History of Victimization Form (Wolfe et al). It contains 10 specific questions about respondents’ sexual abuse histories in the first 18 years of life." [83817]
Cyr, M; Frappier, J-Y. Instrument pour mesurer l’ASE — Version cote. Unpublished manuscript, Université de Montréal, 2005. [cited in 83817]

Instrument zur Stressbezogenen Tätigkeitsanalyse (Semmer et al)

Instrumental Activities of Daily Living (Lawton and Brody)
USE: Physical Self-Maintenance Scale (Lawton and Brody)

Instrumental Activities of Daily Living Scale (Teresi et al)
Teresi, J A; Golden, R R; Gurland, B J; Wilder, D E; Bennett, R G. Construct validity of indicator scales developed from the Comprehensive Assessment and Interview Schedule. Unpublished manuscript, Center for Geriatrics, Columbia University, 1983. [cited in 01934]

Instrumental and Social Competence Scale (Beiser et al)

Instrumental-Expressive Social Support Scale (Ensel and Woelfel)
"asked respondents to indicate the frequency with which they experienced a list of 26 problems" [21533]

Intake Evaluation Form (Mezzich et al)

Intake Form for Homeless Veterans (Rosenheck et al)
"...adapted from Barrow and associates’ Client Description and Contact Information Form..." Rosenheck, R; Leda, C; Gallup, P; Astrachan, B; Milstein, R; Leaf, P; Thompson, D; Herrera, P. Initial assessment data from a 43-site program for homeless chronic mentally ill veterans. Hospital and Community Psychiatry 40: 937-942 (1989). [01152]

Intake General Information Sheet (Mayer et al)
"a fully structured data sheet covering demographics, as well as key events pertaining to the family, the subjects’ development, physical development, physical health, psychosocial history, and a range of stressful life events" [32171]
Intake Questionnaire for Trauma Victims (Lahad and Doron)

IntegNeuro
a “computerized and standardized...battery used to assess domains of cognitive function” [34991]

Integra Outpatient Tracking Assessment (Howard et al)
"The 68-item self-report Integra Outpatient Tracking Assessment, Mental health Inventory...is a combination of three scales: subjective well being, current mental health symptoms, and current life functioning." [25790]
Howard, K I; Brill, P; Lueger, R J; O'Mahoney, M T; Grissom, G R. Integra Outpatient Tracking Assessment: Psychometric Properties. Radnor, Pennsylvania: Integra, 1993. [cited in 25790]

Integration of Stressful Life Experiences Scale (Holland et al)
a 16-item scale "which attempts to measure the extent to which an individual has adaptively integrated a stressful life experience into his or her broader life narrative" [35694]
Holland, J M; Currier, J M; Coleman, R A; Neimeyer, R A. The Integration of Stressful Life Experiences Scale (ISLES): development and initial validation of a new measure. International Journal of Stress Management 17: 325-352 (2010). [35694; the ISLES is printed on pp. 351-352]

Integration/Sealing Over Scale (McGlashan et al)
"This scale distinguished between two opposing coping styles for dealing with a psychotic experience..." [34138]

Intentional Achievement Responsibility Scale (Crandall et al)
"a 34-item, forced-choice, internal-external locus of control measure for academic success and failure" [28546]

Intensity of Treatment Rating Scale (Kazak et al)
a 4-point scale used to rate intensity of treatment and severity of medical late effects" [28112]
Kazak, A E; Cant, C; Jensen, M M; McSherry, M; Rourke, M T; Hwang, W T; Alderfer, M A; Geele, D; Simms, S; Lange, B J. Identifying psychosocial risk indicative of subsequent resource use in families of newly diagnosed pediatric oncology patients. Journal of Clinical Oncology 21: 3220-3225 (2003). [cited in 28112]

Intensive Care Experience Questionnaire (Rattray et al)
a new [24-item] measure developed to...quantify the patient’s perceptions of the intensive care admission.” [28261]

Intent-to-Die Scale (Freeman et al)
"The Freeman scale is divided into two scales designed to measure suicide attempter’s intent to die." [39722]

Interaction Involvement Scale
[used but not cited in 90342]

Interaction with Dying Measure (Fieweger and Smilowitz)
"The IDM is composed of 26 items related to interactions one might have with a significant other who is dying." [81851]

Interactive Metronome Assessment
[used but not cited in 93283]

Interactive Peer Play Observational Coding System (Fantuzzo et al)
Fantuzzo, J; Sutton-Smith, B; Atkins, M; Meyers, R; Stevenson, H; Coolahan, K; Weiss, A; Manz, P. Community-based resilient peer treatment of withdrawn maltreated preschool children. Journal of Consulting and Clinical Psychology 64: 1377-1386 (1996). [08571]

Interest Checklist (Kielhofner and Neville)

Interest Checklist (Matsutsuyu)

Interest in Treatment Scale (Najavits)
"The ITS is a self-report questionnaire that lists 21 different types of therapy...in which respondents rate the perceived helpfulness of each therapy type..." [34497]
Interference of Emotional Expression Scale (Frewen et al)

“Survey items were developed to assess whether various anxieties, and maladaptive attitudes and beliefs, might underlie high self-reports of D-describing emotions in the PTSD population as per the stated hypotheses of the present study.” [38137]

Intergroup Understanding or Bias Questionnaire (Flanagan et al)

Internalized Object Relations Scale (Taylor and Franzen)

Taylor, B; Franzen, R B. The Internalized Object Relations Scale. Unpublished manuscript, University of Chicago, 1986. [cited in 01187]

Internalized Shame Scale (Cook)

Internal Control Index (Duttweiler)

Internal State Scale (Bauer et al)

Internal-External Control Scale (Nowicki-Strickland)

USE: Nowicki-Strickland Internal-External Control Scale (Nowicki and Duke)

Internal-External Control Scale for Children (Nowicki-Strickland)

USE: Nowicki-Strickland Internal-External Control Scale for Children (Nowicki and Strickland)

Internal-External Locus of Control Scale (Rotter)

Internal Equivalent Scale (Rotter)

USE: Internal-External Locus of Control Scale (Rotter)

Internal-Powerful-Other-Chance Scale (Levenson)

Internal Personal and Situational Attributions Questionnaire (Kinderman and Bentall)

Internalized Homophobia Scale (Meyer)

"an empirically validated, 9-item self-administered scale querying how troubled sexual minorities are about identifying as such over the last year" [36336]

Internalized Object Relations Scale (Taylor and Franzen)

Taylor, B; Franzen, R B. The Internalized Object Relations Scale. Unpublished manuscript, University of Chicago, 1986. [cited in 01187]

Internalized Shame Scale (Cook)

International Affective Digitized Sounds System (Bradley and Lang)

International Affective Picture System (Lang et al)

International Child Abuse Screening Tool

International Classification of Functioning, Disability and Health

International Classification of Impairments, Disabilities, and Handicaps
"The instrument [based on the ICIDH] was constructed for screening, monitoring, and prognosis purposes and to assist clinical rehabilitation. It consists of 27 items." [25126]

International Comparative Study of Ethnocultural Youth Questionnaire Scales
[used but not intelligibly cited in 81395]
UF: ICSEY Questionnaire Scales

International Diagnostic Checklists for DSM-IV
"The IDCL assess all DSM-IV criteria of the respective disorders on the basis of a clinical interview including focused diagnostic questions of the clinician and all other available information." [30306]

International Experiences Questionnaire (Schenk and Fremouw)
"contains 37 items and uses a 7-point scale to measure children’s perceptions of how often their parents engage in conflict on relational and domestic issues." [09334]

International Family Screen (Goldman)
"a 15-item questionnaire" [24402]

International Index of Erectile Function (Rosen et al)
"a 15-item questionnaire" [24402]

International Inventory of Erectile Function (Rosen et al)
"contains 37 items and uses a 7-point scale to measure children’s perceptions of how often their parents engage in conflict on relational and domestic issues” [09334]

Interpersonal Agency Scale (Smith et al)
a 5-item scale to "assess the frequency with which individuals use specific strategies to acquire control over their life circumstances and achieve personal goals" [35435]
Smith, G; Kohn, S J; Savage-Stevens, S E; Finch, J J; Ingate, R; Lim, Y O. The effects of interpersonal and personal agency on perceived control and psychological well-being in adulthood. *Gerontologist* 40: 458-468 (2000). [cited in 35435]

Interpersonal Behavior Questionnaire (Kishon-Barash et al)

Interpersonal Behavior Scale (Swan et al)
USE: Rationality/Emotional Defensiveness Scale (Swan et al)

Interpersonal Behavior Survey (Mauger et al)
"Survey designed to distinguish assertive behaviors from aggressive behaviors..." [17514]

Interpersonal Check List (LaForge and Suczek)

Interpersonal Competence Questionnaire for Youth (Buhrmeister)
"This 40-item measure assesses the participants’ perceived social self-efficacy in five domains: self-disclosure, providing emotional support, conflict management, assertiveness, and initiation of friendships." [19796]

Interpersonal Conflict at Work Scale (Spector and Jex)

Interpersonal Dependency Inventory (Hirschfield et al)

Interpersonal Discrimination Test (Rotton et al)
a "measure of cognitive complexity" [09209]

Interpersonal Exchange Model of Sexual Satisfaction Questionnaire (Lawrance and Byers)
a questionnaire comprising three scales of sexual satisfaction” [31048]

Interpersonal Guilt Questionnaire
[used but not cited in 91915]

Interpersonal Hostility Assessment Technique
"The IHAT consists of a 15-minute structured interview including questions from the Western Collaborative Group Study Structured Interview (Rosenman and Friedman, 1962)" [13038]

Interpersonal Jealousy Scale (Mathes and Severa)
"a 26-item scale that measures romantic jealousy" [31048]

Interpersonal Malfunction Scale
[used but not cited in 84823]

Interpersonal Needs Questionnaire (Bryan et al)
"The INQ was designed by our research group to measure participants; current beliefs about the extent to which they feel connected to others and the extent to which they feel like a burden on the people in their lives." [33730]
Interpersonal Negativity Scale (King et al)
- A 16-item scale [unnamed in article; name assigned by PILOTS Database staff]

Interpersonal Negotiation Strategies Interview (Schultz et al)
- "The INS was used to measure the developmental level of the capacity to coordinate social perspectives and to reason about the process of interpersonal negotiation as they attempt to resolve hypothetical dilemmas depicting interpersonal conflicts." [29064]

Interpersonal Network Questionnaire (Pearson)
- *UF: Inventory of Interpersonal Problems (Horowitz and French)*

Interpersonal Perception Method Questionnaire (Laing)
- [used but not cited in 91353]

Interpersonal Problem Survey (Horowitz)
- *USE: Inventory of Interpersonal Problems (Horowitz)*

Interpersonal Problem Inventory (Horowitz and French)
- *USE: Inventory of Interpersonal Problems (Horowitz)*

Interpersonal Problems Scale (Reinherz et al)
- "A 6-item scale created by project staff"

Interpersonal Psychotherapy Outcome Scale (Markowitz et al)
- "The IPOS is a single-page questionnaire that rates change in focal interpersonal problem areas on a 5-point scale." [28295]
  Markowitz, J C; Bleiberg, K L; Christos, P; Levitan, E. Solving interpersonal problems correlates with symptom improvement in interpersonal psychotherapy: preliminary findings. *Journal of Nervous and Mental Disease* 194: 15-20 (2006). [28295; the Scale appears on p. 20]

Interpersonal Reactivity Index (Davis)

Interpersonal Relations Assessment (Pilikonis)

Interpersonal Relationship Inventory (Tilden et al)

Interpersonal Relationship Scale (Schlein et al)
- "Uses a 5-point Likert-type rating to assess respondents' perceived trust for, and intimacy with, a close friend" [09335]

Interpersonal Self-Support Scale (Xia and Huang)
- "The ISSS, a 20-item scale, was designed to measure the 5 interpersonal traits of interpersonal independence." [85519]
  UF: Adolescent Students' Self-Supporting Personality Scale (Xia and Huang)
  Self-Supporting Personality Scale of Adolescent Students (Xia and Huang)

Interpersonal Sensitivity Measure (Boyce and Parker)
- "The ISPM is a 36-item self-report instrument that assesses the trait of interpersonal rejection sensitivity, that is, hypersensitivity to interpersonal rejection." [17990]

Interpersonal Style Inventory (Lorr and Younis)
- Lorr, M; Youniss, R P. *The Interpersonal Style Inventory*. Washington: Catholic University of America, 1971. [cited in 00118]

Interpersonal Support Evaluation List (Cohen et al)
Interpersonal Topical Inventory (Tuckman)

Interpersonal Trust Questionnaire (Forbes and Roger)
"The ITQ has 3 subscales (fear of disclosure, social coping, and social intimacy) and measures the capacity to use social support effectively." [86679]

Interpersonal Trust Scale (Rotter)

Interpersonal Violence Exposure Questionnaire (Griffing et al)
"a combination of open-ended and structured questions about past exposure to maternal domestic violence and to abuse" [33081]
Griffing, S; Ragin, D F; Sage, R E; Madry, L; Bingham, L E; Primm, B J. Domestic violence survivors' self-identified reasons for returning to abusive relationships. *Journal of Interpersonal Violence* 17: 306-319 (2002). [cited in 80056]

Interpretation of PTSD Symptoms Inventory (Clohessy and Ehlers)

Interpretation of Symptoms Questionnaire (Dunmore et al)
"used to measure the negative appraisals of post-trauma symptoms" [23592]

Interpretation of Voices Inventory (Morrison et al)
"This [26-item] scale measures how an individual would interpret auditory hallucinations were they to experience them." [26728]

Interval Treatment Record (McCormick et al)
"developed by our team to record the types and amounts of professional and mental health and medical treatment a person had received" [30034]
McCormick, B; Blum, N; Hansel, R; Franklin, J A; St. John, D; Pfohl, B M; Allen, J; Black, D W. Relationship of sex to symptom severity, psychiatric comorbidity, and health care utilization in 163 subjects with borderline personality disorder. *Comprehensive Psychiatry* 48: 406-412 (2007). [30034]

Intervention Rating Profile (Martens et al)
"a 15-item Likert-type scale...that addresses various aspects of intervention acceptability" [16640]

Intervention Stressors Inventory (Runyan et al)

Interview for Recent Life Events (Paykel)
"a schedule of 64 events, administered as a semi-structured interview" [09914]

Interview for Self-Mutilative Behavior (Evren et al)
"a semistructured interview inquiring a history of self-mutilative behavior" [31137]

Interview for the Assessment of Premorbid Memory (Larbig et al)
"a newly developed structured interview" [33253]

Interview for Traumatic Events in Childhood (Lobbestael et al)
"a retrospective, semi-structured interview for childhood maltreatment" [33081]
Interview Form for Trauma Victims (Sezgin and Yüksel)
"developed in the Istanbul Psychosocial Trauma Programme for evaluation of caseness" [82334]
[used but not otherwise cited in 82334]

Interview Guideline for Victims of Domestic Maltreatment (Labrador and Rincón)
"gathers data about the history and features of violence, considering type, duration, frequency, need of help and attention, and support received" [39731]

Interview Measure of Social Relationships (Brugha et al)

Interview Module for Intermittent Explosive Disorder (Coccaro et al)
"The M-IED is based on the Structured Clinical Interview for DSM-III-R (SCID), and attempts to empirically study IED and refine the diagnosis based on inclusionary and exclusionary criteria focusing on frequency of outbursts, level of aggression, and level of social impairment" [24092]

Interview of Sexual Abuse Incident (Morgan)

Interview of Sexual Experiences (Suris et al)
"The ISE provides the patient with specific definitions and examples of sexual harassment and assault before asking questions about exposure in each of the following three settings: (1) as a child younger than the age of 14, (2) as a civilian adult, not serving in the military, and (3) as an adult on active duty in the military." [28913]

Interview on Exposure to Interpersonal and Sexual Violence (Hill)
"a 31-item self-report measure used to assess the frequency of witnessing interpersonal violence in the community and at home, in adulthood" [19447]

Interview on Traumas Undergone in Childhood
[used but not cited in 17951]

Interview Schedule for Adults with Intellectual Disabilities (Mitchell et al)
"Semi-structured interviews, developed from a pilot study involving focus groups, were used to interview adults with mild intellectual disabilities from a clinical population, about their experiences of trauma. The transcripts were analysed using Interpretative Phenomenological Analysis (IPA)" [33597; instrument not named in article; name assigned by PILOTS Database staff]

Interview Schedule for Children (Kovacs et al)

Interview Schedule for Post-Traumatic Stress Disorder (Green)
USE: Post-Traumatic Stress Interview Schedule (Green)

Interview Schedule for Social Interaction (Henderson et al)

Interview Schedule of Social Integration (Unden and Orth-Gomer)
"measures both availability and satisfaction with deep emotional relations" [18314]

Interview to Assess Response of Panic-Disorder Patients to the Persian Gulf War (Sasson et al)
[title assigned by PILOTS database]
Sasson, Y; Zohar, J; Gross, R; Taub, M; Fux, M. Response to missile attacks on civilian targets in patients with panic disorder. Journal of Clinical Psychiatry 60: 385-388 (1999). [21518; the Interview appears on p. 388]

Interview to Diagnose Depression (Zimmerman et al)
USE: Inventory to Diagnose Depression (Zimmerman et al)
Interview zur Akuten Belastungsstörung (Steil und Füchsel)

Interview zur Diagnostik der Komplexen Posttraumatischen Belastungsstörung (Huber)

Interview zur Erfassung schwerwiegender Störungen der Verhaltenskontrolle (Borgmann und Bohus)
USE: *Severe Behavioral Dyscontrol Interview* (Borgmann and Bohus)

Interview zur Erhebung der Bedingungen des Unfalls (Frommberger et al)
"einem von uns entwickelten, strukturierten Interview“ [20422]

Interview zur Komplexen Posttraumatischen Belastungsstörung (I-kPTBS)
USE: *Structured Interview for Disorders of Extreme Stress* (Van der Kolk et al)

Interviewers’ Response Questionnaire (Mazor et al)
an open-ended questionnaire developed to assess “subjects’ descriptions regarding their own responses to Holocaust survivors’ testimony” [13956]

Interviewleitfaden zu Intrusiven Erinnerungen (Glaesser)

Intervista di Invalidità (Fioravanti et al)

Intimacy Attitude Scale (Amidon and Kavanaugh)

Intimacy Conflict Parenting Styles Family Functioning Scales (Noller et al)

Intimate Aspects of Parenting Questionnaire (Pictin)

Intimate Bond Measure (Wilhelm and Parker)

Intimate Friendship Scale (Sharabany)

UF: Capacity for Intimacy Questionnaire (Sharabany)
Intimate Justice Scale (Jory)
"The IJS measures patterns of psychological abuse and the potential for violence. It consists of 14 items associated with isolation and 15 items associated with physical abuse." [39049]

Intimate Partner Violence Perpetration Scale (Rhodes et al)
"The scale consists of 9 questions that assess verbal aggression, object aggression, physical aggression, sexual abuse, and sexual violence." [82118]
Rhodes, K; Boslaugh, S; Kahn, Z. Assessing the validity of intimate partner violence disclosed by male emergency department patients: an multidimensional construct. Manuscript submitted for publication, 2006. [cited in 82118]

Intimate Partner Violence Strategies Index (Goodman et al)
"assessed 38 methods of responding to physical, sexual, and psychological IPV" [80892]

Intimate Violence Screening Tool (Chicago Department of Health)

Intolerance of Uncertainty (Freeston et al)
"The IU consists of 27 items about uncertainty, emotional and behavioral reactions to ambiguous situations, implications of being uncertain, and attempts to control the future" [22706]

Intolerance of Uncertainty Scale (Buhr and Dugas)

Intrapartum Intervention Score (Clement et al)
"A score was calculated for each participant giving a weighted estimate of how much intervention she had experienced during birth." [34047]

Intrinsic Religious Motivation Scale (Hoge)
"assesses the motivation for religious behavior along the intrinsic and extrinsic dimensions formulated by Allport and Ross" [20395]

Intrinsic Spirituality Scale (Hodge)
"The ISS is a 6-item measure that uses a sentence completion format." [34074]

Intraventricular Religious Orientation Scale (Feagin et al)
*a 5-point, 21-item, closed-end questionnaire developed jointly by Feagin and Allport & Ross to assess motivation for religious affiliation* [04201]

Intrusion and Ruminatin Interview (Speckens et al)
"This semi-structured interview was developed for the purpose of the study and was modeled after the interviews used in earlier work of Ehlers et al, Hackmann et al, and Michael." [31496]

Intrusion Interview (Hackmann et al)
*a series of questions [about intrusive memories] asked in a fixed order" [18395]
Hackmann, A; Ehlers, A; Speckens, A; Clark, D M. Characteristics and content of intrusive memories in PTSD and their changes with treatment. *Journal of Traumatic Stress* 17: 231-240 (2004). [18395]

Intrusion Provocation Task (Michael et al)
"The task was designed to assess how easily intrusive memories were triggered by assault-related material." [27366]

Intrusion Questionnaire (Birrer et al)
"an adapted and expanded form of the Intrusion Interview from Michael et al..." [27366] [29907]
Intrusions Cognitions Questionnaire (Steil and Ehlers)
"developed by the authors for the purposes of this study" [22360]

Intrusions Questionnaire (Ehring et al)
"used to assess the number of intrusive memories of the film as well as their characteristics" [32151]

Intrusive Grief Thoughts Scale
"9 items [assessing] the degree to which one experiences intrusive and unwanted thoughts regarding a death" [82143]

Intrusive Memories Interview (Patel et al)
[instrument not named; name assigned by PILOTS Database staff]
Patel, T; Brewin, C R; Wheatley, J; Wells, A; Fisher, P; Myers, S. Intrusive images and memories in major depression. Behaviour Research and Therapy 45: 2573-2580 (2007). [cited in 32487]

Intrusive Thoughts Questionnaire (Dougall et al)
"used to assess the occurrence, frequency, and amount of intrusive thoughts" [20741]

Intrusive Thoughts Scale (Lepore et al)

Intrusiveness Scale (Dutton et al)
"an ordinal scale of 15 items derived from the Canadian Criminal Code" [08415]

Inventaire Clinique des Syndromes Psychotraumatiques (Crocq)
[used but not cited in 18022]

Inventaire des Conduites Parentales Psychologiquement Violentes (Gagné et al)
"Designed for 10- to 17-year-old children, the PVIPPI measures the frequency of a range of psychologically violent parental practices from the youths’ perspective." [80899]
UF: Psychologically Violent Parental Practices Inventory (Gagné et al)

Inventaire des Événements de Vie (Ferreri et al)

Inventaire-Échelle de Névrose Traumatique (Steinitz and Crocq)
UF: Traumatic Stress Inventory Scale (Steinitz and Crocq)

Inventar zur Erfassung Lebensverändernder Ereignisse (Siegrist et al)
UF: Inventory for Determining Life-Changing Events

Inventário Clínico da Depressão (Vaz Serra)
The IACLIDE is a Portuguese Inventory of the Clinical Evaluation of Depression, consisting of 23 questions with Likert type responses covering 4 types of disturbances: Work changes, Cognitive changes, Interpersonal Relationships changes, and Biological changes. [39658]
UF: Inventory of the Clinical Evaluation of Depression (Vaz Serra)

Inventario de Abuso Psicológico en Relaciones de Pareja (Calvete et al)
Inventário de Estressores de Força Militar de Paz (Monteiro da Silva et al)

"This inventory was developed at the Centre for Personnel Studies, to be used with Brazilian army peacekeepers. It is composed of 46 items which comprise different stressful situations..." [31482]

UF: Military Peace Force Stressor Inventory

Inventarisatielijst Pijngedrag (Kraaimaat and Van Schevikhoven)

UF: Pain-Coping Inventory

Inventarisatielijst Sociale Betrokkenheid (Dam-Baggen et al)

"a Dutch self-report inventory of social support" [22118]

UF: ISB (Dam Baggen et al)

Inventory for Social Support (Dam Baggen et al)

Inventory of Altered Self Capacities (Briere)

[used but not cited in 91690]

Inventory of Anticipatory Grief (Prigerson et al)

Prigerson, H G; Miller, M; Frank, E; Schulz, R; Heskey, E; Reynolds, C F. Inventory of Anticipatory Grief. Unpublished instrument, 1995. [cited in 09772]

Inventory of Beliefs About Wife Beating (Saunders et al)

Inventory of Callous-Unemotional Traits (Frick)

Inventory of Childhood Events (Zozus and Zax)

Inventory of Childhood Imaginings (Wilson and Barber)

USE: Creative Imagination Scale (Wilson and Barber)

Inventory of Childhood Memories and Imaginings

[used but not cited in 90353]

Inventory of College Students’ Recent Life Experiences (Kohn et al)

Inventory of Complicated Grief (Prigerson et al)

Prigerson, H G; Maciejewski, P K; Reynolds, C; Bierhals, A J; Newsom, J T; Fasiczka, A; Frank, E; Doman, J; Miller, M. Inventory of Complicated Grief: a scale to measure maladaptive symptoms of loss. Psychiatry Research 59: 65-79 (1995). [08134; the Inventory appears on p. 79]

Inventory of Depression and Anxiety Symptoms (Watson et al)

"a new self-report instrument...which was designed to assess specific symptom dimensions of major depression and related anxiety disorders" [30679]

Watson, D; O’Hara, M W; Simms, L J; Kotov, R; Chmielewski, M; McDade-Montez, E A; Gamez, W; Stuart, S. Development and validation of the Inventory of Depression and Anxiety Symptoms (IDAS). Psychological Assessment 19: 253-268 (2007). [30679]

Inventory of Depressive Symptomatology (Milne)

Inventory of Depressive Symptomatology (Rush et al)

30 items

Inventory of Disaster Experiences (McFarlane)

Inventory of Drinking Situations (Annis et al)

Inventory of Drug Use Consequences (Miller et al)

"This 50-item self-report inventory assesses the level of longtime negative consequences of drug use in the following domains: physical, interpersonal, intrapersonal, social responsibility, and impulse control." [17759]
[used but not properly cited in 17759]

Inventory of Drug-Taking Situations (Annis and Martin)

Inventory of Exposure Experience to Typhoon Morakot (Hsu et al)

"This 6-item inventory was adapted from the inventory used for the adolescent victims of Taiwan Earthquake in 1999." [35539]
Yang, P; Yen, C-P; Tang, T-C; Chen, C-S; Yang, R-C; Huang, M-S; Jong, Y-J; Yu, H-S. Posttraumatic stress disorder in adolescents after Typhoon Morakot-associated mudslides. Journal of Anxiety Disorders, published online 2010 (DOI: 10.1016/j.janxdis.2010.10.010). [35539]

Inventory of Family Problems (Thériault et al)

"a self-report 17-item questionnaire" [18122]
Thériault, C; Cyr, M; Wright, J. The Inventory of Family Problems. Unpublished instrument, Département de Psychologie, Université de Montréal, 1996. [cited in 18122]

Inventory of Functional Impairment

"The Inventory of Functional Impairment is an 87-item self-report measure designed to assess multiple dimensions of functional impairment experienced by active duty service members and veterans." [ClinicalTrials.gov]
[used but not clearly cited in 40257]

Inventory of Functional Status After Childbirth (Fawcett et al)

"the IPSAC measures functioning in daily activities as well as current role performance" [23618]

Inventory of Interpersonal Problems (Horowitz)

UF: Interpersonal Problem Inventory (Horowitz and French)
Interpersonal Problem Survey (Horowitz)

Inventory of Knowledge and Attitudes (Rybarik et al)

Inventory of Parent and Peer Attachment (Armsden and Greenberg)

Inventory of Parental Representations (Hart)

[used but not cited in 93615]

Inventory of Personal Relations (Zuckerman)

UF: Zuckerman Inventory of Personal Relations (Zuckerman)

Inventory of Physical Symptoms (Cohen and Hoberman)

Inventory of Postconcussive and Posttraumatic Distress Symptoms
[a 13-item instrument used but not named or cited in 29496]

Inventory of Postdisaster Social Support (Kaniasty and Norris)
"assesses the frequency with which 12 different supportive behaviors were received from family, friends, and outsiders...revised from an earlier measure [that] was influenced heavily by the Inventory of Socially Supportive Behaviors" [25133]

Inventory of Precautionary Behavior (Norris)
"encompasses 54 specific self-reported behaviors" [25136]

Inventory of Problems (Viglione and Landis)
[cited as "Viglione & Landis, 1994" in 90122]

Inventory of Problems (Viglione and Landis)
[used but not cited in 29496]

Inventory of Problematic Internet Experiences (Mitchell et al)
"an 11-category inventory" [30485]

Inventory of Psychosocial Balance (Domino and Aphonso)
[used but not cited in 90491]

Inventory of Small Life Events (Zautra et al)

Inventory of Social Support (Hogan and Schmidt)
"This 5-item scale evaluates the degree a bereaved person believes someone is available to listen non-judgmentally to his or her expression of grief." [80772]

Inventory of Social Support for Children (Hogan and Schmidt)

Inventory of Social Support for Children
"This adaptation of the inventory of Social Support measures perceptions of the availability of nonjudgmental validation of thoughts and emotions, opportunities to talk about problems and feelings, and the availability of help when needed." [28463]

Inventory of Social Support in Anxious Situations (St-Jean Trudel et al)
St Jean-Trude, E; Guay, s; Marchand, A; O'Connor, K. Développement et validation d'un questionnaire mesurant le soutien social en situation d'anxiété auprès d'une population universitaire. Santé Mentale au Québec 1: 43-60 (2005). [cited in 31048]

Inventory of Socially Supportive Behaviors (Barrera et al)

Inventory of Supportive Figures
"Asks the mother to identify the person most helpful to her since the disclosure of her child’s sexual abuse." [16319]

Inventory of the Clinical Evaluation of Depression (Vaz Serra)
USE: Inventário Clínico da Depressão (Vaz Serra)
**Inventory of Traumatic Grief (Prigerson and Jacobs)**

"The ITG is a 30-item self-report questionnaire designed to measure maladaptive symptoms of grief ... an expanded version of the Inventory of Complicated Grief." [25928]

**Inventory of Traumatic Stressors (National Comorbidity Survey)**

a 12-item scale assessing "lifetime exposure to a range of traumatic stressors" [14662]

**Inventory of Traumatic Stressors (National Comorbidity Survey)**

UF: Life Events Scale (Kessler et al)

**Inventory of Victim Behavior (Brown)**

**Inventory to Diagnose Depression (Zimmerman et al)**

Zimmerman, M; Coryell, W; Corenthal, C; Wilson, S. A self-report scale to diagnose major depressive disorder. *Archives of General Psychiatry* 43: 1076-1081 (1986).

UF: Interview to Diagnose Depression (Zimmerman et al)

**Investigator Questionnaire (Gaddy)**

"designed to measure [sexual assault] investigators' reaction to trauma work variables including: type of work assignment, years as an investigator and history of interpersonal violence victimization" [91696]

**Investment Model Scale (Rusbult et al)**

"a 22-item self-report inventory designed to measure...commitment level, relationship satisfaction, quality of alternatives, and investment size" [85152]

**Invincibility Belief Index (Killgore et al)**

"a measure of perceived invincibility" [37962]

**Iowa Depression and Anxiety Scales (Watson et al)**

**Iowa Family Interaction Rating Scales**

**Iowa Gambling Task**

**Iowa Interview for Partial Seizure-like Symptoms**

**Iowa Parent Behavior Inventory (Crase et al)**

"attempts to measure parental behavior in relation to a child" [21603]

**Iowa Personality Disorder Screen (Langbehn et al)**

**Iowa Sleep Disturbance Inventory**

[used but not cited in 93577]
Iowa Sleep Experiences Survey (Watson)

"The ISES is an 18-item, 7-point Likert scale which measures a wide range of sleep-related experiences, such as narcoleptic tendencies, waking dreams, lucid dreams, and nightmares." [34966]

Iowa Structured Psychiatric Interview (Tsuang et al)

Iowa Test of Basic Skills (Hieronymous et al)

IPAT Anxiety Scale (Cattell et al)

IPAT Depression Scale (Krug and Laughlin)

[used but not cited in 01578]

IPV Interview (Beck)

"This interview includes questions about the nature of the IPV and the individual's emotional response to the interpersonal violence..." [37694]

IPV Threat Appraisal Scale (Dutton et al)

"A [16-item] measure of perceived threat from the index intimate partner...based on the conceptual model of batterer-generated risks..." [28433]

IQCODE

USE: Informant Questionnaire on Cognitive Decline in the Elderly

Iraq Readjustment Inventory (Katz et al)

"a 16-item self-report measure ["developed specifically for this inquiry"] in which the women were asked to rate how difficult each of the items has been since their return from Iraq/Kuwait or Afghanistan" [30869]

Katz, L S; Bloor, L E; Cojucar, G; Draper, T. Women who served in Iraq seeking mental health services: relationships between military sexual trauma, symptoms, and readjustment. *Psychological Services* 4: 239-249 (2007). [30869; the Inventory appears on p. 249]

Irish Social Class Scale

Irrational Ideas Scale (Jacobsen et al)

Irritability Scale (Hinton et al)

USE: Worry Scales (Hinton et al)

Irritability, Depression and Anxiety Scale (Snaith et al)

Irritable Bowel Syndrome Quality of Life Questionnaire (Patrick et al)

"The IBSQOL is a disease-specific quality of life measure for IBS consisting of 34 questions." [38980]

Isaacs Set Test

ISB (Dam Baggen et al)

USE: Inventarisatieslijst Sociale Betrokkenheid (Dam-Baggen et al)

Isolated Sleep Paralysis Questionnaire (Bell et al)

"The questionnaire consists of the patient's verbatim description of symptoms, in addition to structured questions regarding onset, frequency, duration of the episodes, and controllability." [21229]

Bell, C C; Shakoor, B; Thompson, B; Dew, D; Hughley, E; Mays, R; Shorter-Gooden, K. Prevalence of isolated sleep paralysis in Black subjects. *Journal of the National Medical Association* 76: 501-508 (1984). [cited in 21229]
Israel National Household Survey of Drinking and Drug Use
"It assesses the frequency and quantity of alcohol consumption and the use of psychoactive drugs in the past 7 and 30 days, in the past year, and ever." [39369]

Israeltion Trauma Exposure Questionnaire (Pat-Horenczyk et al)
"developed specifically for the Israeli setting" [19014]
Pat-Horenczyk, R; Chentob, C M; Abramovitz, R; Baum, N; Daie, A; Brom, D. The Israeli Trauma Exposure and Functional Impairment. Unpublished instrument, 2002. [cited in 19014]

ITC Sense of Presence Inventory (Lessiter et al)

Item List (Salmon)
"The sumscore of this 20-item questionnaire measures good overall birth experience." [30310]

Jackson Incest Blame Scale (Jackson and Ferguson)
"An adaptation of the Attribution of Rape Blame Scale (Ward and Resick)"[21089]

Jackson Structured Interview for PTSD (Keane et al)
USE: Structured Interview for Post-traumatic Stress Disorder (Keane et al)

Jag Tycker Jag Är (Ouvinen et al)
"A standardized test of self-evaluation, 'I-think-I-am'...includes 32 items covering body image, talents and abilities, psychological well-being, relations to parents, and family and social support." [21089]

Jalowiec Coping Scale (Jalowiec et al)

Janis Self-Esteem Scale

Japan Brief Job Stress Questionnaire
[used but not otherwise cited in 32438]

Japanese and Caucasian Facial Expressions of Emotion (JACFEE) and Neutral Faces (JACNeuF)
Matsumoto, D; Ekman, P. Japanese and Caucasian Facial Expressions of Emotion (JACFEE) and Neutral Faces (JACNeuF) [CD-ROM]. San Francisco: Department of Psychology, San Francisco University, 1988. [cited in 81416]

Japanese Irrational Belief Test
[used but not cited in English in 19523]

JAREL Spiritual Well-Being Scale (Hungelmann et al)
"The JAREL is a 21-item scale that assesses the nature and depth of commitment to spiritual beliefs" [18632]

Jefferson Physician Empathy Scale (Hojat et al)
a 20-item self-report measure

Jellinek Craving Questionnaire
[cited only as “Ooteman, Koeter, Vserhuel, Schippers, and Van den Brink, 2006” in 92727]

Jellinek-PTSD Screening Questionnaire
a modified version of the Primary Care PTSD (PC-PTSD) screening questionnaire ... adapted for use among civilian substance use disorder (SUD) patients [38591]
Van Dam, D; Ehring, T; Vedel, E; Emmelkamp, P M G. Screening for posttraumatic stress disorder in civilian substance use disorder patients: cross-validation of the Jellinek-PTSD screening questionnaire. *Journal of Substance Abuse Treatment* (published online 19 April 2012). [38591]

Jenkins Activity Survey
Rissler, A; Elgerot, A. *Jenkins Activity Survey (JAS), Form C*(2). [place and publisher not given], 1987. [cited in 08364]
PILOTS Database Instruments Authority List

Jesness Inventory (Jesness)

Jewish Identification Questionnaire (Klein)
[used in 92215; cited only as "Judith Klein’s open-ended questions, measuring Jewish identification"; name assigned by PILOTS Database staff]

Jewish Identification Scale

Jewish Identity Questionnaire
"a 22-item scale that uses a 7-point continuum to measure Jewish identification of a participant’s parents and the degree of Judaisms in the atmosphere of the participant’s childhood home" [09428]
[used but not cited in 09428]

Jewish-American Identity Scale (Zak)

Job Content Questionnaire (Karasek)
"The JCQ is an instrument for assessing job stress, and contains subscales such as job demands, job control, co-worker’s support, and supervisor’s support. “[18297]

Job Control Scale (Ippolito et al)
a 3-item scale "adapted from the autonomy subscale of the Job Diagnostic Survey (Hackman and Oldham)" [29491]

Job Descriptive Index (Smith et al)

Job Involvement Scale (Frone et al)
a 5-item scale

Job Satisfaction Index (Brayfield and Rothe)
"an 18 item measure of general job satisfaction” [81896]

Job Satisfaction Questionnaire (Meliá and Peiró)
USE: Cuestionario de Satisfacción Laboral (Meliá and Peiró)

Job Satisfaction Scale (Churchill et al)

Job Satisfaction Scale (Price and Mueller)

Job Satisfaction Scale (Warr et al)
[a 15-item scale not named in the citing text; name assigned by PILOTS Database staff]

Job Satisfaction Survey (Spector)

Job Strain Instrument (Karasek and Theorell)
"contains 11 items concerning work demands and control” [09737]

Job Stress Survey (Spielberger)
"The JSS is a general measure of job stress. The scale measures 30 types of stressors...“ [24223]
Job Support Scale (Horwitz)  
- 11 items  

Job Tension Scale (House and Rizzo)  
- “a 6-item measure” [31247]  

Job Withdrawal Scale (Hanisch)  

Job-Related Affective Well-Being Scale (Van Katwyk et al)  
- “The JAWS measured the frequency with which the participants had experienced 15 positive and 15 negative emotions at work...” [33561]  

John Henryism Scale for Active Coping  
- “a 12-item active coping scale [that] measures ability to respond to challenges [40304]” [used but not clearly cited in 40304]

Johns Hopkins Depression Symptom Checklist  

Johns Hopkins Functioning Inventory (Robinson and Szetela)  

Johns Hopkins Public Health Infrastructure Tool  
- “an anonymous online survey instrument consisting of a demographic section and attitude/belief sections focusing on health department workers’ perceptions toward public health emergency response” [87217] [used but not cited in 87217]

Joseph Pre-School and Primary Self-Concept Screening Test  
- “The JSCS measures the self-concept of a child by using pictures to stimulate responses from the child.” [35076]  

Journalist Traumatic Exposure Scale (Pyevich)  

Judgement of Line Orientation Test (Benton)  

Judgment of Moral Transgressions Scale (Foa and Mikulincer)  
- “The scale is made up of short vignettes that describe some moral transgression...” [84526]  

Junior Eysenck Personality Inventory  
- USE: Eysenck Personality Inventory (Eysenck and Eysenck)

Junior High Life Experiences Survey (Swearingen and Cohen)  

Junior Temperament and Character Inventory  
- [used but not cited in 31402]  
  UF: Persönlichkeitsfragebogen für Jugendliche (Schmeck et al)

Jury Duty Survey (National Center for State Courts)  
- [used but not cited in 91611]

Jury Stress Scale (National Center for State Courts)  
- [used but not cited in 91611]

Just World Beliefs Scale (Lambert et al)  
Juvenile Suicide Assessment (Galloucis and Francek)
"a suicide risk assessment instrument that is based, in part, on the Juvenile Suicide Screen but that also includes several additional content areas that are considered to be necessary components of a comprehensive suicide risk assessment" [17419] Galloucis, M; Francek, H. The Juvenile Suicide Assessment: an instrument for the assessment and management of suicide risk with incarcerated juveniles. *International Journal of Emergency Mental Health* 4: 181-199 (2002). [17419; the text of the JSA appears on pp. 192-199]

Juvenile Suicide Screen (Galloucis and Francek)
"a brief suicide risk screening instrument designed for use with incarcerated juveniles" [17419]

Juvenile Victimization Questionnaire (Hambly and Finkelhor)
"an inventory of childhood victimization…providing a description of all the major forms of offenses against youth" [18820]

K-SADS
USE: Schedule for Affective Disorders and Schizophrenia for School-Age Children (Puig-Antich and Chambers)

K10 (Kessler et al)
"The Kessler-10 Instrument (K10) is a 10-item questionnaire that assesses psychologic distress, including symptoms of depression and anxiety." [31395]
Kessler, R C; Barker, P R; Colpe, L J; Epstein, J F; Gfroerer, J C; Hiripi, E; Howes, M J; Normand, S L; Manderk, R W; Walters, E E; Zaslavsky, A M. Screening for serious mental illness in the general population. *Archives of General Psychiatry* 60: 184-189 (2003). [cited in 31395]

UF: Kessler-10 Instrument

K6 (Kessler et al)
"a 6-item screening scale" [29909]

Kakuma Emotional Wellbeing Interview
"a local instrument [to] measure emotional distress and the ability to carry out day-to-day tasks of a man/woman within that community" [83635]

KANNER Catatonia Rating Scale

UF: Katatonia Autism Neuropsychiatric Neuromovement Examination Rating Scale

Kansas Family Life Satisfaction Scale

Kansas Marital Satisfaction Scale (Schumm et al)

UF: Kansas Parental Satisfaction Scale

Kansas Parental Satisfaction Scale (James et al)
James, D E; Schumm, W R; Kennedy, C E; Grigsby, C C; Shechtman, K L; Nichols, C W. Characteristics of the Kansas Parental Satisfaction Scale among two samples of married parents. *Psychological Reports* 57: 163-169. [cited in 03484]

Karnofsky Illness Severity Scale
USE: Karnofsky Performance Scale

Karnofsky Performance Scale
"provides a measure of global disability in terms of overall physical impairment during the past week" [22751]

UF: Karnofsky Illness Severity Scale

World Health Organization Performance Scale
Karolinska Affective and Borderline Symptoms Scale (Andersson et al)
"The KABOSS is a 27-item symptoms scale designed to assess psychiatric symptoms concerning depression, anxiety, obsessive-compulsive behaviours, and BPD. KABOSS is an extension of the Comprehensive Psychopathological Rating Scale Self-Rating Scale for Affective Syndromes (CPRS-S-A) taken from the CPRS." [35708]

Korte Depressie Vragenlijst voor Kinderen (De Wit)

Kosovo Poverty Assessment

Krawiecza Rating Scale
a 14-item scale “utilized to evaluate current psychiatric symptoms” [80265]

Kreek-McHugh-Schluger-Kellogg Scale
"The KMSK quantifies self-exposure to opiates, cocaine, alcohol, tobacco, and/or marijuana use." [35280]

Kuder Occupational Interest Survey
[cited in 02441; no reference given]

Kurztest zur Erfassung von Gedächtnis- und Aufmerksamkeitsstörungen (Erzigkeit)
UF: SKT Neuropsychological Test Battery
Syndrom-Kurztest

Kuwait Raha Scale (Al Naser et al)
"a measure designed to assess well-being among Kuwaitis" [32491]

Kuwait University Anxiety Scale (Abdel-Khalek)
a 20-item "unidimensional trait measure" based on the Arabic Anxiety Scale [24016]

Kwestionariusz Fizycznego Podobienstwa Blizniat (Oniszczenko and Rogucka)
"aimed at measuring zygosity in twins" [35186]
UF: Questionnaire of Twins Physical Resemblance (Oniszczenko and Rogucka)
Late Effect of Accidental Injury Questionnaire (Malt et al)

This inventory comprises two scales corresponding with two basic PTSD factors — Intrusion/Hyperarousal and Avoidance/Numbing. [33610]

UF: PTSD - Factorial Version Inventory (Strelau et al)

Kyiv Street Safe Interview Schedule (Kerfoot et al)

"The KSSIS is a semistructured interview schedule for use with a child, parent, or carer and was developed for use within this study." [29843]

Kerfoot, M; Koshyl, V; Roganov, O; Mikhailichenko, K; Gorbova, I; Pottage, D. The health and well-being of neglected, abused and exploited children: the Kyiv Street Children Project. Child Abuse and Neglect 31: 27-37 (2007). [29843]

L-Inventory (Lidvall)

Laban Movement Analysis

"a specific nonverbal observation system [that] takes into account 5 movement categories: body, shape, space, phrasing, and effort" [86527]

Labour Agentry Scale (Hodnett and Simmons-Tropea)

"The LAS is a 10-item Likert-type instrument that measures the maternal experiences of control during childbirth." [29035]

Lack of Binding Scale (Kleim et al)

"a 5-item exploratory scale developed for the purposes of the study" [31337]

Lack of Self-Referent Processing Scale (Halligan et al)

"a self-report measure which assesses the extent to which participants processed the assault as happening to themselves and incorporated the experience with other autobiographical information relating to the self." [08962]

Ladder of Life Scale

"a 10-point scale" [39294]

[used but not cited in 39294]

Lafayette Grooved Pegboard

[cited in 01179; no reference given]

Lakota Grief Experience Questionnaire (Brave Heart)

Lancaster and Northgate Trauma Scales (Wigham)

"The LANTS (informant and self-report versions) were recently designed to measure the effects of stressful life events in people with intellectual disability... They are designed to identify post-traumatic responses within a year of a traumatic incident...” [35580]

Lancaster Life Event Questionnaire

"This [12-item] measure was designed specifically for the proposed study and aims to assess stressful life events which do not currently qualify as A1 traumatic events." [34055]

Lancaster, S; Melka, S E; Rodriguez, B F. An examination of the differential effects of the experience of DSM-IV defined traumatic events and life stressors. Journal of Anxiety Disorders 23: 711-717 (2009). [34055]; the LLEQ appears on p. 716

Langner Scale

USE: Twenty-two Item Screening Scale (Langner)

Language, Identity, and Behavior Scale (Birman and Trickett)

Last Day of Writing Questionnaire (Pennebaker)

"a 17-item self-report questionnaire on which participants rate their evaluations and feelings regarding their writings." [24279]

[cited in 24279 as "adapted from Pennebaker, personal communication"]

Late Effect of Accidental Injury Questionnaire (Malt et al)

Laufer Combat Scale (Laufer et al)  
USE: Combat Exposure Scale (Legacies of Vietnam)  

**Laufer–Parsons Inventory**  
used “to assess combat guilt” [20794]  

**Law Enforcement Officer Stress Survey (Van Hasselt and Sheehan)**  
"a brief, early warning screening measure of stress among law enforcement officers" [14488]  

**Law Enforcement Response Questionnaire**

USE: Life History Interview (Kienhorst et al)

Life Events and Circumstances Checklist (Work et al)
Work, W C; Parker, G R; Cowen, E L.  The impact of life stressors on childhood adjustment: multiple perspectives.  *Journal of Community Psychology* 18: 73-78.  [01253]
UF: Life Events Checklist (Work et al)

Life Events and Circumstances Scale (Pryor–Brown and Cowen)
"records the number of small and drastic changes in the life of a child that may lead to stress...22 items" [20897]

Life Events and Coping Inventory (Dise-Lewis)

Life Events and Difficulties Schedule (Bifulco et al)
"a semistructured contextual interview and rating system that queries about recent stressful life events and chronic difficulties in several domains" [28959]

Life Events and Experiences Grid (Burgess)

Life Events and Memories Interview (Brewin et al)
"a semistructured interview enquiring about the occurrence of a series of life events and stressors commonly associated with the onset of depression" [20098]
Brewin, C R; Watson, M; McCarthy, S; Hyman, P; Dayson, D.  Intrusive memories and depression in cancer patients.  Submitted for publication, 1996.  [cited in 20098]

Life Events and Social History Questionnaire (Mollica et al)

Life Events and Checkpoint (Johnson and McCutcheon)

Life Events Checkpoint (Kilic and Ulusoy)
a "measure of exposure to potentially traumatic events after an earthquake" [32319]

Life Events Checkpoint (NCPTSD)
"The LEC, a [17-item] measure of exposure to potentially traumatic events, was developed at the National Center for PTSD concurrently with the Clinician Administered PTSD Scale (CAPS) to facilitate the diagnosis of PTSD." [26825]
Life Events Checklist (Work et al)
USE: Life Events and Circumstances Checklist (Work et al)

Life Events Checklist for College Students (Tomoda)
"The LECCS is a 46-item self-report measure of various life events encountered by college students." [35253]

Life Events Follow-Up Interview (Kaloupek and Kutter)

Life Events Interview for Adolescents (Garber and Robinson)
"based on the Life Events and Difficulties Schedule" [37514]

Life Events Inventory (Cochrane and Robertson)
"A revision of the Schedule of Recent Events (Holmes and Rahe)"

Life Events Inventory (Tennant and Andrews)

Life Events Questionnaire (Corcoran and Fischer)
"a 12-item measure of common life events that are often traumatic for people" [28411]

Life Events Questionnaire (Finkelhor)
USE: Sexual Life Events Inventory (Finkelhor)

Life Events Questionnaire (Fridman et al)
"developed for this study...this checklist consists of 18 items describing stressful life events" [35881]

Life Events Questionnaire (Garmezy et al)

Life Events Questionnaire (Horowitz et al)
"The short-form of the LEQ is a 37-item self-report measure of cumulative stress as a result of life events..." [21714]

Life Events Questionnaire (Masten et al)

Life Events Questionnaire (Reiss et al)
"a self-rating questionnaire with 31 questions, measuring if life events have happened or have not happened during a defined time period" [80302]
[used but incorrectly cited in 80302]

Life Events Questionnaire (Solomon and Flum)
"comprised of 23 life events tapping 4 domains: family, work, health, and personal events" [81978]

Life Events Repertory Grid (Sewell and Cromwell)
"a version of the Role Construct Repertory Grid Test" [13281]

Life Events Scale (Amiel-Lebigre)
[used but not cited in 14283]
Life Events Scale (Gil-Rivas et al)

Life Events Scale (Holmes and Rahe)
USE: Social Readjustment Rating Scale (Holmes and Rahe)

Life Events Scale (Kamphuis and Emmelkamp)
"specifically developed for this study" [20302]

Life Events Scale (Kessler et al)
USE: Inventory of Traumatic Stressors (National Comorbidity Survey)

Life Events Scale (Norbeck)
"A modification of the Sarason Life Event instrument [i.e., the Life Experiences Survey]"

Life Events Scale (Plummer)
"a 16-item yes/no form lists objective major events that have occurred in the life of the respondent over the past year" [80138]

Life Events Scale (Sandler and Block)
USE: Life Events Scale for Children (Sandler and Block)

Life Events Scale (Slone and Schechner)
"This 10-item scale [constructed for this study] comprised negative personal and social events to which adolescents could be exposed that participants marked positive or negative for exposure." [32606]

Life Events Scale (Zhang and Yang)

Life Events Scale for Children (Sandler and Block)
A "modified version of Coddington's Life Events Scale for Children"

UF: Life Events Scale (Sandler and Block)
Stressful Life Events Scale for Youth (Sandler and Block)

Life Events Scales (Coddington)
USE: Coddington Life Events Scales (Coddington)

Life Events Survey (Murphy et al)
"12-item scale...developed for the current study measured concurrent life stressors" [25081]
Murphy, S A; Chung, I-J; Johnson, L C. Patterns of mental distress following the violent death of a child and predictors of change over time. *Research in Nursing and Health* 25: 425-437 (2002). [25081]

Life Experience Enrichment Questionnaire (Kaniaisty)
"a Polish questionnaire [that] contains 22 questions based on items from two questionnaires: Stress Related Growth Scale and Post-Traumatic Growth Inventory" [39008]

Life Experience Survey (Boudewyn and Liem)
"an inventory of stressful childhood family events" [09316]

Life Experience Timeline (Hillhouse et al)
"a measure adapted from [Hser et al's] Natural History Interview...assesses substance use history using a month-by-month timeline that links substance use to life events" [40454]
Hillhouse, M; Marinelli-Casey, P; Rawson, R. The LET (Life Experience Timeline): a new instrument for collecting time-anchored natural history data. Poster presented at the 67th annual meeting of the College on Problems of Drug Dependence, Orlando, June 2005. [cited in 40454]

Life Experiences Questionnaire (Bryer et al)
Life Experiences Questionnaire (Gibb et al)

"The LEQ was modeled on Cicchetti’s Child Maltreatment Interview, but is more comprehensive and specific with respect to the events it assesses." [81628]

Life Experiences Questionnaire (Kearns and Calhoun)

"This 25-item self-report questionnaire assesses demographics, family information, and sexual abuse history before the age of 14." [84046]

Life Experiences Questionnaire (Long et al)

"a self-report instrument...that includes questions regarding demographics and childhood sexual experiences and is based on the Past Experiences Questionnaire (Messner et al)" [14738]

Life Experiences Questionnaire (Messner et al)

"The LEQ is a series of items assessing child sexual abuse experience..." [83834]

Life Experiences Questionnaire (Surrey et al)

"The Life Experiences Questionnaire is available from the authors on request." [01192]

Life Experiences Scale
[used but not cited in 90423]

Life Experiences Survey (Knight et al)

"listed 15 events...corresponding to the types of events mentioned in the DSM-IV as exemplars of trauma" [18030]
Knight, J A; Rierdan, J; Meschede, T; Losardo, M L. Stability of life events inventories as measures of potentially-traumatic exposure. Paper presented at the 13th annual meeting of the International Society for Traumatic Stress Studies, Boston, 1997. [cited in 18030]

Life Experiences Survey (Sarason et al)

Life Experiences Survey (Singer et al)

"examines recent (26 items) and past (12 items) violence exposure" [25470]
UF: Past Exposure to Violence Scale (Singer et al)
Recent Exposure to Violence Scale (Singer et al)

Life Goals Inventory (Kemeny)

Life History Calendar (Caspi et al)

Life History Calendar (Dunn et al)
"a visual data collection grid for obtaining reliable retrospective reports about demographic changes and other life events” [26224]

Life History Calendar (Freedman et al)
"This tool is designed to clarify memory and enhance accurate recall." [26224]

Life History Calendar (Williams)
Williams, J K. Williams’ Life History Calendar. Iowa City: University of Iowa, 2007. [cited in 34662]
Life History Interview (Kienhorst et al)
UF: Life Event Time Schedule

Life History of Trauma Checklist
[used but not cited in 91711]

Life History Questionnaire (Burton et al)
[used but not cited in 90972]

Life History Questionnaire (Keefe et al)

Life History Questionnaire (SUNY Brooklyn)
"a self-administered questionnaire consisting of demographic, clinical history, and relationship information that has been developed and utilized as part of the ongoing clinical research protocol at the Anxiety Disorders Clinic" [21229]

Life Line

Life Orientation Inventory (Neumann and Pearlman)
Pearlman, L A; Saakvitne, K W. *Trauma and the Therapist: Countertransference and Vicarious Traumatization in Psychotherapy with Incest Survivors*. New York: Norton, 1995. [12845; the Inventory appears on pp. 410-411]

Life Orientation Survey (Kowalchuck and King)
"Consists of a preliminary screening questionnaire of 30 questions to determine the client's potential suicide risk." [17514]

Life Orientation Test (Scheier and Carver)

Life Pain Questionnaire (Van Korff et al)
"developed by researchers to screen for common chronic pain conditions such as TMD and headaches" [31073]

Life Problem Checklist (Fitzpatrick et al)
"The LPC is a 14-item list, which was constructed for the present study." [36412]
Fitzpatrick, M; Carr, A; Dooley, B A; Flanagan-Howard, R; Tierney, K; White, M; Daly, M; Shevlin, M; Egan, J. Profiles of adult survivors of severe sexual, physical and emotional institutional abuse in Ireland. *Child Abuse Review* 19: 387-404 (2010). [36412]

Life Problems Questionnaire
[used but not cited in 90483]

Life Purpose Questionnaire

Life Regard Index (Battista and Almond)
"The LRI is a 28-item questionnaire...designed to assess the degree to which individuals view their lives within some meaningful perspective [and] to measure the degree to which individuals view themselves as having fulfilled, or being in the process of fulfilling, their framework." [80640]

Life Satisfaction Index (Ferman and Aiken)

Life Satisfaction Index (Goliszek)
"containing 30 questions" [32973]

Life Satisfaction Index (Neugarten et al)
**Life Satisfaction Index (Zeglen)**

**Life Satisfaction Questionnaire**

"a 7-item questionnaire that assesses perceived life satisfaction" [20123]

[used but not cited in 20123]

**Life Satisfaction Questionnaire (Fahrenberg et al)**

USE: Fragebogen zur Lebenszufriedenheit (Fahrenberg et al)

**Life Satisfaction Scale (Abdel-Khalik)**

USE: Face Scale (Abdel-Khalik)

**Life Satisfaction Scale (Andrews)**

"The scale's single question ... assesses satisfaction with life in general." [34665]

**Life Satisfaction Scale (Cantril)**

**Life Satisfaction Scale (Donohue et al)**

**Life Situation Survey**

[used but not cited in 90342]

**Life Skills Profile**

[used but not clearly cited in 27433]

**Life Span Locus of Control Scales**

USE: Nowicki-Strickland Internal-External Control Scale (Nowicki and Duke)

**Life Status Questionnaire (Lambert et al)**

Lambert, M J; Vermeersch, D A; Brown, G S; Burlingham, G M. Administration and Scoring Manual for the LSQ 2.0. Stevenson, Maryland: American Professional Credentialing Services, 2004. [cited in 81653]

**Life Status Review**

[used but not cited in 92879]

**Life Story Interview Method**

[used but not cited in 92091]

**Life Strains and Stress Scale (Pearlin and Schooner)**

UF: Role Strain Scales (Pearlin and Schooner)

Stress in Life Coping Scale (Pearlin and Schooner)

**Life Stress Questionnaire (O'Brien and Iannotti)**

"Items were selected from the Lewis et al Feeling Bad Scale, the Oetting/Beauvais Worry Scale, and the Coddington Life Events Checklist."

**Life Stress Questionnaire (Van Atta)**

"a 52-item device...that permits the assessment of stress symptoms, stress levels, and the causes to which they are attributed" [30200]

Van Atta, R E. Epidemiological data as a lever for system change. Paper presented at annual convention of the American Psychological Association, Chicago, August 1975. [cited in 30200]

**Life Stress Test**

[used but not cited in 92841]

**Life Stressor Checklist (Wolfe and Levin)**

**Life Stressor List (CONNECT)**

CONNECT Study. Components, organization, costs and outcomes of health care and community based interventions for people with posttraumatic stress following war and conflict in the Balkans. [cited to a defunct website in 34713]
Life Stressor Scale for Japanese Adolescents (Hayashi and Imabayashi)
"consisting of 5 main categories that cover a full range of traumatic/stressful events experienced by Japanese adolescents." [81399]

Life Stressors and Social Resources Inventory (Moos and Moos)
"Composed of nine indexes of life stressors and seven indexes of social resources." Moos, R; Moos, B. Life Stressors and Social Resources Inventory Preliminary Manual. Palo Alto, California: Social Ecology Laboratory, Stanford University and Department of Veterans affairs Medical Centers, 1988. [cited in 01959].

Life Style Index (Plutchik et al)

Life Threat and Betrayal Measure (Kelley et al)
"developed for the current study [it] comprises three items measuring the level of injury, perceived life threat, and betrayal associated with the index traumatic event" [86775]

Life-Changing Events Scale (Zieba et al)
USE: Skala Zmian Zyciowych (Zieba et al)

Life-in-Exile Questionnaire
"self-report...was constructed to capture different aspects of the subjects' current life situations" [24887]

Life-Skills Development Scale - Adolescent Form (Darden et al)
"The LSDDS-B is a 65-item self-report measure designed to assess the life skills of youth aged 13 to 20 years in four generic areas: (a) interpersonal communication/human relations skills, (b) problem-solving/decision-making skills; (c) physical fitness/health maintenance skills, and (d) identifying development/purpose-in-life skills." [40672]

Life-Skills Inventory

Life-Style Analysis (Hyer)

Lifeline (Kronik et al)
"an interactive psychological software program...used with IBM-compatible computers" [21748]

Lifestyle and Coping Survey (CASE Study)
"an anonymous self-report questionnaire...used in Oxford for the Child and Adolescent Self-harm in Europe (CASE) survey" [33759]

Lifestyle and Defence Mechanisms Questionnaire (Lamovec et al)
[used but not clearly cited in 33568]

Lifestyle Questionnaire (Marks)
a 4-item questionnaire for assessing psychosocial functioning [19762]

Lifestyle Questionnaire (Read et al)

Lifestyle Questionnaire (Westerink and Giarratano)
"questions on health and lifestyle practices...developed by the authors" [21791]
Lifetime Adversity Measure (Turner and Butler)
"a comprehensive measure that includes 15 nonviolent traumatic events and chronic stressors" [81409; instrument is not named in article; name assigned by PILOTS Database staff]

Lifetime Borderline Symptom Index (Dubo et al)

Lifetime Drinking History (Skinner and Sheu)

Lifetime Experiences Questionnaire (Rose et al)
"This scale consisted of 24 abusive or neglectful behaviors that could have been exhibited by a caregiver, and youth responded yes or no to indicate which they had experienced." [85133]

Lifetime History of Aggression (Brown and Goodwin)

Lifetime Incident of Traumatic Events (Rubin and Greenwald)
"developed for this study" [20763]

Lifetime Involvement in Violent Events Survey (McGruder-Johnson et al)
"The LIVES is organized to assess direct and secondary exposure (witnessing and verbal mediation) to each of 19 events." [15105]

Lifetime Parasuicide History (Linehan and Comtois)
Linehan, M; Comtois, K A. _Lifetime Parasuicide History_. Seattle: University of Washington, 1996.  [cited in 32842]

Lifetime Self-Destructiveness Scale (Zanarini et al)
a semistructured interview

Lifetime Stress Events Questionnaire (Armsworth)
"a 300-item self-report instrument devised to collect quantitative information from participants on frequency, intensity and duration of family stresses and abusive experiences (physical, emotional, sexual and physiological)" [17941]
Armsworth, M W. Lifetime Stress Events Questionnaire, 3rd ed. Unpublished instrument, University of Houston, 1993.  [cited in 17941]

Lifetime Substance Use Recall (Ramsay et al)
"The LSUR is a timeline-based, structured interview designed to derive an estimate of total lifetime intake of alcohol, cannabis, and other substance use during the participant’s lifetime (using year-by-year estimates)." [36639]

Lifetime Trauma and Victimization History (Widom et al)
"this new 30-item instrument assesses a participant’s lifetime trauma and victimization history in the context of a structured in-person interview, using a matrix format for ease of administration and scoring" [19495]

Lifetime Trauma Query (Drescher and Abueg)
"The LTQ is divided into three sections, which permit a chronological assessment of the type, intensity, and frequency of trauma occurring in childhood, adolescence, and adulthood." [08702]
Drescher, K D; Abueg, F R. _Lifetime Trauma Query (LTQ)_ . Palo Alto, California: National Center for PTSD, 1992.  [cited in 08702]

Lifetime Traumatic Events Checklist (University of Regina)
"This was developed by the Anxiety and Illness Behaviours Laboratory at the University of Regina to assess experience with a wide array of potentially traumatic events." [82069]
Lightning Fear Scale (Van Zomeren et al)
"a six point scale...devised especially for this study"

Likelihood of Disclosure Scale (Hoyt et al)
"a series of 10-item questionnaires referring to five disclosure targets” [33933]
Hoyt, T; Pasupathi, M; Smith, B W; Yeater, E A; Kay, V S; Tooley, E. Disclosure of emotional events in groups at risk for posttraumatic stress disorder. International Journal of Stress Management 17: 78-95 (2010). [33933; the Scale appears on p. 95]

Limbic System Checklist-33 (Teicher et al);
"a self-report questionnaire” developed for this study
Teicher, M H; Glod, Carol A; Surrey, J; Swett, C. Early childhood abuse and limbic system ratings in adult psychiatric outpatients. Journal of Neuropsychiatry and Clinical Neurosciences 5: 301-306 (1993). [04558]

Lincoln University Life Preservation Survey
"The LULPS is comprised of items measuring demographic variables, social support, suicidal acceptability, personal happiness, religious affiliation and behavior, individual world view, and self-efficacy.” [85208]
Bah, A; Wilson, C; Fatkin, L; Atkinson, C; Brent, E; Horton, D. Computing the prevalence rate of at-risk individuals for suicide within the Army. Military Medicine 176: 731-742 (2011). [85208; the LULPS appears on pp. 738-740]

Linguistic Inquiry and Word Count (Francis and Pennebaker)
"The LIWC program searched the text files and computed the percentage of words in the following categories: negative emotion, positive emotion, causation, insight, present-tense verbs, past-tense verbs, and death,” [24909]

Linköping Youth Life Experience Scale
"a 41-item questionnaire...identifying experiences of noninterpersonal and interpersonal traumas and adverse childhood circumstances” [35297]

LiSat-11 (Fugl-Meyer et al)

List of Daily Stressors (Ruiz)
"Participants were asked how difficult it was for them to experience 11 aspects of life in prison...” [33375]

List of Life Stressors (Ljubotina et al)
"This instrument was created for the purpose of this study in order to assess relative exposure to traumatic events.” [81824]

List of Stressedness (Gavrilovic et al)
"This list was created for the purpose of this study as a checklist of stressors during air attacks; it consists of 37 items and registers the frequency of the particular event and how upsetting it was at the time...” [05862]

List of Threatening Experiences (Brugha et al)

List of Traumatic Events (Carlier et al)
"a Dutch semistructured interview inquiring about any traumatic experiences participants have had” [19181]

List of Unwanted Sexual Experiences (Golding et al)
"a structured interview schedule based on measures used by Koss and Oros, Kilpatrick and colleagues, Wyatt, Russell, and the Los Angeles and North Carolina Epidemiologic Catchment Area studies and on principles derived from literature reviews... [containing] 20 activity-specific items to assess lifetime sexual abuse history, and [including] additional questions...” [22443]

Lista de Síntomas para el Diagnóstico de TEPT (Pineda et al)
"A rating checklist of 24 symptoms of PTSD was applied by self report.” [26104]
Pineda, D A; Guerrero, O L; Pinilla, M L; Estupiñán, M. Utilidad de un cuestionario para rastreo del estrés postraumático en una población colombiana. Revista de Neurología 34: 911-916 (2002). [26104; the Lista appears on p. 915]
**Liste Kritischer Lebensereignisse**

"This list was newly constructed for this investigation" [24787]

**Liste Traumatischer Expositionsbedingungen (Maercker et al)**

"created especially for this study" [21797]

**Ljestvica Percipirane Socijalne Podrske za Djecu (Arambasic et al)**

USE: Perceived Social Support Scale for Children (Arambasic et al)

**Locus of Control (Wrightsman)**

**Locus of Control of Behaviour (Craig et al)**

**Locus of Control Scale (Brown)**

[cited only as "Brown, 1990" in 90396]

**Loneliness Scale (Asher et al)**

"The LS consists of 24 items that assess children’s feelings of loneliness and social dissatisfaction.” [22671]

**Loneliness Scale (De Jong-Gierveld and Kamphuis)**

**Long-Directed Forgetting Task (Zacks et al)**

**Longevity of Symptoms Scale (Swenson et al)**

"developed for the present study" Swenson, C C; Saylor, C F; Powell, M P; Stokes, S J; Foster, K Y; Belter, R W. Impact of a natural disaster on preschool children: adjustment 14 months after a hurricane. *American Journal of Orthopsychiatry* 66: 122-130 (1996). [07061]

**Longitudinal History for Vietnam Veterans Interview (Bremner et al)**

"designed for the purposes of this study" Bremner, J D; Southwick, S M; Darnell, A; Charney, D S. Chronic PTSD in Vietnam combat veterans: course of illness and substance abuse. *American Journal of Psychiatry* 153: 369-375 (1996). [06849]

**Longitudinal Interval Follow-Up Evaluation (Keller et al)**

UF: LIFE

**Longitudinal Interval Follow-Up Evaluation Range of Impaired Functioning Tool (Leon et al)**

"The LIFE-RIFT is a semi-structured interview assessing functioning in the areas of work, interpersonal relationships, and leisure activities.” [32862]

UF: Range of Impaired Functioning Tool (Leon et al)
LONGSCAN Self-Report of Physical, Sexual, and Psychological Abuse

"This measure comprises three type-specific modules that assess a child’s lifetime experience of abuse using an audio-computer assisted self interview format.” [81617]
Available through the LONGSCAN website <www.iprc.unc.edu/longscan/>. [cited in 81617]

Looming Maladaptive Style Questionnaire (Riskind et al)

"a validated measure of individuals’ tendency to generate mental scenarios of potentially threatening situations that are rapidly rising in risk or intensifying in danger” [26868]

Los Angeles Community Violence Checklist
[used but not cited in 90239]

Los Angeles Symptom Checklist

"a self-report measure of PTSD and general distress” [09344]
UF: Adjustment Problem Checklist (Foy et al)
Problem Checklist (Foy et al)
Symptom Checklist (Foy et al)

Los Angeles Symptom Checklist for Adolescents
[used but not cited in 91444]

Los Angeles Times Sexual Abuse Survey

Loss and Separation Checklist (Day et al)

"asks respondents to indicate whether or not they had experienced 19 particular life events, either as a child or as an adult” [81633]

Loss of Enjoyment of Life - Severity Scale (Terman)

"allows designation of a percentage loss of enjoyment for each year of life that loss is experienced” [07814]

Loss of Face Questionnaire (Zane and Yeh)

"The LOF is a 21-item questionnaire assessing the degree to which participants invest in saving face in interpersonal relations.” [82685]

Loss of Meaning and Control Scale
[used but not cited in 90275]

Loss of Psychosocial Resources Questionnaire

"an 11-item scale based on [Hobfoll’s] Conservation of Resources theory, developed for research on September 11 and generalizable to any type of terrorist attack” [30698]
[used but not cited in 30698]

Loss of Resources Scale (Benight et al)

"consists of 40 items...adapted from the previous research by Freedy et al” [14641]

Loss Processing Scale in a Serious Disease
[used but not cited in 28854]

Loss Questionnaire (Diller)

a 53-item questionnaire developed for this study [91692]
Diller, S E. A phenomenological and heuristic study of the experience of losing one’s entire family by death or abandonment by midlife. Ph.D. dissertation, Claremont Graduate University, 2004. [91692]

Loss Questionnaire (Singh and Raphael)
Loss Questionnaire for Survivors (Bourdon and Cook)

Loss Questionnaire for Therapists (Bourdon and Cook)

LOSS Scale (King et al)
"a measure of late-onset stress symptomatology" [30872]
King, L A; King, D W; Vickers, K; Davison, E H; Spiro, A. Assessing late-onset stress symptomatology among aging male combat veterans. Aging and Mental Health 11: 175-191 (2007). [30872]

Loss/Trauma Questionnaire (Kuiken et al)
"required that participants indicate the most impactful loss or trauma experienced within the last five months, and then to indicate, using a 5-point Likert scale, how well each of 60 statements described their reactions to that event over the last two weeks" [25372]
Kuiken, D; Beards, M; Miall, D; Smith, L. Eye movement desensitization reprocessing facilitates attentional orienting. Imagination, Cognition and Personality 21: 3-20 (2002). [25372]

Louisville Behavior Checklist (Miller)
UF: Louisville Fear Survey Schedule

Louisville Older Persons Event Scale (Murrell et al)

Louisville Social Support Scale (Norris and Murrell)

Love Attitudes Scale (Hendrick and Hendrick)
"42 statements…designed to measure love styles or attitudes" [25683]

Love Deprivation Index (Walsh and Petee)

Love Scale (Levin)
USE: Measure of Feeling Loved by God (Levin)

Low Back Pain Symptom Check List (Leavitt)
USE: Back Pain Classification Scale (Leavitt)

Low Magnitude Stressor Events Structured Interview
"This instrument measured the occurrence of 11 events that were excluded from criterion A [for PTSD] in DSM-III-R...that occurred in the year before assessment." [23642]

Lowenfeld Mosaic Test (Block and Block)

Lowenfeld World Technique (Lowenfeld)
UF: Erica-Method (Sjolund)

Lowenstein Occupational Therapy Cognitive Assessment
Lowlands Acculturation Scale (Mooren et al)

"The [25-item] LAS was developed specifically to measure stressors and affiliations directly related to migration." [28228]

Loyola Generativity Scale (McAdams and De St. Aubin)

LSI-A (Neugarten et al)

Lubben Social Network Scale

Lübeck Alcoholism Screening Test (Rumpf et al)

Lum Emotional Availability Scale (Lum and Phares)

Lung Injury Score (Murray et al)

Luo Functioning Scale (Ertl et al)

"developed for the study" [34436]

Luria-Nebraska Neuropsychological Test Battery (Luria)

Golden, C J; Purisch, A D; Hammek, T A. Manual for the Luria-Nebraska Neuropsychological Battery. Los Angeles: Western Psychological Services, 1980. [apan 147]

Lusher Color Test

Lynfield Obsessive/Compulsive Questionnaires (Allen and Tune)

M-3 Checklist (Gaynes et al)

USE: My Mood Monitor (Gaynes et al)

M&M’s Task (Perner et al)

"a Theory of Mind task" [14580]

M2C-Q

USE: Military to Civilian Questionnaire (Sayer et al)

MAACL

USE: Multiple Affect Adjective Check List (Zuckerman and Lubin)

Maastricht Acute Stress Test (Smeets et al)

a 15-minute "stress induction procedure that combines physical stress with uncontrollability, unpredictability, and mental arithmetic elements to produce reliable subjective and cortisol stress responses" [40437]

Maastricht Questionnaire (Appels)

UF: Maastricht Vragenlijst

Maastricht Vragenlijst

USE: Maastricht Questionnaire (Appels)
MAC Scale
USE: Mental Adjustment to Cancer Scale (Watson et al)

MacArthur Communicative Development Inventory for Infants

MacArthur Community Violence Scale

MacArthur Health and Behavior Questionnaire

MacArthur Scale of Subjective Social Status

MacArthur Story Stem Battery
 "used with preschool-age children to assess emotional processes and representations of self and of relationship figures” [21556]
Bretherton, I; Oppenheim, D; Buchsbaum, H; Emde, R N; MacArthur Narrative Group. MacArthur Story Stem Battery. Unpublished manuscript, 1990. [cited in 21556]

MacArthur Story Stem Battery
UF: Narrative Story-Stem Technique (Bretherton et al)

MacGregor Deformity Scale (MacGregor et al)

Machover Test
USE: Human Figure Drawing (Machover)

MACSCREEN (Mancini et al)
"an Internet-based self-report screening tool for anxiety and depression” [35307]
Mancini, C; Van Ameringen, M; Pipe, B; Oakman, J. Development and validation of self-report psychiatric screening tool: MACSCREEN. Poster presented at 23rd annual conference, Anxiety Disorders Association of America, March 2003. [cited in 35307]

MAGIC
USE: Diagnostic Interview for Children and Adolescents (Herjanic et al)

Magical Ideation Scale (Eckblad and Chapman)
 "assesses belief in unconventional phenomena (e.g., telekinesis, reincarnation)” [29978]

Maintenance of Emotional Separation Scale (Corcoran)
a 7-item self-report scale [30560]

Mainzer Strukturierten Biographischen Anamnese (Egle)

Major Depression Inventory (Bech and Wermuth)

Major Depressive Disorder Scale (Wells)
Wells, A. *Metacognitive Therapy for Anxiety and Depression*. New York: Guilford Press, 2009. [82992; the MDD-S appears on pp. 275-276]

Major Events Inventory (Cuddy and Belicki)
Cuddy, M A; Belicki, K. Nightmare frequency and related sleep disturbance as indicators of a history of sexual abuse. *Dreaming* 2: 15-22 (1992). [07516]

Major Life Events Scale (Wills)
 "22 major life events relevant to adolescents in school” [21570]
Major Stressors Inventory (Australian Defence Force)
"The questionnaire [developed within the ADF] contains 36 items for which the respondent is asked to rate the amount of stress experienced arising from a range of deployment-related sources." [85815]

Malaise Inventory (Rutter et al)
"The inventory contains 24 items that assess the emotional and physical symptoms of stress." [17038]

Male Role Norms Inventory (Levant et al)
"The MNRI consists of [52] true or false questions to assess traditional and nontraditional masculine beliefs." [84144]

Male Role Norms Scale (Thompson and Pleck)
a 26-item "adaptation of the 57-item Brannon Masculinity Scale—Abbreviated Form" [14035]

Malingering Strategy Questionnaire
[used but not cited in 92079]

Maltreatment Case Record Abstraction Instrument (Trickett et al)
"Based on the [Barnett et al] Maltreatment Classification System ... the MCRAI was developed and utilized for this study in order to explicate the children's detailed information on maltreatment." [37572]

Maltreatment Classification System (Barnett and Manly)

Maltreatment Inventory
[used but not cited in 90632]

Maltreatment Questionnaire (Petretic-Jackson et al)

Management of Chronic Illness Scale
"used to assess coping with a chronic illness" [39861]
Lorig, K; Stewart, A; Ritter, P; Gonzalez, V; Laurent, D; Lynch, J. Outcome Measures for Health Education and Other Health Care Interventions. London: Sage, 1996. [cited in 39861]

Manchester Short Assessment of Quality of Life (Priebe et al)

Manchester Triage Priority Scale

Mania Rating Scale (Bech et al)

Manifest Anxiety Questionnaire (Fenz and Epstein)
"assessing autonomic, somatic, and psychosocial symptom reports" [26240]

Manifest Anxiety Scale (Taylor)
UF: Taylor Manifest Anxiety Scale

Manifest Content Early Recollection Scale (Manaster and Perryman)
[used but not cited in 01527]
Manipulation Check Questionnaire (Ehring et al)
"The MCQ consisted of six items..." [32151]

Mannheim Peritonitis Index
[used but not cited in 29651]

Mannheimer Biographisches Inventar (Jager)

Mannheimer Elterninterview (Esser et al)
Esser, G; Blanz, B; Geisel, B; Laucht, M. *Mannheimer Elterninterview.* Weinheim, Germany: Beltz, 1989. [cited in 05837]

Map of Contact Network
USE: Network Contact Map

March of Dimes Protocol of Care

Margolis Pain Diagram
"Location of pain was self-reported and recorded on a drawing outlining a male or a female figure..." [39551]

Marijuana Craving Questionnaire (Heishman et al)
"The MCQ includes 17 items that comprise four analytically derived factors: compulsivity, emotionality, anticipation of positive outcome, and purposefulness." [40449]

Marijuana Motives Measure (Simons et al)
"a 25-item measure on which respondents indicate...the degree to which they have smoked marijuana for a variety of possible reasons" [81124]

Marijuana Problems Scale (Stephens et al)
"The MPS includes 19 items assessing negative social, occupational, physical, and personal consequences associated with cannabis use." [40449]

Marijuana Smoking History Questionnaire (Bonn-Miller and Zvolensky)
"The MSHQ is a self-report instrument...used to assess marijuana smoking use history and pattern." [81124]
Bonn-Miller, M O; Zvolensky, M. The Marijuana Smoking History Questionnaire. Unpublished manuscript, Anxiety and Health Research Laboratory, University of Vermont, 2005.

Marijuana Withdrawal Checklist (Budney et al)
"The MWC includes 31 items measuring the severity of commonly identified cannabis withdrawal symptoms..." [40449]

Marital Adjustment Scale (Locke and Wallace)

Marital Adjustment Scale (Spanier and Cole)

Marital Autonomy and Relatedness Inventory (Schaefer and Edgerton)
"assesses the perception of autonomy and relatedness in marriage" [23271]

Marital Communication Inventory (Bienvenu)
"The MCI is a self-report questionnaire designed to assess communication patterns in marriages and other long-term monogamous relationships." [14738]

Marital Discord Questionnaire (Lauterbach et al)
"Nine questions assessed pathological dimensions of marital functioning." [80696]
Marital Intimacy Questionnaire (Van den Broucke et al)

Marital Patterns Test (Hall-Smith and Ryle)

Marital Problems Index (Jordan et al)

Marital Relationship Perceptions Test (Lantz)

Marital Satisfaction Inventory (Snyder)
Snyder, D K. *Marital Satisfaction Inventory*. Los Angeles: Western Psychological Services, 1979. [cited in 02859]

UF: Conflict Over Child Rearing Scale (Snyder)

Marital Status Inventory (Weiss and Cerreto)

Marital/Significant Other Relationship Checklist (Friedrich)

Markers of Protective Resources in Adulthood (Banyard et al)
"This measure was created for the present study and was based on a similar composite created by Hyman and Williams:" [32202]

Marks and Mathews Fear Questionnaire
USE: Fear Questionnaire (Marks and Mathews)

Marlowe-Crowne Social Desirability Scale
USE: Social Desirability Scale (Crowne and Marlowe)

Marriage Role Expectations Inventory (Dunn and DeBonis)

Martindek-Zaichkowsky Self-Concept Scale
USE: Self-Concept Scale (Martinek and Zaichkowsky)

Masculine Behavior Scale (Snell)
"The MBS is a 20-item self-report scale designed to assess men’s endorsement of traditional masculine behavior." [35232]

Masculine Gender Role Stress Scale (Eisler and Skidmore)

Masculinity Attitudes, Stress, and Conformity Scale (Nabavi and Green)
"The MASC is a 108-item self-report questionnaire [that] examines conformity to masculine norms with 6 subscales..." [86692]
Nabavi, R; Green, R-J. Masculinity Attitudes, Stress, and Conformity Scale (MASC). Unpublished manuscript, California School of Professional Psychology, Alliant International University, 2002. [cited in 86692]

Maslach Burnout Inventory (Maslach and Jackson)
Massachusetts General Hospital Hair Pulling Scale
"The HPS assesses trichotillomania severity in terms of urges, behaviors, resistance, control, and associated distress." [29024]

Massachusetts General Hospital Sexual Functioning Questionnaire
LaBate, L A; Lare, S B. Sexual dysfunction in male psychiatric outpatients: validity of the Massachusetts General Hospital Sexual Functioning Questionnaire. *Psychosurgery and Psychosomatics* 70: 221-225 (2001). [cited in 29658]

Massachusetts Youth Screening Instrument
"The MAYS is a...52-item, true/false, paper-and-pencil screening measure designed for use with adolescent offenders between the ages of 12 and 17." [81624]

Massive Traumatic Loss Scale (Kassabian)
"a structured interview with the [Armenian Genocide] survivor generation" [14191]

Kassabian, A. A three generational study of Armenian family structure as it correlates to Armenian ethnic identity within the context of traumatic loss. Doctoral dissertation, Catholic University of America, 1987. [cited in 14191]

MAST
USE: Michigan Alcoholism Screening Test

Matching Familiar Figures Test (Kagan et al)

Maternal Antenatal Attachment Scale (Condon)
"The MAAS is a [19-item] questionnaire designed to assess the mother's attachment with the unborn child during pregnancy." [80613]

Maternal Attachment Questionnaire (Griffin and Bartholomew)
"Used to assess mothers' and grandparents' current perceptions of their relationships with their own mothers during childhood." [16319]

Maternal Attributions Rating Scale (Schechter)
"a simple measure...consisting of a five-point Likert scale for each dimension: negativity and distortion" [18941]

Maternal Availability Scale (Sullivan et al)
"developed for this study...included 20 items assessing the degree to which mothers were emotionally available to their children" [15300]

Maternal Behaviors Scales (Ainsworth)
"an objective instrument to measure maternal attachment behaviors" [16320]

Maternal Child Interaction Research Project Scales (University of Minnesota)

UF: Mother's Quality of Instruction
Mother's Respect for Child's Autonomy
Mother's Supportive Presence

Maternal Fear of Crime Scale (Linares et al)
"13 items...used to assess how often mothers felt afraid and engaged in instrumental coping" [23467]

Maternal Health Interview (Day and Robles)
Maternal History and Current Functioning Interview (Leifer et al)
"a semistructured interview developed for this study" [16319]

Maternal History Interview (Altemeier et al)
"the interview consists of 15 open-ended questions that ask about childhood memories." [22122]

Maternal Inappropriate and Disorganizing Behavior Scale
"based on earlier coding systems for insensitive and frightening maternal behaviors" [23271]

Maternal Postnatal Attachment Scale (Condon and Corkindale)
"This maternal-rated instrument consists of 19 items that describe the frequency or intensity of a parent’s responses to the infant.” [31606]

Maternal Satisfaction Scale (Copeland)
Copeland, J; Hall, W; Didcott, P; Biggs, V. A comparison of a specialist women’s alcohol and other drug treatment service with two traditional mixed-sex services: client characteristics and treatment outcome. Drug and Alcohol Dependence 32: 81-92 (1993). [08562]

Maternal Self-Report Support Questionnaire (Smith et al)
"The MSSQ is a 14-item questionnaire used to assess current levels of abuse-specific maternal support." [85466]

Smith, D W; Sawyer, G; Jones, L M; Cross, T; McCart, M R; Ralston, M E. Mother reports of maternal support following child sexual abuse: preliminary psychometric data on the Maternal Self-Report Support Questionnaire (MSSQ). Child Abuse and Neglect 34: 784-792 (2010). [cited in 85466]

Maternal Separation Anxiety Scale (Hock et al)

Maternal Social Support Index (Paskoe et al)
Paskoe, J; Ialong, N S; Horn, w; Reinhard, M A; Perradatto, D. The reliability and validity of the Maternal Social Support Index. Family Medicine 20: 271-276 91998). [cited in 08531]

Matrix for the Assessment of Community and Healthcare Services
"[MACSI is] a specific instrument developed within the CONNECT project, designed for registering health care use and a specific and non-specific forms of help in the area of former Yugoslavia after war..." [31610]
[used but not clearly cited in 31610]

Maturity of Motivation Scale (Kishon-Barash et al)
"measures the extent to which the individual is motivated by thoughts that represent differing levels of maturity” [14808]

Maudsley Addiction Profile
"a brief interview-administered questionnaire for treatment outcome research applications” [82553]

Maudsley Marital Questionnaire

Maudsley Obsessive-Compulsive Inventory (Hodgson and Rachman)

Maudsley Personality Inventory (Jensen)

Maudsley Strain Questionnaire (Whittington and Wykes)

UF: Strain Questionnaire (Whittington and Wykes)
Maximally Discriminative Facial Movement Coding System (Izard)
"This scoring system enables a rater to identify the presence of 10 discrete emotional expressions [in infants]" [26813]

Mayo-Portland Adaptability Inventory

Maze Test (Porteus)
UF: Porteus Maze Test

McCarthy Scales of Children’s Abilities (McCarthy)

McDaniel-Piers Young Children’s Self-Concept Scale (McDaniel and Piers)
McDaniel, E; Piers, E. Longitudinal study of elementary school effects: design, instruments, and specifications for a field test; final report. West Lafayette, Indiana: Purdue University Educational Research Center, 1973. [cited in 05217]
UF: Young Children’s Self-Concept Scale

McGill Pain Questionnaire (Melzack)
UF: Pain Questionnaire (Melzack)

McGill Quality of Life Questionnaire
Cohen, S R; Mount, B M; Bruera, E; Provost, M; Rowe, J; Tong, K. Validity of the McGill Quality of Life Questionnaire in the palliative care setting: a multi-centre Canadian study demonstrating the importance of the existential domain. Palliative Medicine 11: 3-20 (1997). [cited in 32219]

McGlashan Outcome Dimensions (McGlashan)

McKnight Risk Factor Survey (Shisslak et al)
"a 103-item self-report instrument that has been used to identify risk and protective factors for the development of eating disturbances in preadolescent and adolescent girls" [22793]

McLean Screening Instrument for Borderline Personality Disorder

McLean Sleep Questionnaire (Chu et al)
"devised by the investigators...asks participants to report on the frequency of difficulty falling asleep, sleep latency, mid-sleep awakenings, and subjective fear associated with sleep onset and mid-sleep awakening" [16334]
Chu, J A; Dill, D L; Murphy, D E. Depressive symptoms and sleep disturbance in adults with histories of childhood abuse. Journal of Trauma and Dissociation 1(3): 87-97 (2000). [16334; the Questionnaire appears on p. 97]

McMaster Family Assessment Device (Epstein et al)

MD Anderson Symptom Inventory
used “to evaluate physical symptoms” [29461]

Me/Not Me Reaction Time Task (Aron et al)
**Meaning - Long Form (Pargament)**

"This is a 20-item, self-report instrument assessing the search for religious or spiritual meaning." [19017]

**Meaning Assessment Scale (Park)**

**Meaning in Life Questionnaire (Steger et al)**

"assessed the participants' ability to construct meaning out of their illness experience” [21976]

**Meaning-Focused Coping Questionnaire (Gan et al)**

"The Meaning-Focused Coping Questionnaire included 26 items within eight dimensions: Changes in Situational Beliefs, Changes in Global Beliefs, Changes in Goals, Meaning Making, Long-Term Prevention Strategies, Rational Use of Resources, Acceptance, and Heuristic Thinking.” [39620]

**Means-End Problem-Solving Procedure (Platt and Spivack)**

"the MEPS task is an index of real-life problem-solving abilities, Participants are presented with the beginning and the end of each problem and need to conceptualise the ideal solution strategy.“ [30631]

**Measure of Adolescent Potential for Suicide**

**Measure of Adolescent Potential for Suicide (Eggert et al)**

**Measure of Alienation (Nettler)**

**Measure of Ambiguity Tolerance (Norton)**

"The MAT is a scale designed to measure the degree to which a person perceives ambiguous situations as threatening or undesirable. It includes 61 items in 8 domains...” [82485]

**Measure of Avoidance Strategies (Boelen)**

"The MAS is a 10-item measure of loss-related avoidance behaviour." [32483]

Boelen, P A. A sense of "unrealness" about the death of a loved-one: an exploratory study of its role in emotional complications among bereaved individuals. Applied Cognitive Psychology, in press.  [cited in 32483]

**Measure of Body Apperception (Carver et al)**

"This measure reflects dependence of self-esteem on physical appearance and on the sense of body integrity, in separate scales.” [28858]

Carver, C S; Pozo-Kaderman, C; Price, A A; Noriega, V; Harris, S D; Derhagopian, R P; et al. Concern about aspects of body image and adjustment to early stage breast cancer. Psychosomatic Medicine 60: 168-174 (1998).  [cited in 28858]

**Measure of Feeling Loved by God (Levin)**

"8 items ask respondents to report the degree to which they feel love toward and from God.” [81956]

UF: Love Scale (Levin)

**Measure of Maternal Ambivalence (Bolen and Lamb)**

"This measure, completed by the nother, was designed to capture the mother's valence toward her partner and child.” [18076]

**Measure of Mundane Meaning (Brown et al)**

"a measure of meaning in life ... capable of capturing loss of personal meaning relative to a previous higher level of functioning” [34342]

Measure of Parental Style (Parker et al)

Measure of Perceived Benefits (Antoni et al)

Measure of Psychologically Abusive Behaviors (Follingstad)

Measure of Wife Abuse (Rodenburg and Fantuzzo)

Measurement of Dissociation Scale
USE: Questionnaire of Experiences of Dissociation (Riley)

Measurement of Empathy in Adult Child Interaction (Stover et al)

Measurement of Mood (Sjöberg et al)

Measurement of Trauma Events Interview (De Arellano et al)

Measures of Natural Intervention (Raphael et al)

Measures of Psychosocial Development (Hawley)

Measuring Life Stress (Holmes and Masuda)

Mechanical Comprehension Test
[used but not cited in 09678]

Media Attentiveness Scale (Maercker and Mehr)
"developed specifically for purposes of the present study" [38656] Maercker, A; Mehr, A. What if victims read a newspaper report about their victimization?: a study on the relationship to PTSD symptoms in crime victims. European Psychologist 11(2): 137-142 (2006). [38656]

Media Exposure Inventory (Ben-Zur et al)
"This instrument was developed for the present study to assess the frequency of use of various media..." [38737] Ben-Zur, H; Gil, S; Shamshins, Y. The relationship between exposure to terror through the media, coping strategies and resources, and distress and secondary traumatization. International Journal of Stress Management 19: 132-150 (2012). [38737]

Media Exposure Questionnaire (Leavitt)

Media Questionnaire (Gleason and Zeanah)
Gleason, M M; Zeanah, C H. The Media Questionnaire. New Orleans: Tulane University, Department of Psychiatry and Neurology, 2004. [cited in 83517]
Medical and Social Needs Questionnaire (Davis et al)
"a 23-item self-report measure developed for this study, assessing the self-perceived importance of a range of social and medical services" [81791]

Medical Coping Modes Questionnaire (Feifel et al)
a 32-item self-report measure measuring confrontation, avoidance, and acceptance-resignation [paraphrased from 08546]

Medical Event Monitoring System
[used "to assess adherence" to medication but not cited in 31303]

Medical Examination and Diagnostics Information Coding System (Rudy et al)
a method designed to quantify the extent of physical findings in chronic pain patients [consisting] of 18 physical examination and medical diagnostic tests [21561]

UF: MEDICS

Medical History Form (Weisberg et al)
"designed for the study" [34279]

Medical History Form II (Sheftner and Endicott)
Sheftner, W; Endicott, J. *Medical History Form II: Revised*. Chicago: Rush Medical Center, 1988. [cited in 07459]

Medical History Questionnaire (Hodge)
"designed...to obtain information regarding participants’ medical history information" [81092]

Medical Intervention Scale (Stone)
"provides a weighted score of women’s self-report of obstetrical procedures" [23446]

Medical Lethality Rating Scale (Beck et al)
"used to measure the degree of medical damage caused by each suicide attempt" [38343]

Medical Outcome Study
USE: MOS Short-Form General Health Survey

Medical Outcomes Study HIV Health Survey (Wu et al)

Medical Outcomes Study Sleep Survey
"This 12-item questionnaire evaluates sleep performance." [35513]

Medical Outcomes Survey
USE: MOS Short-Form General Health Survey

Medical Personnell Stress Survey (Hammer et al)

Medical Problems Questionnaire (Jerram and Coleman)
"comprising 18 items developed for use in a British longitudinal study of aging" [23400]

Medical Psychological Health Questionnaire
[used but not cited in 24558]

Medical Research Council Psycholinguistic Database

Medical Research Council Socio-Demographic Schedule
Mallett, R; Leff, J; Bhugra, D; Pang, D; Zhao, J H. Social environment, ethnicity and schizophrenia. *Social Psychiatry and Psychiatric Epidemiology* 37: 329-335 (2002). [cited in 32153]
Medical Symptom Validity Test (Green)
"The MSVT is a shortened and modified version of the Word Memory Test." [34880]

Medical-Based Emotional Distress Scale (Overholser et al)
"This instrument is developed specifically to assess the type and severity of emotional distress following a physical illness, injury, or disability." [20509]
Overholser, J C; Schubert, D S P; Folari, R; Frost, F. Assessment and emotional distress following a spinal cord injury. Rehabilitation Psychology 38: 187-198 (1993). [cited in 20509]

Medical/Nursing Professional Secondary Stress Self-Awareness Questionnaire (Wicks)

Medication Effects Scale (Davidson et al)

MEDICS
USE: Medical Examination and Diagnostics Information Coding System (Rudy et al)

Mehrabian Achieving Tendency Scale
[used but not cited in 92214]

Mehrabian Somatization Scale
[used but not cited in 92496]

Mehrdimensionale Schmerzskala (Lehrl et al)
"consists of 25 items which refer to one scale about the intensity of pain and six scales for the assessment of quality of pain" [09269]
Lehrl, S; Cziske, R; Blaha, L. Schmerzmessung durch die mehrdimensionale Schmerzskala. Vaterstetten-München: Vless, 1980. [cited in 09269]

Mehrdimensionaler Befindlichkeitsfragebogen (Steyer et al)
"The MDBF is a short, multidimensional, self-evaluative questionnaire that describes the current mood state of an individual on the three dimensions ‘good versus bad mood’, ‘wakefulness versus sleepiness’, and ‘calmness versus restlessness’." [32211]
UF: Multidimensional Mood Questionnaire (Steyer et al)

Mehrfachwahl-Wortschatz-Intelligenztest (Lehrl)
"a vocabulary test to estimate intelligence level" [30505]

Member Process Scale
[used but not cited in 90770]

Memorial Symptom Assessment Scale (Portenoy et al)
"This self-rated instrument questions patients about their experiences of 32 physical symptoms during the previous week." [28767]

Memories and Thoughts Questionnaire (Michael and Ehlers)
"It asks whether the participants had intrusive memories about the picture stories seen in the experiment in the week before the questionnaire was received, in the form of images, feelings, and dreams." [29848]

Memories for Significant Life Events Questionnaire (Butler and Wolfner)
"This questionnaire, adapted from materials developed by Christianson and Loftus and Wessel and Merckelbach, included 18 items that assessed characteristics of participants' memories for their significant positive and negative life events." [15560]

Memories of Childhood Rearing Inventory (Ross et al)
USE: EMBU (Perris et al)

Memories of Childhood Sexual Abuse Interview (Crowley)
[Instrument is not named in text; name assigned by PILOTS Database staff]
"The interview protocol was developed in reference to the clinical case study research on recovered memories of child sexual abuse, employing language associated with reports of recovered memories in those studies." [81071]
Memory Assessment Procedure (Porter et al)
"a tool to examine the qualitative aspects of traumatic memory" [27167]

Memory Assessment Scales (Williams)

Memory Beliefs Scale (Garry et al)

Memory Characteristics Questionnaire (Suengas and Johnson)

Memory Characteristics-Rating Scale (Hagenaars et al)
"a 20-item rating scale that addressed trauma memory features...developed...for the current study" [32853]

Memory Checklist
"a 20-item list consisting of common memory complaint areas" [08101]
[used but not cited in 08101]

Memory Experiences Questionnaire (Sutin and Robins)
"The MEQ provided an assessment of the phenomenological experience of the intrusive memories." [36466]

Memory for Designs Test (Graham and Kendall)
[used but not cited in 02521]

Memory for Fifteen Items Test (Rey)
[used but not cited in 34967]
UF: 15-Item Memory Test (Rey)

Memory Impairment Screen (Buschke et al)
"The MIS is a measure of delayed free- and cued-recall memory..." [38779]
Buschke, H; Kuslansky, G; Katz, M; Stewart, W F; Slivinski, M J; Eckholdt, H M; Lipton, R B. Screening for dementia with the Memory Impairment Screen. *Neurology* 52(2): 231-238 (1999). [cited in 38779]

Memory Integration Processing Questionnaire (Zetsche et al)
"The MIPQ was developed by the authors to evaluate the degree of elaborative, chronologically structured processing of the [study's experimental] film material." [33504]

Memory Interview (Goodman et al)
"consisted of 1 free recall question, 75 detailed questions, 5 affect questions, and a photo identification task designed to assess each child's memory for the social interaction that occurred during [an earlier session]" [24052]

Memory of Traumatic Event Questionnaire (Gil et al)
"a 9-item self-report questionnaire, which was specifically developed for the present study" [27357]

Memory Questionnaire
[used but not cited in 92843]

Menstrual Distress Questionnaire (Moos)
[used but not cited in 90690]
**Menstrual History Questionnaire**

"A 30-item questionnaire designed to elicit menstrual history..." [14854]  
[used but not cited in 14854]

**Menstrual Symptom Severity List (Woods et al)**

"The MSSL is a 51-item checklist that includes both positive and negative experiences." [22423]  

**Mental Adjustment to Cancer Scale (Watson et al)**

Watson, M; Greer, S; Young, J; Inayat, Q; Burgess, C; Robertson, B.  Development of a questionnaire measure of adjustment to cancer: the MAC scale.  *Psychological Medicine* 18: 203-209 (1988).  [cited in 11538 (handbook 525)]

**Mental Contamination Report (Herba and Rachman)**

"This measure asks respondents to rate the degree to which they currently feel dirty and have urges to participate in each of five washing behaviors." [40735]  

**Mental Defeat Questionnaire (Ehlers et al)**

USE:  Semistructured Interview and Rating Manual (Ehlers et al)

**Mental Defeat Scale (Dunmore et al)**

"a self-report questionnaire assessing the perceived loss of all autonomy during the trauma, consisting of 11 items" [35162]  

**Mental Efficiency and Workload Test**

[used but not cited in 31416]

**Mental Health Assessment and Dynamic Referral for Oncology (Boudreaux et al)**

"The MHADRO is a program that conducts a computerized assessment of physical, psychological, and social functioning related to oncology treatment, prints personalized summary reports for both the patient and the provider, and for those who provide consent, faxes a referral and assessment summary report to a matched mental health treatment provider (i.e., dynamic referral)." [84602]  
Boudreaux, E D; O'Hea, E L; Grissom, G; Lord, S; Houseman, J; Grana, G.  Initial Development of the Mental Health Assessment and Dynamic Referral for Oncology (MHADRO).  *Journal of Psychosocial Oncology* 29: 83-102 (2011).  [84602]

**Mental Health Assessment Tool (Grant et al)**

USE:  Florida Secondary Traumatic Stress Scale

**Mental Health Confidence Scale (Carpinello et al)**

"measures psychiatric patients' mental health related self-efficacy beliefs (i.e., optimism, coping, and advocacy)" [29553]  

**Mental Health Continuum (Keyes)**

**Mental Health Effects Scale (Rintamaki et al)**

"Participants...answered questions focused on the short- and long-term psychological effects of the POW experience on their lives." [34144; scale not named in text; name assigned by PILOTS Database staff]  

**Mental Health History Questionnaire (Hodge)**

**Mental Health Inventory (RAND)**

USE:  Mental Health Inventory (Veit and Ware)

**Mental Health Inventory (Veit and Ware)**

"based substantially on the General Well-Being Schedule" of Dupuy  

UF:  Mental Health Inventory (RAND)
Mental Health Inventory-5 (Berwick et al)
"the MHI contains five questions assessing sadness and emotional tension" [19452]
Berwick, D M; Murphy, J M; Goldman, P A; Ware, J E; Barsky, A J; Weinstein, M C. Performance of a five-item mental health screening test. *Medical Care* 29: 169-176 (1991). [cited in 19452]

Mental Health Questionnaire (Bean et al)
Three versions: for guardians, for teacher, and for adolescents

Mental Health Research Institute Unusual Perceptions Schedule
The MUPS "contains 365 items examining many aspects of the voice hearing experience across 7 major sections or modules: physical characteristics, personal characteristics, relationship/emotion, form/content, cognitive processes, perceptions of experience, and psychosocial issues" [33633]

Mental Health Symptom Questionnaire
[used but not cited in 37299]

Mental Illness Awareness Survey (Becker et al)
[used but not cited in 93349]

Mental Imagery Ratings Questionnaire (Martin)
"an unpublished 56-item self-report inventory designed by Maryanne Martin" [09261]

Mental Rotations Test (Vandenberg and Kuse)
a "visual mental imagery" test [31408]

Mental Status Examination (Loewenstein)
UF: Clinical Mental Status Examination for Complex Dissociative Systems
Office Mental Status Examination for Complex Dissociative Systems

Mental Status Index (Myers and Bean)
"This [self-report] instrument consists of 20 items dealing with various types of symptomatic and/or somatic distress such as nervousness, headaches, heart palpitations, excessive drinking, lethargy, and the like." [25556]

Mental Status Questionnaire (Kahn et al)

Mental, Physical, Spiritual Well-Being Scale (Vella-Broderick)
"This is a 30-item scale that measures overall well-being through the incorporation of mental, physical, and spiritual subscales." [80578]

Mentoring Program Feedback Questionnaire (Rosen et al)
Participants indicated how many times they had engaged in 14 specific program activities in the past six months. [39814]
Rosen, C S; Nguyen, T; Bernardy, N C; Hambleton, J L; Ruzek, J I; Friedman, M J. Evaluation of a mentoring program for PTSD clinic managers in the U.S. Department of Veterans Affairs. *Psychiatric Services* 63: 1047-1050 (2012). [39814]

Mesulam Go-No-Go Test
[used but not cited in 92261]

Mesure de Stress Psychologique (Lemyre and Tessier)
"This questionnaire is a measure of the subjective experience of feeling stressed based on 53 affective, cognitive, behavioral, and physical descriptors, on an eight-point Likert-type scale." [18388]
UF: Psychological State of Stress Measure (Lemyre and Tessier)

Meta-Emotion Interview (Katz and Gottman)
[used but not cited in 91623]

Meta-Evaluation Scale (Mayer and Stevens)
Meta-Worry Questionnaire (Wells)
"This questionnaire assesses thoughts and ideas about worrying." [82292]
Wells, A. Metacognitive Therapy for Anxiety and Depression. New York: Guilford Press, 2009. [82992; the Questionnaire appears on p. 264]

Metacognitions Questionnaire (Cartwright-Hatton and Wells)
"This scale measures metacognitive beliefs using 65 items." [26728]

Metacognitive Awareness about Stress and Coping Scale (Delahaij et al)
"This scale was derived from Schraw and Dennison's metacognitive awareness scale for the educational domain." [36131]

Metropolitan Achievement Test (Prescott et al)

MHAT-IV Soldier and Marine Well-Being Survey
"adapted from the Land Combat Study of the Walter Reed Army Institute of Research" [30973]

Miami VAMC Post-Sleep Questionnaire

Michigan Alcoholism Screening Test (Selzer et al)

Mind Reading Emotions Library (Baron-Cohen)
"a software package that includes 412 emotion words" [85890]

Mindful Attention and Awareness Scale (Brown and Ryan)
"The MAAS is a 15-item instrument measuring attention to and awareness of present-moment experience in daily life." [29919]

Mini International Neuropsychiatric Interview (Sheehan et al)

Mini International Neuropsychiatric Interview for Children and Adolescents (Sheehan et al)
[used but not cited in 33544]

MINI Work Anxiety Interview (Linden and Muschalla)
Based on Sheehan's Mini International Neuropsychiatric Interview, "we developed an additional interview kit for the assessment of work-related anxieties [that] targeted panic, situational phobia, social phobia, generalized anxiety, and PTSD in relation to the workplace." [30077]

Mini-Cog (Borson et al)

Mini-DIPS
USE: Diagnostisches Kurz-Inventar bei Psychischen Störungen (Margraf)

Mini-MAC
USE: Mini-Mental Adjustment to Cancer Scale (Watson et al)

Mini-Markers (Saucier)
"a self-report measure based on the Big Five model of personality" [28724]

Mini-Mental Adjustment to Cancer Scale (Watson et al)
"a 29-item self report scale based on the original 40-item version [the Mental Adjustment to Cancer Scale] and is used to assess patients' coping responses to a cancer diagnosis" [20636]
Watson, M; Law, M; Dos Santos, M; Greer, S; Baruch, J; Bliss, J.  The Mini-MAC: further development of the Mental Adjustment to Cancer Scale. Journal of Psychological Oncology 12: 33-46 (1994). [cited in 20636]
UF: Mini-MAC
Mini-Mental State Examination (Folstein et al)

UF: MMSE

Mini-Mult (Kincannon)

Mini-SCID (First et al)
“the computer-administered Mini-Structured Clinical Interview for DSM-III-R” [25972]
First, M B; Gibbon, M; Williams, J B W; Spitzer, R L. *Mini-SCID*. [s.l.]: Multi-Health Systems, 1990. [cited in 25972]

Mini-Sleep Questionnaire (Zomer et al)
“Developed at the Technion Sleep laboratory. The questionnaire is comprised of 10 items tapping both insomnia and excessive daytime sleepiness.” [24888]

Mini-SPIN (Connor et al)
USE: Social Phobia Inventory (Connor et al)

Mini-Structured Clinical Interview for DSM-IV Dissociative Symptoms and Disorders (Steinberg et al)

Minimization Coping Scale (Plutchik and Van Praag)
10 items that “measure the use of minimization as a coping strategy” [mvra 125]

Minimum Data Set (Centers for Medicare and Medicaid Services)
“a mandated, government-developed assessment tool used in almost every nursing home in the United States” [39822]

Minnesota Adolescent Health Survey
Adolescent Health Database Project. *The State of Adolescent Health in Minnesota*. (Principal investigator: Robert W. Blum, University of Minnesota.) [cited in 11372]

Minnesota Borderline Personality Disorder Scale (Bornovalova et al)
The MBPD “consists of the sum of responses to 19 true/false items from the Multidimensional Personality Questionnaire, Brief Form”. [38572]

Minnesota Child Development Inventory (Ireton and Thwing)

Minnesota Code Manual of Electrocardiographic Findings

Minnesota Living with Heart Failure Questionnaire
Minnesota Multiphasic Personality Inventory (Hathaway and McKinley)
Hathaway, S. R.; McKinley, J. C. A multiphasic personality schedule (Minnesota); I: construction of the schedule. *Journal of Psychology* 10: 249-254 (1940) [risg 1:103, which also cites parts II, III, and IV]
Hathaway S R; McKinley J C. *The Minnesota Multiphasic Personality Inventory*. New York: Psychological Corporation, 1943. [harvard]
UF: 
- Barron Ego Strength Scale
- Existential Depression Scale
- Factor 2 Scale (Eichman)
- MMPI
- Repression Scale (Haan)
- Repression-Sensitization Scale (Byrne)
- Welch Anxiety Scale
- Welch Depression Scale

Minnesota Multiphasic Personality Inventory-2 (Butcher et al)
UF: MMPI-2

Minnesota Multiphasic Personality Inventory: Adolescent (Butcher et al)
"a self-administered multiscale objective inventory [of 478 items] developed for the assessment of psychopathology in adolescents" [22986]
Butcher, J N; Williams, C L; Graham, J R; Archer, R P; Tellegen, A; Ben-Porath, Y S; Kaemmer, B. *Minnesota Multiphasic Personality Inventory: Adolescent*. Minneapolis: University of Minnesota, 1992. [cited in 22986]

Minnesota Nicotine Withdrawal Scale
"The MWS is a...7-item self-report scale that was utilized to measure current nicotine withdrawal symptoms." [30979]

Minnesota Paper Form Board (Likert and Quasha)
a "visual mental imagery" test [31408]
Likert, A; Quasha, W H. *Revised Minnesota Paper Form Board Test (Series AA)*. New York: Psychological corporation, 1941. [cited in 31408]

Minnesota Satisfaction Questionnaire (Weiss et al)

Minnesota Sedation Assessment Tool
[used but not clearly cited in 31968]

Minnesota Student Survey
"an anonymous questionnaire...administered to all 6th, 9th, and 12th grade students in Minnesota public schools" [18009]

Minor Injury Severity Scale (Peterson et al)
"The measure uses behaviorally specific and objective parameters to catalog 22 different kinds of injuries." [30224]

MIPG (Abraham)
UF: Model for Exploring Intra- and Interindividual Process in Groups (Abraham)

Mirror-Tracing Task (Quinn et al)
"The task requires participants to use a computer mouse to trace objects on the computer screen as if viewing them through a mirror." [84161]

Miscarriage Experience and Needs Assessment Questionnaire
[used but not cited in 90006]
MISS-10
USE: Mississippi Scale for Combat-Related PTSD [Miss-10] (Hyer et al)
Missile Attack Worry Inventory (Somer et al)

“The MAWI is a 13-item measure in which participants are asked to indicate to what extent a given statement reflects their belief about a particular worry.” [27371]

Missionary Stressful Events Questionnaire (Bagley)

A three-part questionnaire, comprising a demographic section, a modified version of the Traumatic Events questionnaire (Vrana and Lauterbach), and aversion of the PTSD Checklist - Civilian (Weathers et al).

Mississippi Scale for Combat-Related PTSD (Keane et al)

UF: Civilian Mississippi Scale

Mississippi Scale for Combat-Related PTSD [Miss-10] (Hyer et al)

UF: MISS-10

Mississippi Scale for Desert Storm War-Zone Personnel (Keane et al)

"Derived from the Mississippi Scale for Combat-Related PTSD"

Mississippi Trauma Disclosure Survey

[used but not cited in 92078]

Missouri Children’s Behavior Checklist (Sines et al)

Mizes Anorexic Cognitions Questionnaire

[used but not cited in 23790]

MMPI

USE: Minnesota Multiphasic Personality Inventory (Hathaway and McKinley)

MMPI ...

*For scales such as the MMPI K Scale, MMPI Lie Scale, etc.*

USE: Minnesota Multiphasic Personality Inventory (Hathaway and McKinley)

except for dissociation and PTSD subscales, which are listed individually

MMPI Acute PTSD Scale (Gaston et al)

MMPI Chronic PTSD Scale (Gaston et al)

MMPI PTSD Scale

USE: MMPI-PTSD Subscale (Keane et al)

MMPI PTSD Subscale (Schlenger and Kulka)

UF: PS Scale

MMPI PTSD366 Subscale (Tirpak)

MMPI-2

USE: Minnesota Multiphasic Personality Inventory-2 (Butcher et al)

MMPI-2 Infrequency-Posttraumatic Stress Disorder Scale (Elhai et al)

*a new MMPI-2 infrequency scale...created to minimize sensitivity to PTSD-related psychopathology* [25306]

Elhai, J D; Ruggerio, K J; Frueh, B C; Beckham, J C; Gold, P B; Feldman, M E. The Infrequency-Posttraumatic Stress Disorder Scale (Fptsd) for the MMPI-2: development and initial validation with veterans presenting with combat-related PTSD. *Journal of Personality Assessment* 79: 531-549 (2002). [25306]

UF: Infrequency-Posttraumatic Stress Disorder Scale (Elhai et al)
MMPI-2 PTSD Subscale (Keane et al)

MMPI-2 PTSD Subscale (Schlenger and Kulka)
[used but not cited in 09636]

MMPI-Combat Exposure Scale (Penk)
[Unpublished instrument, cited in 00167]

MMPI-Combat Intensity Scale (Penk)
[Unpublished instrument, cited in 00167]

MMPI-PTSD Subscale (Keane et al)

UF: Keane-Fairbank PTSD Subscale
MMPI PTSD Scale
PK Scale

MMSE
USE: Mini-Mental State Examination (Folstein et al)

Mobility Inventory (Ehlers et al)

Mobility Inventory for Agoraphobia (Chambless et al)

MOQ/R
[used (to measure "obsessions and compulsions") but not cited in 31719]

Modality-Specific Imagery Questionnaire (Jelinek et al)
"A new self-rating scale, based on the Creative Imagination Scale, was developed by the authors, specially tailored to the purpose of the present study... The MIQ contains 7 items, each assessing a different sensory quality of mental imagery." [35196]

Model for Exploring Intra- and Interindividual Process in Groups (Abraham)
USE: MIPG (Abraham)

Modern Sexism Scale
[used but not cited in 92229]

Modified Caregiver Strain Index (Thornton and Travis)
"This 13-item questionnaire assesses caregiver strain across the following domains: employment, financial, time, physical, and social." [37946]

Modified Codependency Assessment Criteria
[used but not cited in 90223]

Modified Daily Drinking Questionnaire (Dimeff et al)
"a grid representing the seven days of the week [that] assesses participants’ typical daily alcohol consumption for a typical week during the last six months" [28891]

Modified Depression Scale (Orpinas)
"asks respondents to describe the past 30-day frequency of 5 depressive symptoms" [84934]

Modified Fear Survey (Kilpatrick and Veronen)
Other citations: Kilpatrick and Veronen, [various] [dbat 309]; Resick et al [cited in 03851].

UF: Fear Survey Schedule (Veronen and Kilpatrick)
Veronen-Kilpatrick Fear Survey
Modified Gay Identity Questionnaire
[used but not cited in 92936]

Modified Injury Severity Scale
"The MISS classifies children’s injuries in each of five body areas: neurologic, face and neck, chest, abdomen and pelvic contents, and extremities and pelvic girdle." [21198]

Modified Location Index (Tohen et al)

Modified Means-End Problem-Solving Procedures (Schotte and Clum)
"This scale was…based on the Means-End Problem-Solving Procedure (Platt, Spivack, and Bloom)." [23969]

Modified Memory Questionnaire (Sunderland and Baddely)
"The MMQ is a 35-item measure of subjective memory function." [37274]

Modified Mini Screen
"The MMS is a 22-item pencil and paper instrument that takes about 15 minutes to answer and which screens for mental health problems in 3 areas: mood disorders, anxiety disorders, and psychotic disorders." [85539]

Modified Parenting Attitudes Measure (Lutenbacher and Hall)

Modified Perceived Quality of Life (Patrick et al)

Modified Psychosocial Adversity Scale (Gerring et al)
"modeled after the scale composed by Brown et al…This structured interview elicits eight risk factors related to childhood psychiatric disorder" [24264]

Modified PTSD Symptom Scale (Falsetti et al)

Modified Scale for Suicidal Ideation (Miller et al)

Modified Short Form Health Survey
USE: MOS Short-Form General Health Survey

Modified Treatment Evaluation Inventory (Kelley et al)

Modified Vietnam Experiences Questionnaire (Cooper and Clum)

Modified Vocational Status Index (Tohen et al)

Modified Weekly Self-Help Questionnaire (Weiss and Najavits)

Monash Interview for Liaison Psychiatry

Monetary Incentive Delay Task
[used but not cited in 93336]
Money Road Map
[used but not cited in 25712]

MONICA/KORA Chronic Illness Checklist

Monitoring-Blunting Questionnaire (Muris et al)
"an inventory consisting of 10 hypothetical situations which require a monitoring and blunting score for each using an 11-point scale” [26372]

Monitoring-Blunting Style Scale (Miller)
"a self-report scale designed to assess individual differences in monitoring and blunting processing styles" [20128]

Monitoring-the-Future Questionnaire (Bachman et al)

Monroe Scale (Monroe)

Montgomery-Åsberg Depression Rating Scale (Montgomery and Åsberg)
(Consists of 10 items from the Comprehensive Psychopathological Rating Scale.)

Monthly Health Review (Jenkins et al)
"asks respondents to recall their symptoms during the previous 30 days” [24603]

Montreal Affective Voices (Belin et al)
an auditory counterpart to the Ekman faces used to assess the ability to recognize emotional voices [39445]

Montreal Classification for Esophageal Atresia

Montreal Cognitive Assessment Test

Mood Adjective Check List (Nowlis)
UF: Nowlis Adjective Checklist

Mood and Anxiety Symptoms Questionnaire (Watson et al)
"a 62-item, 5-point scale, which rates symptoms over the last week and discriminates factors that relate to anhedonia, general distress, and anxious arousal” [25689]

Mood and Feelings Questionnaire
[used but not cited in 09820]

Mood and Feelings Questionnaire (Angold et al)
“The MFQ is a 33-item self-report scale that is used to address depression.” [80809]

Mood Clinic Data Questionnaire
Mood Disorder Questionnaire (Hirschfeld et al)
"a 15-item self-report assessment of lifetime bipolar spectrum disorder based on DSM-IV criteria" [31004]

Mood Feeling Questionnaire (Costello and Angold)

Mood Measuring Instrument
"The MMI, which measures anger, fatigue, vigor, tension, and depression, is a combination of the Profile of Mood States and the Amsterdam Mood Questionnaire." [24419]
Marburger, D. [The instruments for the psychologist: part 146, development of the measuring instrument the POMS]. Unpublished manuscript (in Dutch), Faculty of Psychology, University of Amsterdam, 1987. [cited in 24419]

Mood Questionnaire (Holmes et al)

Mood Questionnaire (Zevon and Tellegen)

Mood Scale (Bowler et al)
"a 10-item scale that includes criteria from DSM-IV for the diagnosis of depression and anxiety disorders" [09021]

Mood Scale (Zivic)

UF: Emotion Scale (Zivic)

Mood Spectrum Measure (Fagiolini et al)
USE: Structured Clinical Interview for Mood Spectrum (Fagiolini et al)

Mood Spectrum-Self Report (Dell'Osso et al)
"a questionnaire for the assessment of mood spectrum symptomatology" [32500]

Mooney Problem Checklist
[used but not cited in 07354]

Moral Injury Events Scale (Nash et al)
a 9-item "measure of potentially morally injurious events" [87547]
Nash, W P; Marino Carper, T L; Mills, M A; Au, T; Goldsmith, A; Litz, B T. Psychometric evaluation of the Moral Injury Events Scale. Military Medicine 178: 646-652 (2013). [87547; the MIES appears on pp. 650-651]

Morale Scale (Lawton)
USE: PGC Morale Scale (Lawton)

Morel Emotional Numbing Test (Morel)
"a forced-choice test for detecting response bias in assessments for PTSD" [20162]

Morisky Adherence Score
"self-report tool to assess adherence to medications" [34522]

MOS Cognitive Functioning Scale
"assessed functional neurocognitive health perception" [28689]

MOS Pain Index
MOS Short-Form General Health Survey
Stewart, A L; Hays, R D; Ware, J E. The MOS Short-Form General Health Survey. Medical Care 26: 724-735 (1988). [cited in 04188]
UF:
Medical Outcome Study
Medical Outcomes Survey
Modified Short Form Health Survey
RAND 36-Item Health Survey
SF-36
Short Form Health Survey

MOS Social Support Survey

Most Helpful Aspect of Therapy Form
"provide[s] data about the client’s subjective experience of aspects of therapy" [25184]

Mother Immigration Stress Scale (Short and Johnston)
"10 questions developed for this study that assessed the degree of immigration stress that the family had experienced" [[09398]

Mother Surveys
"included questions about mothers’ mental health, parenting behavior, social support, and demographic information" [93414]
[used but not cited in 93414]

Mother-Child Interaction Scale (Tuteur et al)

Mother-Daughter Relationship Inventory (Lyons-Ruth et al)
"The MDRI was developed for the purposes of this study to assess role-confusion in the mother-daughter relationship..." [37725]
Lyons-Ruth, K; Choi-Kain, L; Pechtel, P; Bertha, E; Gunderson, J. Perceived parental protection and cortisol responses among young females with borderline personality disorder and controls. Psychiatry Research 189: 426-432 (2011). [37725]

Mother-Father-Peer Inventory

Mother’s History of Loss and Harm (Hunter and Everson)
"This scale was developed by LONGSCAN staff to assess caregivers’ history of loss and victimization." [80451]

Mother/Father Support Questionnaire (UNOCCAP Workgroup)
a 10-item measure developed...to assess youth perceptions of parental behaviors” [80278]

Mothers Now Childless Study Participant Questionnaire

Mothers’ Developmental History Questionnaire (Trickett and Everett)
a structured interview protocol developed for the current study” [81420]
Trickett, P K; Everett, B. Mothers’ Developmental History Questionnaire. Unpublished manuscript, 1988. [cited in 81420]

Mothers’ Object Relations Scale (Oates and Gervai)
“This 14-item questionnaire has been developed as a screening tool for identifying potential areas of difficulty in the early mother-infant relationship — in particular, a mother’s working model of attachment.” [31606]

Motivation for Behavior Change Scale (Cautela)
Motivation for Sexual Risk Behavior Questionnaire (Bornavalova et al)
28 items

Motivational Interviewing Treatment Integrity Coding System (Moyers et al)
"The MITI provides two sets of ratings: global ratings of the MI spirit, which represents the characteristics of competent MI clinicians, and counts of MI-related behaviors." [39279]

Motivations for Violence Scale (Swan and Gill)
"developed for this study to assess participants’ motivations for violent or abusive behaviors" [25481]
Swan, S C; Gill, K. The Resource Utilization Questionnaire, Unpublished manuscript, Yale University, 1998. [cited in 25481]

Motives for Smoking Questionnaire (Shiffman)

Motives for Smoking Scale (Russell et al)

Motor Activity Assessment Scale (Devlin et al)

Motor Vehicle Accident Coping Self-Efficacy Scale (Cieslak et al)
"Participants were asked to evaluate their capability to deal with trauma-related demands. The scale consists of 41 items..." [31030]
Cieslak, R; Benight, C C; Caden Lehman, V. Coping self-efficacy mediates the effects of negative cognitions on posttraumatic distress. *Behaviour Research and Therapy* 46: 788-798 (2008). [31030]

Motor Vehicle Accident Follow-Up Interview (Blanchard and Hickling)

Motor Vehicle Accident Interview (Blanchard and Hickling)

Motor Vehicle Accident Scale (Koch et al)
"The 21-item scale assessed individuals’ beliefs about driving-related safety and danger." [22259]

Motor Vehicle-Related Schema Questionnaire (Miller)
"developed as a tool to tap the content of a potential dysfunctional thought process germane to road traffic situations" [91653]

Movie for the Assessment of Social Cognition (Dziobek et al)
"The MASC requires subjects to attribute mental states to movie characters in an everyday life-relevant context." [36956]

Movie-Specific Experience Questionnaire (Carleton et al)
"The MSEQ was a 7-item measure created to assess movie-specific experiences and behaviors associated with viewing a movie containing scary content.” [84135]

MST Therapist Adherence Scale (Letourneau et al)
Letourneau, E J; Sheidow, A J; Schoenwald, S K. *Structure and Reliability of the MST Therapist Adherence Scale in a Large Community Sample*. Charleston: Family Services Research Center, Medical University of South Carolina, 2002. [cited in 18148]
UF: Therapist Adherence Scale (Letourneau et al)

MTBI Screen (Veterans Health Administration)
"This screening questionnaire, which was developed for use in VA medical facilities, contains 4 questions used to identify OEF/OIF veterans who may have MTBI. It is based on a tool developed by the Defense and Veterans Brain Injury Center..." [33319]
Mullen Scales of Early Learning

Multi-Attitude Suicide Tendency Scale (Orbach et al)
"a self-report measure designed to assess four conflicting attitudes relating to life and death: attraction to life, repulsion by life, attraction to death, and repulsion by death" [22783]

Multi-Dimensional Anxiety Scale
[used but not cited in 09820]

Multi-dimensional Pain Inventory (Rudy)
"a 61-item inventory which gathers information regarding the experience of pain and its attendant limitations" [22155]

Multi-Item Measure of Adult Romantic Attachment (Brennan et al)
"This measure was developed using established measures. It includes 36 items that identify style of attachment on a continuum and consists of two 18-item subscales that measure the level of avoidance and anxiety in the romantic relationship." [39049]

Multi-Problem Screening Inventory (Hudson)
UF: Multiple Problem Symptom Inventory (Hudson)

Multi-Self-Esteem Inventory
[used but not cited in 91020]

Multiaxial Assessment of Pain (Turk and Rudy)

MultiCASI (Knaevelsrud and Mueller) USE: Multilingual Computer Assisted Self-Interview (Knaevelsrud and Mueller)

Multidimensional Adolescent Assessment Scale (Hudson)
"The MAAS...assesses adolescent psychosocial functioning in 16 areas. The subscales that comprise the MAAS were derived from...the Multi-Problem Screening Inventory." [18013]

Multidimensional Anger Inventory (Siegel)

Multidimensional Anxiety Scale for Children (March et al)

Multidimensional Assessment of Dissociation (Dell)
"a 247-item, 0-10 Likert scale, self-report instrument with 11 scales that measure dimensions of dissociation and 3 validity scales that measure response set." [16348]

Multidimensional Assessment of Sex and Aggression (Knight and Cerce)
"originally developed to supplement our coding of archival records" [18986]

Multidimensional Body Self Relations Questionnaire (Cash)
"a 69 item scale that assesses attitudes towards three somatic domains of the body: physical appearance, physical fitness, and physical health" [18031]

Multidimensional Coping Inventory (Endler and Parker)
Multidimensional Fatigue Inventory (Smets et al)
"a validated 20-item questionnaire that yields scores on general, physical, and mental fatigue, reduced activity, and reduced motivation" [22751]

Multidimensional Fatigue Symptoms Inventory (Stein et al)
"identifies 5 facets of fatigue" [31083]

Multidimensional Health Assessment Questionnaire
[used but not cited in 40036]

Multidimensional Health Locus of Control Scales (Wallston et al)
SEE ALSO: Health Locus of Control Scale (Wallston et al)

Multidimensional Health Profile (Ruehlman et al)

Multidimensional Internal-External Scale (Ried and Ware)

Multidimensional Inventory of Dissociation (Dell)
"The MID is a 218-item, self-administered, multiscale instrument that comprehensively assesses the phenomenological domain of pathological dissociation and diagnoses the dissociative disorders." [80132]

Multidimensional Loss Scale (Vromans et al)
a 24-item instrument "designed specifically to index Experience of Loss Events and Loss Distress across multiple domains (cultural, social, material, and intrapersonal) relevant to refugee settlement" [38471]

Multidimensional Measure of Children’s Perceptions of Control (Connell)
"a 48-item measure of three dimensions of locus of control: Internal, Powerful Others, Unknown Others" [22876]

Multidimensional Measure of Cultural Identity (Felix-Ortiz et al)

Multidimensional Measure of Emotional Abuse (Murphy et al)
"The measure consists of 28 items and is administered by using the same response format as the Conflict Tactics Scale..." [27372]

Multidimensional Measure of Work-Family Conflict (Carlson et al)

Multidimensional Mood Questionnaire (Steyer et al)
USE: Mehrdimensionaler Befindlichkeitsfragebogen (Steyer at al)

Multidimensional Neglectful Behavior Scale (Straus et al)
"The MNBS is a 40-item, self-report questionnaire designed to elicit reports of four types of neglect in childhood: physical, emotional, supervisory and cognitive." [40119]

Multidimensional Pain Inventory (Kerns et al)
USE: West Haven-Yale Multidimensional Pain Inventory (Kerns et al)
Multidimensional Perfectionism Scale (Frost et al)

Multidimensional Personality Questionnaire (Tellegen)
UF: Absorption Scale (Tellegen)
Differential Personality Questionnaire
Tellegen Absorption Scale

Multidimensional Relationship Questionnaire (Snell et al)

Multidimensional Scale of Perceived Social Support (Zimet et al)

Multidimensional Scales of Perceived Self-Efficacy (Bandura)

Multidimensional Self-Concept Scale (Bracken)
"The MSCS is a 150-item self-report measure...[with] six subscales: social, family, academic, competence, affect, and physical"
Bracken, B A. *Multidimensional Self-Concept Scale*. Austin, Texas; Pro-Ed, 1992. [cited in 80104]

Multidimensional Self-Esteem Inventory (O’Brien and Epstein)

Multidimensional Self-Report Questionnaire of Disease-Related Distress (Van Dongen-Melman et al)
a 125-item questionnaire "originally developed for the assessment of disease-related distress among parents of childhood patients with cancer" [26855]

Multidimensional Sex Role Inventory (Bernard)

Multidimensional Sexual Self-Concept Questionnaire (Snell)

Multidimensional Sexuality Questionnaire (Snell et al) "the MSQ is a 60-item self-report instrument designed to measure 12 aspects of human sexuality" [19881]

Multidimensional Social Support Scale (Winefield et al)

Multidimensional Social Transgression Scale (Florian and Mikulincer)

Multidimensional Trauma Recovery and Resiliency Interview

Multidimensional Trauma Recovery and Resiliency Scale "a 135-item observer-rated Likert type questionnaire" [17696]
Harvey, M R; Liang, B; Harney, P A; Koenen, K; Tummala-Narra, P; Lebowitz, L. A multidimensional approach to the assessment of trauma impact, recovery and resiliency: initial psychometric findings. *Journal of Aggression, Maltreatment and Trauma* 6(2): 87-109 (2003). [17696]
Multidimensional-Multiattributional Causality Scales (Lefcourt)

Multifactor Leadership Questionnaire
[used but not cited in 92096]

Multigenerational Interconnectedness Scale (Gavazzi and Sabatelli)
Gavazzi, S U; Sabatelli, S M. Assessing levels of individuation through multigenerational interconnectedness. Paper presented at the annual meeting of the National Council on Family Relations, Atlanta, 1987. [cited in 07078]

Multigroup Ethnic Identity Measure (Phinney)
"an objective 20-item acculturation measure" [27620]

Multilevel Assessment Instrument (Lawton et al)

Multilingual Aphasia Examination
[used but not cited in 08993]

Multilingual Computer Assisted Self-Interview (Knaevelsrud and Mueller)
UF: MultiCASI (Knaevelsrud and Mueller)

Multimodal Life History Questionnaire (Lazarus)

Multiphasic Assessment of Cultural Constructs
[used but not cited in 92440]

Multiphasic Sex Inventory (Nichols and Malinder)
"a self-report questionnaire which consists of statements about sexual activities, problems, and experiences" [22200]

Multiple Affect Adjective Check List (Zuckerman and Lubin)
UF: MAACL

Multiple Choice Questionnaire (Phipps et al)
"this 15-item questionnaire was specifically designed to test knowledge of information relevant to an understanding of psychological trauma and the delivery of OATC [Orienting Approach to Trauma Counselling]." [80580]
Phipps, A B; Byrne, M K; Deane, F P. Can volunteer counsellors help prevent psychological trauma?: a preliminary communication on volunteers skill using the Orienting Approach to Trauma Counselling. Stress and Health 23: 15-21 (2007). [80580]

Multiple Discrimination Scale (Bogart et al)
"Participants were asked whether they experienced 10 different discrimination events in the past year, with response options ‘yes’ and ‘no’." [37205]

Multiple Forms of Violence Scale (Ho and Cheung)
"The MFVS is a 48-item self-report scale, listing violent incidents that an adolescent in Hong Kong might experience in a lifetime." [83909]
Ho, M Y; Cheung, F M. Multiple Forms of Violence Scale. Department of Psychology, Chinese University of Hong Kong, 2008. [cited in 83909]

Multiple Problem Symptom Inventory (Hudson)
USE: Multi-Problem Screening Inventory (Hudson)

Multiple Scales of Social Support (Morgan)

Multiple Sclerosis Impact Scale (Hobart et al)
"The MSIS is a 29-item measure used to assess the impact of MS on day-to-day life." [39456]
Multiple Sleep Latency Test (Carskadon et al)
Carskadon, M; Dement, W D; Miller, M M; Roth, T; Westbrook, P R; Keenan, S. Guidelines for the Multiple Sleep Latency Test (MSLT): a standard measure of sleepiness. Sleep 9: 519-524 (1986). [cited in 06345]

Multiscale Dissociation Inventory (Briere)
"a self-report inventory that taps into 6 different domains of dissociation" [17222]
Briere, J. Multiscale Dissociation Inventory. Odessa, Florida: Psychological Assessment Resources, in press. [cited in 17222]

Multiscore Depression Inventory (Berndt)
Berndt, D J. Multiscore Depression Inventory. Los Angeles: Western Psychological Services, 1986. [cited in 06165]

Multiscore Depression Inventory for Children (Berndt and Kaiser)
"The MDI-C, a 79-item self-report inventory measures a child's depression, involving anxiety, self-esteem, sad mood, instrumental helplessness, social introversion, low energy, pessimism, defiance, and suicide risk." [35075]

Multitest CMI
USE: Cutaneous Cell-Mediated Immunity Multitest (Institut Mérieux)

Multivariate Apnea Prediction Index (MAPI) (Maislin et al)

Münchener Ereignisliste (Maier-Diewald et al)

MVA Severity Interview (Karl)
"This interview...contains 43 questions about the course of the motor vehicle accident, injuries, material damage, experienced fear, and loss of control." [82157]

MVA Survey (Donahue)
"prepared for this study" [92034]

MVA-Related Phobic Travel Anxiety Scale (Hamanaka et al)
"For this study, we developed a four-grade scale to evaluate MVA-related phobic travel anxiety." [28503]

MVC-Behavioral Avoidance Test
[used but not cited in 92029]

My Exposure to Violence (Buka et al)

My Family and Friends (Reid and Landesman)
"an interview procedure designed to measure the perception of a child or young adolescent of existing social support" [20024]

My Feelings About the Abuse Questionnaire (Feiring et al)

My Future Scale
[used but not cited in 90140]

My Mood Monitor (Gaynes et al)
"a new, 1-page, patient-rated, 27-item tool developed to screen for multiple psychiatric disorders in primary care" [34395]
UF: M-3 Checklist (Gaynes et al)

My Worst Experience Scales (Hyman et al)
"used to identify stress response in children and adolescents" [83313]
Hyman, I; Berna, J; Snook, P; Ducette, J; Kohr, M. Manual for the My Worst Experience Scales (MWES). Los Angeles: Western Psychological Services, 2002. [cited in 83313]

My Worst Experience Survey

My Worst School Experience
[used but not cited in 90860]

Myers-Briggs Type Indicator

Mysticism Scale (Hood)

N-Back Working Memory Task
Callicott, J H; Ramsey, N F; Tallent, K; Bertolino, A; Knable, M B; Coppola, R; Goldberg, T; Van Gelderen, P; Mattay, V S; Frank, J A; Moonen, C T; Weinerberger, D R. Functional magnetic resonance imaging brain mapping in psychiatry: methodological issues illustrated in a study of working memory in schizophrenia. Neuropsychopharmacology 18: 186-196 (1998). [cited in 32993]

Nachtelijke Intrusie na Traumatische Ervaringen
USE: Nocturnal Intrusions After Traumatic Events Questionnaire (Schreuder et al)

Nagi Disability Scale (Nagi)
Nakivale Event Checklist (Neuner et al)
"a checklist especially developed for the assessment of traumatization in survivors of the Rwandese genocide" [32150]
Neuner, F; Schauer, M; Karunakara, U K; Klaschik, C; Robert, C; Elbert, T. Psychological trauma and evidence for enhanced vulnerability for posttraumatic stress disorder through previous trauma among West Nile refugees. BMC Psychiatry 4: 34 (2004). [cited in 32150]

Narcissism Inventory (Dencke and Hilgenstock)
USE: Narzissmusinventar (Dencke and Hilgenstock)

Narcissistic Personality Inventory
[used but not cited in 91208]

Narcissistic Vulnerability Scale (Bachar et al)
"This scale was developed for the purpose of the present study. It consists of 48 items: 8 for grandiosity, 11 for exploitation, 14 for the self-esteem regulation, and 2 for idealization subscales. 13 additional items do not relate to the concept of narcissistic vulnerability..." [27940]

Narrative Coherence Coding Scheme
"The NACCS was developed to provide a standard measure of the narrative coherence of essays that cold be used across laboratories." [34723]

Narrative Memory Test (Jelinek et al)
"measures both content memory and sequence memory performance in free recall and recognition" [32253]

Narrative Questionnaire (Tuval-Mashiach et al)
"composed of 9 questions [addressing] coherence and continuity, meaning, and self-evaluation" [27739]
Tuval-Mashiach, R; Freedman, S; Bargai, N; Boker, R; Hader, H; Shalev, A Y. Coping with trauma: narrative and cognitive perspectives. Psychiatry 67: 280-293 (2004). [27739; the Questionnaire appears on p. 284]

Narrative Story-Stem Technique (Bretherton et al)
USE: MacArthur Story Stem Battery

Narzissmusinventar (Dencke and Hilgenstock)
UF: Narcissism Inventory (Dencke and Hilgenstock)

National Adult Reading Test (Nelson)

National Advisory Committee for Aeronautics Score
"Originally developed in the US for the triage of injured soldiers, this instrument is now widely used to describe illness and injury severity in pre-hospital emergency situations in Switzerland, Austria, and Germany." [37018]
[used but not usefully cited in 37018]

National Alliance for Caregiving and the American Association of Retired Persons Survey

National Anxiety Disorders Screening Day Questionnaire

National Attachment Scale (Sidanius et al)
"a 21-item questionnaire [with] 4 dimensions: nationalism, patriotism, attachment to place, and concern for co-nationals" [87397]

National Center for Veterans Studies Survey
a 34-item survey

National College Health Risk Behavior Survey

National Crime Victimization Survey
National Eye Institute Visual Function Questionnaire
    a 25-item "measure of visual quality of life" [39069]

National Health and Nutrition Examination Survey

National Health and Social Life Survey Questionnaire

National Health Interview Survey

National Health Survey of Gulf War Era Veterans and their Families
    "The VA initiated a survey...designed as a cross-sectional study in which health factors of a population-based sample of 15,000 troops deployed into the Persian Gulf area are compared with those of 15,000 troops not deployed in the Persian Gulf area." [Kang et al]

National HIV Behavioral Surveillance System

National Household Survey of Drug Abuse (NIDA)

National Latino and Asian American Study Instrument
    "The NLAAS estimates the lifetime and 12-month prevalence of psychiatric disorders and use of mental health services, and explores psychosocial factors associated with psychiatric disorders and use of mental health services." [39498]

National Longitudinal Study of Youth

**NPV**
Nederlandse PTSS-zelfbeoordelingsschaal (Hovens et al)
USE: Dutch PTSD Scale (Hovens et al)

Need for Cognition Scale (Cacioppo and Petty)

Need Importance Inventory (Sheldon et al)
"a 30-item descriptive inventory [that] requires participants to rate the relative salience of the presence or absence of 10 needs (3 for each need) in defining their recollection of motivationally significant (satisfying vs. distressing) events" [39685]

Need Satisfaction in Relationship Scale (La Guardia et al)
"The NSRS is a self-reported questionnaire that uses 7-point scales to assess the degree to which a person experiences basic need satisfaction while relating to a caregiver." [34960]

Negative Acts Questionnaire (Einarsen et al)

Need Satisfaction in Relationship Scale (La Guardia et al)

Negative Aspects Questionnaire (Einarsen et al)

Negative Affect Self-Statement Questionnaire (Ronan et al)
"NASSQ is a self-report questionnaire designed to assess self-statements related to negative affect in children aged 7 to 15 years." [17243]

Negative Appraisals of Sexual Abuse Scale (Spaccarelli)

Negative Aspects of Peacekeeping Scale (Maguen et al)
"This scale was composed of 17 items, which measured the extent to which participants found peacekeeping duties and issues related to the mission in Kosovo difficult or frustrating" [26748]

Negative Aspects of the Somalia Peacekeeping Experience (Litz et al)
"This 13-item measure assessed stressful events and circumstances that occurred during the peacekeeping mission to Somalia that might have created a sense of personal discomfort or distress but that did not constitute an imminent threat to life." [28652]
Litz, B T; King, L A; King, D W; Orsillo, S M; Friedman, M J. Warriors as peacekeepers: features of the Somalia experience and PTSD. Journal of Consulting and Clinical Psychology 65: 1001-1010 (1997). [09930]

Negative Childhood Life Events Scale (Horesh et al)
[not named in source article; instrument name assigned by PILOTS Database staff]
Negative childhood life events were assessed using a 9-item self-report scale especially devised for the present study." [34993]
Horesh, D; Solomon, Z; Zerach, G; Ein-Dor, T. Delayed-onset PTSD among war veterans: the role of life events throughout the life cycle. Social Psychiatry And Psychiatric Epidemiology (2010; DOI: 10.1007/s00127-010-0255-6). [34993]

Negative Cognitions about the World
[used but not cited in 91260]

Negative Coping Checklist (Unger et al)

Negative Emotionality Measure
"This measure is a 30-item true-false self-report questionnaire that assesses the degree to which individuals feel negative emotions." [37672]

Negative Emotions Scale (Pole et al)
"Participants rated how much they experienced six negative emotions (anxiety, fear, sadness, anger, guilt, and disgust)...using an 11-point scale" [19889]
Pole, N; Cumberbatch, E; Taylor, W M; Metzler, T J; Marmar, C R; Neylan, T C. Comparisons between high and low peritraumatic dissociators in cardiovascular and emotional activity while remembering trauma. Journal of Trauma and Dissociation 6(4): 51-67 (2005). [19889]
Negative Life Experiences Questionnaire (used but not cited in 37642)

Negative Impact of War on Adolescents (Hardin et al)

Neuroticism, Extroversion, Openness Personality Inventory

NEO-PI
USE: NEO Personality Inventory (Costa and McCrae)

Neonatal Behavioral Assessment Scale (Brazelton)
Neonatal Index of Parental Satisfaction (Mitchell-DiCenso et al)
"a 27-item self-report questionnaire" [28559]

Neonatal Therapeutic Intervention Scoring System (Gray et al)
"relates treatment intensity and complexity to illness severity" [83880]

Neosexism Scale (Tougas et al)
11 items

NEPEC PTSD Scale

NEPSY (Korkman et al)
"a standardized neuropsychological assessment instrument developed for use with children aged 3- to 12-years-old" [80447]

Nervios Scale (Hinton et al)
3 items used to assess "the severity of nervios and ataque de nervios in the last month" [36143]

NES Reaction Time Measures
[used but not cited in 23462]

NESARC PTSD Module
The PTSD module in NESARC is closely modeled on the National Institute of Mental Health’s Diagnostic Interview Schedule and the world Health Organization Composite International Diagnostic Interview. [38787]
[used but not clearly cited in 38787]

Network Analysis Profile (Sokolovsky and Cohen)
"generated variables concerning network, size, intimacy, reliability of contacts, advice giving, and material support" [29198]

Network Contact Map
"includes contact and satisfaction with persons in close environment" [34193]

UF: Map of Contact Network

Network of Relationships Inventory (Burmeister)

Network Orientation Scale (Vaux)

Neurobehavioral Cognitive Status Examination (Kiernan et al)

Neurobehavioral Evaluation System

Neurobehavioral Functioning Inventory (Kreutzer et al)
"a 76-item self-report inventory defining problems currently experienced by persons with neurological injury" [26900]
Kreutzer, J; Seel, R; Marwitz, J. *Neurobehavioral Functioning Inventory*. San Antonio: Harcourt Brace, 1999. [cited in 26900]

Neurobehavioral Symptom Inventory (Cicerone and Kalmar)
"The NSI is a 22-item self-report measure that asks individuals to rate their difficulties with a variety of symptoms." [33051]

Neurobehavioural Rating Scale (Levin et al)
Neurocognition Deployment Health Study Neuropsychological Battery
"The NDHS Neuropsychological Battery was designed to optimise sensitivity to more general potential deployment exposures (for example neurotoxicants, stress).”  [39088]
Vasterling, J J; Proctor, S P; Amoroso, P; Kane, R; Heeren, T; White, R F. Neuropsychological outcomes of army personnel following deployment to the Iraq war.  *Journal of the American Medical Association* 296: 519-529 (2006).  [28689; cited in 39088]

Neurocognitive Deficits Checklist (King et al)
"A 27-item measure of neurocognitive deficits was...created for this study.”  [28922; instrument not named in text; name assigned by PILOTS Database staff]

Neurodevelopmental History and Temporolimbic Interview (McLean Study of Adult Development)

Neuropsychiatric Evaluation Sheet (Schwab)

Neuropsychiatric Inventory (Cummings et al)
"The NPI...a widely used tool for assessment of behavioral disturbances in neurologic patients...is based on a structured interview with a caregiver and evaluates the severity and frequency of psychopathology along different dimensions.”  [37186]
Cummings, J L; Mega, M; Gray, K; Rosenberg-Thompson, S; Carusi, D A; Gornbein, J. The Neuropsychiatric Inventory: comprehensive assessment of psychopathology in dementia. *Neurology* 44: 2308-2314 (1994).  [cited in 37186]

Neuropsychiatry Unit Cognitive Assessment Tool (Walterfang et al)
"The NUCOG tests cognitive functions in five main areas: attention, memory, executive functioning, language, and visuoconstructional function, utilizing a number of tests in each domain.”  [38966]

Neuropsychological Assessment Battery (White and Stern)

Neuropsychological Deficit Scale (Reitan)
Reitan, R M. *Neuropsychological Deficit Scale for Adults*. Tucson: Reitan Neuropsychology laboratory, 1993.  [cited in 09457]
UF: General Neuropsychological Deficit Scale
Left and Right Neuropsychological Deficit Scales

Neuropsychological Symptom Checklist
[used but not cited in 26746]

Neuropsychological Test Battery (Halstead)
USE: Halstead-Reitan Neuropsychology Battery (Halstead and Reitan)

Neuroticism Scale (Eysenck)
This is a scale of the EPI or EPQ (?)

Neuroticism, Extroversion, Openness Personality Inventory
USE: NEO Personality Inventory (Costa and McCrae)

Neurotoxic Anxiety Scale (Bowler et al)
"contains 18 true/false items selected...from the MMPI-2”  [09021]

Neutral Objects Satisfaction Questionnaire (Weitz)

New Holocaust Survivor Parenting Questionnaire (Kellerman)
"This questionnaire includes 30 items examining perceived parenthood in four areas: transmission of trauma, affection, punishing, and overinvolvement.”  [40175]
New Injury Severity Score (Osler et al)
The NSS is a modification of the ISS, and is defined as the sum of squares of the three highest AIS scores, regardless of body region. [33833]

New Manning System Field Evaluation Study

New Mexico Refugee Health Symptom Checklist-121 (Hollifield et al)

New Mexico Refugee Symptom Checklist
"The NMRSCL has 67 symptom items organized into 15 composite scales [and] is being developed into symptom scale health outcome measures for refugees." [28084]
Hollifield, M; Eckert, V; Warner, T D; Jenkins, J H; Krakow, B; Ruiz, J; Westermeyer, J J. Development of an inventory for measuring war-related events in refugees. Comprehensive Psychiatry 46: 67-80 (2005). [28084]

New York Assessment Instrument for Women (Miller et al)

New York High Risk Study Family Interview

New York PTSD Risk Score (Boscarino et al)
"A brief PTSD screening instrument that is useful in clinical practice, similar to the Framingham Risk Score used in cardiovascular medicine" [36785]

Newcastle Child and Family Recent Life Events Schedule (Goodyer et al)

Newcastle Rating Scales for Depression (Roth et al)

Newcastle-Ottawa Quality Assessment Scale
"This scale consists of 8 questions" [32876]
Wells, G A S B; O’Connell, D; Peterson, J; et al. the Newcastle-Ottawa Scale (NOS) for assessing the quality of nonrandomized studies in meta-analyses. [Web citation only provided in 32876]

NICHD Investigative Interview Protocol
[used but not clearly cited in 37961]

NICU Medical Severity Rating (Lefkowitz et al)
"A 6-item rating scale of infant physiological risk and intensity of medical intervention was developed based on the extant literature on determinants of infant morbidity and mortality in the NICU." [36389]

NICU Parental Beliefs Scale (Melniky et al)
"consists of 18 items that assess parents' beliefs about preterm infants and their confidence in their parenting role" [32920]

Nightmare Content Interview
[used but not cited in 31418]

Nightmare Distress Questionnaire
"The NDQ includes 13 items rated on a 5-point scale to assess the degree of distress attributed to nightmares by nightmare sufferers." [23290]
Nightmare Effects Survey (Krakow et al)
“assesses psychosocial impairment attributed to nightmares...consists of 11 self-report questions” [15539]

Nightmare Frequency Questionnaire (Krakow et al)
“a self-report questionnaire that retrospectively assesses nightmare frequency as a continuous variable” [15539]

Nightmare Intervention and Treatment Evaluation Scale (Donovan et al)
“a [32-item] self-report instrument developed to assess nightmare distress among those diagnosed with PTSD” [19450]
Donovan, B S; Padin-Rivera, E; Chapman, H; Strauss, M; Murray, M. Development of the Nightmare Intervention and Treatment Evaluation (NITE) Scale. *Journal of Trauma Practice* 3(3): 47-68 (2004). [19450; the Scale appears on pp. 64-68]

Nightmare Scale (Fahr)
“to measure intensity of distress caused by nightmares and frequency of nightmares” [91693]

Nightmare/Sleep History Questionnaire (Cuddy and Belicki)
Cuddy, M A; Belicki, K. Nightmare frequency and related sleep disturbance as indicators of a history of sexual abuse. *Dreaming* 2: 15-22 (1992). [07516]

NIH Stroke Scale
[used but not cited in 29062]

NIMH Diagnostic Interview Schedule for DSM-IV (Robins et al)
Robins, L N; Cottler, L; Bucholz, K; Compton, W. *Diagnostic Interview Schedule for DSM-IV*. St. Louis: Washington University, 1995. [cited in 09248]

NIMH Diagnostic Interview Schedule Homeless Supplement (North and Smith)
“the Homeless Supplement, which included questions about the homeless experience and recent life events, was designed for this study.” [03372]

NIMH Diagnostic Interview Schedule PTSD Supplement (Robins and Hough)
[used but not cited in 04377]

NIMH Life Chart Method (Leverich and Post)

NIMH Self-Rating Scale (Van Kammen and Murphy)

NimStim Face Stimulus Set (Tottenham et al)
“a standardized stimulus set of actors displaying emotional expressions” [82700]
Tottenham, N; Tanaka, J W; Leon, A C; McCary, T; Nurse, M; Hare, T A; et al. The NimStim set of facial expressions: judgments from untrained research participants. *Psychiatry Research*, in press. [cited in 82700]

Nine Equivalents of Nursing Manpower Use Score (Reis et al)
Nine Hole Peg Test
[used but not cited in 93823]

Nocturnal Intrusions After Traumatic Events Interview (Schreuder et al)
a 38-item scale "compiled for this study" [15151]
UF: Nachtelijke Intrusie na Traumatische Ervaringen

Nocturnal Intrusions After Traumatic Events Questionnaire (Schreuder et al)

Nonreligious Coping with Events Scale (Abu-Raiya et al)
"A 12-item scale was developed for the purpose of the study." [39231]

Nonspecific Distress Scale (Kessler et al)
a 10-item, 30-day global distress scale [81281]
Kessler, R C; Andrews, G; Colpe, L J; Hiripi, E; Mroczek, D K; Normand, S T; et al. Short screening scales to monitor population prevalences and trends in nonspecific psychological distress. Psychological Medicine 32: 959-976 (2002). [cited in 81281]

Nonverbal Selective Reminding Test (Fletcher)
"The NVSRT measured consistent long-term retrieval of the spatial location for 8 dots over 8 trials followed by a 30-minute delayed recall." [34887]

Nonverbal Signs of Warding-Off Behavior Manual (Horowitz et al)

Norbeck Social Support Questionnaire (Norbeck et al)
"yields a list of significant people in the respondent's life, a length of association and availability, and degree to which each person provides positive affect, affirmation, and aid" [22712]

Normative Adaptive Behavior Checklist (Adams)
"a 120-item scale that measures a child's performance of skills relevant to independent living" [30884]

Normative Beliefs About Aggression Scale (Huesmann and Guerra)
"a 20-item scale used to assess individuals' beliefs about the acceptability of aggressive responses" [07785]
Huesmann, L R; Guerra, N G. Children's normative beliefs about aggression and aggressive behavior. Manuscript submitted for publication, 1994. [cited in 07785]

North American Adult Reading Test (Blair and Spreen)

North Carolina Dissociation Index (Mann)
"a new, empirically derived scale comprised of items from the MMPI-2" [30884]

Northampton PTSD Coping Inventory
"a 35-item measure designed to assess the coping skills taught at a Veterans Affairs Medical Center Specialized Inpatient PTSD Unit (SIPU)" [91566]
[used but not cited in 91566]

Northeast Program Evaluation Center Survey

NorVold Abuse Questionnaire
"The 8-part NorAQ was developed for a Nordic study on gender violence and ill-health." [34519]
Wijma, B; Schei, B; Swahnberg, K. NorAQ: the NorVold Abuse Questionnaire (Report No. 2). Linköping, Sweden: Division of Gender and Medicine, Faculty of Health Sciences, Linköping University, 2004. [cited in 34519]

Norwegian National Client Assessment Form
"consists of 37 questions...covering sociodemographic characteristics, substance abuse, and questions about psychiatric and physical health" [09567]
[used but not cited in 09567]
NOSIE-30
USE: Nurses' Observation Scale for Inpatient Evaluation (Honigfeld et al)

Nottingham Emotional Intelligence Scale (Hunt and Evans)
a single-factor 18-item scale [26372]
[used but not cited in 26372]

Nottingham Health Profile (Hunt et al)
"A measure of perception of health...The scale consists of two parts: Part I includes 38 items relating to six dimensions of functioning: energy, pain, emotional reactions, sleep, social isolation, and physical mobility....Part II relates to the seven areas of task performance in daily activities most affected by health conditions" [18854]

Nottingham Pain Profile (Hunt et al)
Hunt, S M; McEwan, J; McKenna, S P. Measuring Health Care. London: Croom Helm, 1986. [cited in 08094]

Novaco Anger Scale
"The NAS (Novaco, 1994) is a self-report instrument designed to measure anger disposition in clinical and non-patient populations." [16622]

Novaco Provocation Inventory (Novaco)

Nowicki-Strickland Internal-External Control Scale (Nowicki and Duke)
UF: Adult Nowicki-Strickland Internal-External Control Scale
ANSIE
Internal-External Locus of Control Scale (Nowicki-Strickland)
Life Span Locus of Control Scales
Locus of Control Scales (Nowicki-Strickland)

Nowicki-Strickland Internal-External Control Scale for Children (Nowicki and Strickland)
UF: Children’s Internal-External Control Scale (Nowicki and Strickland)
Children’s Nowicki-Strickland Internal-External Control Scale
CNSIE
Internal-External Control Scale for Children (Nowicki-Strickland)
Locus of Control Scale for Children (Nowicki-Strickland)

Nowicki-Strickland Internal-External Control Scale for Preschool and Primary Grades
USE: Preschool and Primary Locus of Control Scale (Nowicki and Duke)

Nowlis Adjective Checklist
USE: Mood Adjective Check List (Nowlis)

NPI-ES Inventaire Neuropsychiatrique Équipe Soignante (Sisco et al)
[used but not cited in 87154]

NPV
USE: Nederlandse Persoonlijkheids Vragenlijst (Luteijn et al)

NSHLEW Interview
Wilnsack, S C; Vogeltanz, N D; Klassen, A D; Harris, R T. Childhood sexual abuse and women’s substance abuse: national survey findings. Psychology of Women Quarterly (in press as of 1996)]. [cited in 08084]

NSMHWB Screening Instrument
USE: National Survey of Mental Health and Well-Being Screening Instrument (Australian Bureau of Statistics)

Number Connection Test (Oswald and Roth)
UF: Zahlenverbindungstest
ZVT
Number Information Test (Norton et al)
"a measure of general knowledge" [38599]

Number of Symptoms Index (Byrne)

Numerical Memory Test (Grünberger)

Numerical Rating Scale of Acute Pain (Bijur et al)

Nungesser Homosexuality Attitudes Inventory
"The Modified NHAI is a 37-item self-report instrument measuring internalized homonegativity." [29561]

Nurse Feedback Questionnaire (Ward-Begnoche et al)
"A 19 item questionnaire, created for the current study, was used to gather nurses' impressions of the STEPP (Screening Tool for Early Predictors of PTSD) implementation process." [30635]

Nursery Neurobiologic Risk Score (Brazy et al)
"This scale measures insults to the brain occurring through direct injury or inadequate blood flow, oxygenation, or nutrients." [25767]

Nurses’ Observation Scale for Inpatient Evaluation (Honigfeld et al)
UF: NOSIE-30

Nursing Child Assessment Teaching Scale (Barnard et al)

Nursing Students Stress Scale (Admi)
a 32-item instrument “developed for this study” [09845]

Nurture Scale (Altemeier et al)

NYU Child and Adolescent Stressors Checklist
"The NYU-CASC is a 66-item yes-no self-report questionnaire that queries about exposure to various forms of trauma and life stressors." [31002]
Cloitre, M; Morin, N; Silva, R. The NYU Child and Adolescent Stressors Checklist - Revised (CASC). Unpublished manuscript, 2002. [cited in 31002]

O-LIFE
USE: Oxford-Liverpool Inventory of Feelings and Experiences

O’Brien Multiphasic Narcissism Inventory (O’Brien)

O’Leary-Porter Scale (Porter and O’Leary)

Oakland Growth Study
[a longitudinal study at the Institute of Human Development, University of California, Berkeley; cited in 10600]
OARS Multidimensional Functional Assessment Questionnaire (Center for the Study of Aging and Human Development)

Objective Assault Severity Interview (Halligan et al)

“A semistructured interview provided a comprehensive assessment of assault characteristics.” [80296; instrument not named in text; name assigned by PILOTS Database staff]

Objective Measure of Ego Identity Status

USE: Extended Objective Measure of Ego Identity Status (Grovet and Adams)

Objectives Checklist (Thorn)

"a 14-item parent report measure of the child’s ability to express emotions, define abuse, discuss violence, express anger appropriately, and create a safety plan” [15065]

Thorn, B. Objectives Checklist. Salt Lake City: Cornerstone Counseling Center, 1998. [cited in 15065]

Objectivism Scale (Leary et al)

"a measure of one’s tendency to make decisions on the basis of rational information” [26030]

Observational Checklist for Reactive Attachment Disorder (McLaughlin et al)

"explores interactions between the child and stranger(s) on first meeting” [40438]

Observed Child Temperament Scale (Stifter et al)

Observed Symptoms Rating Scale (Baker)

Observer Pain Scale (Tyler et al)

Obsessive Belief Questionnaire (OCCWG)

"The OBQ is a 44 item self-report questionnaire which assesses beliefs associated with OCD.” [33283]

Obsessive Compulsive Drinking Scale (Anton et al)

Obsessive-Compulsive Disorder Scale (Wells)

Wells, A. Metacognitive Therapy for Anxiety and Depression. New York: Guilford Press, 2009. [82992; the OCD-S appears on pp. 273-274]

Obsessive-Compulsive Inventory (Foa et al)

"a [42-item] self-report instrument...for determining the diagnosis and severity of obsessive-compulsive disorder” [20751]

Obsessive-Compulsive MCP-Oxford Scale (Coles et al)

Coles, M; Bogert, K V; Krause, M S; Amir, N; Salkovskis, P; Kozak, M; et al. The Obsessive-Compulsive MCP-Oxford Scale. Presented at the Association for the Advancement of Behavior Therapy, New York, 1996. [cited in 20977]

Obstetrical Complication Scale (Littman and Parmelee)

"a scale designed to assess the number of perinatal risk factors experienced by the infant” [29334]

Occupational Coping Strategies Questionnaire (Dewe and Guest)

a 48-item questionnaire

Occupational Performance History Interview (Kiethofner et al)

"The OPHI-II is a semi-structured instrument that is administered in order to collect historical data on daily life experiences and on the impact of the environment on those experiences." [16070]
Kielhofner, G; Mallinson, T; Crawford, C; Rigby, M; Henry, A; Walens, D. A User's Manual for the Occupational Performance History Interview-II. Chicago: Model of Human Occupation Clearinghouse, Department of Occupational Therapy, University of Illinois at Chicago, 1998. [cited in 16070]

Occupational Questionnaire (Smith et al)

"a widely used measure of occupational profile" [34153]

Occupational Risk Scale (Cwikel et al)

"A scale of seven items that reflect risk factors that might put a sex worker at occupational risk" [25966]

Occupational Self-Assessment (Baron et al)

"The OSA is a self-report, administered to measure the women's self-perception of their abilities, their satisfaction with their performance, and their views of the environment’s effects on their performance." [16070]

Occupational Self-Esteem Questionnaire (Braun)

"developed by this investigator" [90028]

Occupational Stress Indicator (Cooper et al)

"The OSI assesses social contact as a coping strategy and physical and mental ill-health as indicators of psychological stress." [27234]

Occupational Stress Inventory (Osipow and Spokane)

UF: Personal Resources Questionnaire (Osipow and Spokane)
Personal Strain Questionnaire (Osipow and Spokane)

Occupational Stress Scale (House et al)

Occupational Therapy Psychosocial Assessment of Learning (Townsend et al)

"The OT PAL is an observational and descriptive assessment tool, targeted at students 6-12 years old who are having difficulty meeting the functional expectations and roles within the classroom." [16072]
Townsend, S; Carey, P; Hollins, N; Helfrich, C; Blondis, M; Hoffman, A; Collins, J; Blackwell, A. (2000). The Occupational Therapy Psychosocial Assessment of Learning. Chicago: Model of Human Occupation Clearinghouse, Department of Occupational Therapy, University of Illinois at Chicago, 2000. [cited in 16072, where the OT PAL appears on pp. 136-140]

OCD Case Formulation Interview (Wells)

Wells, A. Metacognitive Therapy for Anxiety and Depression. New York: Guilford Press, 2009. [82992; the Interview appears on p. 279]

OEF/OIF Post-Deployment Screen for PTSD

[used but not cited in 38199]

OEF/OIF/OND Program Screen (Whealin et al)

"assessed the major roles that participants could potentially engage in during OEF/OIF/OND deployments" [40752]

Offer Self-Image Questionnaire for Adolescents (Offer et al)

Office Mental Status Examination for Complex Dissociative Systems

USE: Mental Status Examination (Loewenstein)
Ohio Scales

“a 48-item scale that assesses problem severity, functioning, satisfaction with services, and hopefulness” [40419]

Ohio State University TBI Identification Method

Oklahoma City Bombing Exposure Survey (Tucker et al)

Tucker, P; Dickson, W; Pfefferbaum, B; McDonald, N B; Allen, G. Traumatic reactions as predictors of posttraumatic stress six months after the Oklahoma City bombing. Psychiatric Services 48: 1191-1194 (1997). [cited in 30578]

Oklahoma State University PTSD Screener

Oldenburg Burnout Inventory

"The OLBI is a 15-item instrument that asks respondents to rate how they feel about statements [concerning] exhaustion and disengagement...The original version of the OLBI was developed in German." [29957]

Older Adult Health and Mood Questionnaire (Kemp and Adams)

"The OAHMQ was designed to evaluate depression in older adults and among people with physical disabilities as a 22-item questionnaire with few items reflecting physical or vegetative symptomatology." [33652]

Older Adult-Inventory of Small Life Events (Zautra and Guarnaccia)

Older American Resources and Services Questionnaire

Older American Resources Assessment Health Rating

[used but not cited in 09047]

Older Persons Health Profile Questionnaire (Stuck et al)

Stuck, A E; Kharicha, K; Dapp, U; Anders, J; Von Renteln-Kruse, W; Meier-Baumgartner, H P; Iliffe, S; Bachmann, M D; Egger, M; Gillmann, G; Beck, J C; Swift, C G. The PRO-AGE study: an international randomised controlled study of health risk appraisal for older persons based in general practice. BMC Medical Research Methodology 7: 2 (2007). [cited in 34837]

Older Women's Perceived Stress Beyond Health Status Scale (Prilutsky)

"This 9-item tool quantifies stress caused by 9 potential stressors, including the emotional strain related to spousal loss, geographic isolation from loved ones, financial strain, and caregiving stress." [35107]

Omnibus Self-Test (Jensen et al)

One Clinical Measurement Package (Hudson)

USE: Clinical Measurement Package (Hudson)

Online Self Evaluation Tool (Vetter et al)

"an Internet based self-screening test" [30726]

Vetter, S; Endrass, J; Schweizer, I; Rössler, W. Specific use of online trauma self-test after the tsunami disaster. European Trauma Bulletin, 2005. [cited in 30726]

ONSET (Vetter et al)

USE: Online Self Evaluation Tool (Vetter et al)

Ontario Child Health Scale

"an interviewer-administered checklist for parents, children and teachers [consisting of] 34 questions..." [31409]

Boyle, M H; Offord, D R; Hofman, H G; Catlin, G P; Byles, J A; Dadman, D T; Crawford, J W; Links, P S; Rae-Grant, N I; Szatmari, P. Ontario Child Health Study: methodology. Archives of General Psychiatry 44: 826-831 (1987). [cited in 31409]
Ontario Family Risk Assessment

"The OFRA is an actuarial-based instrument that assesses the future risk of maltreatment." [34955]  
[used but not cited in 34955]

Ontario Health Study Scales

Boyle, M H; Offord, D R; Racine, Y; Szatmari, P; Sanford, M. Evaluation of the revised Ontario Health Study Scales. *Journal of Child Psychology and Psychiatry* 34: 189-213 (1993).  [cited in 25240]

Ontario Health Survey Mental Health Supplement

"a province-wide survey conducted in 1990-1991" [09585]  
Boyle, M H; Offord, D R; Campbell, D; Catlin, G; Göering, P; Lin, E; Racine, Y A. Mental Health Supplement to the Ontario Health Survey: methodology. *Canadian Journal of Psychiatry* 41: 549-558 (1996).  [cited in 09585]

Ontario Risk Assessment Measure

"The ORAM is a standardized child welfare risk assessment instrument used in Ontario from 1998 to 2007 based on the California Risk Assessment Model. It appraises the immediate safety of the child, aids the worker to assign a risk level for maltreatment recurrence, and suggests interventions that should be implemented." [34955]  
[used but not cited in 34955]

Ontario Safety Assessment

"The OSA is a consensus based tool that determines whether the child is in immediate danger and consists of questions addressing the caregiver's current and previous behavior, ability to supervise, and attitude toward the child." [34955]  
[used but not cited in 34955]

Ontario Student Drug Use and Health Survey Questionnaire

[used but cited only as a web document in 37335]

Ontario Student Drug Use Survey

"This instrument collects information on different health risk behaviours, such as substance use." [83400]  

Open-Ended Questions for Emergency Responders and Terrorism Investigators (Friedman)

Opening Doors Study Measure

an unnamed 20-item measure used to assess "participants' outlook and sense of identity" [84312]  
[used but not cited in 84312]

Openness to Reconciliation Questionnaire (Adam and Klasen)

USE: Fragebogen zur Versöhnungsbereitschaft (Adam and Klasen)

Operation Desert Storm Events Checklist (Rosen)

"a checklist of 15 Desert Storm events [affecting spouses of deployed personnel] that was developed for [this study]" [07581]  

Operation Desert Storm Reunion Survey (Wolfe et al)

USE: Desert Storm Reunion Survey (Wolfe et al)

Operation Desert Storm Stress Exposure Scale (Wolfe)

[used but not cited in 22386]

Operation Desert Storm Trauma Questionnaire (Southwick et al)

USE: Desert Storm Trauma Questionnaire (Southwick et al)

Operation Span Task

"In the Ospan task, participants are asked to memorize stimuli while simultaneously performing simple math operations." [37953]  
UF: Ospan Task

Operation Span with Words (Turner and Engle)

Operational Criteria Checklist for Psychotic Illness (McGuffin et al)

Operational Definitions of Child Emotional Maltreatment (Baily and Baily)

Operational Mental Health Needs Evaluation
[used but not cited in 40318]

Operational Stress Scale (Rosen et al)
"comprised 15 items...that dealt with stress experienced as a result of soldiers' working conditions" [21767]

Operationalisierte Psychodynamische Diagnostik

Operationalized Checklist for ICD-10: Enduring Personality Change (Silove et al)
"an interview-based checklist was refined from a previous study undertaken amongst a heterogeneous group of asylum seekers” [30368]
Silove, D M; Coello, M J; Tang, K; Aroche, J; Soares, M; Lingam, R; Chaussivet, M; Manicavasagar, V L; Steel, Z. Towards a researcher-advocacy model for asylum seekers: a pilot study amongst East Timorese living in Australia. *Transcultural Psychiatry* 39: 452-468 (2002). [30368]

Opiate Treatment Index (Darke et al)

Optimality Index (Murphy and Fullerton)
"This [52-item] instrument serves as an interval-level global indicator of the 'optimality' of processes and outcomes of maternity care.” [28164]

Optimism for Future Life Events
[used but not cited in 91260]

Optimism Scale (Weinstein)

Ordinary Life Stress Scale (Jeon et al)
"The OLSS was developed specifically for this study... It is composed of 12 items addressing ordinary life stress...” [87385]

Oregon Discipline Scale

Organizational Religiousness Short Form (Idler)

Organizational Social Context Questionnaire (Glisson et al)
"Active practitioners completed the OSC Questionnaire to explore potential changes in attitudes about key organizational attributes that may relate to EBT [evidence based treatment] use.” [86255]
Glisson, C; Landsvorl, J; Schenwald, S K; Kelleher, K; Hoagwood, K E; Mayberg, S. Assessing the organizational social context (OSC) of mental health services: implications for research and practice. *Administration and Policy in Mental Health and Mental Health Services Research* 35: 98-113 (2008). [cited in 86255]

Organizational Tolerance for Sexual Harassment Inventory (Hulin et al)

Organizational Trust Inventory (Cummins and Bromiley)

Orientation to Life Questionnaire
USE: Sense of Coherence Questionnaire (Antonovsky)

Orientation to the Other Scale (Staub et al)
Developed “to assess forgiveness and reconciliation [including] the essence of psychological reconciliation, the orientation to and degree of acceptance of the other” [28199]
Orienting Approach Rating Scale for Clinicians

"This 12-item measure assesses the presence or absence of a particular skill." [80580]

Phipps, A B; Byrne, M K; Deane, F P. Can volunteer counsellors help prevent psychological trauma?: a preliminary communication on volunteers skill using the Orienting Approach to Trauma Counselling. *Stress and Health* 23: 15-21 (2007). [80580]

Orthogonal Cultural Identification Scale (Oetting and Beauvais)

Orthostasis Catastrophic Cognitions Severity Scale (Hinton et al)

"The 6 items of the OCCSS assess culturally specific fears about orthostasis, each rated on a 0- to 4-point Likert-type scale." [28223]

Orthostasis Flashback Interview (Hinton et al)

Orthostasis Flashback Severity Scale (Hinton et al)

"consisting of the 0- to 4-point Likert-type scale of the Clinician-Administered PTSD Scale's Flashback Intensity scale" [28223]

"The 6 items of the OCCS5 assess culturally specific fears about orthostasis..." [28223]

Orthostatic PA Interview (Hinton et al)

Orthostatic PA Severity Scale (Hinton et al)

"profiles each of 3 dimensions — (1) frequency, (2) degree of distress, and (3) duration — on a 0- to 4-point Likert-type scale” [28223]

"The 6 items of the OCCSS assess culturally specific fears about orthostasis..." [28223]

Oslo Immigrant Health Study

Oslo Social Support Scale

[used but not cited in 36370]

Ospan Task

USE: Operation Span Task

OSU PTSD Scale

USE: Oklahoma State University PTSD Screener

Oswestry Low Back Pain Disability Questionnaire

"a 10-item, self-report measure...designed to assess the broad domain of disability” [21561]

Other as Shamer Scale (Goss et al)

"The scale consists of 18 items measuring external shame (global judgements of how people think others view them).” [34816]

Other Stressors Associated with Peacekeeping Scale (Litz et al)

"This 15-item measure assessed stressful events and circumstances that occurred during the peacekeeping mission to Somalia that might have created a sense of personal discomfort or distress, but that did not constitute an imminent threat to life.” [28832]

Litz, B T; King, L A; King, D W; Orsillo, S M; Friedman, M. Warriors as peacekeepers: features of the Somalia experience and PTSD. *Journal of Consulting and Clinical Psychology* 65: 1001-1010 (1997). [cited in 28832]

OTHERS Resources Competency Indicator (Fazio)

"a self-awareness questionnaire, developed to help people better understand their strengths and areas of growth as well as open doorways to conversations” [32152]

Otis Test of Mental Ability
[used but not cited in 24780]

Ottawa Mental Skills Assessment Tool
"developed...to measure a broad range of mental skills thought to be relevant for sport performance" [83966]

Outcome Questionnaire 45.2
"This 45-item instrument was developed to measure patient progress in psychotherapy. It yields 4 scores: total score, interpersonal relations score, symptom distress score, and social roles score." [19595]
Lambert, M; Hansen, N; Umpress, Y; Lunnen, K; Okiishi, J; Burlingame, G; et al. Administration and Scoring Manual for the OQ45.2. Stevenson, Maryland: American Credentialing Services, 1996. [cited in 19595]

Outcomes Expectancies Scale (Solomon and Annis)

Overall Anxiety Severity and Impairment Scale (Norman et al)

Overall Coping Zone Score (Sloan-Power)
Sloan-Power, E M; Boxer, P; McGuirl, C; Church, R. Coping zone construction and mapping: an exploratory study of contextual coping, PTSD, and childhood violence exposure in urban areas. Journal of Interpersonal Violence 28: 1741-1764 (2013). [40595]

Overall Grief Scale (CLOC Study)
"a 19-item scale developed by the Changing Lives of Older Couples researchers" [83910; scale not explicitly named; name assigned by PILOTS Database staff]

Overt Aggression Scale (Yudofsky et al)
Yudofsky, S C; Silver, J M; Jackson, W; Endicott, J; Williams, D. The Overt Aggression Scale for the objective rating of verbal and physical aggression. American Journal of Psychiatry 143: 35-39 (1986). [cited in 06329]

Overt Aggression Scale-Modified (Coccaro et al)
"The OAS-M is a clinician-administered, semi-structured interview that was adapted from the Overt Aggression Scale (Yudofsky et al) for use in outpatients." [25309]

Own Memories of Child-Rearing Experience Scale (Ross et al)
USE: EMBU

Oxford Happiness Questionnaire
[used but not cited in 93270]

Oxford Measure of Psychosocial Adjustment
a 53-item scale

Oxford-Liverpool Inventory of Feelings and Experiences
"initially developed from a factor analysis of scales that had previously been developed to assess aspects of schizotypy" [21926]

UF: O-LIFE

P.G.I. Memory Scale (Pershad)

Paced Auditory Serial Addition Task (Gronwall)

Padua Inventory - Washington State University Revision (Burns et al)
"a 39-item instrument, based on the Padua Inventory, which measures five dimensions relevant to obsessive-compulsive disorder" [23450]
Padua Inventory (Sanavio)  

Paediatric Index of Mortality (Pearson et al)  

Pain Anxiety Symptoms Scale (McCracken et al)  
"a 40-item self-report measure of fear and anxiety behaviors related to pain" [21528]  

Pain Assessment Inventory Narrative  
"self-administered...containing previously validated surveys measuring physical and emotional health" [27793]  
[used but not cited in 27793]

Pain Behavior Check List (Kerns et al)  
"The PBCL is a 17-item self-report questionnaire assessing observable and measurable pain behaviors." [34949]  

Pain Behavior Rating Scale (Ohlund et al)  

Pain Beliefs and Perceptions Inventory (Williams and Thorn)  

Pain Catastrophizing Scale (Sullivan et al)  
"The PCS instructions ask participants to reflect on past painful experiences, and to indicate the degree to which they experienced each of 13 thoughts or feelings when experiencing pain..." [33329]  

Pain Disability Index (Tait et al)  

Pain Discomfort Scale (Jensen et al)  
"The PDS is a 10-item measure of emotional responses to pain" [23846]  

Pain Intensity Survey (Van Korff et al)  

Pain Locus of Control Scale (Penzien et al)  
"a 36-item measure of pain control attribution comprised of three subscales: Internality, Powerful Other, and Chance...derived from the Multidimensional Health Locus of Control Scale" [07729]  

Pain Questionnaire (Arnér)  

Pain Questionnaire (Melzach)  
USE: McGill Pain Questionnaire (Melzach)

Pain Self-Perception Scale (Tang et al)  
"The PSPPS is a 24-item questionnaire used to assess mental defeat in chronic pain patients." [35901]  

Pain Treatment Satisfaction Scale (Evans et al)  

Pain-Coping Inventory  
USE: Inventarisatielijst Pijngedrag (Kraaimaat and Van Schevikhoven)
Pain-Related Self Statements Scale (Flor)

Painful and Provocative Life Events Scale (Van Orden et al)
"The PPES is a self-report instrument that requests participants to rate the frequency with which they have been exposed to varying life events deemed to be physically painful and/or psychologically provocative." [40110]

PAIR
USE: Personal Assessment of Intimacy in Relationships (Schaeffer and Olson)

Paired-Associate Learning
USE: Wechsler Paired Associate Learning Test

PAIS
USE: Psychosocial Adjustment to Illness Scale (Derogatis)

Pakistan Anxiety and Depression Questionnaire (Mumford et al)
"a culturally sensitive screening instrument for anxiety and depression symptoms specifically developed for a Pakistani population" [34433]

Pan-Acculturation Scale (Soriano and Hough)
"This 16-item measure evaluates assimilation into US culture." [38536]

PANAS Scales
USE: Positive and Negative Affect Schedule (Watson et al)

Panic and Agoraphobia Scale
[used but not cited in 24452]

Panic Appraisal Inventory (Telch)
Telch, M J. The Panic Appraisal Inventory. Unpublished manuscript, University of Texas, 1987. [cited in 20027]

Panic Attack Coping Questionnaire (Borden et al)
"used to assess the strategies that patients use to deal with panic attacks or extreme anxiety from a list of 32 possibilities on a 5-point Likert scale" [21229]

Panic Attack Form (Michelson)
"a self-rating scale for panic disorder" [20559]

Panic Attack Questionnaire (Kellner et al)
"a 4-point DSM-IV items...questionnaire" [21991]

Panic Attack Questionnaire (Norton et al)

Panic Attack Somatic-Symptom Scale (Hinton et al)
USE: Anger Scales (Hinton et al)

Panic Attack Symptom Scale (Southwick et al)
"This scale consisted of 27 items that included the 13 DSM-III-R panic attack symptoms" [04081]
Southwick, S M; Krystal, J H; Morgan, C A; Johnson, D; Nagy, L M; Nicolaou, A; Hening, G R; Charney, D S. Abnormal noradrenergic function in posttraumatic stress disorder. *Archives of General Psychiatry* 50: 266-274 (1993). [04081]

Panic Attacks Record
[used but not cited in 80648]
Panic Attitude Severity Scale (Hinton et al)
"utilized to assess severity of neck-focused and orthostatic-triggered panic attacks" [19663]

Panic Disorder Self-Report (Newman et al)
"The PDSR is a 22-item self-report measure designed to diagnose panic disorder based on DSV-IV criteria." [24362]

Panic Disorder Severity Scale (Shear et al)
Shear M K; Brown, T A; Barlow, D H; Money, R; Sholomskas, D E; Woods, S W; Gorman, J M; Papp, L A. Multicenter collaborative Panic Disorder Severity Scale. American Journal of Psychiatry 154: 1571-1575 (1997). [cited in 23300]

Panic Inventory (Heldt et al)
"The Panic Inventory classifies panic attacks as spontaneous, situational, complete, or incomplete. It also assesses their intensity and frequency as well as the severity of agoraphobia and anticipatory anxiety." [29462]

Panic Symptom Scale
[used but not cited in 36847]

Panic-Agoraphobic Spectrum Questionnaire (Cassano et al)

PAQ
USE: Personal Attributes Questionnaire (Spence and Helmreich)

Paramedic Demographic Survey (Spencer)
"developed for this study" [92013]
Spencer, W M. Peritraumatic dissociation and posttraumatic symptomatology in urban paramedics. Doctoral dissertation, Chestnut Hill College, 2006. [92013]

Paranoia Scale (Fenigstein and Vanable)
"The PS is a 20-item self-report scale which was developed to measure the occurrence of paranoia in a student (i.e., non-clinical) population." [30066]

Paranoid Thought Scales (Green et al)

Paranoid-Depression Scale (Zerssen)
USE: Paranoid-Depressivitäts-Skala (Zerssen)

Paranoid-Depressivitäts-Skala (Zerssen)
UF: Paranoid-Depression Scale (Zerssen)

Paranormal Belief Scale (Tobacyk and Milford)
UF: Revised Paranormal Belief Scale (Tobacyk)

Parasuicide History Interview (Linehan et al)

Parent Activities Questionnaire (LaMontagne and Pawlak)
"a 38-item self-report of activities designed to assess the number and type of child care activities performed by parents during hospitalization" [30007]

Parent Affect Test
[used but not cited in 90838]
Parent and Adolescent Interviews (Center for Treatment Research on Adolescent Drug Abuse)

Center for Treatment Research on Adolescent Drug Abuse. Parent and Adolescent Interviews. Miami: University of Miami School of Medicine, 1998. [cited in 35523]

Parent Attachment Diary (Stovall and Dozier)

Parent Attribution Test (Bugental and Shennum)

"The PAT was developed to assess the attributions adults make for the causes of their successful and unsuccessful interactions with children." [16466]

Parent Behavior Form (Kelly and Worell)

Parent Behavior Inventory (Kolko and Kazdin)

"The PBI is a parent version of the Children's Report of Parenting Behavior Inventory that is completed by parents. Revisions of the original 260-item measure have varied in length." [21722]

Parent Bereavement Survey (Murphy)

"a 68-item [scale] developed by the primary investigator for the current study" [22016]

Murphy, S A; Johnson, C; Cain, K C; Das Gupta, A; Dimond, M; Lohan, J; Baugher, R. Broad-spectrum group treatment for parents bereaved by the violent deaths of their 12- to 28-year-old children: a randomized controlled trial. Death Studies 22: 209-235 (1998). [22016]

Parent Daily Report of Problem Behaviors (Hunt et al)

a "34-item checklist...designed to measure the occurrence of the daily rate of conduct problems demonstrated by the adolescent" [07881]

Parent Death Events List (Sandler et al)

Sandler, I N; West, S G; Baca, L; Pillow, D R; Gersten, J C; Rogosch, F; Virdin, L M; Beals, J; Reynolds, K D; Kallgren, C A; Tein, J-Y; Krieger, G; Cole, E; Ramirez, R. Linking empirically based theory and evaluation: the family bereavement program. American Journal of Community Psychology 20: 491-521 (1992). [cited in 82143]

Parent Emotional Reaction Questionnaire (Mannarino and Cohen)

Parent Evaluation of Termination Status (Wolfe et al)

USE: Evaluation of Termination Status (Wolfe et al)

"This is a 25-item self-report scale designed to assess parental adjustment to the experience of their child’s chronic illness.” [31243]

Parent Feedback Questionnaire (De Luca et al)

De Luca, R V; Boyes, D A; Grayston, A D; Romano, E. Sexual abUSE: effects of group therapy on preadolescent girls. Manuscript submitted for publication, 1994. [cited in 08431]

Parent Guidance Assessment - Combat Injured (Cozza et al)

Cozza, S J; Chun, R S; Miller, C. Children and families of combat injured service members, In: Ritchie, E C (ed.), Combat and Operational Behavioral Health. Washington: Borden Institute, in press. [cited in 03698]

Parent Health Locus of Control Scale (De Vellis and De Vellis)

"assesses parents; beliefs about the type of control (internal or external) over the health of their children" [33378]

Parent Impact Questionnaire (Wolfe and Wolfe)

Parent Interview (Friedrich)

Parent Interview on Child Health and Well-Being (ECLS-K)

Parent Interview Questionnaire (Jaffe et al)

Parent Interview Questionnaire (Montgomery)

Parent Interview Schedule (Wodarski et al)

Parent Issues Checklist (Prinz et al)
"Includes issues such as chores, curfew, and fights with siblings" [82143]

Parent Knowledge Assessment (Marsac et al)
"Parental knowledge of child injury reactions was assessed via 4 open-ended questions and a 16-item checklist..." [36840]

Parent Observation of Child Adaptation (Ialongo et al)
"a structured interview designed to measure parents' perceptions of their child's adaptation within the family context" [25657]

Parent Observation of Classroom Adaptation (Kellam et al)
"This is a brief parent-observation measure assessing various aspects of children's mental health." [28080]

Parent Opinion Questionnaire (Azar et al)

Parent Outcome Questionnaire (Gully et al)
"a questionnaire rating 6 items...developed for this project" [82097]

Parent Perception Inventory (Hazzard et al)

Parent Perception Questionnaire (Child Custody Research Project)
This is one of the "experimental measures developed by the Child Custody Research Project" of Harvard Medical School used in: Wolman, R; Taylor, K. Psychological effects of custody disputes on children. Behavioral Sciences and the Law 9: 399-417 (1991). [02646]

Parent Perception Questionnaire (Rosen)
Rosen, B C. Social class and the child's perception of the parent. Child Development 35: 1147-1153. [cited in 00653]

Parent Practices Interview (Webster-Stratton)
"adapted from the Oregon Social Learning Center Discipline Questionnaire" [84593]

Parent Practices Scale (Strayhorn and Weidman)

Parent PTSD Questionnaire (Applebaum)
Parent Questionnaire (Steele and Raider)

"consists of 22 Likert-type questions" [16004]

Parent Report of Post-Traumatic Symptoms (Greenwald)

Parent Satisfaction Questionnaire (Tullis and Stetson)
"This is a 9-item validated satisfaction questionnaire that is widely used to assess user satisfaction with Web sites." [36840]

Parent Satisfaction with Child Scale (Donohue et al)

Parent Support Scale (Short and Johnston)
"This scale, designed for the present study, focuses on perceptions of the adequacy of support received specifically within the parenting domain." [09398]

Parent Support-Control Questionnaire (Lilley)
"The PSCQ, a 26-item parent self-report questionnaire, assesses parental support and parental control." [36386]

Parent-Adolescent Communication Scale (Olsen et al)
Olsen, D; McCubbin, H; Barnes, H; Larsen, A; Muxen, M; Wilson, M. Family Inventories: Inventories Used in a National Survey of Families Across the Life Cycle. St. Paul: University of Minnesota, Department of Family Social Science, 1982. [cited in 06988]

Parent-Adolescent Conflict Issues Checklist
[used but not cited in 37725]

Parent-Child Conflict Tactics Scales (Straus et al)

Parent-Child Interaction Questionnaire - Revised (Lange et al)
"a 25-item self-report scale designed to assess the quality of the parenting relationship between child and mother and/or father” [35784]

Parent-Child Relations Questionnaire (Siegelman and Roe)

Parent-Child Relationship Checklist (Burack et al)
"designed by the authors to identify children and adolescents in the nonmaltreated group who may have experienced maltreatment by either parent" [29064]

Parent-Child Relationship Inventory (Gerard)

Parent-Child Relationship Questionnaire (Swanson)
[used in 02646, without citation]

Parent-Child Relationship Scale (Boney-McCoy and Finkelhor)

Parent-Infant Behavior and Affect Assessment (Clark)
"...based on scales developed by Clark..." [01044]
Parent-Infant Relationship Global Assessment Scale
"The PIR-GAS measures the level of adaptation of the parent-child relationship on a scale from 99 to 0 based on the intensity, frequency, and duration of the disturbance." [23199]

Parent’s Interview on Community Violence (Hill)
"a 50-item structured interview conducted with parents" [20896]

Parent’s Life Events Inventory (Rahe)
[mentioned in 02031 as “Rahe, 1968” but not cited]

Parent’s Perception Uncertainty in Illness Scale
USE: Uncertainty in Illness Scales (Mishel)

Parent’s Report of Child Empathy (McCloskey and Lichter)

Parent’s Report of the Child’s Reaction to Stress (Fletcher)
"Parent or guardian paper-and-pencil report regarding stress responses of children and adolescents." [stamm 225]

Parent/Child Communication Questionnaire (Olson et al)
Olson, D; McCubbin, H; Barnes, H; Larsen, A; Muxen, M; Wilson, M. Family Inventories. Beverly Hills, California: Sage Publications, 1982. [handbook 643; cited in 11546]

Parental Acceptance-Rejection Questionnaire (Rohner)

Parental Account of Children’s Symptoms (Taylor)

Parental Anger Inventory (MacMillan et al)
"The PAI assesses parental anger in response to a particular child’s misbehavior and other child-related situations." [32427]
MacMillan, V M; Olson, R L; Hanson, D J. The development of an anger inventory for use with maltreating parents. Paper presented at the annual meeting of the Association for Advancement of Behavior Therapy, New York, 1988. [cited in 32427]

Parental Attribution Scale (Celano et al)
"a 21-item self-report Likert scale...assesses the caretaker’s attributions of responsibility for the abuse to the child, to herself, and to the perpetrator" [07737]

Parental Authority Questionnaire (Buri)

Parental Behavior and Attitudes Questionnaire (Bergeron et al)
Bergeron, L; Vallia, J P; Breton, J J; Gaudet, N; Berthiaume, C. Factor analysis and reliability of Parental Behavior and Attitudes Questionnaire. Poster presented at the 40th annual meeting of the American Academy of Child and Adolescent Psychiatry, San Antonio, October 1993. [cited in 40156]

Parental Behavior Inventory (Schaefer)
Parental Bonding Instrument (Parker et al)

Parental Cognitions and Conduct Toward the Infant Scale (Boivin et al)

Parental Disciplines Practices Scale (Goodman et al)
"a 6-item, parent and child self-report measure of coercive discipline and punishment" [34221]

Parental Empathic Attunement and Responsiveness Scale (Moor and Silvern)
"A scale developed specifically for this study assessed perceived parental failure of empathy." [80586]

Parental Expectancies Scale (Project SAVE)
"The PES is a 13-item inventory wherein parents rate the expectations they have for their child’s functioning over the next 12 months as compared to peers." [82516]

Parental Fear Index
[used but not cited in 90580]

Parental Functioning Questionnaire (Dekel et al)
"This instrument was specifically developed to assess interpersonal and social functions including parental functioning in posttraumatic casualties of wars in Israel." [36770]

Parental Inconsistency of Love Scale (Schwarz and Zuroff)

Parental Investment in Daughter’s Thinness Questionnaire
[used but not cited in 90373]

Parental Locus of Control Scale (Campis et al)
"assesses parents’ perceptions of their parenting control and efficacy with their child(ren)" [33457]

Parental Monitoring Questionnaire (Flannery et al)
[scale not explicitly named in 23672; name supplied by PILOTS database staff]

Parental Monitoring Scale (Cauce et al)
Cauce, A M; Morgan, C J; Wagner, V; Moore, E; Sy, J; Wurzbacher, K; Weeden, K; Blanchard, T. Effectiveness of intensive case management for homeless adolescents: results of a 3-month follow-up. *Journal of Emotional and Behavioral Disorders* 2: 219-227 (1994). [cited in 33462]

Parental Monitoring Scale (Goodman et al)

Parental Monitoring Scale (Patterson and Stouthamer-Loeber)
"a 9-item, parent and child self-report measure that assesses how closely parents keep track of children’s whereabouts and control over activities" [34221]

Parental Observations Checklist
[used but not cited in 90580]
Parental Practices Questionnaire (Loeber et al)
"consists of five subscales [on which] caregivers rated their parenting style...and their supervision and family activities" [17776]

Parental PTSD Scale (Yehuda et al)
"This scale, developed by our group for use in offspring of Holocaust survivors, was given to participants in order to assess parental Holocaust-related PTSD." [23715]

Parental Punitiveness Scale (Blane et al)
"an interviewer rating system designed to assess parents' reactions to disclosure based upon a structured interview" [23341]

Parental Reaction to Abuse Disclosure Scale (Everson et al)
"This measure is a semi-structured interview conducted for the purpose of evaluating four dimensions of perceived parental support following a disclosure of sexual abuse." [18010]

Parental Reaction to Incest Disclosure Scale (Everson et al)
"The PRCT-1 is a 20 item instrument evaluating each parent's perception of the presence or absence of PTSD symptoms in her child." [28441]
Lehmann, P. Parental Reaction to Child Trauma, One (PRCT-1). Unpublished instrument, University of Texas at Arlington, 1996. [cited in 28441]

Parental Responses to Child Misbehavior (Holden et al)

Parental Role Questionnaire
[used but not cited in 92201]

Parental Social Support for Adolescents Scale (Aneshensel and Sucoff)

Parental Stress Scale (Berry and Jones)
"The 28-item PSS:NICU measures the stress of parents in the NICU due to alterations in the parental role, the appearance and behavior of their child, and unit sights and sounds." [25767]

Parental Stressor Scale: Pediatric Intensive Care Unit (Carter and Miles)
"This is a 36 item Likert scale questionnaire which measures parents' perception of PICU associated stress on seven different dimensions." [29323]

Parental Support Measure (Czapinski)
"This measure consists of 4 items and examined the availability of social support from parents." [82140]

Parental Support Questionnaire (Mannarino and Cohen)
Parental Support Scale (Fromuth)

Parental Support Scale (Khamis)
"a 10-item scale which assesses child's degree of satisfaction with parental support" [27243]

Parental Values for Children Scale (Schafer and Edgerton)
"consists of 15 items presented in three different sets, with 5 items in each set measuring parental values along the dimension of conforming versus self-directing values" [22254]

Parental/Adult Response to Crisis Checklist (Johnson)

Parenting Alliance Inventory (Abidin)
"The PAI assesses the degree to which parents perceive themselves to be in a cooperative, communicative, and mutually respectful alliance for the care of their children." [34420]

Parenting Assessment (Daud et al)

Parenting Competence Scale
USE: Parenting Sense of Competence Scale (Gibaud-Wallston and Wandersman)

Parenting Daily Hassles Scale (Plummer)
"The Hassles Scale has 20 items defined by 'situations or people that can be annoying in minor ways or problematic in fairly major ways'" [80138]

Parenting Dimensions Inventory (Slater and Power)

Parenting Practices Questionnaire (Gorman-Smith et al)

Parenting Practices Questionnaire (Robinson et al)
"The PPQ was administered to mothers how often they engaged in each of 62 parenting behaviors over the last year (Authoritarian, Authoritative, and Permissive scales)." [19092]

Parenting Practices Scale (Barber)
"a 9-item scale...indicating parents' punitive, controlling and negotiating disciplining practices in a situation when the child had broken a rule" [31409]

Parenting Questionnaire (Dudley et al)
"A series of questions about parenting competency and family intimacy in the period before detention and in the one month period prior to assessment" [27572]
Steel, Z; Momartin, S; Bateman, C; Hafshejani, A; Silove, D M; Everson, N; Roy, K; Dudley, M; Newman, L; Blick, B; Mares, S. Psychiatric status of asylum seeker families held for a protracted period in a remote detention centre in Australia. Australian and New Zealand Journal of Public Health 28: 527-536 (2004). [27572]

Parenting Questionnaire (National Longitudinal Study of Children and Youth)
"The 20-item parenting questionnaire measured youths' perceptions about their parents' nurturance, rejection, and monitoring during the past 3 months." [81058]
Parenting Questionnaire (Nicholas and Bieber)

Parenting Representations Interview - Adolescence (Scharf and Mayseless)

Parenting Role Questionnaire (Melnyk et al)

Parenting Scale (Arnold et al)

Parenting Sense of Competence Scale (Gibaud-Wallston and Wandersman)

UF: Parenting Competence Scale

Parenting Skills Inventory (Nash)

Parenting Stress Index (Abidin)

Parenting Styles and Dimensions Questionnaire (Robinson et al)

Parenting Styles Survey (Sameroff et al)
"a 62-item measure designed to assess 10 areas of parenting competence in both high and low-risk families” [14052] Sameroff, A J; Thomas, S L; Barrett, L C. Anxiety and parental childrearing styles. Presented at the Society for Research in Adolescence, 1990. [cited in 14052]

Parents’ Questionnaire (Barath)

Participant Feedback Questionnaire (Possemato et al)

Participant Profile Form (Bolstad and Zinbarg)

Participant Satisfaction Questionnaire (Niles et al)
"The PSQ is a self-report questionnaire developed for the current study to gather information about participants’ levels of satisfaction with the interventions.” [37920] Niles, B L; Klunk-Gillis, J; Rynagla, D J; Silberbogen, A K; Paysnick, A; Wolf, E J. Comparing mindfulness and psychoeducation treatments for combat-related PTSD using a telehealth approach. Psychological Trauma: Theory, Research, Practice, and Policy, published online 14 November 2011 (DOI: 10.1037/a0026161). [37920]

Participant Survey of EMDR Training (Farrell and Keenan)
"19 questions in which research participants were asked to retrospectively consider their EMDR practice and outcome of treatment” [87407] Farrell, D; Keenan, P. Participants’ experiences of EMDR training in the United Kingdom and Ireland. Journal of EMDR Practice and Research 7(1): 2-16 (2013). [87407; the Survey appears on p. 5]

Participant Treatment Evaluation and Engagement Measures (Irvine et al)
"a 22 item treatment evaluation measure was developed specifically for the clinical trial...” [37345] Irvine, J; Stanley, J; Org, L; Cribbie, R; Ritvo, P; Katz, J; Dorian, P; O’Donnell, S; Harris, L; Cameron, D; Hill, A; Newman, D; Johnson, S N; Bilanovic, A; Sears, S F. Acceptability of a cognitive behavior therapy intervention to implantable cardioverter defibrillator recipients. Journal of Cognitive Psychotherapy 24: 246-264 (2010). [37345]
Participation Measure for Post-Acute Care (Gandek et al)

"The PM-PAC was developed to assess social and role participation outcomes outlined in the World Health Organization’s International Classification of Functioning.” [82515]

Gandek, B; Sinclair, S J; Ware, J E. The Participation Measure for Post-Acute Care (PM-PAC). Boston: Health Assessment, 2001. [cited in 82515]

Participatory Style of Physician Scale (Kiesler and Auerbach)

"The 15-item face-valid PSPS is designed to measure the physician’s participatory style during patient visits." [31082]

Kiesler, D J; Auerbach, S M. Participatory Style of Physician Scale. Richmond: Virginia Commonwealth University, 2003. [cited in 31082]

Partner Abuse Scale (Hudson and MacIntosh)

Partner Abuse Scales (Hudson)

do a 25-item measures...to assess the extent of perceived physical and non-physical abuse received from a partner” [14827]

Partner Abuse Symptom Scale (Ford-Gilboe et al)

"The PASS was created for this study by expanding the items and response choices on the Miller Abuse Physical Injury and Symptom Scale (MAPSAIS) so that a broader range of physical and mental health symptom associated with intimate partner violence are captured.” [31808]

Ford-Gilboe, M; Campbell, J C; Merritt-Gray, M; Lent, B; et al. Partner Abuse Symptom Scale. Manuscript in preparation. [cited in 31808]

Partner Abuse Symptom Scale (Ford-Gilboe et al)

"The PASS was developed to measure the pattern and severity of injuries and symptoms associated with interpersonal violence.” [33189]

Ford-Gilboe, M; Campbell, J; Merritt-Gray, M; Lent, B; Samuels-Dennis, J; Wilk, P. Validation of the Partner Abuse Symptom Scale (PASS). Unpublished manuscript. [cited in 33189]

Partner Aggression Style Screening Questionnaire (Conradi et al)

"The PASSQ is a two-page, paper-and-pencil screener developed by the researchers in an attempt to operationalize the definition of dominant aggressor.” [83646]

Partner Conflict Calendar (Ehrensaft et al)

"used to identify individuals in abusive relationships that involved significant consequences” [28484]

Partner Experiences with PTSD Survey (Manguno-Mire et al)

"A telephone survey instrument...developed to collect information from partners about their psychological symptoms, mental health treatment, and involvement in the veteran’s mental health treatment.” [29395]

Manguno-Mire, G M; Sautter, F J; Lyons, J A; Myers, L; Perry, D; Sherman, M D; Glynn, S M; Sullivan, G. Psychological distress and burden among female partners of combat veterans with PTSD. Journal of Nervous and Mental Disease 195: 144-151 (2007). [29395]

Partner PTSD Checklist (Gallagher et al)

"a 17-item questionnaire developed for the present study” [14078]

Partner Responses to Cancer Inventory (Manne and Schnoll)

8 items “which measure the frequency with which partners provide specific types of informational, instrumental, and emotional support in the prior month” [35975]

Partner Table (González-Guarda et al)

"collected detailed information regarding the past 5 intimate relationships participants had and their experiences with substance abuse, risk for HIV, and histories of intimate partner violence” [36877]

Partner Violence Interview (Boris et al)

"The PVI is a 26-item structured interview adapted from the Conflict Tactics Scale…” [82217]

Partner Violence Inventory (Bernstein et al)

Partner Violence Screen (Feldhaus et al)
Feldhaus, K M; Kozol-McLain, J; Amsbury, H L; Horton, I M; Lowenstein, S R; Abbott, J T. Accuracy of 3 brief screening questions for detecting partner violence in the emergency department. Journal of the American Medical Association 277: 1357-1361 91997. [cited in 27131]

Partners in Care Study Instrument (Meredith et al)
Meredith, L S; Orland, M; Humphrey, N; Camp, P; Sherbourne, C D. Are better ratings of the patient-provider relationship associated with higher quality care for depression? Medical Care 39: 349-360 (2001). [cited in 29643]

Passionate Love Scale (Hatfield and Sprecher)

Past Abusive Relationships Measure (Swan and Sullivan)
"assesses the total number of past adult relationships in which women experienced intimate partner violence and the duration of the three most recent relationships" [83504]
Swan, S C; Sullivan, T P. Past Abusive Relationships. New Haven: Yale University School of Medicine, 2004. [cited in 83504]

Past Experience Questionnaire (Michael and Ehlers)
"screens participants for a trauma history, blood/injury phobia, and severe depression" [29848]

Past Experiences Questionnaire (Messner et al)
Messner, S; Shipp, D; Jackson, J; Edison, J; Townsley, R; Burke, M; Chandler, K; Long, P. Reliability of adults' reports of childhood sexual abuse. Paper presented at annual meeting of the Southeastern Psychological Association, New Orleans, March 1988. [cited in 03164]
UF: Life Experiences Questionnaire (Messner et al)

Past Feelings and Acts of Violence Scale (Plutchik and Van Praag)

Past History of Sexual Abuse Questionnaire (Thériault et al)
Thériault, C; Cyr, M; Wright, J. Past history of sexual abuse: translation and adaptation from the "Incest History Questionnaire" and the "Parental Reaction to Disclosure Scale". Unpublished manuscript, PRIMASE, Université de Montréal, 1995. [cited in 19100]

Past History Schedule (McGuffin et al)

Past Trauma Experiences Scale (DeRoma et al)
"a 9-item measure designed to assess number and type of prior traumas" [27473]
[used but not cited in 27473]

Pathological Grief Questionnaire (Prigerson et al)

Pathways Inventory (Drebing et al)
"a structured interview ... regarding common steps in the pathway-to-care" [37837]

Patient Action Scale (Hoyt et al)

Patient Assessment Instrument (Rosen et al)

Patient Competency Rating Scale (COMBI)
"the 30-item PCRS is a self-report instrument that evaluates difficulty with cognitive, emotional, or behavioral tasks after traumatic brain injury." [34341]
Center for Outcome Measurement in Brain Injury. PCRS properties. [Web document cited in 34341]

Patient Engagement Subscale (Sayer and Thuras)
18 items
Patient Health Questionnaire (Spitzer et al)

"a self-administered version of the PRIME-MD (Primary Care Evaluation of Mental Disorders)" [25089]

Patient Health Questionnaire for Adolescents (Johnson et al)

"The PHQ-A is a self-report version of the Primary Care Evaluation of Mental Disorders (PRIME-MD)" [84123]
Johnson, J G; Harris, E S; Spitzer, R L; Williams, J B. The Patient Health Questionnaire for Adolescents: validation of an instrument for the assessment of mental disorders among adolescent primary care patients. *Journal of Adolescent Health* 30: 196-204 (2002). [cited in 84123]

Patient Medical Information Questionnaire (NCPTSD)

Patient Mental Health Care Component Scale (Parker et al)

"a fidelity tool to assist clinics with implementing PMHC" [83956]
Shiner, B; Watts, B V; Pomerantz, A; Groft, A; Scott, D; Street, B; Young-Xu, Y. Access to what?: an evaluation of the key ingredients to effective advanced mental health access at a VA medical center and its affiliated community-based outreach clinics. *Military Medicine* 174: 1024-1032 (2009). [83956; the Scale appears on pp. 1029-1031]

Patient Outcome for Mood Scale

[a "self-report" used but not cited in 34102]

Patient Outcome Questionnaire (American Pain Society)

Patient Preferences Questionnaire (Najavits)

Patient Rated Anxiety Scale (Sheehan)

"a 35-item, 5-point instrument that was developed to measure the intensity of anxiety" [22079]

Patient Relationship Questionnaire

"The PRQ is a 34-item questionnaire...used to assess the relationship between the patient and caregiver." [36341]
[used but not cited in 36341]

Patient Satisfaction - Results and Quality

USE: PS-RESKVA (Guldvog et al)

Patient Satisfaction - Results and Quality (Sorlie et al)

"The PS-RESKVA...contains 39 items of which 27 are included in 4 subscales: quality of contact with the nursing staff, quality of contact with the medical staff, adequate treatment information, and global satisfaction with treatment." [40795]

Patient Satisfaction Questionnaire (Larsen et al)

Patient Satisfaction Scale (Marshall et al)

measures "dissatisfaction with previous medical treatment" [16560]

Patient Visit Rating Questionnaire (Rubin et al)

"The PVRQ is a 9-item measure of patients' satisfaction with ourpatient visits." [27618]
Rubin, H R; Gandek, B; Rogers, W H; Kosinski, M; Mchomney, C A; Ware, J E. Patients' ratings of outpatient visits in different practice settings: results from the Medical Outcomes Study. *Journal of the American Medical Association* 270: 835-840 (1993). [cited in 27618]

Patient-Caregiver Support Scale

[used but not usefully cited in 38350]

Patient-Generated Index (Ruta et al)

"used as a subjective measure of health-related quality of life" [30468]
Ruta, D A; Garratt, A M; Leng, M; Russell, I T; Macdonald, L M. *A new approach to the measurement of quality of life: the Patient-Generated Index*. *Medical Care* 32: 1109-1126 (1994). [cited in 30468]

Patient-Rated Global Improvement Scale (Baer et al)

Patient’s Estimate of Improvement (Hatcher and Barends)

"The PEI is a 16-item questionnaire assessing improvement to date in psychotherapy." [27169]

Patriotism and Nationalism Scale (Kosterman and Feshbach)

"consists of 120 items” [29497]

Patriotism Scale (Huddy and Khatib)

"a 6-item measure used to assess American patriotism” [86718]

Patterns of Individual Change Scales (Kaltreider et al)

Pavlovian Temperament Survey

"composed of three scales: strength of excitation, strength of inhibition, and mobility of the nervous processes” [35186]

PC-SAD (Rogers et al)

"The PC-SAD is a 37-item DSM-IV-compatible depression screener.” [31303]

PCGT Clinical Interview

[used but not cited in 80808]

PCT Orientation Group Satisfaction Scale

"The PGSS was designed to evaluate veterans’ satisfaction with the patient intervention developed and implemented in this study.” [26824]

PDQ

USE: Personality Diagnostic Questionnaire (Hyler et al)

PE-11M

[used but not cited in 84791]

Peabody Individual Achievement Test (Dunn and Markwardt)

Peabody Picture Vocabulary Test (Dunn and Dunn)

Peacekeeping Deployment Stressors Scale (Litz et al)

25 items
Litz, B T; King, L A; King, D W; Orsillo, S M; Friedman, M J. Warriors as peacekeepers: features of the Somalia experience and PTSD. Journal of Consulting and Clinical Psychology 65: 1001-1010 (1997). [cited in 33424]

Peacekeeping Events Scale (Adler et al)

a 23-item scale that “measured exposure to mission stressors and potentially traumatizing events” [81971]

Peacekeeping Exposure Scale (MacDonald et al)

"developed especially for use in this study” [21200]
MacDonald, C; Chamberlain, K; Long, N; Mirfin, K. Psychological Effects of Peacekeeping Deployments on Military Personnel. Palmerston North, New Zealand: Department of Psychology, Massey University. [cited in 21200]

Peacekeeping Questionnaire (Greenberg et al)

Peak Aggressive Incident Rating (Lewis et al)

Pearl Harbor Research Questionnaire (Wilson et al)

Pediatric Anesthesia Emergence Delirium Scale
The PAED is "a 5-item scale used to measure the patient's behavioral response on emergence from general anesthesia" [39956]. Sikich, N; Lerman, J. Development and psychometric evaluation of the Pediatric Anesthesia Emergence Delirium Scale. Anesthesiology 100: 1138-1145 (2004). [cited in 39956]

Pediatric Anxiety and Avoidance Scale (Best et al)
"This scale, which has 15 items, was developed for this study to assess anxiety and avoidance symptoms related to medical care in parents of childhood cancer survivors. PAAS items were derived from the Impact of Traumatic Stressors Interview Schedule." [23325]

Pediatric Asthma Quality of Life Questionnaire (Juniper et al)
"The PAQLQ is a 23-item measure of asthma-related functioning over the past 2 weeks." [82040]

Pediatric Behavior Scale (Lindgren and Koeppl)

Pediatric Cancer Quality of Life Inventory
[used but not cited in 91432]

Pediatric Early Elementary Examination (Levine)

Pediatric Emotional Distress Scale (Saylor et al)
Saylor, C F; Swenson, C C; Stokes, S J; Wirtleib, D; Casto, Y. The Pediatric Emotional Distress Scale: a brief new screening measure. Paper presented at the American Psychological Association meeting, Los Angeles, 1994. [cited in 07139]

Pediatric Examination of Educational Readiness at Middle Childhood (Levine)

Pediatric Musculoskeletal Functional Health Questionnaire
"a self-report measure of physical functioning" [25658]

UF: Pediatric Orthopedic Surgeons of North America Pediatric Musculoskeletal Functional Health Questionnaire
POSNA Pediatric Musculoskeletal Functional Health Questionnaire

Pediatric Oncology Quality of Life Scale (Goodwin et al)
"a 21-item 7-point Likert type scale, measures frequency of pediatric oncology patients' daily activities over 2 weeks" [20545]
Goodwin, D; Boggs, S; Graham-Poole, J. Development and validation of the Pediatric Oncology Quality of Life Scale. Psychological Assessment 6: 321-328 (1994). [cited in 20545]

Pediatric Orthopedic Surgeons of North America Pediatric Musculoskeletal Functional Health Questionnaire
USE: Pediatric Musculoskeletal Functional Heath Questionnaire

Pediatric Pain Coping Inventory
[used but not cited in 31564]

Pediatric Pain Disability Index (Hübner et al)
"The P-PDI assesses disability in daily activities due to pain on 12 items rated n a 5-point scale." [83656]

Pediatric Quality of Life Enjoyment and Satisfaction Questionnaire (Endicott et al)
a 17-item questionnaire "derived from the adult Quality of Life Enjoyment and Satisfaction Questionnaire" [35590]
Pediatric Quality of Life Inventory (Varni et al)

"The PedsQL measures quality of life in children ages 2 to 18." [29109]
Varni, J W; Seid, M; Kurtin, P S. The Pediatric Quality of Life Inventory, Version 4.0. Unpublished instrument, 1999. [cited in 29109]

Pediatric Risk of Mortality Scale (Pollack et al)

"The PRISM consists of commonly measured physiologic variables that reflect illness severity and allow for quantification of prognosis." [24651]

Pediatric Stressor Scale: Pediatric Intensive Care (Miles and Carter)

Pediatric Symptom Checklist (Murphy and Jellinek)

a 35-item checklist

Pedo Admitter Scale (Freund)

Peer Harassment Questionnaire (Duncan)

"The PHQ...developed for this study, was used to assess childhood bully victimization" [14819]

Peer Nomination of Aggression Inventory (Eron et al)

Peer Play Interactive Checklist (Fantuzzo and Atkins)

Peer Relations Inventory (Wolfe et al)

Wolfe, D A; Grasley, C; Wekerle, C. The Peer Relations Inventory (Wolfe et al). London, Ontario: Youth Relationships Project, Department of Psychology, University of Western Ontario, 1994. [cited in 20225]

Peer Support Scale (Ehrensaft)

"measured active seeking of support from peers for difficult experiences" [85938]

Peer Victimization Scale (Espelage and Holt)

"a 4-item scale...developed through in-depth interviews with middle school students" [81723]

Peer Victimization Scale (Neary and Joseph)

"a 6-item measure of current experience of peer-victimization designed to be immersed in the Self-Perception Profile for Children in order to reduce the saliency of the victimisation items" [22876]

Peer Victimization Scales (Perren and Alsaker)

a teacher-completed rating scale

Peer-Nominated Index of Aggression (Eron et al)

Peilingslijst Acute Stress (Van der Velden and Kleber)

UF: Acute Stress List (Van der Velden and Kleber)

PEN Inventory (Eysenck and Eysenck)

Penetration Scale (Fisher and Cleveland)

Penn Alcohol Craving Scale (Flannery et al)
“a 5-item scale that examines various aspects of alcohol cravings over the previous week” [80154]

Penn Helping Alliance Scales (Alexander and Luborsky)

Penn Inventory for Posttraumatic Stress Disorder (Hammarberg)

Penn State Worry Questionnaire (Meyer et al)

Penn/RESIST/Peradeniya War Problems Questionnaire

Pennebaker Inventory of Limbic Languidness (Pennebaker)

Pennebaker Trauma Narrative
"asks participants to write about the most upsetting experience of their lives" [85890]

Pentagon Post Deployment Health Assessment
Hoge, C W; Engel, C C; Orman, D T; Crandell, E O; Patterson, V J; Cox, A L; Tobler, S K; Ursano, R J. Development of a brief questionnaire to measure mental health outcomes among Pentagon employees following the September 11, 2001 attack. *Military Medicine* 167(Supplement 4): 60-63 (2002). [25028]

People in My Life (Gifford-Smith)
"The PML is a 30-item, self-report measure that was derived from a longer version of the measure." [83718]
Gifford-Smith, M. People in My Life: Grade 4, Year 5. [cited from online source in 83718]

People in My Life (Neeman and Harter)
USE: Self Perception Profile for College Students (Neeman and Harter)

Per-Mag
[used but not cited in 90446]

Perceived Ability to Cope With Trauma Scale (Bartone et al)
"a brief questionnaire...with 2 scales that measure the perceived ability to focus on processing the trauma (trauma focus) and to focus on moving beyond the trauma (forward focus)” [85145]

Perceived Adequacy of Resources Scale (Rowland et al)

Perceived and Desired Help Scale (Cigoli et al)
a 14-item scale that "measures the woman's perception of received and desired support by significant people” [40658]
Cigoli, V; Gilli, G M; Molinari, E; Saita, E. *Perceived and Desired Help Scale - ISU*. Milan, in press. [cited in 40658]

Perceived Available Instrumental and Emotional Support Scale (Florian et al)

Perceived Barriers and Stigma Scale (Britt)
"13 items designed to examine barriers to care among OEF and OIF veterans” [83688]

Perceived Benefit Measure (Harville et al)
Perceived Benefit Scales (McMillen and Fisher)
"measures...the different types of self-reported positive life changes that occur after negative events" [20557]

Perceived Benefits and Costs Questionnaire (Cheng et al)

Perceived Benefits/Limitations of Genetic Testing for PTSD (Meiser et al)
"This is a 19-item measure on which participants rated the importance of several potential implications of genetic testing on a 5-point scale..." [39595]

Perceived Burden Scale (Peak)
"a new scale designed to assess the degree of burden that a person perceives themselves to be" [93166]
Peak, N J. Depression, hopelessness, and perceived burden: suicidal tendencies in depressed patients. Ph.D. dissertation, Case Western Reserve University, 2011. [93166]

Perceived Collective Family Efficacy Scale (Bandura)

Perceived Community Cohesion Scale (Lev-Wiesel)
a 67-item scale originally developed in Israel [82165]

Perceived Competence Scale for Children (Harter)
USE: Self-Perception Profile for Children (Harter)

Perceived Competencies Scale (Lund et al)

Perceived Consequences of Domestic Violence Scale (Walker et al)
"The PCDVQ was developed specifically for this study. It includes 27 items that assess the IPV perpetrators perceptions of the consequences resulting from his abuse, including psychological and interpersonal effects, and interference with work or school, health, and family." [86665]
Walker, D D; Neighbors, C; Mbilinyi, L F; O'Rourke, A; Zegree, RJ; Roffman, R A; et al. Evaluating the impact of intimate partner violence on the perpetrator: the Perceived Consequences of Domestic Violence Scale (PCDVQ). Journal of Interpersonal Violence 25: 1684-1690 (2010). [cited in 86665]

Perceived Consequences Questionnaire (Perry et al)
Perry, D G; Perry, L C; Rasmussen, P. Cognitive social learning mediators of aggression. Child Development 57: 700-711 (1986).

Perceived Control Over Illness Questionnaire (Affleck et al)
7 items assessing "sense of control through sense and sense of control through the help of others" [40581]

Perceived Control Over Internal States Scale (Pallant)
"an 18-item measure of perceived control over internal experiences" [36450]

Perceived Control Over Stressful Events Scale (Frazier et al)
Frazier, P; Keenan, N; Anders, S; Perera, S; Shalcross, S; Hintz, S. Perceived Control Over Stressful Events Scale: development and initial validation. Unpublished manuscript, University of Minnesota, 2010. [cited in 84954]

Perceived Control Questionnaire (Chisholm et al)
"The PCQ was devised for the study [to measure] perceived control during a psychotic episode." [32492]

Perceived Control Scale (Fleming et al)
Perceived Control Scale (Wallston)
    a 6-item scale measuring “perceptions of control in a health care setting” [22242]

Perceived Control Scale (Weisz et al)
    “used to measure perceived control, defined as the belief that one is able to obtain a desired or to avoid an undesired outcome” [25706]

Perceived Controllability Scale (Kushner et al)

Perceived Criticism Measure (Hooley and Teasdale)

Perceived Devaluation/Discrimination Scale (Link et al)

Perceived Discrimination Scale (Taylor and Turner)
    “a 9-item scale…to assess discrimination toward family members” [32661; Scale not named, name assigned by PILOTS Database staff]

Perceived Discrimination Scale (Williams et al)
    “The scale consisted of 9 items” [29925]

Perceived Disease Impact Scale (Van Gestel et al)
    “a newly developed instrument to measure the influence of illness on [20] life domains” [32531]

Perceived Disruption During Rebuilding Inventory (Burnett et al)
    Burnett, K; Ironson, G; Benight, C; Wynings, C; Greenwood, D; Carver, C S; Crueess, D; Baum, A; Schneiderman, N. Measurement of perceived disruption during rebuilding following Hurricane Andrew. Journal of Traumatic Stress 10: 673-681 (1997). [13777]

Perceived Emotional Closeness with Perpetrator Scale (Schultz et al)

Perceived Ethnic Discrimination Questionnaire (Contrada et al)
    “The PDEQ is a 22-item self-report measure designed to assess the frequency of various acts of ethnic discrimination.” [34591]

Perceived Exertion and Pain Scales (Borg)

Perceived Family Interaction Scale
    [used but not cited in 03313]

Perceived Health Competence Scale (Smith et al)
    “An 8-item instrument [that] assesses perceived self-efficacy towards positive health outcomes” [36561]

Perceived Immigration-Related Stressors Scale (Ritsner et al)
    “consists of 15 items that describe sources of adjustment difficulties encountered by immigrants to Israel” [22756]

Perceived Impact of Cancer on Developmental Tasks (Schwartz and Diener)
    “This 5-item measure was designed for this study” [27309]
Perceived Need for Care Questionnaire (Meadows et al)

"The PNQ assessed whether a respondent perceived a need for or received help for problems with emotions, mental health, or use of alcohol or drugs in the past year." [29760]

Perceived Negative Spouse Behaviors Scale (Manne et al)

"composed of 13 items...focusing specifically on interchanges relevant to cancer treatment" [21662]

Perceived Neighborhood Disorder Scale (Ross and Mirowsky)

"a 15-item measure of physical and social disorder" [82346]

Perceived Neighborhood Scale (Martinez)

"The PNS lists 17 positive and 11 negative characteristics of the neighborhood." [18787]

Perceived Organizational Support Scale (Lynch et al)

Perceived Parenting Support Scale (Thabet et al)

"The PPBS includes 50 items rated by children." It is derived from Mohammed’s Parenting Support Scale. [33432]

Perceived Personal Efficacy for Members of Volunteer Associations (Barbaranelli and Capanna)

"The instrument contains 18 items, assessing the extent to which members of associations feel capable facing the challenges arising from their volunteer work." [83901]

Perceived Personal Meaning Scale (Wong)

"participants rate 5 items regarding their life meaning" [85943]

Perceived Physical Threat Scale (Dunmore et al)

"This [2-item] measure was used to ask participants about the extent to which he believed he would be seriously injured at the time of the assault." [29384]

Perceived Posttrauma Stress Symptoms Scale (Sahin et al)

"a 30-item scale developed by the researchers...designed to assess posttraumatic stress symptoms in children as perceived by their parents" [80934]

Perceived Preparedness for Re-entry Scale (Jones et al)

"PPRS was adapted from Stanton and Ganz et al and was developed specifically for the current study. It consists of 4 questions...to assess how well prepared women feel about their recovery." [83936]

Perceived Problems in School Performance Scale (Stuvland)

USE: Psychosocial Assessment Battery (Stuvland)

Perceived Quality of Leadership Index

"Nine variables...describing how the individual had perceived the quality of leadership in his unit, were...used to create a Perceived Quality of Leadership Index” [16612]
Perceived Relationship Quality Components Scale (Fletcher et al)
"This 18-item scale measures 6 components of relationship quality: closeness, intimacy, passion, love, trust, and satisfaction." [86222]

Perceived Resources Scale (Hochwarter et al)
"a 6-item scale" [31247]

Perceived Risk Questionnaire (Beehler)

Perceived Risk Scale (Vaughan)
[used but not cited in 24680]

Perceived Romantic Relationship Efficacy Questionnaire (Lassri and Shahar)
"an adaptation of [Bandura's] Perceived Collective Family Efficacy Scale" [39422]
Lassri, D; Shahar, G.  Self-criticism mediates the link between childhood emotional maltreatment and young adults' romantic relationships.  *Journal of Social and Clinical Psychology* 31(3): 289-311 (2012).  [39422]

Perceived Safety Scale
[used but not cited in 25863]

Perceived SARS-Related Risk Scale (Wu et al)
a 10-item questionnaire
Wu, P; Fang, Y; Guan, Z; Fan, B; Kong, J; Yao, Z; Liu, X; Fuller, C J; Susser, E; Lu, J; Hoven, C W.  The psychological impact of the SARS epidemic on hospital employees in China: exposure, risk perceptions, and altruistic acceptance of risk.  *Canadian Journal of Psychiatry* 54: 302-311 (2009).  [32755]

Perceived Self-Efficacy in Combat Scale (Solomon et al)

Perceived Self-Efficacy Scale (Bandura)

Perceived Self-Efficacy Scale (Cowen et al)
"This scale consists of 20 items measuring children’s perception of their ability to cope with situations of daily living." [23718]

Perceived Sexual Control Inventory (Exner et al)
"the PSC is a 20-item measure developed to assess perceptions of control over sexual risk behaviors and sex drive." [83829]

Perceived Social Image Damage Scale (Evans et al)
The PSC was developed for the purposes of the present study and assessed the extent to which the participant felt diminished as a result of the victim's actions immediately before the assault, particularly with respect to undermining the image that he perceived that others held of him." [29384]

Perceived Social Support Questionnaire (Guay and Miller)
"a self-administered questionnaire in French adapted from the Perceived Supportive Spouse Behaviors and Perceived Negative Spouse Behaviors scales [of Manne et al]" [83624]

Perceived Social Support Scale (Durakovic-Belko et al)
based on the Survey of Children's Social Support (Dubow and Ullman)

Perceived Social Support Scale (Fitzpatrick and Wilson)

Perceived Social Support Scale (Fleming et al)

Perceived Social Support Scale (Kaniasty)
[used but not cited in 81625]

PILOTS Database Instruments Authority List 373
Perceived Social Support Scale (Raboteg-Saric et al)
"This scale is an adaptation of the scale by Simons et al. It consists of 11 items describing the availability of various forms of social support in a person's environment." [36059]

Perceived Social Support Scale (Vaitkus and Griffith)
"A 10-item scale was used to assess perceived social support from unit members and unit leaders..." [31301]

Perceived Social Support Scale for Children (Arambasic et al)
"a 20-item self-report...used to assess youngsters' perception of available assistance and support from others in different situations" [25374]
UF: Ljestvica Percipirane Socijalne Podsrske za Djecu (Arambasic et al)

Perceived Social Support Scales (Procidano and Heller)

Perceived Stigma and Barriers to Care for Psychological Problems (Hoge et al)
"This instrument assesses stigma (6 items) and obstacles that prevent or dissuade individuals from seeking mental health treatment (5 items)." [33318]

Perceived Stigmatization Questionnaire (Lawrence et al)
"The PSQ is a 21-item measure designed to measure stigmatizing behaviors often reported by people with visible distinctions." [36807]
Lawrence, J W; Fauerbach, J A; Heinberg, L; Doctor, M; Thombs, B D. The reliability and validity of the Perceived Stigmatization Questionnaire (PSQ) and the Social Comfort Questionnaire (SCQ) among an adult burn survivor sample. Psychological Assessment 18: 106-111 (2006). [cited in 36807]

Perceived Stress Questionnaire (Levenstein et al)
"a measure of overall stress [comprising] 30 items constituting 7 subscales" [31079]

Perceived Stress Questionnaire for Young Women (Women's Health Australia)

Perceived Stress Scale (Cohen et al)

Perceived Stressfulness of Disaster Experiences (Raphael et al)
UF: Scale for Rating the Dimensions of the Disaster According to Their Perceived Stressfulness

Perceived Support Network Inventory (Orit et al)

Perceived Tolerance of Sexual Harassment in the Military Scale (Murdoch et al)
6 items that "evaluated respondents' perceptions of local work norms toward sexual harassment" [35511]

Perceived Well-Being Scale (Reker and Wong)
"a 16-item measure of psychological, physical, and general well-being" [17122]

Percent Back To Normal Rating Scale (Powell et al)

Perception of Care Questionnaire (Fisher)
Perceptions of Helplessness Questionnaire (Joseph et al)
4 items

Perception of Implementation Practices Scale (Hunter Williams et al)
an 11-item scale that "refers to service members' perceptions of the military's efforts to enforce policies and procedures related to sexual harassment" [25201]

Perception of Labour and Delivery Scale (Czarnocka and Slade)
"covering appraisals of perinatal experience" [31028]

Perception of Mental Illness Questionnaire (Ganesan et al)
[questionnaire not named in source article; name assigned by PILOTS Database staff]
A "semi-structured questionnaire investigating patients; attitudes towards mental health and mental health treatment used at the Vancouver General Hospital cross-cultural psychiatry outpatient clinic" [39596]
Ganesan, S; Mok, H; McKenna, M. Perception of mental illness; preliminary exploratory research at a cross-cultural outpatient psychiatric clinic. *International Journal of Social Psychiatry* 57(1): 81-89 (2011). [39596; the Questionnaire appears on p. 89]

Perception of Procedures Questionnaire (Kazak et al)
"a 19-item, 7-point Likert-type scale consisting of five subscales" [23325]

Perceptions About Hazardous Substances Questionnaire (Rubin et al)

Perceptions of Bereavement Questionnaire (Burnett et al)
Burnett, P; Middleton, W; Raphael, B; Dunne, M; Moylan, A; Martinek, N. Concepts of normal bereavement. *Journal of Traumatic Stress* 7: 123-128 (1994). [11911; the Questionnaire appears on pp. 127-128]

Perceptions of Care and Safety Questionnaire (Grubaugh et al)
"This 5-item instrument, which was developed for this study, assessed perceptions of psychiatric care and safety in the psychiatric setting and aspects of communication with psychiatric staff." [30661]
Grubaugh, A L; Frueh, B C; Zinzow, H M; Cusack, K J; Wells, C B. Patients' perceptions of care and safety within psychiatric settings. *Psychological Services* 4: 193-201 (2007). [30661]

Perceptions of Care Questionnaire (Lee et al)

Perceptions of Childhood Dissatisfaction Scale (Hojat et al)
a 9-item self-report [on] dissatisfaction with parents, perceptions of peer relationships, and perceptions of critical evaluations received from school [28521]

Perceptions of Computerized Therapy Questionnaire (Carper et al)
"The PTCQ are 39- (patient version) and 45-item (clinician version) self-report questionnaires designed to assess patient and clinician perception of computer-based psychological treatments in accordance with Diffusion of Innovations theory." [40328]
Carper, M; McHugh, R K; Barlow, D H. Development and initial validation of the Perceptions of Computerized Therapy Questionnaire. Presented at a symposium on "Dissemination and Implementation of Computerized CBT" conducted at the 44th annual convention for the Association for Behavioral and Cognitive Therapies, San Francisco, 2010. [cited in 40328]

Perceptions of Past Parenting Scale
[used but not cited in 92110]

Perceptions of Prevalence and Aggression Scale
"The POPAS assesses exposure to 16 different items of aggression, including passive-aggressive and self-directed aggressive behaviours." [32016]

Perceptions of September 11 Scale (Linley et al)
"To assess participants' perceptions of the terrorist attacks of September 11, we developed a pool of 18 items designed to measure three broad perceptions that were prevalent in the immediate aftermath of the terrorist attacks." [14537]
Perceptions of Stigmatization by Others for Seeking Help

"The PSOSH is a 5-item scale that assesses anticipated enacted stigma from others for seeking psychological help." [87375]

Perceptions of Support Questionnaire (Morrison and Clavenna-Valleroy)

"developed specifically for this study" [14726]

Perceptual Alteration Scale (Sanders)

Perceptual Distortions Scale [used but not cited in 90123]

Perfectionism Scale (Burns)

PERI USE: Psychiatric Epidemiology Research Interview (Dohrenwend)

Perinatal Grief Scale [used but not cited in 01216]

Perinatal Grief Scale (Toedter et al)

"a measuring instrument for grief after termination of pregnancy or the birth of a stillborn child" [27748]

Perinatal Loss Interview (Bennett et al)

a "45-60-minute semistructured phone interview" [82332]

Bennett, S M; Sarnott-Lee, B; Litz, B T; Maguen, S. The Perinatal Loss Interview. Unpublished semistructured assessment interview, 2003. [82332]

Perinatal Psychosocial Profile (Brown)

Perinatal PTSD Questionnaire (Hynan)

"developed...to quantify symptoms of PTSD specifically related to childbirth" [83222]

Perinatal Risk Assessment Monitoring Survey

"an epidemiologic surveillance instrument created by the Centers for Disease Control and Prevention" [33411]

Perinatal Risk Inventory (Scheiner and Sexton)

Perinatal Self-Care Index (Roller)

a 7-item "trauma-informed health behavior index" [39962]

Perinatal Stress Survey [used but not cited in 08322]

Peritraumatic and Posttraumatic Emotions Questionnaire (Stein et al)

"The PTEQ is a self-report measure that was adapted from the Standardized Trauma Interview." [39846]

Stein, N R; Mills, M A; Arditte, K; Mendoza, C; Borah, A M; Resick, P A; Litz, B T; STRONG STAR Consortium. A scheme for categorizing military events. Behavior Modification 36: 787-8907 (2012). [39846]

Peritraumatic Autonomic Activation Scale

"10 items...taken and modified from the Potential Stressful Events Interview" [25659] [used but not cited in 25659]
Peritraumatic Dissociation Questionnaire (Johansen and Weisäeth)

"A 7-item self-report measure of dissociative experiences during the violent exposure. The questionnaire was developed specifically for this study by two of the authors. The items were inspired by the Peritraumatic Dissociative Experiences Questionnaire - Rater Version (PDEQ) and the Dissociative Experiences Scale (DES)." [30072]

Peritraumatic Dissociative Experiences Questionnaire (Marmar and Weiss)

UF: Immediate Reactions and Experience Questionnaire (Marmar and Weiss)

Peritraumatic Distress Inventory (Brunet et al)

"a 13-item self-report measure...to obtain a quantitative measure of the level of distress experienced during and immediately after a traumatic event" [23546]

Peritraumatic Emotional Distress Scale (Marmar et al)

"a 23-item questionnaire" [12850]; an 8-item self-report version is described and used in [07453]

Peritraumatic Emotions List (Van der Velden et al)

"a standardized list with 10 emotions that can be scored on a 5-point Likert scale" [19594]

Peritraumatic Emotions Questionnaire (Halligan et al)

"asks participants to rate the extent to which they experienced each of 15 different negative emotions during the accident and until help arrived: '28842"

Peritraumatic Response Scale (Pfefferbaum et al)

"adapted from scales developed by Freedy and colleagues and by Wang and colleagues, included 12 items addressing the participants' peritraumatic responses of fear, arousal, and dissociation at the time of the incident" [24644]

Peritraumatic Somatoform Dissociation Questionnaire (Nijenhuis and Van der Hart)

"The SDQ-P is a newly constructed self-report questionnaire that evaluates somatoform manifestations of dissociation during or immediately following an overwhelming event. The items were derived from clinical observations, clinical reports in the literature, and the SDQ-20 [Somatoform Dissociation Questionnaire], which assesses the severity of current somatoform dissociation." [16369]

[cited in 16369 as "unpublished document"]

Permissiveness of Parent-Child Sexual Boundary Scale

[used but not cited in 92552]

Perpetration and Victimization Survey (Finkelhor)

"19 questions concerning any sexual experiences that may have occurred prior to the age of 16 years" [17918]

Perpetration History (Lisak et al)

USE: Personal History Questionnaire (Lisak et al)

Perpetration of Sexual Harassment Index (Fineran and Bolen)

"12 questions inquired about frequency of sexual harassment perpetration" [80589]

Persecution and Maltreatment Checklist (Maercker et al)

Perseverative Thinking Questionnaire (Ehring)

"The PTQ-T consists of 15 items assessing the repetitiveness, intrusiveness, difficulties to disengage, and unproductiveness of recurrent negative thinking, as well as the degree to which rumination captures mental capacity." [32151]

**Personal Spirituality Inventory (Devine)**

**Personal Strain Questionnaire (Osipow and Spokane)**

**Personal Strain Questionnaire (Osipow and Spokane)**
USE: *Occupational Stress Inventory (Osipow and Spokane)*

**Personal Stress Scale (Rosen et al)**

"This scale was based on 11 items...that dealt with family problems, interpersonal difficulties among soldiers, morale problems, and lack of recreation." [21767]

**Personal Stress Symptom Assessment (Numeroff)**

**Personal Style Inventory (Robins et al)**

"The PSI-II is a 48-item, self-report measure of sociotropy and autonomy." [26789]

**Personal Styles Inventory (Kunce et al)**
[used but not cited in 90526]
Personal Trauma (Self) Scale (McCormack)
a 4-question scale “to identify traumatic life events that might have an impact on the outcome of current or general psychological distress occurring before and after Vietnam” [83658]

Personal Views Survey (Bartone et al)
45 items

Personal Views Survey (Kobasa)
"50-item, revised hardiness protocol developed by Kobasa” [22752]

Personal Adjective Check List (Strack)
"a 153-item adjective checklist, self-report measure of Millon’s eight basic personality styles developed to assess normal personality” [08221]

Personal Assessment Form (Shea et al)

Personal Assessment Inventory (Morey)

Personal Assessment Inventory-2 (Morey)
"a 344-item inventory consisting of 4 validity scales and 18 non-overlapping clinical scales [one of which is] the Traumatic Stress (ARD-T) subscale” [21710]

Personal Assessment Questionnaire (Rohner et al)
"This instrument comprises 42 items, categorized into 7 scales…” [84036]
[used but not clearly cited in 84036]

Personal Assessment Schedule (Tyrer et al)

Personal Assessment Screener (Morey)
"The PAS…consists of 22 items, each assessing the degree to which a particular symptom has caused discomfort in the respondent.” [82049]

Personality Attributes Questionnaire
USE: Personal Attributes Questionnaire (Spence and Helmreich)

Personality Diagnostic Questionnaire (Hyler et al)
Hyler S E; Rieder R; Spitzer R L; et al. Personality Diagnostic Questionnaire (PDQ). New York: New York State Psychiatric Institute, Biometrics Research Division, 1978. [apa]
UF: PDQ
Personality Disorder Questionnaire (Hyler and Rieder)

Personality Disorder Examination (Loranger et al)

Personality Disorder Interview (Widiger et al)
a semistructured interview
Widiger, T A; Mangine, S; Corbitt, E M; Ellis, C G; Thomas, G V. Personality Disorder Interview IV: A Semi-structured Interview for the Assessment of Personality Disorders. Odessa, Florida: Psychological Assessment Resources, 1995. [cited in 31367]

Personality Disorder Questionnaire (Hyler and Rieder)
USE: Personality Diagnostic Questionnaire (Hyler et al)

Personality Inventory (Bernreuter)
USE: Personal Inventory (Bernreuter)
Personality Inventory for Children (Wirt et al)

Personality Inventory for Youth
[used but not cited in 91224]

Personality Research Form (Jackson)

UF: Hostility Questionnaire (Jackson)

Personality Structure Questionnaire (Pollock et al)
"a measure of identity disturbance of personality" [19591]

Personality Type D Scale (Denollet)
a 16-item scale measuring negative affectivity and social inhibition [25435]

Persönlichkeitsfragebogen für Jugendliche (Schmeck et al)
USE: Junior Temperament and Character Inventory

Perspectives on Addressing Trauma Symptoms Scale (Tarakeshwar et al)
"The [11-item] PATS measures distinct positive and negative trauma perspectives." [85253]

Pet Attachment and Life Impact Scale (Cromer and Freyd)
"The PALS is a 30-item, 5-point Likert-type scale measuring relational and emotional attachment to pets as well as negative impacts of pets on people's lives." [39379]
Cromer, L D; Freyd, J J. Stuffed animals, pets, and dissociation. Poster presented at the American Association for the Advancement of Science annual conference, Seattle, February 2004. [cited in 39379]

Pet Attachment Survey (Gosse)
"The PAS is an 11-item measure assessing the strength of attachment the participant has to his or her deceased pet." [85942]

PET Scale (Baldry)
USE: Physical and Emotional Tormenting Against Animals Scale (Baldry)

Petersen Pubertal Development Scale (Petersen et al)

PG-13 (Prigerson et al)
"The PG-13 is a structured diagnostic interview that assesses 11 potential prolonged grief disorder symptoms in the previous month." [35915]

PGC Morale Scale (Lawton)

UF: Morale Scale (Lawton)
Philadelphia Geriatric Center Morale Scale

PGI Health Questionnaire (Verma)
Phan Vietnamese Psychiatric Scale
"a questionnaire derived from a qualitative study that was undertaken in Vietnamese refugees to identify culturally relevant idioms and expressions of psychological distress" [25168]

PHCSC
USE: Piers-Harris Children's Self-Concept Scale (Piers and Harris)

Phenomenology of Consciousness Inventory (Pekala)

Philadelphia Family Management Study Caregiver Interview Schedule

Philadelphia Geriatric Center Morale Scale
USE: PGC Morale Scale (Lawton)

Philadelphia Head Injury Questionnaire (Curry et al)

Phillips Dissociation Scale (Phillips)
Phillips, D W. Initial development and validation of the Phillips Dissociation Scale (PDS) of the MMPI. Dissociation 7: 92-100 (1994). [08127; the Scale appears on p. 94]

Phillips Social Participation Index (Phillips)

Phobia Checklist (Fredrikson et al)
"based on the DSM-IV-TR criteria for specific phobia" [32179]

Phobic Stimuli Response Scales (Cutshall and Watson)

Phone Screen
"This 18-item measure was administered via telephone..." [36157]

Physical Abuse Questionnaire (Demaré)
USE: Childhood Maltreatment Questionnaire (Demaré)

Physical Abuse Record (Beck-Sander)

Physical Abuse Scale (Grossman et al)
"developed for this project" [16256]

Physical Activity Scale for the Elderly (Washburn et al)
"The PASE is a [10-item] measure of self-reported physical activity in older adults." [35892]

Physical and Emotional Tormenting Against Animals Scale (Baldry)
"the [9-item] scale measures two aspects of animal abuse: (a) direct physical and emotional animal abuse inflicted by youth against animals and (b) exposure to animal abuse committed by peers or adults." [17346]
UF: PET Scale (Baldry)

Physical and Neurological Examination for Subtle Signs (Denckla)
Physical and Sexual Abuse Questionnaire (Nagata et al)
"a self-reporting questionnaire...used to assess abuse histories...of child abuse victims in Japan" [21671]
[21671]

Physical and Sexual Assault Experiences Interview (Jacobson et al)
Jacobson, A; Richardson, B; Simon, J; et al. *Physical and Sexual Assault Experiences Interview*. Seattle: University of Washington Medical Center, 1984. [cited in 11663]
UF: Sexually Assaulted as a Child Inventory

Physical Appearance Comparisons Scale (Thompson et al)
"The PACS uses 5-point Likert scales...to assess frequency of engagement in body comparisons." [82316]

Physical Appearance State and Trait Anxiety Scale (Reed et al)
"a 16-item scale that measures anxiety ratings for eight weight-related and eight nonweight-related body sites" [21580]

Physical Child Maltreatment Questionnaire (Zelikovsky and Lynn)
"The PhyMQ consists of eight subscales describing eight parental behaviors that might be considered physically abusive" [17032]
[used but not cited in 17032]

Physical Force Experiences As a Child (Carlson et al)
derived from the Physical Violence Scale of the Conflict Tactics Scales

Physical Health Assessment (Ertl et al)
"developed for the study" [34436]

Physical Health Index (Murphy)
Murphy, S. Coping with stress following a natural disaster: the volcanic eruption of Mt. St. Helens. Doctoral dissertation, Portland State University, 1982. [cited in 02865]

Physical Health Questionnaire (Schat et al)
"The PHQ is a 14-item self-report scale of somatic symptoms." [37607]

Physical Status Questionnaire (Herczeg Institute on Aging)
"a self-report questionnaire...listing 18 chronic physical illnesses" [30724]
[used but not cited in 30724]

Physical Health Symptoms Questionnaire (Greenberg et al)
a 36-item questionnaire that "assesses health complaints pertaining to upper respiratory, muscular, and gastrointestinal symptoms during the past 2 weeks" [35530]

Physical Injury Severity Scale (Saunders)
"The scale was developed from ratings of battered women's injuries made by emergency room nurses." [05868]

Physical Punishment Questionnaire (Lisak et al)
USE: Personal History Questionnaire (Lisak et al)

Physical Punishment Questionnaire (Berger et al)

Physical Reactions Scale (Falsetti and Resnick)
Falsetti, S A; Resnick, H S. *Physical Reactions Scale*. Charleston: Crime Victims Research and Treatment Center, Medical University of South Carolina, 1992. [cited in 13778]

Physical Risk Assessment Inventory (Llewellyn)
"a 20-item scale that addresses an individual's attitudes regarding the level of physical risk associated with several risky behaviours" [83486]
Physical Self-Efficacy Scale (Ryckman et al)

Physical Self-Maintenance Scale (Lawton and Brody)
"a disability measure for use in planning and evaluating treatment for elderly people living in the community or in institutions"
[mh 73-75]

Physical Symptom Checklist (Bartone et al)
USE: Health Symptom Checklist (Bartone et al)

Physical Symptom Checklist (Norris et al)
"a scale that has 35 items on a five-point response format, each of which asks about the presence and severity of a symptom or problem during the previous month...adapted from Leventhal and colleagues" [20272]

Norris, F H; Murphy, A D; Baker, C K; Perilla, J L. Severity, timing, and duration of reactions to trauma in the population: an example from Mexico. Biological Psychiatry 53: 769-778 (2003). [cited in 20272]

Physical Symptom Checklist (Timms and Connors)
"a list of physical symptoms common to women with an abuse history" [28408]

Physical Symptom Index (Moos et al)
USE: Health and Daily Living Form (Moos et al)

Physical Symptom Questionnaire (Farley and Keaney)

Physical Symptom Scale (Pennebaker)

Physical Symptoms and Conditions Checklist (King et al)
"Lists of 27 symptoms and 25 conditions were compiled [for this study]." [28922; instrument not named in text; name assigned by PILOTS Database staff]

Physical Symptoms Checklist (Leventhal et al)

Physical/Sexual Abuse Survey (Sells et al)
"The PSAS is a 12-item self-report questionnaire that was constructed specifically for this project." [26049]

Sells, D; Styron, T; Shahar, G; Chinnab, M; Davidson, L. Predictors of community adjustment in a sample of patients with severe mental illness. Manuscript submitted for publication, June 2002. [cited in 26049]

Physician Back Pain Checklist (Pecukonis)
used “to identify subjects who are experiencing chronic intractable back pain” [21432]

Physician Withdrawal Checklist (Rickels et al)

Physicians’ Outpatient Psychopathology Scale (Spencer et al)

Physiological Reactivity and Stress Scale (Tucker et al)
"11 items assessing emotional and physiological reactions" [22922]

Pictorial Representation of Illness and Self-Measure (Buchi et al)

UF: PRISM (Buchi et al)

Pictorial Scale of Perceived Competence and Social Acceptance for Young Children (Harter and Pike)

Picture Attribution Test (Bugental et al)

"The PIXAT's interview format involves questions concerning the causes of conflictual interaction between parents and children. Children are presented with cartoon pictures that depict a problem in a family followed by cartoon pictures that depict a solution." [16466]

Picture IQ Test (Saleh)

USE: Saleh Picture IQ Test

Picture Word Memory Test (Jelinek et al)

"a task similar to the Auditory Verbal Learning Test" [33253]

PIE

USE: Profile Index of Emotions

Piedmont Health Survey

Regier, D A; Farmer, M E; Rae, D S; et al. Comorbidity of mental disorders with alcohol and other drug abuse: results from the Epidemiologic Catchment Area (ECA) study. JAMA 264: 2511-2518 (1990). [cited in 29226]

The Way I Feel About Myself

Pilot Repulsion Questionnaire (Vogt)

USE: Pilotekelfragebogen (Vogt)

Pilotekelfragebogen (Vogt)

UF: Pilot Repulsion Questionnaire (Vogt)

Pitt Depression Inventory (Pitt)

"a [24-item] self-report instrument patterned after the Hamilton Depression scales and used widely in Great Britain and its former colonies" [23236]

Pittsburgh Insomnia Rating Scale

Pittsburgh Occupational Exposure Test (Ryan et al)

Pittsburgh Sleep Diary (Monk et al)

Pittsburgh Sleep Quality Index (Buysse et al)

**Pittsburgh Sleep Quality Index Addendum for PTSD (Germain et al)**

"a self-report instrument designed to assess the frequency of seven disruptive nocturnal behaviors" [26816]

Germain, A; Hall, M; Krakow, B; Shear, M K; Buysse, D J. A brief sleep scale for posttraumatic stress disorder: Pittsburgh Sleep Quality Index Addendum for PTSD. *Journal of Anxiety Disorders* 19: 233-244 (2005). [26816; the Addendum appears on p. 242]

**Pittsburgh War Stress Survey (Perconte et al)**

"a self report inventory created specifically for this group"

Perconte, S; Wilson, A; Pontius, E; Dietrick, A; Kirsch, C; Sparacino, C. Unit-based intervention for Gulf War soldiers surviving a SCUD missile attack: program description and preliminary findings. *Journal of Traumatic Stress* 6: 225-238 (1993). [11490]

**PK Scale**

USE: MMPI-PTSD Subscale (Keane et al)

**Plastic Surgery Questionnaire (Borah et al)**

A two-part survey instrument measuring common physical and postoperative complications and prevalence rates (Negative Outcomes—Postoperative Complications Rating Scale), and how surgeons weighed a patient’s history of psychological disease or previous mental trauma (Presurgical Psychosocial Screening Scale).

**Play Performance Scale (Lansky et al)**

Lansky, S B; List, M A; Lansky, L L; Ritter, S A; Leon, J M; Lipsett, P M. Use of a self report measure of stressors, general stress level, burnout, stress outcomes, performance level, and demographics and job characteristics [30079]

**Police Incident Survey (BCOPS)**

*contained a list of traumatic situations usually found in police work* [29094]

**Police Officer History Questionnaire**

[used but not cited in 90093]

**Police Perception Survey (Harvey-Lintz and Tidwell)**

"developed to explore what LAPD officers perceive as the LAPD role in the April/May 1992 Los Angeles unrest" [08896]

**Police Performance Scale (Murphy)**

**Police Stress and Burnout Interview (Malach-Pines and Keinan)**

*a self-report measure of stressors, general stress level, burnout, stress outcomes, performance level, and demographics and job characteristics [30079]*

**Police Stress and Burnout Questionnaire (Malach-Pines and Keinan)**

"In the structured interview, [police] officers described the most significant aspects of their work and the most traumatic experience they had." [30079]

Police Stress and Coping Questionnaire (Patterson)
“developed for use in this study” [16834]

Police Stress Inventory (Lawrence)

Police Stress Survey (Spielberger et al)
Spielberger, C D; Westberry, L G; Grier, K S; Greenfield, G. The Police Stress Survey: Sources of Stress in Law Enforcement. Tampa: Human Resources Institute, 1981. [cited in 03816]

Policing Events Scale
“a 28-item checklist of operational policing tasks” [40312]
[used but not clearly cited in 40312]

Political Activity Scale (Punamäki et al)
an unnamed instrument [name assigned by PILOTS database] “developed for the purpose of the study” [21451]

Political Alienation Scale (Olsen)

Political Ideology Questionnaire (Shechner et al)
"This questionnaire was constructed for the present study...Participants noted their level of agreement with 17 statements aimed at revealing political attitudes particularly relating to the Israeli-Palestinian conflict...” [29819]

Political Life Events Scale (Slone)
“containing 20 items that participants were requested to mark for exposure over the past 6 months” [82138]
Slone, M. construction of a Political Life Events Scale. Unpublished manuscript, Tel Aviv University, 1997. [cited in 82138]

Political Terror Scale
“a country level measure of political violence compiled from human rights reports” [39138]
[cited only as web document in 39138]

Political Violence Inventory (Haj-Yahia)
40 items

POLO-Chart
USE: Polytrauma Outcome Chart (Pirente et al)

Polytrauma Outcome Chart (Pirente et al)
"a modular instrument for the assessment of health-related quality of life” [31565]
Pirente, N; Bouillon, B; Schäfer, B; Raum, M; Helling, H-J; Berger, e; Neugebauer, E. Systematische Entwicklung eines Messinstruments zur Erfassung der gesundheitsbezogenen Lebensqualität beim polytraumatisierten Patienten: die Polytrauma-Outcome- (POLO-) Chart. Unfallchirurg 105: 413-422 (2002). [31565; the POLO-Chart appears on supplementary online pp. L423-L440]
UF: POLO-Chart

POMS
USE: Profile of Mood States (McNair et al)

POPS
USE: Physicians’ Outpatient Psychopathology Scale (Spencer et al)

Pornography Exposure/Use Interview (Leguizamo)
[instrument not named in article; name assigned by PILOTS Database staff]
"These questions evaluate the frequency of childhood and adolescent exposure/use of several types of pornography...”

Porteus Maze Test
USE: Maze Test (Porteus)

Portland Digit Recognition Test (Binder)
Portrait Values Questionnaire (Schwartz et al)
"The PVQ comprises 40 items grouped into 10 scales. Each item describes a person in two sentences ('portrait'). Respondents are asked to assess how similar to the portrait person they are." [33822]
Schwartz, S H; Melech, G; Lehmann, A; Burgess, S; Harris, H; Owens, V. Extending the cross-cultural validity of the theory of basic human values with a different model of measurement. Journal of Cross-Cultural Psychology 35: 519-542 92001). [cited in 33822]

Positive and Negative Affect Schedule (Watson et al)
UF: PANAS Scales

Positive and Negative Consequences of War Questionnaire (Krizmanic and Kolesaric)
"comprises 15 positive and 15 negative statements...each [describing] a positive or negative change caused by war" [24068]

Positive and Negative Effects of Military Service (Aldwin et al)
"28-item scale...based on the work of Elder and Clipp" [28508]
Aldwin, C M; Levenson, M R; Spiro, A. Vulnerability and resilience to combat exposure: can stress have lifelong effects? Psychology and Aging 9: 34-44 (1994). [04601]

Positive and Negative Life Changes (Frazier)
"a 20-item measure of positive and negative life changes resulting from the assault was developed and administered" [15577]

Positive and Negative Suicide Ideation Inventory
[used but not cited in 30861]

Positive and Negative Syndrome Scale (Kay)

Positive Aspects of Ethnicity Questionnaire
[used but not cited in 24158]

Positive Aspects of the Peacekeeping Experience (Litz et al)
"This 7-item measure was developed to measure events of circumstances that might have been fulfilling or uplifting for military personnel while they were in Somalia." [28652]
Litz, B T; King, L A; King, D W; Orsillo, S M; Friedman, M J. Warriors as peacekeepers: features of the Somalia experience and PTSD. Journal of Consulting and Clinical Psychology 65: 1001-1010 (1997). [09930]

Positive Attitude Toward School Index (Kennedy and Bennett)

Positive Beliefs about Rumination Scale - Adapted (Watkins and Moulds)
"This 9-item scale was adapted from the Positive Beliefs about Rumination Scale developed by Papageoriou and Wells. The PBRS-A assesses the degree to which respondents hold beliefs about whether repetitive thinking is helpful." [34314]

Positive Life Events Inventory
[used but not cited in 92470]

Positive Meaning in Caregiving (Folkman et al)
a 6-item measure developed for this study [40475]

Positive Meaning Scale (Fredrickson et al)
a 5-item scale

Positive Military Experiences Scale (Maguen et al)
"This 11-item scale...assessed the general positive aspects of military service" [26748]
Positive Perceived Outcomes Scale (Kolko et al)
"The PPO scale was developed for this project based on input obtained from the investigators and members of the training division of the SAMHSA network." [33200]

Positive States of Mind Scale (Horowitz et al)
"designed to assess state patterns in individuals’ capacities to enter valued cognitive and interpersonal states" [09526]

Positive Symptom Distress Index
USE: SCL-90-R (Derogatis)

POSNA Pediatric Musculoskeletal Functional Health Questionnaire
USE: Pediatric Musculoskeletal Functional Health Questionnaire

Possessions Comfort Scale (Hartl et al)
"The PCS was developed for this study to assess various aspects pertaining to the emotionality hoarders report in relation to possessions, including physical and emotional comfort, vulnerability, and loneliness." [27085]

Post 9/11/01 Quality of Professional Practice Survey
"The P9PSS survey consists of several established self-report measures as well as professional demographics [and additional questions].” [84344]

Post Angioplasty Stress Scale
[used but not cited in 90047]

Post Deployment Psychological Screener
"This tool is a brief questionnaire of 22 items that covers symptoms of PTSD, depression, relationship problems, alcohol abuse, and anger issues." [82747]

Post Event Memory Questionnaire (Eisen and Carlson)
"a 24-item questionnaire developed for this study to assess participants’ memory and resistance to misleading information for a staged event” [21316]

Post Game Questionnaire (Williams)
"assessed the extent of belonging, self-esteem, control, and meaningful existence on four scales” [83631]
UF: Threat to Need Scale (Williams)

Post Sexual Abuse Expectancies Scale (Project SAVE)
"The PAES...is an 8-item inventory on which parents rate the negative impact they expect sexual abuse to have on their child over the next 12 months...” [82516]

Post Traumatic Experience Questionnaire (Rivers)

Post Traumatic Stress Disorder Qualitative Assessment Interview (Farrell)
"a 32-item interview schedule” [35877]

Post Traumatic Stress Disorder Questionnaire for Children (Middleton et al)

Post Traumatic Stress Inventory
[used but not cited in 93521]
Post Traumatic Stress Scale (Syrjala)
"developed for use in hematopoietic cell transplant patients...a self-report of symptoms for diagnosing PTSD corresponding to DSM-IV psychiatric criteria" [37274]
Basinski, J R; Alfano, C M; Katon, W J; Syrjala, K L; Fann, J R. Impact of delirium on distress, health-related quality of life, and cognition 6 months and 1 year after hematopoietic cell transplant. *Biology of Blood and Marrow Transplantation* 16: 824-831 (2010). [37274]

Post Traumatic Stress Symptom Checklist for Children (Ahmad)
"consists of 30 items mainly based on DSM-III-R criteria for PTSD" [08195]

Post Writing Questions (Pennebaker et al)
"assessed adherence to writing instructions and engagement in the writing tasks" [36685]

Post-9/11 Intervening Variables (DeVoe et al)

Post-Accident Clinical Interview (Holmes)
"designed for this study...a clinician-administered structured interview designed to elicit demographic, peritrauma and diagnostic information...to distinguish ASD from PTSD" [07314]

Post-Acute Concussion Symptom Checklist (Powell et al)
a 28-item checklist rating severity of symptoms on a 5-point scale

Post-Burn Distress Q-Sort (Weichman Askay et al)
[instrument not named in article; name assigned by PILOTS Database staff]
Weichman Askay, S; Stricklin, M; Carrougher, G J; Patterson, D R; Klein, M B; Esselman, P C; Engrav, L H. Using Qmethodology to identify reasons for distress in burn survivors postdischarge. *Journal of Burn Care and Research* 30: 83-91 (2009). [32124]

Post-Concussive Symptom Interview (Mittenberg et al)
"The PCS-I includes 15 cognitive, somatic, and emotional symptoms." [34178]

Post-Cult Needs Assessment (Wellspring)
"An information checklist developed at Wellspring that ascertains clients' personal desires for rehabilitation focus..." [17514, where it is used but not cited]

Post-Deployment Driving Scale (Stern et al)
[scale not named in citing article; name assigned by PILOTS Database staff]

Post-Deployment Health Assessment
"The PDHA instrument consists of 3 pages of self-administered questions pertaining to deployment location, general health, physical symptoms, mental health concerns, and exposure concerns." [28111]

Post-Deployment Health Assessment Test
"a locally used screening tool...the PDHAT is distinct from the similarly named Post-Deployment Health Assessment (PDHA), a national, military screening program" [39146]
[used but not cited in 39146]

Post-Deployment Health Re-Assessment
"Soldiers complete a self-report questionnaire [including "demographic, general health, physical symptoms, and mental health items that may be deployment related"] and then undergo a brief interview with a primary care physician, physician assistant, or nurse practitioner." [30120]

Post-Deployment Readjustment Inventory (Katz et al)
"The PDIRI [provides 36] self-report questions on symptoms and level of functioning across a variety of domains." [34905]

Post-Deployment Reintegration Measure (Canadian Forces)
Blais, A R; Thompson, M M; McCready, D R. Post-Deployment Reintegration Measure: psychometric replication and preliminary validation results. Defence R&D Canada Toronto technical report. [cited in 86250]
PILOTS Database Instruments Authority List 393

**Post-Hospital Behavior Questionnaire (Vernon et al)**

**Post-Hospital Stress Index (Melnky et al)**
"developed for this study"
UF: Post-Hospital Stress Index for Children (Melnky et al)
Post-Hospital Stress Index for Parents (Melnky et al)

**Post-Hospital Stress Index for Children (Melnky et al)**
USE: Post-Hospital Stress Index (Melnky et al)

**Post-Hospital Stress Index for Parents (Melnky et al)**
USE: Post-Hospital Stress Index (Melnky et al)

**Post-Imagery Questionnaire (Smucker)**
"The PIQ was developed by the senior author for use with survivors of childhood abuse who continue to be haunted by visual recurring memories of their traumas. The PIQ is administered to the patient following an imagery rescripting session as a means of obtaining immediate and direct client feedback about the session just experienced." [83002]
Smucker, M R; Dancu, C V. *Cognitive-Behavioral Treatment for Adult Survivors of Childhood Trauma: Imagery Rescripting and Reprocessing*. Lanham, Maryland: Rowman & Littlefield, 2005. [83002; the PIQ appears on pp. 223-232]

**Post-Intervention Satisfaction Measure (Gray et al)**
a 7-item measure to assess marines' satisfaction with adaptive disclosure

**Post-Migratory Living Problem Checklist (Steel and Silove)**
"lists a range of problems typically reported by refugees" [39355]

**Post-Migratory Social Support Inventory (Hollifield et al)**
"The PMSSI...is a 7-item self-rated questionnaire that assesses the number of relatives and friends that are in the participant’s country of origin, in the United States, and in the same city as the participant." [28084]
Hollifield, M; Eckert, V; Warner, T D; Jenkins, J H; Krakow, B; Ruiz, J; Westermeyer, J J. Development of an inventory for measuring war-related events in refugees. *Comprehensive Psychiatry* 46: 67-80 (2005). [28084]

**Post-Operational Psychological Screen (Australian Defence Force)**

**Post-Task Questionnaire (Nason and Yeater)**
"This 10-item questionnaire asked participants to rate...how effective they thought their response was in decreasing their likelihood of experiencing an unwanted sexual experience..." [40620]

**Post-Trauma Environment Interview (Orsillo et al)**
"developed for the purposes of the present study...based on the homecoming section of the self-report Vietnam Era Stress Inventory"

**Post-Trauma Interview Questionnaire (Palesh et al)**
"The PTI was developed for the present study as a measure of trauma-related affective responses to a salient reminder of the past childhood sexual abuse." [81259]

**Post-Traumatic Checklist Scale (Ventureyra et al)**

**Post-Traumatic Inventory (Meinhardt et al)**
Meinhardt, K; Tom, S; Tse, P; Yu, C Y. Southeast Asian refugees in the "Silicon Valley": the Asian health assessment project. *Amerasia* 12: 43-65 (1986). [cited in 03826]

**Post-Traumatic Stress Disorder...**
SEE ALSO: PTSD
Post-Traumatic Stress Disorder Clinical Checklist (University of Natal)
"developed for Black South African flood victims at the Department of Medically Applied Psychology, University of Natal" [21750]

Post-Traumatic Stress Disorder Index (Diehl et al)

Post-Traumatic Stress Disorder Reaction Checklist for Children (Macksoud et al)
a structured interview "adapted from the Child Post-Traumatic Stress Reaction Index (Frederick and Pynoos) and the Post-Traumatic Stress Disorder Reaction Checklist for Children (Dyregrov and Raundalen)" [08069]
Macksoud, M; Aber, L; Dyregrov, A; Raundalen, M. Post-Traumatic Stress Disorder Reaction Checklist for Children. New York: Columbia University, Center for the Study of Human Rights, Project on Children and War, 1990. [cited in 08069]

Post-Traumatic Stress Disorder Self-Rating Scale (Liu et al)
"The PTSD-SS is a 24-item self-reported inventory for PTSD." [37960]
UF: Self-Rating PTSD Scale (Liu et al)

Post-Traumatic Stress Disorder Self-Test (ADAA)

Post-Traumatic Stress Disorder Structured Interview (Keane et al)

Post-Traumatic Stress Disorder Symptom Scale (Yehuda)
"similar to a section of the Anxiety Disorders Interview Schedule—Revised on PTSD" [07153]

Post-Traumatic Stress Interview Schedule (Green)
Green, B L. Post-Traumatic Stress Interview Schedule. Traumatic Stress Study Center, Department of Psychiatry, University of Cincinnati, 1986. [cited in 10763]
UF: Interview Schedule for Post-Traumatic Stress Disorder (Green)

Post-traumatic Stress Problems Scale (Achenbach and Rescorla)
"The PTSP assesses the problems that researchers on post-traumatic stress have identified and validated as being significantly associated with experiences of traumatic stress. This PTSP scale consists of 14 items from the Youth Self-Report, the Teacher’s Report Form, and the Child Behavior Checklist." [31045]

Post-Traumatic Stress Questionnaire (Williams)

Post-Traumatic Stress Reaction Index
USE: PTSD Reaction Index (Frederick)

Post-Traumatic Stress Reaction Measure (Greenberg et al)
"a brief measure of 7 items" [30984]

Post-Traumatic Stress Scale (Potts)

Post-traumatic Stress Symptom Inventory
"a checklist of 19 symptoms described by the DSM-IV for acute stress disorder" [33378]
[used but not cited in 33378]

Post-Traumatic Symptom Scale (Holen et al)
Holen, A; Sund, A; Weisaeth, L. Questionnaire for screening disaster victims, in: [The Alexander L. Kielland Disaster March 27, 1980: Psychological Reactions among the survivors]. Oslo: University of Oslo, Division of Disaster Psychiatry, 1983. [In Norwegian.] [Handbook 749]
Holen, A. A Long-Term Outcome Study of Survivors from a Disaster: The Alexander L. Kielland Disaster in Perspective, p. 72. Oslo: Department of Psychiatry, University of Oslo, 1990. [10903]
UF: PTSS-10
PTSS-12
Post-Traumatic Vulnerability Scale (Shillace)

"The PTV measures a perceived sense of defenselessness; a sense of insecurity and expectation that danger exists and harm will occur; overvigilance and caution to protect self and loved ones." [82458]

Post-Tsunami Symptom Checklist (Parker et al)

"Identified possible emotional and bodily stress reactions that had been gleaned from reports by tsunami survivors from nearby villages" [82465]

Post-Vietnam Stress Inventory (Mack)

Post-War Adversities Index (Layne and Djapo)

"a 25-item self-report inventory of stressful life events and circumstances during the past 6 months" [34613]

Layne, C M; Djapo, N. Post-War Adversities Index. Unpublished psychological test, University of California, Los Angeles, 1999. [cited in 34613]

Post-War Trauma Exposure Index (Layne)

"The PWTEI is a 13-item self-report measure of exposure to nonwar-related traumatic events." [34613]

Layne, C M. Post-War Trauma Exposure Index. Unpublished psychological test, University of California, Los Angeles, 1999. [cited in 34613]

Postaccident Avoidance Questionnaire (Steil and Ehlers)

Postconcussive Symptom Checklist (Bryant and Harvey)

Postconcussive Syndrome Checklist (Gunstad and Suhr)

"a 97-item symptom checklist comprised of common neuropsychological symptoms and distracter items" [24866]

Postdeployment Criminal Violence Rating Guide (Sreenivasan et al)

"a conceptual template that addresses qualitative factors as they relate to the potential impact of combat-related injuries and postdeployment violence" [40712]

Postdeployment Health Assessment Test (McLay et al)

"The PDHAT is a locally used screening tool that includes information on demographics, risk exposures, the 17 items from the PCL-M, as well as questions about other symptom clusters. Of note, the PDHAT is distinct from the similarly named Postdeployment Health Assessment (PDHA), a national military screening program that includes screening for PTSD, but not information on individual symptoms." [84373]

[used but not cited in 84373]

Postdisaster Social Support Scales (Kaniasty)

[4 scales, measuring Sense of initial unity, Dissatisfaction with help received and aid distribution, Postdisaster social disaffection, and Perceived postdisaster community cohesion; not named in source (name supplied by PILOTS Database staff)]

Postexperiential Questionnaire (Murray and Segal)

"The PQ is an 8-item self-report measure in which participants are asked to rate changes that have occurred as a result of the procedures of the study." [82818]

Postmigration Living Difficulties Questionnaire (Silove et al)

Postmilitary Adjustment Index (Foy et al)

Postmission Altruistic Identity Disruption Questionnaire (McCormack and Joseph)

"The PostAID/Q is an 18-item self-report measure designed to assess altruistic identity disruption." [87079]

Postnatal Complications Rating (DeMier et al)

"an 8-unit scale quantifying the severity of postnatal complication" [24758]

Postpartum Bonding Questionnaire (Brockington et al)

Postpartum Depression Screening Scale (Beck and Gable)

"Completed by mothers only, the PDSS is a 35-item, Likert-type self-report instrument designed for use in screening for PPD."
[36389]

Posttrauma Emotional Growth Scale (Vernon et al)

"developed for the present study...5 items"

Posttrauma Gratitude Scale (Vernon et al)

"developed for the present study...4 items"

Posttraumatic Adjustment Scale (O'Donnell et al)

a "10-item screening instrument...that could be routinely administered during an acute hospital admission to identify patients at risk for subsequent development of PTSD or major depressive episode at 12 months posttrauma" [31763]
O'Donnell, M L; Creamer, M C; Parslow, R; Elliott, P; Holmes, A C N; Ellen, S; Judson, R; McFarlane, A C; Silove, D; Bryant, R A. A predictive screening index for posttraumatic stress disorder and depression following traumatic injury. *Journal of Consulting and Clinical Psychology* 76: 923-932 (2008). [31763]

Posttraumatic Approach and Avoidance Scale (Andrews)

"a new multidimensional measure of avoidance ... based on a four-factor conceptualisation of trauma-related inhibition processes" [91529]

Posttraumatic Avoidance Behaviour Questionnaire (Van Minnen and Hagenaars)

a 25-item questionnaire "to measure typical situations PTSD patients avoid, ... to gather more detailed information about the avoidance behavior, ... [and] to have a valid instrument for changes in avoidance behaviour as a result of treatment in PTSD patients". [34333]

Posttraumatic Avoidance Scale (Andrews et al)

a 20-item "measure of trauma-related avoidance" [87500]

Posttraumatic Chronic Pain Test (Muse and Frigola)

Posttraumatic Cognitions Inventory (Foà et al)

a 36-item "comprehensive measure of the appraisals of trauma and its sequelae...involved in the development and persistence of PTSD" [21182]

Posttraumatic Depreciation Inventory (Baker et al)

"This 21-item measure was developed to assess depreciation, with items designed to parallel the original items from the Posttraumatic Growth Inventory." [82159]

Posttraumatic Diagnostic Scale (Foà et al)

USE: Posttraumatic Stress Diagnostic Scale (Foà)
Posttraumatic Dissociation Scale (Carlson)  
[cited only as "unpublished data" in 26745]

Posttraumatic Growth Inventory (Tedeschi and Calhoun)  

Posttraumatic Growth Inventory for Children (Tedeschi and Calhoun)  

Posttraumatic Growth Inventory for Children (Tedeschi and Calhoun)  

Posttraumatic Stress Disorder Scale (Foa)  

Posttraumatic Stress Disorder Interview for Vietnamese Refugees (Dao et al)  

Posttraumatic Stress Disorder Interview Schedule (Mertin and Mohr)  

Posttraumatic Stress Disorder Questionnaire (Cross)  
a self-report questionnaire adapted from Watson et al’s PTSD Interview Schedule and item adaptation of the Posttraumatic Growth Inventory) assesses positive changes associated with having to deal with traumatic stressors. [28463]

Posttraumatic Stress Disorder Scale (Friedman et al)  

Posttraumatic Stress Disorder Scale (Foa et al)  

Posttraumatic Stress Disorder Scale (Foa et al)  

Posttraumatic Stress Disorder Scale (Wells)  
Wells, A. Metacognitive Therapy for Anxiety and Depression. New York: Guilford Press, 2009. [82992; the PTSD-S appears on pp. 271-272]

Posttraumatic Stress Disorder-Teacher Rating Scale (Warnygora)  
a behavioral rating scale [to] differentiate children who had been diagnosed with PTSD from children who had not been traumatized” [91852]

Posttraumatic Stress Index (Wasco et al)  
6 items
Wasco, S M; Campbell, R; Howard, A; Mason, G E; Staggs, S L; Schewe, P A; Rigor, S. A statewide evaluation of services provided to rape survivors. Journal of Interpersonal Violence 19: 252-263 (2004). [18078; the Index appears on p. 260]

Posttraumatic Stress Questionnaire for Patients (Leahy and Holland)  
"allows patients to rate the degree to which they are bothered by common PTSD symptoms” [21834]

Posttraumatic Stress Reaction Index (Chang et al)  
"The PTSRC consists of 20 statements that assess for post-traumatic stress reaction based on [DSM-IV] criteria.” [24456]

Posttraumatic Stress Reaction Index (Rodriguez et al)  
A revision on the PTSD Reaction Index that “includes [11] questions about the kind of emotionally traumatic events to which the child was exposed and the child’s emotional response to them” [25835]
Posttraumatic Stress Reactions in Exile Scale (Ajdukovic)

Posttraumatic Stress Response Checklist (Asukai)
"an observer-rated scale with a 13-item posttraumatic symptom scale that can assess a child's posttraumatic responses" [24257]

Posttraumatic Stress Scale (Scott and Dua)
a self-report scale based on the DSM-IV that "assesses the trauma experienced by people via the specific criteria of reexperiencing, numbing and avoidance, hyperarousal, and functioning" [21771]

Posttraumatic Stress Scale for Family Violence (Saunders)

Posttraumatic Stress Screen for the Cognitively Impaired (Carlson et al)
"The P

Posttraumatic Stress Symptom Scale (Fitzpatrick and Wilson)

Posttraumatic Stress Symptom Scale (Pfefferbaum et al)
"a 22-item measure of posttraumatic stress symptoms adapted from the Impact of Event Scale - Revised" [23529]
Pfefferbaum, B; Call, J A; Lensgraf, S J; Miller, P D; Flynn, B W; Doughty, D E; Tucker, P; Dickson, W L. Traumatic grief in a convenience sample of victims seeking support services after a terrorist incident. Annals of Clinical Psychiatry 13: 19-24 (2001). [23529]

Posttraumatic Stress Symptomatology Scale (King et al)
a 13-item scale [unnamed in article; name assigned by PILOTS Database staff]

Posttraumatic Symptom Inventory for Children (Eisen and Carlson)
Eisen, M; Carlson, E. Development, reliability, and validity of a brief PTSD measure for young children. Unpublished manuscript, California State University, Los Angeles, 1997. [cited in 82943]

Posttraumatic Symptoms Checklist
a 17-item checklist based on DSM-IV criteria B, C, and D [35782]
[used but not cited in 35782]

Postwar Adaptation Questionnaire (Bramsen)
Bramsen, I. The Long-Term Psychological Adjustment of World War II Survivors in the Netherlands. Delft, the Netherlands: Eburon Press, 1995. [12791; the Questionnaire appears in English on pp. 66-67, the original Dutch text in Appendix 3, pp. 237-248]

Potency Scale (Ben-Sira)
"19 items that measure...self-confidence, control, and social significance and order" [23064]

Potential Stressful Events Interview (Kilpatrick et al)
UF: Clinician Administered Assessment Interview for Adults (Falsetti et al)
Initial Subjective Reactions Scale

Potentially Traumatizing Events Scale (Norris et al)
"This 8-item inventory was partially derived from the [Keane et al] Combat Exposure Scale..." [19730]
Norris, R L; Maguen, S; Litz, B T; Adler, A B; Britt, T W. Physical health symptoms in peacekeepers: has the role of deployment stress been overrated? Stress, Trauma, and Crisis 8: 251-265 (2005). [19730]

POW Experiences Scale (Rintamaki et al)
"The researchers used a 14-item self-report measure to assess POW experiences and stressor severity." [34144; scale not named in text; name assigned by PILOTS Database staff]
POW Protocol Examination (USDVA)
"VA Form 10-0048" [82095]
[used but not otherwise cited in 82095]

POW Trauma Index (Sutker et al)

Power Strategies Scale (Falbo and Peplau)

Powerlessness Scale (Newcomb and Harlow)

Practical Adolescent Dual Diagnosis Interview (Estroff and Hoffmann)
"The PADDI was developed as a pragmatic clinical assessment tool to standardize diagnostic assessments of adolescents requiring behavioral health services." [29767]

Prayer Functions Scale (Bade and Cook)
"The PFS is a Likert scale assessing how often prayer is used for specific coping functions." [30206]

Pre- and Posthurricane Stressors and Hassles Survey (Pickens et al)
"12 questions developed by the authors, with items created to be similar to other authors’ measures of life stress...but modified for the purpose of measuring postdisaster stressors”

Pre-Deployment Health Assessment (U.S. Department of Defense)
"introduced by the U.S. Department of Defense in 1998 as a means of assessing the health and suitability of service members for deployment” [40498]

Pre-Military Experience Questionnaire (Ginsberg et al)
"[The PMEQ] uses a checklist (yes/no) of nine rationally-derived adverse experiences from middle and late childhood.” [19913]
Ginsberg, J P; Ayers, E D; Burriss, L B; Powell, D A. A study of the association between retrospective appraisal of childhood reactivity and post-discharge traumatic stress in combat veterans. *Traumatology* 12: 61-82 (2006). [19913; the PMEQ appears on p. 81]

Pre-Post Child/Teen Questionnaire/Interview
"used...to investigate children’s understanding of abuse before and after a group treatment program" [15067]

Pre-War Trauma Exposure Index (Layne)
"a 10-item self-report measure of exposure to a range of prewar traumatic experiences” [34613]
Layne, C M. Pre-War Trauma Exposure Index. Unpublished psychological test, University of California, Los Angeles, 1999. [cited in 34613]

Predeployment Stressors Scale (Maguen et al)
"The 13-item scale lists a number of potential predeployment stressors... This measure was rationally derived and modified from the study of peacekeepers from Somalia reported by Litz et al and the study of peacekeepers from Kosovo reported by Maguen et al.” [81613]

Predictive Screening Tool for Depression and PTSD After Injury (Richmond et al)
an 8-item "predictive screener that when given soon after injury will accurately differentiate those who will later develop depression or PTSD from those who will not” [36640]
Richmond, T S; Ruzek, J; Ackerson, T; Wiebe, D J; Winston, F; Kassam-Adams, N. Predicting the future development of depression or PTSD after injury. *General Hospital Psychiatry* (DOI: 10.1016/j.genhosppsych.2011.05.003). [36640; the Tool appears in the text of the article]

Preferences for Care Near the End of Life Scale (Gauthier and Froman)
"This scale is composed of 19 items related to the discussion of preferences for medical care.” [81851]
Preferences Questionnaire (Gobin)
"a self-report questionnaire that was developed...for the current investigation. Items ask participants to rate the desirability of 42 characteristics in potential partners" [86223]

Pregnancy Attitude Index (O’Connell)
"This measure was used to assess women’s locus of control as it relates to pregnancy." [23446]

Pregnancy Distress Questionnaire (Yali and Lobel)
"measures the extent to which a woman is concerned about different aspects of her pregnancy" [30443]

Pregnancy Pressure Scale (Chen et al)

Pregnancy Risk Assessment Monitoring System (Centers for Disease Control)
"Developed by the Centers for Disease Control, this instrument assesses maternal health indicators related to prenatal care, attitude about pregnancy, pregnancy-related morbidity, living conditions, and stressors." [26498]

Pregnancy Unique Qualification of Emesis (Koren et al)

Prejudicial Attitude Survey (Stephan et al)
"This instrument contains 6 reactions: hatred, disdain, dislike, hostility, superiority, and rejection." [82939]

Preliminary Strategic Approach to Coping Scale (Hobfoll et al)
"a 34-item measure rated on a 5-point Likert scale, assessed personal strengths and coping abilities" [21008]

Premenstrual Assessment Form (Halbreich et al)

Premilitary Adjustment Index (Foy et al)

Premilitary Delinquency Scale (Miller et al)
"constructed from 10 items taken from the preservice background section of the War Stress Interview (Rosenheck and Fontana)" [27262]

Premorbid Adjustment Scale (Barrett)
"This scale was developed for this study." Barrett, T W; Mizes, J S. Combat level and social support in the development of posttraumatic stress disorder in Vietnam veterans. Behavior Modification 12: 100-115 (1988). [00499]

Premorbid Adjustment Scale (Phillips)
Included in Vietnam Veteran Survey (Figley), q.v., as Attachment C, "Personal Background Questionnaire" [used but not cited in 00369, 01583]

Prenatal Life Events Scale (Lobel)
"The 27-item PLES measures the number of life events that have happened to the participant of someone close to her since she has been pregnant and her perception of how each event affected her." [30443]

Prenatal Social Environment Inventory (Orr et al)
Prenatal Stress Questionnaire (Hellhammer)

“This self-report questionnaire assesses the effects of stress experienced by the client’s mother during pregnancy, smoking, alcohol, and drug habits, and her psychological and physiological well-being.” [31159]

Preparation for Marriage Questionnaire (Holman et al)

“The PREP-M is designed primarily for unmarried couples and contains over 250 items assessing four broad areas: personality traits, similarity of values, family background, and relationship experiences.” [29514]

Preparatory Grief in Advanced Cancer Patients Scale (Mystakidou et al)

"a 31-item scale…intended for use as an aid or clinical tool for the health care professionals to recognize patients in need of specialized supportive intervention” [37180]

Preschool Age Psychiatric Assessment (Egger et al)

Egger, H; Ascher, B; Angold, A. Preschool Age Psychiatric Assessment. Durham, North Carolina: Duke University Medical Center, 2002. [cited in 81130]

Preschool and Early Childhood Functional Assessment Scale (Hodges et al)

Preschool and Kindergarten Behavior Scales (Merrell)

"The PKBS...measures...social competence and antisocial behaviors in preschool (ages 3-6 years) children.” [34213]

Preschool and Primary Locus of Control Scale (Nowicki and Duke)

UF: Nowicki-Strickland Internal-External Control Scale for Preschool and Primary Grades

Preschool Behavior Checklist (McGuire and Richman)

Preschool Behavior Questionnaire (Behar and Stringfield)

Preschool Child Interview for PTSD and Observational Record (Scheeringa and Zeanah)

"a clinician-administered interview supplemented by clinical observation of the child that proves for PTSD” [85859]

Preschool Children’s Assessment of Stress Scale (Laor et al)

Preschool Children’s Behavior Assessment (Chesapeake Institute)

[used but not cited in 01564]

Preschool Development Inventory (Ireton)

"a 60-item scale based on parental report” [36691]

Preschool Feelings Checklist (Luby et al)

"a sensitive screening measure for depression in young children” [37377]

Preschool Language Scale (Zimmerman et al)

Zimmerman, I L; Steiner, V G; Pond, R E. Preschool Language Scale Manual. Columbus, Ohio: Charles E. Merrill, 1979. [cited in 27844]

Preschool Posttraumatic Stress Symptoms Inventory (Graham-Bermann)

"consists of 17 items measuring symptoms of PTSD that reflect the traumatic distress of preschoolers” [27559]

Preschool Structured Interview (Friedrich and Hewitt)

Preschool Symptom Self-Report (Martini)

Preschool Trauma Questionnaire (Saigh)

Presence Questionnaire (Witmer and Singer)
"This 19-item measure...is designed to measure the degree to which individuals experience presence in a virtual environment.” [31930]

Present Affect Reactions Questionnaire (Endler and Okada)
USE: Endler Multidimensionality Anxiety Scales (Endler et al)

Present Feelings About Loss Scale (Singh and Raphael)

Present Health Status Questionnaire (AMANI Trust)
"a 22-item questionnaire covering the common complaints seen in survivors of organized violence and torture...developed from the questionnaires provided in Rasmussen’s monograph on torture” [23145]

Present State Examination (Wing et al)

Presenteeism Scale (Stewart et al)

Preventative Investigative Report
[used but not cited in 17117]

Preservice Social History Questionnaire (Green and Berlin)

Pressure Management Indicator (Williams and Cooper)

Pressure to Uphold Restraint (Litz et al)
"This scale assessed the frustration associated with the need to restrict the use of force during the mission.” [28652]
Litz, B T; King, L A; King, D W; Orsillo, S M; Friedman, M J. Warriors as peacekeepers: features of the Somalia experience and PTSD. Journal of Consulting and Clinical Psychology 65: 1001-1010 (1997). [09930]

Presumptive Stressful Life Events Scale (Singh et al)

Prevalence of Sexual Abuse Scale (Gore-Felton et al)
"The aim of this [10-item] scale was to assess the types of beliefs therapists held about the prevalence of child sexual abuse.” [22425]

Prewar Life Events Questionnaire (Horesh et al)
[not named in source article; instrument name assigned by PILOTS Database staff]
"Life events before the war were assessed by means of a [36-item] questionnaire especially devised for the present study.” [34993]
Horesh, D; Solomon, Z; Zerach, G; Ein-Dor, T. Delayed-onset PTSD among war veterans: the role of life events throughout the life cycle. Social Psychiatry And Psychiatric Epidemiology (2010; DOI: 10.1007/s00127-010-0255-6). [34993]

PRIMAPP
USE: Cognitive Appraisal Inventory
Primary and Secondary Psychopathy Scale (Levenson et al)
"The PSPS is a 26 item self report scale that was designed to assess psychopathy in noninstitutionalized populations. The questionnaire items were developed to represent the two factors of the Hare Psychopathy Checklist." [16332]

Primary Appraisal of Traumatization Test (Segal)
Segal, S A. The development of measures to assess traumatic appraisal. Ph.D. dissertation, Purdue University, 1986. [90825]

Primary Appraisal Scale (Folkman et al)

Primary Appraisal Secondary Appraisal Scale (Gaab et al)
"The PASA comprises 16 situation-specific items..." [28290]

Primary Batterer and Victim Assessment (McCloskey and Grigsby)
"provides both questions to elicit the way clients attribute meaning to the IPV incidents and conceptual factors to help the clinician organize each client's viewpoints and IPV attributions so that the primary batterer and victim can more easily be determined" [27901]

Primary Care Evaluation of Mental Disorders (Spitzer et al)
UF: PRIME-MD

Primary Care PTSD Screen (Prins et al)
"a brief 4-item screen for PTSD in primary care" [26676]
Prins, A; Ouiemette, P; Kimerling, R; Cameron, R P; Hugelshofer, D S; Shaw-Hegwer, J; Thrailkill, A; Gusman, F D; Sheikh, J I. The Primary Care PTSD Screen (PC-PTSD): development and operating characteristics. Primary Care Psychiatry 9: 9-14 (2003). [26676]

Primary Health Workers Needs Assessment Questionnaire (Byaruhanga et al)
"We developed a questionnaire to assess the training needs of health workers, e.g. their knowledge of mental health, common mental disorders, services available, etc." [82004]

Primary Needs Questionnaire (Zadro et al)
"This 12-item self-report questionnaire is the gold standard instrument used to index the impact of ostracism on primary needs." [35060]

PRIME-MD
USE: Primary Care Evaluation of Mental Disorders (Spitzer et al)

Prior Experience with Computer and Audiovisual Technology Questionnaire (Egede et al)
"a short measure to learn more about participants' prior experiences and comfort level with computers and audiovisual technology" [34522]
Egede, L E; Frueh, B C; Richardson, L K; Acierno, R; Mauldin, P D; Knapp, R G; Lejuez, C. Rationale and design: telepsychology service delivery for depressed elderly veterans. Trials 10: 22 (2009). [34522]

Prior Illness Experiences Scale (Phipps et al)
"This is a 17-item parent-report scale developed for this study. It assesses previous parent and child experiences with cancer therapy and inpatient hospitalization." [27203]

PRISM (Buchi et al)
USE: Pictorial Representation of Illness and Self-Measure (Buchi et al)

Prison Adjustment Questionnaire (Wright)

Prison Adjustment Scale (Deaton et al)
"This [22-item] instrument was developed as a measure of prison adaptation and is a modified version of a scale by Zamble and Porporino." [40106]
**Prison Violence Inventory (Warren et al)**
[used but not cited in 92616]

**Prisoner of War Questionnaire**
Mandic, N. The prisoner of war. In: Klain, E (ed.), *Psychology and Psychiatry of a War*, pp. 147-157. Zagreb, Croatia: Faculty of Medicine, University of Zagreb, 1992. [17278; the Questionnaire appears on pp. 156-157]

**Private Religious Practices Scale (Levin)**

**Private Self-Consciousness Scale (Fenigstein et al)**

**Private Self-Consciousness Scale (Murray and Segal)**

**Probability and Cost Questionnaire (McManus and Ehlers)**
"developed for the purposes of this study" [30640]
White, M; McManus, F; Ehlers, A. An investigation of whether patients with post-traumatic stress disorder overestimate the probability and cost of future negative events. *Journal of Anxiety Disorders*, in press, DOI 10.1016/j.janxdis.2008.01.004 [30640; the Questionnaire appears in Appendix A]

**Probabilistic Stimulus Selection Task**

**Problem Behavior Frequency Scales (Farrell et al)**

**Problem Behavior Scale**
USE: Teacher-Child Rating Scale (Hightower et al)

**Problem Behaviour Checklist (Riley)**
"Although this measure was devised specifically for the purpose of the study, the items were drawn from a list of behaviours that have been reported by carers in previous traumatic brain injury research to be distressing." [32885]

**Problem Checklist (Kuhne et al)**
USE: PTSD Symptom Scale (Kuhne et al)

**Problem Checklist (Foy et al)**
USE: Los Angeles Symptom Checklist

**Problem Checklist (Oddy et al)**
"developed specifically for use with head injury populations" [20080]

**Problem Checklist (Pearce et al)**
"51 psychological problems characteristic of the diagnostic criteria for PTSD" [00166]

**Problem Gambling Severity Index (Ferris and Wynne)**
"provides a continuous score and categorizes individuals into nongambler, nonproblem gambler, low risk, moderate risk, and problem gambler categories" [39887]
Problem Oriented Screening Instrument for Teenagers

Problem Rating Scale (Greenwald)

Problem Report Form (Obenchain and Silver)

Problem Scale (Childhood Cancer Survivors Study)
"a 25-item questionnaire [that] investigates the presence and intensity of cognitive problems showed by mothers dealing with childhood cancer experience in the last two weeks" [39294] [used but not cited in 39294]

Problem Solving Inventory (Heppner and Petersen)

Problematic Relationships Scale (Forbes et al)
"The PRS is a 5-item measure of problematic relationships developed for this study to assess negative social support." Forbes, D; Parslow, R A; Creamer, M C; Allen, N; McHugh, A F; Hopwood, M J. Mechanisms of anger and treatment outcome in combat veterans with posttraumatic stress disorder. *Journal of Traumatic Stress* 21: 142-149 (2008). [81871]

Problems and Targets Scale (Marks)

Problems from Substance Use Scale (Ouimette et al)
"developed to assess the negative consequences of alcohol use or drug use, or both" Ouimette, P C; Ahrens, C; Moos, R H; Finney, J W. Posttraumatic stress disorder in substance abuse patients: relationship to 1-year posttreatment outcomes. *Psychology of Addictive Behaviors* 11: 34-47 (1997). [08406]

Problems in Functioning Questionnaire (Neria et al)

Problems in Psychosocial Adaptation Scale (Kornblith et al)
"an instrument developed by the Cancer and leukemia B clinical research group“ [30522, which does not name the instrument; instrument name assigned by PILOTS Database staff] Kornblith, A B; Anderson, J; Cella, D F; et al. Hodgkin’s disease survivors at increased risk for problems in psychosocial adaptation. *Cancer* 70: 2214-2224 (1992). [cited in 30522]

Problems in Social Functioning Scale (Solomon)

Problems Pertaining to the Coverage Scale (Hatanaka et al)
"11 items measuring complaints of journalists about the coverage and reporting, the severity of the competition with other news organizations, and the difficulty of completing the assignment, among others“ [83706] Hatanaka, M; Matsui, Y; Ando, K; Inoue, K; Fukuoka, Y; Koshiro, E; Itamura, H. Traumatic stress in Japanese broadcast journalists. *Journal of Traumatic Stress* 23: 173-177 (2010). [83706]

Procareine Scale (Kelliner et al)
Kelliner, C H; Post, R M; Putnam, F; Cowdry, R; Gardner, D; Kling, M A; Minichiello, M D; Trettau, J R; Coppola, R. Intravenous procareine as a probe of limbic system activity in psychiatric patients and normal controls. *Biological Psychiatry* 22: 1107-1126 (1987). [cited in 00739]

Procedural Justice Scale (Murphy)

Process Evaluation Form (Murphy)
Murphy, S A; Johnson, C; Cain, K C; Das Gupta, A; Dimond, M; Lohan, J; Baugher, R. Broad-spectrum group treatment for parents bereaved by the violent deaths of their 12- to 28-year-old children: a randomized controlled trial. *Death Studies* 22: 209-235 (1998). [22016]

Process of Change in Abused Women Scales (Brown)"
Processes of Change Questionnaire (Prochaska et al)

Professional Quality of Life Scale (Stamm)

Professional Self-Description Form (Taylor et al)
"The instrument presupposes that knowledge of one’s self in relation to others will influence personal performance and future achievement." [27241]
Taylor, C. W; Smith, B; Ellison, R. Explorations in the measurement and prediction of contribution of one sample of scientists. Lackland Air Force Base, Texas Personnel Laboratory Technical Report ASDTR 1961, pp. 61-96. [cited in 27241]

Professional Self-Esteem of Physicians Scale (Carmel)
8 items that "tap their appraisal of their professional competence" [82144]

Profil de Rendement Mnésique (Rey)
UF: PRM

Profil der Lebensqualität Chronisch Kranker (Siegrist et al)
"an inventory covering personal resilience and social activities" [20888]

Profil Indeks Emocija
USE: Profile Index of Emotions

Profile Index of Emotions
UF: PIE
Profil Indeks Emocija

Profile of Adaptation to Life – Clinical
[used but not cited in 90602]

Profile of Mood States (McNair et al)
UF: POMS

Profile of Substance Abusing Women (Palacios et al)

Profiles of Student Life: Attitude and Behavior Questionnaire
USE: Attitude and Behavior Questionnaire (Search Institute)

Program Satisfaction Questionnaire (Smyth)

Progress Evaluation Scales (Ihilevich and Gleser)

Progress in Treatment Questionnaire (Brand et al)
"This measure was developed for this study and was based in the ISSTD’s Guidelines for Treating Dissociative Identity Disorder in Adults...The PITQ...assesses capacities developed throughout the stages of treatment for dissociative disorders..." [82810]
Brand, B; Classen, C; Lanius, R; Loewenstein, R; McNary, S; Pain, C; Putnam, F. A naturalistic study of dissociative identity disorder and dissociative disorder not otherwise specified patients treated by community clinicians. Psychological Trauma: Theory, Research, Practice, and Policy 1: 153-171 (2009). [82810]

Progressive Matrices Test (Raven)
USE: Raven Progressive Matrices (Raven)
Project AWARE Instrument
"33 items...used to measure intimate partner violence among Southeast Asian women living in the Washington, D.C. metropolitan area." [84520]

Project SHIELDS Questionnaire (Gershon et al)
[cited only as “Gershon, Lin, and Li, 2002” in 91853]

Project TALENT Survey Questionnaire (Card)

Projective Life Attitude Assessment (Rosenblatt et al)

Prolonged Exposure Counterconditioning Inventory (Paunovic)
"The PECI is administered by the therapist in order to identify (a) specific sensory-based details of several pleasurable life moments that are currently most pleasurable to the client, and (b) the most central sensory-based details of the traumatic event." [25918]

Prolonged Grief Disorder Interview (Prigerson et al)
"The PGD-I is a structured interview to be administered by trained interviewers. The PGD-I is a modification of the Inventory of Complicated Grief (Prigerson et al.)." [37757]
Prigerson, H G; Horowitz, M J; Jacobs, S C; Parkes, C M; Aslan, M; Goodkin, K; Raphael, B; Marwit, S J; Wortman, C; Neimeyer, R A; Bonanno, G; Block, S D; Kissane, D; Boelen, P; Maercker, A; Litz, B T; Johnson, J G; First, M B; Maciejewski, P K.

Prolonged Grief Disorder Scale
"The PGD-Scale contains 11 slightly modified items from the Inventory of Complicated Grief - revised that resemble recently proposed criteria for PGD..." [37864]

Prolonged Grief Disorder Screening Measure (Prigerson and Jacobs)
a 9-item measure

Proneness to Intrusive Cognitions Scale (Davies and Clark)
a "single item scale...designed for the present study" [09261]

Propensity for Abusiveness Scale (Dutton)
"the best 29 self-report items that predicted frequency of abusiveness...empirically derived from the BPO, MAI, RSQ, TSC, and EMBU scales" [14564, p. 180]

Proper Naming of Body Parts Questionnaire (Reeker and Ensing)
"developed by the present investigators to measure each child’s knowledge of the proper names of private body parts" [16365]

Proportional Change Index (Wolery)
"The PCI is a numerical statement of the relationship between the child's rate of development in comparison with the gain in chronological age during intervention." [08112]

Prosocial Coping Scale for Teachers
USE: Coping Effectiveness Scale (Bleichman et al)

Prosocial Reasoning Objective Measure
[used but not cited in 91002]

Prostate Cancer Peer Support Inventory (Steginga et al)
"a list of 18 possible ways that prostate cancer groups might help men was provided across the domains of informational and decisional support, emotional and practical support, and decreasing social isolation." [28200]
Steginga, S K; Pinnock, C; Gardner, M; Gardiner, R A; Dunn, J. Evaluating peer support for prostate cancer: the Prostate Cancer Peer Support Inventory. British Journal of Urology 95: 46-50 (2005). [28200; the Inventory appears on p. 47]
Prostitution Questionnaire (Farley et al)  
USE: Questionnaire for Sex Workers (Farley and Barkan)

Protocolo de Factores de Riesgo
"This schedule is a structured interview based on the Service Utilization and Risk Factors (Goodman et al, 1998)." [34892]  
UF: Risk Factors Schedule

Prout-Strohmer Assessment System
[used but not cited in 90144]

Provider Rating Form (Horowitz et al)
"a 13-category checklist of the severity and duration of psychosocial and developmental problems that is based on a World Health Organization-sponsored primary care child orientation system" [22639]  

Provision of Resources Scale (Hunter Williams et al)
"a 4-item scale that "assesses service members’ perceptions of the services provided to harassment victims by the military" [25201]  

Provision of Training Scale (Hunter Williams et al)
"a 6-item scale that "assesses service members’ perceptions of the prevalence of sexual harassment training as well as whether they had received sexual harassment training during the last 12 months." [25201]  

Provisions of Social Relations Scale (Turner et al)
"a 15-item instrument that measures two aspects of perceived social support: support from family and from friends" [08516]  

Provoked Aggression Scale (Olweus)

Prüfsystem für Schul- und Bildungsberatung (Horn)
"a German intelligence test" [24097]  

PS Scale
USE: MMPI PTSD Subscale (Schlenger and Kulkka)

PS-RESKVA (Guldvog et al)
"The PS-RESKVA has 40 items...used to assess satisfaction with care" [31519]  
UF: Patient Satisfaction - Results and Quality

PSS
USE: Psychiatric Status Schedule (Endicott et al)

PSY (Bernot et al)
[cited in 09287 only as “PSY - Test de investigación psicológica, Bernot y otros, Paris”

PSY (Briere and Runtz)

PsyBari (Mahony)
"The PsyBari is a psychological test designed specifically for bariatric surgery evaluations, It measures psychological and behavioral variables considered to be important in identifying patients at risk for post-surgical psychosocial problems." [84145]  

PsyCheck Screening Instrument (Lee et al)
Psychiatric Assessment for Adults with Developmental Disabilities (Moss et al)

"The PAS-ADD is a semi-structured interview for use with respondents who have intellectual disability and for key informants. [It] is based on items drawn from the Schedules for Clinical Assessment in Neuropsychiatry (WHO)." [32000]

Psychiatric Assessment Scale (Krawiecka et al)

"a brief rating scale consisting of 8 symptom categories" [26580]

Psychiatric Assessment Schedule (Surtees et al)

"a semi-structured clinical interview schedule...based on the first 40 items of the Present State Examination and selected items from the Schedule for Affective Disorders and Schizophrenia" [03682]

Psychiatric Consultation Form (Sovner)

Psychiatric Diagnostic Inventory (Othmer et al)

Othmer, E; Penick, E C; Powell, B. The Psychiatric Diagnostic Inventory. Los Angeles: Western Psychological Services, 1981. [cited in 13281]

Psychiatric Diagnostic Screening Questionnaire

"The PSDQ is a 102-item, self-administered questionnaire that screens for the most common DSM-IV axis I disorders present in psychiatric outpatients." [21638]
"The PSDQ is a 90-item self-administered questionnaire that screens for 13 DSM-IV disorders in 5 areas" [21794]

Psychiatric Disability Assessment Schedule (World Health Organization)

UF: World Health Organization Short Disability Assessment

Psychiatric Epidemiology Research Interview (Dohrenwend)

UF: Beliefs and Feelings Scale (Dohrenwend et al)
PERI

Psychiatric Evaluation Form (Endicott and Spitzer)

Spitzer, R L; Endicott, J; Mesnikoff, A M; Cohen, M S. The Psychiatric Evaluation Form. New York: Biometrics Research, 1968. [cited in TC 007, p. 341]

Psychiatric Experiences Questionnaire (Cusack et al)

"developed...for this study" [26351]
Cusack, K J; Frueh, B C; Hiern, T G; Suffoletta-Maierle, S; Bennett, S. Trauma within the psychiatric setting: a preliminary empirical report. Administration and Policy in Mental Health 30: 453-460 (2003). [26351]

Psychiatric Research Interview for Substance and Mental Disorders (Hasin et al)

Psychiatric Screening Questionnaire (Dynes et al)

Dynes, J B; Springer, N N; Thomas, F H. A psychiatric program for a naval receiving station. War Medicine 8: 337-342 (1945). [04614; the unnamed questionnaire appears on pp. 339-342]

Psychiatric Service Dog Assistance Scale (Marshall)

"a 4-scale instrument [that] measures the ways in which psychiatric service dogs help their handlers" [93589]

Psychiatric State Examination

[used but not cited in 25138]
Psychiatric Status Schedule (Spitzer et al)

Psychiatric Symptom Assessment Scale (Bigelow and Berthot)
"a 23-item modification of the Brief Psychiatric Rating Scale”

Psychiatric Symptom Frequency Scale (Lindelow et al)
Lindelow, M; Hardy, K; Rodgers, B. Development of a scale to measure symptoms of anxiety and depression in the general UK population: the Psychiatric Symptom Frequency Scale. *Journal of Epidemiology and Community Health* 51: 549-557 (1997). [33296]

Psychiatric Symptom Index (Ilfeld)

Psychiatrists' Attitudes Toward Their Patients Scale (Bras et al)
14 items
[Instrument not named in text; name assigned by PILOTS Database staff]
Bras, M; Brjakovic, L; Milunovic, V; Bicanic, I; Haller, F; Dordevic, V; Milicic, D. Psychiatrists' empathy, beliefs and attitudes towards veterans suffering from combat-related posttraumatic stress disorder. *Psychiatria Danubina* 24: 287-291 (2012). [39567; the Scale appears on p. 288]

Psycho-Oncology Screening Tool (Kilbourn et al)
"The POST is a 33-item self-report survey designed to identify oncology patients who could benefit from early psychosocial intervention.” [85526]
Kilbourn, K M; Bargal, N; Durning, P E; DeRoche, K; Madore, S; Zabora, J. Validity of the Psycho-Oncology Screening Tool (POST). *Journal of Psychosocial Oncology* 29: 475-498 (2011). [85526; the POST appears on p. 498]

Psychological Abuse and Neglect Scales (Briere)

USE: Psychological Maltreatment Review (Briere et al)

Psychological Abuse Inventory (Calvete et al)

"The PAI is based on the recommendations published by the National Center for Injury Prevention and Control of the USA to promote consistency in the use of terminology and data collection related to interpersonal violence. It includes 17 abusive acts...which were suggested by an expert panel as indicators of intimate partner psychological abuse. [81400]

Psychological Abuse Survey (Follingstad)

This questionnaire asks “How often did your partner ______?” with seven categories of abuse...” [28872]

Psychological Adjustment Scale (Sabir)

Psychological Aggression Scale (Stets)

"a 26-item questionnaire that serves to investigate whether a respondent perpetrated or received 13 types of psychological violence” [80105]

Psychological Assessment of Candidates for Transplantation (Olbrisch and Hamer)

"FACT...consists of 10 items, including 8 items measuring aspects of psychosocial importance, an initial rating, and a final rating...” [31399]

Psychological Child Maltreatment Questionnaire (Zelikovsky and Lynn)

"consists of seven subscales that reflect seven verbal parental reactions that might be psychologically damaging to the individual” [17032]
[used but not cited in 17032]

Psychological Consequences Questionnaire (Cockburn et al)

Psychological Contract Inventory (Rousseau)
Psychological Coping with Captivity Scale (Solomon and Dekel)
"a 24-item self-report questionnaire" [28174; not named in text; name assigned by PILOTS Database staff]

Psychological Distress and Somatic Symptoms Questionnaire (Kaiser et al)
"a 31-item questionnaire"

Psychological Distress Index (Renshaw et al)
"we generated [a 25-item] index of psychological distress from a broad range of items that assessed spouses' psychological functioning within the past year" [34832]

Psychological Distress Scale of Quebec Health
Préville, M; Boyer, R; Potvin, L; Perrault, C; Légaré, G. La détresse psychologique: determination de la fiabilité et de la validité de la mesure utilisée dans l’enquête Santé Québec. *Enquête Santé Québec 87, Gouvernement du Québec, Ministère de la santé et des Services sociaux*, 1992. [cited in 82736]

Psychological Elder Abuse Scale (Wang et al)
"The PEAS is a 32-item scale based on a yes/no response format, which is user-friendly for older adults." [28329]
Wang, J; Hsu, Y; Chen, K; Tseng, H. Development and testing of the indicators to screening elder subtle psychological abuse for older Taiwanese adults. Presented at 23rd Quadrennial International Council of Nurses Congress, Taipei, Taiwan, 2005. [cited in 28329]

Psychological Hardiness Scale (Durak and Motan)
"assesses hardiness for Turkish samples with 19 items" [37472]
Durak, M; Motan, I. Psychometric properties of the Psychological Hardiness Scale. Unpublished manuscript, 2009. [cited in 37472]

Psychological Health Scale (Xiao)

Psychological Inventory of Personality and Symptoms (Vincent)

Psychological Maltreatment Inventory (Engels and Maisan)
"a 25-item scale"

Psychological Maltreatment Measure (Baker and Festinger)
"A new measure of adult recall of childhood psychological maltreatment was created for this study to ensure that all five of the APSAC-endorsed categories [i.e., spurning, terrorizing, isolating, exploited/corrupted; denying emotional responsiveness] were assessed." [86485]

Psychological Maltreatment of Women Inventory (Tolman)

Psychological Maltreatment Rating Scales

Psychological Maltreatment Review (Briere et al)
"The PMR is a 30-item scale that includes three subscales with 10 items each that assess parental psychological abuse, psychological neglect, and psychological support prior to age 18." [86672]

UF: Psychological Abuse and Neglect Scales (Briere)
Psychological Maltreatment Scale (Davis et al)

"The PMS is a 30-item questionnaire consisting of items from Briere and Runtz's scale of psychological maltreatment and additional questions used in more recent studies that sample the range of actions included in Hart and Brassard's definition criteria for psychological abuse." [15861]

Psychological Measure of Islamic Religiousness (Abu-Raiya et al)

Psychological Mindedness Assessment Procedure

Psychological Orientation Questionnaire (Waddington and Morley)

"developed from the Opinions About Psychological Problems Questionnaire devised by Barker et al" [22368]

Psychological Preparedness for Torture Scale (Basoglu et al)

Psychological Profile of Forgiveness Scale (Hebl and Enright)

Psychological Responses Questionnaire on SARS (Qian et al)

"a 14-item questionnaire designed to investigate the behavioural, cognitive, and emotional responses of the public towards SARS" [18961]

Qian, M; Ye, D; Zhang, J; Xu, K; Zhang, L; Huang, Z; Dong, W; Liu, X; Zhang, X; Zhang, Z; Wang, C; Nie, J. Behavioural, cognitive and emotional responses to SARS: differences between college students in Beijing and Suzhou. *Stress and Health* 21: 87-98 (2005). [18961]

Psychological Screening Inventory (Lanyon)

Psychological Sense of School Membership (Goodenow)

"The PSSM scale is an 18-item self-report measure of a student's sense of school belonging." [30001]

Psychological Separation Inventory (Hoffman)

measures functional, emotional, conflictual, and attitudinal independence

Psychological State Checklist (Amone-P’Ołak)

"a 22-item checklist specifically designed for this study to collect information...about the mental states of the adolescents" [80776]

Psychological State of Stress Measure (Lemyre and Tessier)

USE: Mesure de Stress Psychologique (Lemyre and Tessier)

Psychological State Questionnaire (Johnson et al)

Psychological Symptoms Scale (Punamäki)

"A 34-item questionnaire was based on two earlier symptom checklists used among war-traumatized children. The questionnaire covers depressive, aggressive, somatic, and posttraumatic symptoms as well as sleeping difficulties and cognitive problems." [29956]

Psychological Symptoms Screening Test (Gurin et al)

[instrument not named in 21680; name assigned by PILOTS database staff]

Psychological Trauma and Resources Scales (Holmes et al)

Holmes, G R; Forand, A Q; Myers, D; Leonhardt, T V; Caesar, R; Cuccaro, M L; Hood, M; Stader, S R; McNulty, G F. An interim report on the development of the Psychological Trauma and Resources Scales. *Psychological Reports* 80: 819-831 (1997). [09454]
**Psychological Well-Being - Post-Traumatic Changes Questionnaire (Regel and Joseph)**

"The PWB-PTCQ consists of 18 items, with 3 items developed to reflect each of the domains of self-acceptance, autonomy, purpose in life, relationships, sense of mastery, and personal growth." [38107]

**Psychological Well-Being Scale (Rumbaut)**

"adapted from the General Well-Being Scale [Dupuy]" [09006]

**Psychological Wellbeing Scale (Bradburn)**

USE: Bradburn Affects Balance Scale (Bradburn)

**Psychologically Violent Parental Practices Inventory (Gagné et al)**

USE: Inventaire des Conduites Parentales Psychologiquement Violentes (Gagné et al)

**Psychomotor Retardation Rating Scale (Widlöcher)**

**Psychomotor Vigilance Task (Dinges and Powell)**

"a 10-minute visual reaction time task and index of alertness" [29498]

**Psychopathic Personality Inventory (Lilienfeld and Andrews)**

"The PPI is a 187-item self-report measure of psychopathy." [29171]

**Psychopathic States Inventory (Haertzen et al)**

**Psychopathology Inventory for Mentally Retarded Adults**

[used but not cited in 90144]

**Psychopathy Checklist (Hare)**

Psychosomatic Inventory (McFarland and Seitz)

Psychosomatic Problems Scale (Hagquist)
The PSP is an 8-item scale... [38537]

Psychosomatic Reactivity (Ogar)

Psychosomatic Problems Scale (Hagquist)
The PSP is an 8-item scale... [38537]

Psychosomatic Symptom Checklist (Attansio et al)

Psychosomatic Symptom Scale (Theorell et al)
22 items

Psychotherapeutic and Safety Planning Knowledge Quiz (Acierno et al)
"to assess the degree to which participants were aware of steps they could take to ameliorate symptoms of avoidance and depression following traumatic events" [18834]

Psychotherapy Decisional Balance Scale (Bellis)
"a 20-item instrument that was developed to ascertain opinions of the positive and negative aspects of engaging in psychological therapy" [27222]

Psychotherapy Outcome Assessment and Monitoring System (Green et al)
"a self-report measure designed to assess domains such as feelings of well-being, psychological symptom distress, and life functioning." [28128]

Psychotherapy Process Q Sort (Block)

Psychotic Symptom Screening Questionnaire
[used but not cited in 32714]

Psychotic Symptoms Rating Scales (Haddock et al)
"a six-item interview measure that assesses amount of preoccupation, duration of preoccupation, conviction, amount of distress, severity of distress, and impairment" [27720]

UF: PSYRATS

Psychotropic/Auxiliary Drug Treatment Schedule (Zlotnick et al)
"an interview administered form designed for this study" [25419]

PSYRATS
USE: Psychotic Symptoms Rating Scales (Haddock et al)

PsySTART Rapid Triage System
PTED Self-Rating Scale (Linden et al)
"a 19-item questionnaire designed to assess the diagnostic criteria of posttraumatic embitterment disorder (PTED)" [30299]

PTS-Related Checklist for Children (Linares et al)
"a developmentally appropriate symptom checklist for preschool children, developed in our laboratory" [21143]

PTSD
SEE ALSO: Post-Traumatic Stress Disorder

PTSD - Factorial Version Inventory (Strelau et al)
USE: Kwestionariusz PTSD - Wersja Cynnikowa (Strelau et al)

PTSD and Dissociation Checklist (Coons et al)
USE: Questionnaire on Symptoms of Posttraumatic Stress and Dissociation (Coons et al)

PTSD Assessment (Brende)

PTSD Assessment Tool for Schizophrenia (Williams-Keeler)
"The PATS is a semi-structured interview designed to elicit posttraumatic reactions to psychosis and treatment experiences." [34138]

PTSD Case Formulation Interview (Wells)
Wells, A. Metacognitive Therapy for Anxiety and Depression. New York: Guilford Press, 2009. [82992; the Interview appears on p. 278]

PTSD Checklist - Civilian (Weathers et al)

PTSD Checklist - Military (Weathers et al)

PTSD Checklist - Specific (Weathers et al)

PTSD Checklist - Terror
[used but not cited in 91915]

PTSD Checklist (Kulka and Schlesinger)

PTSD Checklist (Lipper et al)
" an unpublished scale" of PTSD symptoms rated by an interviewer

PTSD Checklist (Realmuto)
"a self-report scale developed to evaluate the level of PTSD according to DSM-III-R" [04201]

PTSD Checklist (Shields et al)
"A checklist was adapted from the diagnostic criteria for PTSD in the DSM-IV." [21773]

PTSD Checklist for Children (Ford and Weathers)
a 17-item questionnaire

PTSD Checklist for Preschool Children (Linares and Cloitre)
"A developmentally appropriate 20-item symptom checklist for preschool children" [18584]
PTSD Checklist Relevance Questionnaire (Richards et al)
developed "in order to gauge the relevance of the PTSD checklist symptoms to the participants’ experience" [85869]

PTSD Coping Inventory (Hunt)
"a [24-item] tool for evaluating the acquisition of coping skills specific to combat related PTSD" [91281]

PTSD Criterion A3 Checklist (Bracha et al)
a 10-query checklist that "may be useful for screening persons in the acute aftermath of a disaster" [27346]

PTSD Disclosure Checklist (Gallagher et al)
[used but not cited in 14662]

PTSD Disclosure Checklist (Gallagher et al)
a 17-item questionnaire developed for the present study [14078]

PTSD Index (Lipper et al)
"an unpublished self-rating scale.
Lipper, S; Davidson, J R T; Grady, T A; Edinger, J D; Hammett, E B; Mahoney, S L; Cavenar, J O. Preliminary study of carbamazepine in post-traumatic stress disorder. *Psychosomatics* 27: 849-854 (1986). [00651]

PTSD Interview (Goldstein et al)

PTSD Interview (Watson et al)

PTSD Inventory (Solomon et al)
Solomon, Z; Benbenisti, R; Mikulincer, M. *Combat Stress Reactions In The 1982 Lebanon War: Clinical Interviews With The Casualties*. Tel Aviv: Israel Defense Forces, 1987. [cited in 02185 (as "PTSD Questionnaire")]

PTSD Inventory (Zawadzki et al)
"based on the DSM-IV diagnostic criteria for PTSD" [82967]

PTSD Knowledge Questionnaire (McKenzie and Smith)
"purpose-designed...to investigate what clinicians know about PTSD, what they believe to be true, and what, if any, are the gaps in their knowledge" [32103]

PTSD Life-Chart Method (Osuch et al)
Osuch, E A; Brotman, M A; Podell, D; Geraci, M; Touzeau, P L; Leverich, G S; McCann, U D; Post, R M. Prospective and retrospective life-charting in posttraumatic stress disorder (the PTSD-LCM): a pilot study. *Journal of Traumatic Stress* 14: 229-239 (2001). [15873]
PTSD Multimodal Questionnaire (Hutzell et al)

PTSD Parent-Child Weekly Rating Scale (Peebles and Scheeringa)
"assesses 10 items for the child...and 10 items for the parent" [81130]

PTSD Practice Inventory (Speroff et al)
a 128-item instrument that asked VA practitioners about "their practices and attitudes related to disability assessment of PTSD” [88586]
Jackson, J C; Sinnott, P L; Marx, B P; Murdoch, M; Sayer, N A; Alvarez, J M; Greevy, R A; Schnurr, P P; Friedman, M J; Shane, A C; Owen, R R; Keane, T M; Speroff, T. Variation in practices and attitudes of clinicians assessing PTSD-related disability among veterans. Journal of Traumatic Stress 24: 609-613 (2011). [88586]

PTSD Prognostic Checklist (Simon)
"for the systematic assessment of risk for chronic PTSD in adults”

PTSD Program Environment Scale (Fontana et al)
"an expanded form of the Moos Community Oriented Program Environment Scale, consisting of 110 True-False questions that assess patients' perceptions of their inpatient unit” [20788]

PTSD Questionnaire (Frans et al)

PTSD Questionnaire (Lopez et al)
"Based on the French-Canadian version of the child Post-Traumatic Stress-Reaction Index” [31259]

PTSD Questionnaire (Solomon et al)
USE: PTSD Inventory (Solomon et al)

PTSD Reaction Index (Frederick)
Sometimes attributed to Pynoos or to Pynoos and Nader.
Pynoos, R; Frederick, C; Nader, K; Arroyo, W; Steinberg, A; Eth, S; Nunez, F; Fairbanks, L. Life threat and posttraumatic stress in school-age children. Archives of General Psychiatry 44; 1063 (1987). [00726]
Frederick, C; Pynoos, R. Child Post-Traumatic Stress Reaction Index. Los Angeles: UCLA Neuropsychiatric Institute and Hospital, 1988. [cited in 03925]

UF: Child Post-Traumatic Stress Reaction Index
Child PTSD Reaction Index
Post-Traumatic Stress Reaction Index
Reaction Index
Reaction Index for Children
Traumatic Index Scale
UCLA PTSD Reaction Index

PTSD Scale (Boehnlein and Kinzie)
a 38-item scale, with 19 items asking about experiences of traumatic events and 19 items about the effects of traumatic experiences [used but not usefully cited in 28993; name assigned by PILOTS Database staff]

PTSD Scale (Chen et al)

PTSD Scale (Lerer et al)

PTSD Scale (McIntyre)
[used but cited only as “McIntyre, 1993” in 37007]

PTSD Scale (Shalev)
"a 17-item symptom checklist and self-report questionnaire used to evaluate the presence of each of the DSM-III-R diagnostic criteria for PTSD during the month preceding” [used but not cited in 08541]
PTSD Scale for Adolescents (McIntyre and Ventura)

USE: Escala de Avaliação da Resposta ao Acontecimento Traumático (McIntyre and Ventura)

PTSD Scale for Family Violence

"a self-report scale based on DSM-III-R criteria"
[used but not intelligibly cited in 27312]

PTSD Screening and Diagnostic Scale (Kubany)

"The PSDS is a 38-item self-report questionnaire for assessing PTSD symptoms and detecting the presence of PTSD as defined by the DSM-IV diagnostic criteria." [82482]
Kubany, E S. Trauma Assessment Inventories: Traumatic Life Events Questionnaire and PTSD Screening and Diagnostic Scale. Los Angeles: Western Psychological Services, 2004. [cited in 82482]

PTSD Screening Form (NEPEC)

[used but not cited in 14662]

PTSD Self-Assessment Questionnaire (Smyth)

PTSD Self-Report Scale (Kemp et al)

"a 17-item, self-report instrument" [06240]

PTSD Semi-Structured Interview and Observational Record for Infants and Young Children (Scheeringa and Zeanah)

"an examiner-based interview of the primary caregiver" [23436]
Scheeringa, M S; Zeanah, C H. PTSD Semi-Structured Interview and Observational Record for Infants and Young Children. Unpublished instrument, Department of Psychiatry and Neurology, Tulane University Health Sciences Center, 1994. [cited in 23436]

PTSD Specialist Questionnaire (Rosen et al)

PTSD Statistical Prediction Instrument (Marx et al)

"a statistical prediction instrument to determine combat-related PTSD status…which consisted of 12 well-known risk and resilience variables associated with PTSD" [31146]

PTSD Status Form (NCPTSD)

[used but not cited in 29601]

PTSD Symptom Checklist (Espino)

"a 15-item checklist which includes the symptoms in [DSM-III-R] as well as some of the findings recently reported in research with children"

PTSD Symptom Frequency Scale (Snow et al)

a "17-item 5-point Likert-type [scale] developed for the 1984 survey...of the health and well-being of American Legion members" [26299]

PTSD Symptom Inventory (Hough and Vega)

"a researcher-designed questionnaire of 12 items in a 7-point Likert scale format that assesses the presence of PTSD symptoms as defined by DSM-IV…originally adapted and modified from one developed by Hough and Vega" [22850]

PTSD Symptom Scale (Foa et al)

Two versions of this scale exist: a semi-structured interview (PTSD Symptom Scale—Interview [PSS-I]) and a self-report instrument (PTSD Symptom Scale—Self-Report [PSS-SR]). [11890, p. 460]
Foa, E B; Riggs, D S; Foa, E; Rahman, D; Houcher, B O; Rothbaum, B O; Griggs, D S; Foa, E. The PTSD Symptom Scale. Presented at the European Association of Behavior Therapy Annual Conference, Paris, September 1990. [cited in 11374]
PTSD Symptom Scale (Kuhne et al)

UF: Problem Check List (Kuhne et al)

PTSD Symptom Scale (Southwick et al)
"developed and used to measure the effects of yohimbine on specific symptoms associated with PTSD...consisted of 14 items" [04081]
Southwick, S M; Krystal, J H; Morgan, C A; Johnson, D; Nagy, L M; Nicolaou, A; Heninger, G R; Charney, D S. Abnormal noradrenergic function in posttraumatic stress disorder. *Archives of General Psychiatry* 50: 266-274 (1993). [04081]

PTSD Symptoms Measure (Del Valle and Alvelo)
"developed to determine the extent of parental behavioral indicators of PTSD as observed by the children" [0300]

PTSD Symptoms Scale (Barrett)
"This scale, developed for this study, consisted of 83 questions..."

PTSD Symptoms Scale (Carlson et al)
"a 0- to 10-point global scale devised by the authors"

PTSD-8 (Hansen et al)
"a short screening instrument...derived from the first 16 items of the Harvard Trauma Questionnaire" [36014]
Hansen, M; Andersen, T E; Armour, C; Elklit, A; Palic, S; Mackrill, T. PTSD-8: a short PTSD inventory. *Clinical Practice and Epidemiology in Mental Health* 6: 101-108 (2010). [36014; the PTSD-8 appears on pp. 106-107]

PTSD-Alcohol Expectancy Questionnaire (Inaba)
"developed in the first phase of this research" [90106]

PTSD-PAC (Levendosky et al)
"an 18-item measure of PTSD symptoms in preschool children developed for this study based on the DSM-IV criteria for PTSD symptoms, with the addition of symptoms relevant to young children's traumatic responses" [16461]
Levendosky, A A; Huth-Bocks, A C; Semel, M A; Shapiro, D L. Trauma symptoms in preschool-age children exposed to domestic violence. *Journal of Interpersonal Violence* 17: 150-164 (2002). [14641]

PTSS-10
USE: Post-Traumatic Symptom Scale (Holen et al)

PTSS-12
USE: Post-Traumatic Symptom Scale (Holen et al)

PTSS—Zelf-Scoring
USE: Self-Rating Scale for PTSD (Carlier et al)

Public and Private Self-Consciousness Scale (Fenigstein et al)
USE: Self-Consciousness Scale (Fenigstein et al)

Punitive Discipline Scale (Schuette and Eiden)
a 12-item scale "to measure the participants' use of various verbal and physical discipline techniques with their child" [28161]

Pupil Evaluation Inventory (Pekarik et al)
"The PEI consists of 35 items assessing social behavior yielding three homogeneous and stable factors, including aggression, withdrawal, and likability." [21293]

Purdue Momentary Assessment Tool
Weiss, H M; Beal, D J; Lucy, S L; MacDermid, S M. Constructing EMA studies with PMAT: the Purdue Momentary Assessment Tool user's manual. [cited only as 2004 web document in 40008]

Purdue Non-Language Test
"48 tasks to draw geometrical shapes...designed to measure mental capabilities" [26538]
Purdue Pegboard Test

Purdue Post-Traumatic Stress Disorder Scale (Figley)
USE: Purdue PTSD Scale (Hartsough)

Purdue PTSD Questionnaire (Lauterbach and Vrana)
"consists of 17 items, one corresponding to each of the DSM-III-R criteria for PTSD...[rated] on a 5-point Likert scale" [13736]

Purdue PTSD Scale (Hartsough)

UF: Purdue Post-Traumatic Stress Disorder Scale (Figley)

Purdue Social Support Scale (Burge and Figley)

Purpose in Life Scale (Ryff and Keyes)
"a 7-item self-report measure that assesses a person's sense of purpose and direction in life" [31598]

Purpose in Life Test (Crumbaugh and Maholick)

Q-PTSD (Morel)
USE: Quick Test for PTSD (Morel)

Q-Sort of Adolescent Images (Young and Klein)

QLC-C30
USE: EORTC Quality of Life Questionnaire

QOL-Cancer Survivor Questionnaire
[used but not cited in 92585]

QOLIBRI
USE: Quality of Life Questionnaire After Traumatic Brain Injury

Qualitative Interview Schedule (Ferry et al)
"designed to guide the collection of information on the impact of the traumatic event(s) on the participants" [83571]
Ferry, F; Bolton, D; Bunting, B; Devine, B; McCann, S; Murphy, S. *Trauma, Health and Conflict in Northern Ireland: A Study of the Epidemiology of Trauma Related Disorders and Qualitative Investigation of the Impact of Trauma on the Individual*. Omagh and Londonderry, Northern Ireland: Northern Ireland Centre for Trauma and Transformation and Psychology Research Institute, University of Ulster, 2008. [83571; the QIS appears on pp. 72-74]

Quality of Dying and Death Scale (Curtis et al)

Quality of Life - End of Life Scale (Steinhauser et al)

Quality of Life and Care (Wennink and Van Wijngaarden)

Quality of Life and Functioning Scale (Sheehan)

Quality of Life Enjoyment and Satisfaction Questionnaire (Endicott et al)
Quality of Life Events Scale
[a “self-report” used but not cited in 34102]

Quality of Life Index (Ferrans and Powers)
"The original QLI contains 35 items designed to measure satisfaction with life over four subscales: Health and Functioning, Social and Economic, Psychological/Spiritual, and Family." [83883]

Quality of Life Instrument for Young Adults (Chen et al)

Quality of Life Interview (Lehman)

Quality of Life Inventory (Frisch)

Walling, D P; Goenjian, L P. Validation of the adolescent quality of life scale in Greek trauma survivors. [2003 conference presentation confusingly cited in 36607]

Quality of Life Questionnaire After Traumatic Brain Injury
UF: QOLIBRI

Quality of Life Scale (Andrews and Withey)

Quality of Life Scale (Burckhardt and Anderson)
"The QOLS contains 16 items that require respondents to estimate their current satisfaction with different life domains." [84159]

Quality of Life Scale (Chibnall and Tait)
"a 7-item Likert-type self-report scale that assesses fulfillment and satisfaction in 7 areas of role functioning" [27502]

Quality of Life Scale (Fazel and Young)

Quality of Life Scale (Flanagan)

Quality of Life Scale (Heinrichs et al)
"a 21-item scale based on a semi-structured interview that was designed to quantify role-functioning in patients suffering from chronic psychotic disorders" [13304]

Quality of Life Scale (Lehman et al)
Quality of Life Scale (Marks)

"This scale (range 0-40) rates five areas: work, individual leisure, leisure involving other people, family life, and sex life." [30573]
Marks, I; Swinson, R; Basoglu, M; Kuch, K; Noshirvani, H; O'Sullivan, G; Lelliott, P; Kirby, M; McNamee, G; Sengun, S; Wickwire, K. Alprazolam and exposure alone or combined in panic disorder with agoraphobia: a controlled study in London and Toronto. British Journal of Psychiatry 162: 776-787 (1993). [cited in 30573]

Quality of Life Scales (Krizmanic and Kolesaric)

"This consists of 21 items which measure various aspects of quality of life." [30972]

Quality of Life Self-Report (Berman et al)

"a self-report measure modified from [Lehman’s] Quality of Life Interview" [15542]

Quality of Life Surveys (Michigan)
[used but not cited in 19732]

Quality of Marital Relationship
[used but not cited in 91254]

Quality of Marriage Index (Norton)

"The QMI is a six item self-report questionnaire designed to measure overall marital relationship satisfaction." [14738]

Quality of Motivation Questionnaire (Martin)

"a self-report format that consists of 310 true/false questions and provides motivational information in five major areas: disclosure level, sources of motivation, skills, life style characteristics and power scores" [16697]
Martin, R C. The Quality of Motivation Questionnaire. Lee’s Summit, Missouri: RCM Enterprises, 1989. [cited in 16697]

Quality of Relationships Inventory (Pierce et al)

"The QRI was used to measure the participants’ perceptions of their social support during the time of abuse....The inventory consists of 25 items..." [85229]

Quality of Social Support Scale (Vandervoort)

5 items

Quality of Well-Being Scale (Kaplan et al)

"an interview-based measure of well-being" [20523]

Quality of Work Satisfaction
[used but not cited in 92841]

Quality-Frequency Index of Alcohol Consumption

"The Q-F Index assesses the quantity and frequency of alcohol consumption over the past month." [26883]

Quantitative Cocaine History (Satel et al)

Quantitative Workload Inventory
[used but not cited in 91260]

Quebec Health Survey (Bellerose et al)

Quebec Task Force Classification of Whiplash Associated Disorders (Spitzer et al)

Queensland Mental Health Case Manager Personal Efficacy Scale
USE: Florida Secondary Traumatic Stress Scale
Quest Scale (Batson et al)

"Designed to measure...the degree to which an individual’s religion involves [a]...responsive dialogue with existential questions.” [15157, quoting Batson et al]

Questionario del Dolore (Fioravanti et al)

Questionario Epidemiologico sui Disturbi d’Ansia (Pancheri et al)

Questionnaire Aftercare - Royal Army

"This scale assessed threatening events experienced during deployment [with the Dutch armed forces] as well as the degree of threat experienced from them.” [84057]

Questionnaire d’Évitement Cognitive (Gosselin et al)

"The CAQ is a 25-item measure that assesses an individual’s use of five cognitive avoidance strategies in response to threatening thoughts.” [34314]
Gosselin, P; Langlois, F; Freeston, M H; Ladouceur, R; Dugas, M J; Pelletier, O. Le Questionnaire d’évitement cognitive (QEC): développement et validation auprès d'adultes et d'adolescents. *Journal de Thérapie Comportementale et Cognitive* 12: 24-37 (2002).

UF: Cognitive Avoidance Questionnaire (Gosselin et al)

Questionnaire d’Auto-Évaluation de la Mémoire (Van der Linden et al)

Van der Linden, M; Wynn, Ch; Coyette, F; Von Frenckell, R; Seron, X. Questionnaire d’Auto-Évaluation de la Mémoire. [n.p.]: Editeil, 1989. [cited in 07926]

USE: Fragebogen zu Konfliktbewältigungsstrategien (Hentschel et al)

Questionnaire for Eating Disorders Diagnosis (Mintz et al)

Questionnaire for Eating Styles (Figueroa)

"This is a Spanish 81-item self-report instrument...rating the presence of symptoms and eating styles that are consonant with such eating disorders as bulimia and/or anorexia nervosa.” [82424]

Questionnaire for Haemophilia Nurses (Gordon et al)

Questionnaire for Investigation of War Experiences (Kerepcic et al)
Kerepcic, I; Vuletin, J; Muacevic, V; Matic, J; Kajevic, M; Mandic, K. Experience of war in chronic schizophrenic patients living in war operation areas and out of them. *Psychologische Beiträge* 34: 327-335 (1992). [13866; the Questionnaire appears on pp. 333-335]

Questionnaire for Sex Workers (Farley and Barkan)
"a 23-item questionnaire which inquired about their histories of physical and sexual violence, and what was needed in order to leave prostitution" [20504]
UF: Prostitution Questionnaire (Farley et al)

Questionnaire for the Assessment of Disgust Sensitivity (Schienle et al)
"This instrument consists of 13 items, pairs of opposite statements which describe different aspects of the state of anxiety." [23212]
incompletely cited as "Vizek-Vidovic, Kutrovac & Franc, 1993"

Questionnaire for the Examination of Children’s Depression (Vizek-Vidovic and Zivic)
"This instrument consists of 18 pairs of opposite statements describing various manifestations of the state of depression in children." [23212]
incompletely cited as "Vizel-Vidovic & Zivic, 1993"

Questionnaire for the Examination of Children’s Psychosocial Adaptation (Lugomer-Armano and Vizek-Vidovic)
"This instrument consists of 14 items describing different aspects of psychosocial adaptation to the subject’s current environment." [23212]
incompletely cited as "Lugomer-Armano c & Vizek-Vidovic"

Questionnaire for the Examination of Posttraumatic Stress Reactions in Children (Kuterovac et al)
"consists of 20 items based on the description of PTSD in [DSM-III]" [23212]
incompletely cited as "Kutrovac, Franc & Vizek-Vidovic, 1993"

Questionnaire for the Examination of Psychosomatic Symptoms in Children (Kerestes et al)
"The instrument consists of 15 binary (YES-NO) items describing physiological changes and problems associated with stressful and/or traumatic experiences." [23212]
incompletely cited as "Kerestes, Kutrovac & Vizek-Vidovic, 1993"

Questionnaire for the Self-Evaluation of the Quality of Life (Ventegodt)
"The questionnaire...contained 317 questions, divided into the following sections: social information, lifestyle, illness, sexuality, self-perception, life-perception, and 8 series of questions used to measure the quality of life according to 8 different definitions of quality of life." [28985]
Ventegodt, S. *Measuring the Quality of Life: From Theory to Practice*. Copenhagen: Forskningscentrets Forlag, 1996. [cited in 28985; contains a "rough translation" of the Questionnaire]

Questionnaire for the Vio Ventotene Civilian Disaster (Farina et al)
"a self-rating, PTSD DSM-IV-based questionnaire" [37800]

Questionnaire for Women Vietnam Veterans (Schnaier)
Questionnaire Guide d'Évaluation (Mouchenik et al)

"The QGE was used for the assessment of psychological disorders in young children... The QGE is a hetero-evaluation rating scale for children aged 4 to 6 years, filled by parents or child welfare workers." [36235]

Mouchenik, Y; Gaboulaud, V; Pérouse de Montclos, M-O; Monge, S; Baubet, T; Taleb, O; Moro, M R. Questionnaire Guide d'Évaluation des difficultés psychologiques de jeunes enfants pris en charge par la Protection de l'Enfance. Enfant 62(2): 143-166 (2010). [36235; the QGE appears on pp. 163-166]

Questionnaire Measure of Emotional Empathy (Mehrabian and Epstein)

[cited in 91255 only as "Mehrabian and Epstein, 1972"]

Questionnaire Measure of Emotional Empathy (Mehrabian and Epstein)

"The QMEE is a 33-item measure of emotional empathetic tendency." [19595]

Questionnaire Measuring Immediate Mood

[used but not cited in 91440]

Questionnaire of Approaches to Critical Life Events (Trzebinski and Zieba)

"This self-report questionnaire consists of 50 descriptions of possible reactions to a given critical event in one's personal life." [39995]

Questionnaire of Coping Responses

USE: Coping Questionnaire (McCrae)

Questionnaire of Early Childhood Adversities (Kessler and Magee)

"assessed seven types of childhood adversity, each focusing on an experience before the respondent was 16 years of age" [23021]

Questionnaire of Experiences of Dissociation (Riley)

UF: Measurement of Dissociation Scale

Questionnaire of Psychosomatic Symptoms (Vizek Vidovic and Arambasic)

"16 statements to which children respond yes or no" [20155]

Questionnaire of Recently Experienced Events (Willige et al)

USE: Vragenlijst Recent Meegemaakte Gebeurtenissee (Van Willige et al)

Questionnaire of Twins Physical Resemblance (Oniszczenko and Rogucka)

USE: Kwestionariusz Fizycznego Podobienstwa Blizniat (Oniszczenko and Rogucka)

Questionnaire on Agent Orange (Fink)

Questionnaire on Child Sexual Abuse (Cantón-Cortés and Cantón)

"This questionnaire was developed specifically for this research. It compiles socio-demographic data and CSA experiences of participants in an anonymous way." [34428]

Questionnaire on Child Sexual Abuse (Halpérin et al)

[Instrument not named by authors; name supplied by National Center staff]

Questionnaire on Childhood Sexual Abuse (Hulme)

"In the Q-CSA, 13 sexual activities are listed in order of invasiveness, and respondents are asked if they ever experienced any of these sexual activities before the age of 18." [18137]

Questionnaire on Children’s Stressful and Traumatic War Experiences (Franc et al)

"This instrument consists of 20 items describing different war stressors." [23212]

Incompletely cited as "Franc, Kuterovac & Stuvland, 1993"

Questionnaire on Dating Violence (Bergman)

Questionnaire on Eating and Weight Patterns (Spitzer et al)
Spitzer, R; Devlin, M J; Walsh, B T; Hasin, D; Wing, R; Marcus, M; Stunkard, A J; Wadden, T; Yanovski, S; Agras, S; Mitchell, J; Nonas, C. Binge eating disorder: a multisite field trial of the diagnostic criteria. International Journal of Eating Disorders 11: 191-203 (1992).
Spitzer, R; Yanovski, S; Wadden, T; Wing, R; Marcus, M D; Stunkard, A J; Devlin, M; Mitchell, J; Hasin, D; Horne, R L. Binge eating disorder: its further validation in a multisite study International Journal of Eating Disorders 13: 137-153 (1993). [cited in 32731]

Questionnaire on Events of Childhood and Adolescence (Thériault et al)
“self-report questionnaire” [80326]
Thériault, C; Cyr, M; Wright, J. Questionnaire on Events of Childhood and Adolescence. Unpublished manuscript, Department of Psychology, Université de Montréal, 1996. [cited in 80326]

Questionnaire on Intimate Relationships (Button and Dietz)

Questionnaire on Loss Events (Liotti et al)
"The QLE is a 17–item questionnaire developed by our group to assess parental loss events and other negative life events within the 2 years preceding and the 2 years following the patient's birth." [23687]

Questionnaire on Loss Events (Nagata et al)
"15 self-assessment questions" [31674]

Questionnaire on Self-Injurious Behavior (Paul et al)

Questionnaire on Severe Mental Illness (Ritsher et al)
An unnamed 76-item questionnaire [name of instrument assigned by PILOTS database] exploring “issues in living with mental illness, personal relationships, and professional relationships and health care.” [21506]

Questionnaire on Sexual Experiences in the Past
USE: Vragenlijst Sexuele Ervaringen uit het Verleden (Lange)

Questionnaire on Smoking Urges (Tiffany and Drobes)
an 11-item questionnaire
Questionnaire on Social Support Behaviors in Anxious Situations (Guay et al)

"The QBSA is a 31-item self-report questionnaire assessing the perceived frequency of supportive social interactions and counternegativesocial interactions with the most significant other when the participant is notably very anxious or distressed." [86492]

Guay, S; Marchand, A; O’Connor, K. The Questionnaire on Social Support Behaviors in Anxious Situations. Unpublished manuscript, Centre de recherche Fernand-Seguin, Hôpital Louis-H. Lafontaine, Montreal, 2003. [cited in 86492]

Questionnaire on Specific Guilt (Janoff-Bulman)

Questionnaire on Symptoms of Posttraumatic Stress and Dissociation (Coons et al)

UF: PTSD and Dissociation Checklist (Coons et al)

Questionnaire on the Experience and Assessment of Work

USE: Vragenlijst Beleving en Beoordeling van de Arbeid (Van Veldhoven et al)

Questionnaire on Traumatic Combat and War Experiences (Bunjevac and Kuterovac-Jagodic)

[used but not usefully cited in 81821]

Questionnaire on Traumatic Status (Kardiner)

Kardiner, A. The Traumatic Neuroses of War. New York: Paul B. Hoeber, 1941. [12273; the Questionnaire is given on pp. 242-245]

Questionnaire Reintegration After Work Disability

Nijboer I D; Gründemann R W M; Andries F. Werkherstelling na arbeidsongeschiktheid: onderzoek naar de kans op werkherstel na een half tot anderhalf jaar na het einde van het ziektecentrum en naar de kans van hervatters om aan het werk te komen bij de oude of een nieuwe werkgever. ‘s-Gravenhage, Ministerie van Sociale Zaken en Werkgelegenheid, 1993. [cited in 34009]

Questionnaire Socio-Démographique et Sanitaire

Questionnaire sur l’Évaluation du fonctionnement Actuel (Freeston)

"The ACF assesses the severity of problems caused by anxiety over a 2-week period in seven different areas of life." [32026]

UF: Assessment of Current Functioning (Freeston)

Questionnaire sur la Nature de l’Agression (Khouzam)

Questionnaire to Assess Intensity of Fear and Tormenting Thoughts (Höring)

Questionnaire to Assess Personality Characteristics

USE: Vragenlijst Kenmerken van de Persoonlijkheid (Duijsens et al)

Questionnaire to Assess Women’s Mental Health Problems (Fujiwara et al)

"Questions used for this assessment were created based on DSM-IV..." [34222]

Fujiwara, T; Okuyama, M; Izumi, M; Osada, Y. The impact of childhood abuse history and domestic violence on the mental health of women in Japan. Child Abuse and Neglect 34: 267-274 (2010). [34222; the Questionnaire appears on p. 274]

Questionnaire to Measure Multiple Types of Aggression (Abaza)

"The questionnaire consists of 41 descriptions of behavior, thinking and feelings..." [31409]

Questionnaire upon Mental Imagery (Sheehan)

USE: Questionnaire on Mental Imagery (Bett)

Questions for Assessing Emotional Distress (Chen et al)

a "self-administered survey...to determine immediate and longer-term traumatic responses" to the September 11 terrorist attack [25681]

Questions on Life Satisfaction

USE: Fragen zur Lebenszufriedenheit (Henrich and Herschbach)
Quick Diagnostic Interview Schedule (Bucholz et al)
Bucholz, K; Marion, S L; Shayka, J J; Marcus, S C; Robins, L N. A short computer interview for obtaining psychiatric diagnoses. *Psychiatric Services* 47: 293-297 (1996). [cited in 20002]

Quick Inventory of Depressive Symptomatology (Rush et al)
Rush, A J; Trivedi, M H; Ibrahim, H M; Carmody, T J; Arnow, B; Klein, D N; Markowitz, J C; Ninan, P T; Kornstein, S; Manber, R; Thase, M E; Kocsis, J H; Keller, M B. The 16-item Quick Inventory of Depressive Symptomatology (QIDS), clinician rating (QIDS-C), and self-report (QIDS-SR): a psychometric evaluation in patients with chronic major depression. *Biological Psychiatry* 54: 573-583 (2003). [cited in 29750]

Quick Neurological Screening Test
[used but not cited in 06266]

Quick Test (Ammons and Ammons)

Quick Test for PTSD (Morel)
"The Q-PTSD is a self-report questionnaire comprising 8 statements that are rated on a 5-point Likert scale." [31000]

QuickDASH (Beaton et al)

R-Scale (Clements et al)
"The R-Scale is a 40-item self-report inventory developed to assess the type of abusive behaviors more commonly reported in college student relationships. Abusive behavior items were adapted from the Conflict Tactics Scale..." [19278]

Race-Related Events Scale (Waelde et al)
"assessed perceived exposure to...any of 22 race-related events" [30207]
Waelde, L C; Mahan, R; Kabouir, M; Mahan, C. Preliminary psychometric properties of the Race-Related Events Scale. Manuscript submitted for publication, 2005. [cited in 30207]

Race-Related Experiences Questionnaire (Loo et al)
USE: Race-Related Stressor Scale for Asian American Veterans (Loo et al)
Race-Related Stressor Scale for Asian American Veterans (Loo et al)
"a [33-item] questionnaire that assesses exposure to race-related stressors in the military and war zone" [24158]
Loo, C M; Fairbank, J A; Scurfield, R M; Ruch, L O; King, D W; Adams, L J; Chemtob, C M. Measuring exposure to racism: development and validation of a Race-Related Stressor Scale (RRSS) for Asian American Vietnam veterans. *Psychological Assessment* 13: 503-520 (2001). [24158]; the Scale is printed on pp. 518-520

Racial Climate Scale (Reid and Radhakrishnan)
"The RCS is an 8-item self-report measure that assesses perceptions of racial climate on college campuses." [34591]

Racial Discrimination Experiences Questionnaire (Carter et al)
"The RDEQ uses open-ended questions to investigate participants' experiences with racism." [84132]

Racialized Sexual Harassment Scale (Buchanan)
"The RSHS assessed participants' experience of 7 harassing behaviors that focused on their race and gender simultaneously during their most significant experience of harassment." [32677]

Racism and Life Experience Scales (Harrell)
"a comprehensive set of scales designed to measure multiple dimensions of racism experiences" [81633]

Ramsay Scale
Rancho Los Amigos Scale
[used but not cited in 91385]

RAND 36-Item Health Survey
USE: MOS Short-Form General Health Survey

RAND Community Quality Index
"Includes chart-based quality indicators for diabetes, hypertension, hyperlipidemia, and coronary artery disease" [33919]

RAND Corporation Health Insurance Survey
"The survey contains four scales measuring overall health, chronic illness, acute illness, and resistance to illness." [14517]
Eisen, M; Donald, C; Ware, J. Conceptualization and Measurement of Health for Children in the Health Insurance Study (R-2313-HEW). Santa Monica, California: RAND Corporation, 1980. [cited in 14517]

RAND Health Insurance Experiment Functional Limitations Battery
USE: Functional Limitations Battery (RAND Health Insurance Experiment)

Rand Social Activities Questionnaire (Donald et al)

Random Number Generation Task (Towse and Neil)
"a measure of the ability to resist non-random (prepotent) responses (e.g., counting) during random number generation" [32197]

Randt Memory Test (Randt et al)

Range of Impaired Functioning Tool (Leon et al)
USE: Longitudinal Interval Follow-Up Evaluation Range of Impaired Functioning Tool (Leon et al)

Rankin Scale
Wilson, J T; Hareendran, A; Grant, M; Baird, T; Schulz, U G; Muir, K W; et al. Improving the assessment of outcomes in stroke: use of a structured interview to assign grades on the modified Rankin Scale. Stroke 33: 2243-2246 (2002). [cited in 39054]

Rape Aftermath Symptom Test (Kilpatrick)
Other citations: Kilpatrick and Veronen, 1984; Kilpatrick et al, 1985. [dbat 367]

Rape Aversiveness Scale (Hamilton and Yee)

Rape Avoidance Strategies Scale (Hamilton and Yee)
[used but not cited in 05166]

Rape Empathy Scale (Deitz et al)

Rape Myth Acceptance Scale (Burt)
USE: Rape Supportive Beliefs Scales (Burt)
Rape Supportive Beliefs Scales (Burt)
- Acceptance of Interpersonal Violence Scale (Burt)
- Adversarial Sexual Beliefs Scale (Burt)
- Rape Myth Acceptance Scale (Burt)
- Sex Role Stereotyping Scale (Burt)
- Sexual Conservatism Scale (Burt)

Rape Surveillance Questionnaire (Swart et al)

Rape Survivors Questionnaire (Galliano et al)
“created for this study...31 forced-choice and checklist items” [26087]

Rape Trauma Knowledge Test (Hamilton and Yee)

Rape Trauma Pre-Assessment Inventory
[used but not cited in 04056]

Rape Trauma Symptom Rating Scale (DiVasto et al)

Rape Trauma Syndrome Checklist (Amanat)

Rapid Alcohol Problems Screen (Cherpitel)
“The RAPS-4 consists of four items...measuring signs of problem alcohol use.” [29476]

Rapid Assessment of Mental Health (WHO)

Rapid Couple Interaction Coding System
“used to assess communication in problem solving and support discussions” [27311]

Rapid Estimate of Adult Literacy in Medicine (Davis et al)

Rapid Marital Interaction Coding System (Heyman and Vivian)

Rapid Pace Walk (Staplin et al)
“assesses the person while he or she walks a 20-foot distance” [37142]

Rapid Serial Visual Presentation
[used but not cited in 39786]

Raskin Scale for Depression (Raskin)

RAST
USE: Rape Aftermath Symptom Test (Kilpatrick)

Rathus Assertiveness Schedule (Rathus)
Rating of Parent-Child Interaction (Friedrich)

Rating of Past Life Events Scale (McGee)

Rating Scale for Dementia Syndromes (Gottfries et al)

UF: Gottfried-Brane-Steen Scale

Ratings of Emotional Attitudes to Clients by Treaters (Najavits et al)
Najavits, L M; Griffin, M L; Luborsky, L; Frank, A; Weiss, R D; Liese, B L; Thompson, H; Nakayama, E; Siqueland, L; Daley, D; Onken, L S. *Therapists’ emotional reactions to substance abusers: a new questionnaire and initial findings*. *Psychotherapy* 32: 669-677 (1995).  [cited in 09357]

Rational Behavior Inventory
[used but not cited in 90464]

Rationality/Emotional Defensiveness Scale (Swan et al)

UF: Interpersonal Behavior Scale (Swan et al)

Raven Progressive Matrices (Raven)

UF: Progressive Matrices Test (Raven)
Standard Progressive Matrices (Raven)

RBPC
USE: Behavior Problem Checklist (Quay and Peterson)

RCOPE (Pargament et al)
"a 105-item measure, assessing the degree to which individuals use different types of religious coping methods" [18325]

Reaction Index
USE: PTSD Reaction Index (Frederick)

Reaction Index for Children
USE: PTSD Reaction Index (Frederick)

Reaction Level Scale (Starmark et al)

UF: RLS85

Reaction to Loss Inventory (Horowitz and Feld)
[cited in 08897 as "a new and as-yet-unpublished self-administered questionnaire with 34 items"]

Reaction to Miscarriage Questionnaire (Cordle)

Reactions of Adolescents to Traumatic Stress Questionnaire (Bean et al)
"consisting of items on all symptoms of PTSD" [28137]

Reactions Questionnaire (Mezey et al)
"a 17-item questionnaire designed for this study" [24620]
Reactions to Impairment and Disability Inventory (Livneh and Antonak)
"a 60-item, multidimensional measurement instrument instrument with 8 subscales: shock, anxiety, denial, depression, internalized anger, externalized hostility, acknowledgment, and adjustment" [27707]

Reactions to PTSD Research Survey (Grubaugh et al)
"a self-report study specific instrument" [39164]
Grubaugh, A L; Tuerk, P W; Egede, L E; Frueh, B C. Perceptions of PTSD research participation among patients with severe mental illness. Psychiatry Research (published online 2012; doi: 10.1016/j.psychres.2012.07.039). [39164]

Reactions to Relaxation and Arousal Questionnaire (Heide and Borkovec)
"a 9-item, factor-analytically derived measure of fear of relaxation" [24362]

Reactions to Research Participation Questionnaire (Newman)
"a novel instrument to assess potential benefits, psychological distress, and risk-benefit ratios in trauma research" [09504]
Newman, E. Reactions to Research Participation Questionnaire. Unpublished instrument, Department of Psychology, University of Tulsa. [cited in 09504]

Reactions to Tests (Sarason)
"a multidimensional measure of test anxiety which provides...clearly differentiated measures of cognitive and somatic anxiety components" [26030]

Reactive Responding Scale (Taylor and Seeman)

Reactive-Proactive Aggression Questionnaire (Raine et al)

Readiness for Events with Psychological Emergencies Assessment Tool (Meredith et al)
"a novel and practical quality improvement tool for hospitals and clinics to use in planning for and responding to the psychological consequences of catastrophic events that create a surge of psychological casualties presenting for health care" [39239]
Meredith, L S; Zazzali, J L; Shields, S; Eisenman, D P; Al Sabagh, H. Psychological effects of patient surge in large-scale emergencies: a quality improvement tool for hospital and clinic capacity planning and response. Prehospital and Disaster Medicine 25(2): 107-114 (2010). [39239; the REPEAT appears on pp. 113-114]

Readiness Ruler (Miller)
"asks the teen to indicate, separately for alcohol, marijuana, and nicotine, where they are ‘right now’ with regard to changing their use of the substance on a 10-point scale" [28490]

Readiness to Change Questionnaire
[used but not clearly cited in 32856]

Reading Span Test (Daneman and Carpenter)
"RST evaluates working memory capacity" [18692]

Reading Teacher Social Rating Scale (ECLS-K)

Reading the Mind in the Eyes Test (Baron-Cohen et al)
"The test consists of 36 photographs of the face just around the eyes, presenting expressions of different emotions." [82419]

Realistic Control Beliefs Scale (Zuckerman et al)
"assesses perceived control over controllable events" [36450]
Recent Health History Questionnaire (Fillingim et al)
"Participants' reasons for disclosure were assessed with a checklist of 21 possible reasons for telling someone about the sexual assault." [83869]

Reasons for Fearful Dating Experiences (Ulloa et al)
"assesses exposure to each of [15 situations associated with [the September 11 terrorist attacks]]" [27427]

Reasons for Recent Events Checklist (Kassam-Adams and Kazak)
"The RFDE is a modified version of the Women's Experience with Battering Scale originally developed by Smith, Tessaro, and Adams and Kazak)" [22671]

Recent Difficulties/Events (Singh et al)
Singh, B; Lewin, T; Raphael, B; Johnston, P; Walton, J. Minor psychiatric morbidity in a casualty population: identification, attempted intervention, and six month follow-up. *Australian and New Zealand Journal of Psychiatry* (1986). [cited as "in press" in 11029, which reprints the questionnaire on p. 74]

Recent Fearful Dating Experiences (Ulloa et al)
"The RFDE is a modified version of the Women's Experience with Battering Scale originally developed by Smith, Tessaro, and Earp to measure traumatic experiences among women involved in domestic violence." [83649]

Recent Health History Questionnaire (Fillingim et al)
"queried subjects about recent pain- and health-related issues" [21324]
Recent Life Changes Questionnaire (Rahe et al)

Recent Life Event Scale (Elderly Care Research Center)

Receptive One-Word Picture Vocabulary Test
[used but not cited in 92633]

Reciprocal Attachment Questionnaire
"a self-report questionnaire...used to assess attachment style" [91331] [used but not cited in 91331]

Reciprocating Social Support Scale
"a newly developed questionnaire measuring levels of reciprocating social support“ [91506] [used but not cited in 91506]

Recognition Memory Test (Warrington)

Recognition Test (Holmes et al)
"a 16 item ‘yes/no’ forced choice recognition test” [34284]

Recommended Sets of Alcohol Consumption Questions (NIAAA)
[cited only as web resource from National Institute on Alcohol Abuse and Alcoholism in 33574].

Reconciliation Inventory (Stammel et al)

Record of Maltreatment Experiences (McGee et al)
"The ROME was developed from previous research involving the History of Victimization Form [Wolfe et al]...Items for the exposure to family violence scale and the physical abuse scale were derived largely from the Conflict Tactics Scales [Straus]...” [04753]
McGee, R A; Wolfe, D A; Wilson, S K. A Record of Maltreatment Experiences. Unpublished manuscript, Department of Psychology, University of Western Ontario, 1990. [cited in 04753]

Record of Personal Antecedents (Rincón)
"collects women’s sociodemographic data, and information about their life with the aggressor and their economic dependence on him” [39731]

Recovery Assessment Scale (Corrigan et al)

Recovery Attitudes and Treatment Evaluator (Najavits et al)

Recovery Attitudes Questionnaire (Borkin)

Recovery Self-Assessment (O’Connell et al)
"The RSA is a 32-item survey instrument that has versions for the participant, provider, family member/advocate, and CEO/directors.” [39057]
[cited only as web document in 39057]

Recovery Stress Questionnaire for Athletes (Kellmann and Kallus)

Recovery Style Questionnaire (Drayton et al)
"a 39-item self-report measure of McGlashan’s ‘integration’ versus ‘sealing over’ styles of adaptation to psychotic illness” [26580]
Recruit Assessment Program Questionnaire
"The RAP questionnaire is a self-administered instrument that assesses Marine recruits’ medical and psychosocial histories...Most of the RAP questions were derived or adapted from other survey instruments, including the SF-36 Health Survey, the Adverse Childhood Experiences Study, the conflict Tactics Scales, and the Alcohol Use Disorders Identification Test (AUDIT).” [82861]

Recruit Health Questionnaire (Canadian Forces)
"The RHQ is a paper-and-pencil tool administered to CF candidates in group sessions in the early weeks of basic training." [40535]
[used but not cited in 40535]

Recurring Recognition Figures Test (Kimura)

Red Cross Wound Classification

Redirecting Sexual Aggression Sexual History Disclosure Questionnaire (Simons et al)
"a four-part, open-ended questionnaire designed by clinicians to obtain information about sexual offenders’ sexual development and offending history” [17117]

Redress for Trauma Survivors Questionnaire (Basoglu et al)
"devised...to measure appraisal of redress" [25452]
Basoglu, M; Livano, M; Cnobaric, C; Franciskovic, T; Sulicj, E; Duric, D; Vranesic, M. Psychiatric and cognitive effects of war in former Yugoslavia: association of lack of redress for trauma and posttraumatic stress reactions. Journal of the American Medical Association 294: 580-590 (2005). [25452]

Reduced Wechsler Intelligence Scale

Reeder Daily Stress Scale
USE: Subjective Stress Scale (Reeder et al)

Referential Activity Scale (Bucci)
[used but not cited in 9002]

Reflective Functioning Scale (Fonagy et al)

Refugee Appraisal and Coping Experience Scale (Halcón et al)
"an investigator-developed 20-item questionnaire” [84341]

Refugee Coping Scale (Sharma and Van Ommeren)
"lists 10 positive and 10 negative coping strategies” [25237]
Sharma, B; Van Ommeren, M. Preventing torture and rehabilitating survivors in Nepal. Transcultural Psychiatry 35: 85-97. [cited in 25237]

Refugee Distress and Coping Interview (Miller et al)
"The RCDI, developed for this study, asks respondents about three primary domains of their experience: life in prewar Bosnia, their journey of exile, and, most centrally, life in Chicago.” [27717]

Refugee Health Screener-15 (Hollifield et al)
"an empirically developed screening instrument for common mental disorders in refugees” [39941]

Refugee Trauma Experience Inventory (Hussain and Bhushan)
a 27-item self-report measure
Refusal Self-Efficacy Scale (Cecil and Pinkerton)
"The ability to refuse sex in various situations was measured by a 7-item scale." [83895]

Regional Disablement Services Patient Questionnaire (Graham et al)
Graham, L; Parke, R C; Paterson, M C; Stevenson, M. A study of the physical rehabilitation and psychological state of patients who sustained limb loss as a result of terrorist activity in Northern Ireland 1969-2003. Disability and Rehabilitation 28: 797-801 (2006) [30860; the Questionnaire appears on p. 801]

Regressed Family Kinetic Drawing Test (Furth)
"The RKFD [a version of the Kinetic Family Drawing Test] was developed to assess primary disturbances in the individual's perception of his or her family." [38654]

Regulation of Emotional Distress Scale (Larson)
"This scale was designed to assess the extent to which respondents use emotion regulation strategies that are functional or dysfunctional, and internal to the individual (e.g., reappraisal) or external (e.g., social support)." [38814]

Regulation of Emotions Questionnaire (Phillips and Power)
"This scale was designed to assess the ability to adaptively regulate emotions." [29587]

Reintegration to Normal Living Index (Wood-Dauphinee et al)
"measures satisfaction with reintegration to normal living after an incapacitating illness or trauma" [07397]
Wood-Dauphinee, S; Opzoomer, A; Williams, J; Marchand, B; Spitzer, W. Assessment of global function: Reintegration to Normal Living Index. Archives of Physical Medicine and Rehabilitation 69: 583-590 (1988). [cited in 07397]

Reintegration Unit Risk Inventory (U.S. Army)
"The inventory consists of about 80 survey items, and its primary purpose is to screen for high-risk behaviors and attitudes of soldiers, which may have occurred during deployment or postdeployment." [39575]
[used but not cited in 39575]

Reitan Word Finding Test
[used but not cited in 09457]

Reitan-Indiana Aphasia Screening Examination
[used but not cited in 09457]

Reitan-Klove Lateral Dominance Examination
[used but not cited in 09457]

Reitan-Klove Sensory-Perceptual Examination
[used but not cited in 09457]

Rejection Experiences Scale (Link et al)

Rejection Sensitivity Questionnaire (Feldman and Downey)

Relapse Interview (Miller and Marlatt)
"assesses important features of the situation that led to the participant's first use of alcohol or illicit drugs" [29587]

Relapse Prediction Scale (Wright)
Wright, F. Relapse Prediction Scale. Unpublished scale. [cited in 09357]

Relatedness Scale (Lynch and Cicchetti)
"The RS...is designed for children aged 7 to 13 and has two subscales that capture the sense of relatedness children experience with others." [81078]

Relatedness Scales (Wellborn and Connell)
USE: Assessment Package for Schools (Wellborn and Connell)
Relational Health Indices (Liang et al)
"The RHI is a 37-item measure comprised of three scales that assess the quality of relationships with peers, mentors, and communities." [34653]

Relationship Anecdote Paradigm Interview (Perry et al)
"adapted from Luborsky...as a semi-structured interview with specific questions to elicit up to six recent life vignettes across three areas of life, including work or its equivalent, intimate relationships or dealing withy any professionals or agencies who are help-giving" [29287]

Relationship Anxiety Inventory (McDonald and Jouriles)
8-item scale
McDonald, R; Jouriles, E N. Relationship Anxiety. Unpublished measure, Southern Methodist University, 2005. [cited in 32713]

Relationship Assessment Scale (Hendrick)
"This 7-item questionnaire measured satisfaction with a marital or cohabitating relationship." [19493]

Relationship Attribution Measure (Fincham and Bradbury)

Relationship Closeness Inventory (Berscheid et al)
"The RCI assesses how much of time one typically spends with their relationship partner during the day, the number of different activities shared between relationship partners, and the perceived impact of the relationship on life domains." [33660]

Relationship Conflict Inventory (Bodin)
Bodin, A M. Relationship Conflict Inventory. Palo Alto, California: Mental Research Institute, 1992. [cited in 05056]

Relationship Conflict Scale (Vivian and Heyman)
"a 12-item self-report measure designed to assess the degree of conflict present in a relationship and the form the conflict takes" [16130]

Relationship Dimensions Scale (Braiker and Kelley)

Relationship Efficacy Measure (Fincham and Bradbury)
Fincham, F D; Bradbury, T N. Cognition and marital dysfunction: the role of efficacy expectations. Presented at the 23rd annual convention of the Association for the Advancement of Behavior Therapy, Washington, 1989. [cited in 09014]

Relationship Inventory (Barrett-Lennard)
"This inventory consists of 28 items assessing empathy, positive regard, incongruence, and negative regard of the therapist as perceived by the patient." [24448]
Barrett-Lenard, G T. Relationship Inventory. Armidale, Australia; University of New England, 1964.

Relationship Problems Questionnaire (Minnis et al)
"The RPQ is a 10-item parent- and teacher-report screening instrument for reactive attachment disorder symptoms." [40438]
Minnis, H; Reekie, J; Young, D; O’Connor, T; Ronald, A; Gray, A; et al. Genetic, environmental and gender influences on attachment disorder behaviours. British Journal of Psychiatry 190: 495 (2007). [cited in 40438]

Relationship Problems Scale (Riggs)
"a 32-item questionnaire designed to assess the severity of problems in relationships" [09796]

Relationship Questionnaire (Bartholomew and Horowitz)
"an adaptation of the attachment measure developed by Hazan and Shaver (1987)" [04853]

Relationship Satisfaction Scale (Simons et al)
Relationship Self-Efficacy Scale (Lopez and Lent)  

Relationship Styles Questionnaire (Griffin and Bartholomew)  
"a 30-item self-report measure" with items drawn from other measures [04853]  

Religiosity, Fatalism and Reincarnation Questionnaire (Pederson)  
"24 statements yielding scores on the affect, cognition, and conation components of attitudes toward religious beliefs and practices" [82001]  
Religious Background and Behavior Scale (Connors et al)

Religious Commitment Inventory (Worthington et al)
Worthington, E L; Wade, N G; Hight, T L; Ripley, J S; McCullough, M E; Berry, J W; et al. The Religious Commitment Inventory - 10: development, refinement, and validation of a brief scale for research and counseling. Journal of Counseling Psychology 50: 84-96 (2003). [cited in 35840]

Religious Coping Activities Scale (Pargament et al)
a 32-item scale
Pargament, K I; Ensing, K F; Olsen, H; Reilly, B; Van Haitsma, K; Warren, R. God help me: I, religious coping efforts as predictors of the outcomes to significant negative life events. American Journal of Community Psychology 18: 793-824 (1990). [cited in 16987]

Religious Identification Scale (Garfield et al)
"The 6-item scale...asked about the extent to which a specific religion was important in participants; lives" [32235]

Religious Importance Scale
[used but not cited in 90993]

Religious Orientation Scale (Allport and Ross)
"a 20 item scale which measures religiousness along two theoretical dimensions: intrinsic and extrinsic religion" [15561]

Religious Problem-Solving Scale (Pargament et al)
"a 36 item instrument which measures three types of religious problem solving" [15561]

Religious Support Scale (Fiala et al)
"This scale consists of 21 items, which are divided into three subscales: perceived support from God, perceived congregational or religious community support, and perceived support from religious leaders." [82605]

Religious-Metaphysical Index (Wellspring)
"Index of person's religious belief system prior to group involvement, during involvement, and desire for future belief boundaries." [17514, where Index is described as "under development at Wellspring"]

Religiousness Scale (Yaparel)
"consists of 31 items [with] 4 subscales: religious beliefs, religious feelings, religious behavior, and religious knowledge" [32999]
[used but cited only as "unpublished" in 32999]

Relived Emotions Task (Ekman et al)

Remember/Know Paradigm (Clarys et al)

Remote Associates Test (Mednick)
[used but not cited in 92060]

Renard Diagnostic Interview

Rennick Repeatable Battery
[can be cited in 01179; no reference given]

Repeatable Battery for the Assessment of Neuropsychological Status (Randolph)
"a measure assessing multiple cognitive domains including attention, memory, language, and visuospatial abilities" [38599]

Repertory Test (Slater)
Repetitive Thinking Questionnaire (McEvoy et al)
A [33-item] measure of repetitive negative thinking developed from an initial pool of 44 items drawn exclusively from the Penn State Worry Questionnaire, the Post-Event Processing Questionnaire - Revised, and the Ruminative Response Scale from the Response Styles Questionnaire. “ [34314]
McEvoy, P M; Mahoney, A J; Moulds, M L. Are worry, rumination, and post-event processing one and the same?: development of the Repetitive Thinking Questionnaire. Journal of Anxiety Disorders 24: 509-519 (2010). [34314]

Report of Health and Behaviour (Jenkins and Smith)

Report Rating Scale (Large)
a 22-item scale "designed to assess the content of medico-legal reports written with respect to psychiatric injury following motor vehicle accidents" [07349]

Reported Torture and Ill-Treatment List (El Sarraj et al)
"developed for an epidemiological prisoners' study in Gaza during the Intifada I" [25145]

Reporting Effects of Sexual Abuse (New Zealand)

Reporting Questionnaire for Children (World Health Organization)

Repression Scale (Haan)
USE: Minnesota Multiphasic Personality Inventory (Hathaway and McKinley)

Repression-Sensitization Scale (Byrne)
USE: Minnesota Multiphasic Personality Inventory (Hathaway and McKinley)

Reproductive Health Questionnaire (Eadie and Runtz)
"The 40-item RHQ was designed for the present study to assess women's reproductive and sexual health concerns." [82357] Eadie, E M; Runtz, M G. Development of a measure of women's reproductive and sexual health: the Reproductive Health Questionnaire. Poster presented at the Canadian Psychological Association annual convention, Ottawa, June 2007. [cited in 82357]

Research Diagnostic Criteria for Temporomandibular Disorder Questionnaire

Research Participant Questionnaire (Newman et al)

Research Protocol for Measuring the Prevalence of Neurological Disorders in Developing Countries (World Health Organization)

Resident Assessment Instrument - Mental Health (Hirdes et al)
Hirdes, J P; Prendergast, P; Smith, T F; Morris, J N; Rabinowitz, T; Ikegami, N; Yamauchi, K; Phillips, C D; Perez, E; Fries, B E; Curtin Telegdi, N. The resident assessment instrument-mental health (RAI-MH): Inter-rater reliability and convergent validity. Journal of Behavioral Health Services and Research, 29(4): 419-432 (2002). [cited in 40223]
Resilience Appraisals Scale (Johnson et al)
"The RAS consists of 12 items assessing self-appraisals. The RAS comprises three 40-item subscales, namely, the emotion coping, situation coping, and the social support subscale." [38846]

Resilience Quotient Test (Reivich and Shatte)

Resilience Scale (Wagnild and Young)

Resilience Scale for Adolescents (Hjemdal et al)
"The READ is a 28-item self-report scale ... based on the Resilience Scale for Adults." [35160]

Resilience Scale for Adults (Hjemdal et al)
"The RSA is a 33-item self-report questionnaire for measuring resilience among adults." [28617]
Hjemdal, O; Friborg, O; Martinussen, M; Rosenvinge, J H. Preliminary results from the development and validation of a Norwegian scale for measuring adult resilience. Journal of the Norwegian Psychology Association 38: 310-317 (2001). [cited in 28617]

Resiliency Scales for Children and Adolescents
[used but not cited in 92470]

Resolution Scale (Singh)
USE: Unfinished Business Resolution Scale (Singh)

Resolution Survey (Heller)

Resource and Outcome Data Form (Tebes et al)
Tebes, J K; Bowler, S; Shah, S; Connell, C M; Ross, E; Simmons, R; et al. Service access and service system development in a children's behavioral health system of care. Evaluation and Program Planning 28: 151-160 (2005). [cited in 33184]

Resource Loss Scale (Freedy)

Resource Loss Scale for Children (Jones and Ollendick)
"adapted from [Freedy et al's] Resources Questionnaire..., the modified version of this self-report measure consists of 28 items assessing loss following a disaster" [83630]

Resource Utilization Questionnaire (Swan and Gill)
"The RUQ is a 24-item self-report measure of participants' utilization of resources in their current relationships 'to deal with the violence in your relationship, to keep yourself safe, or to deal with other problems in the relationship'". [82769]

Resources Questionnaire (Hobfoll et al)

Respect in Close Relationships Scale (Frei and Shaver)
Response Evaluation Measure (Steiner et al)
"measures 21 classic defense mechanisms...conceptually related [to] Bond's Defense Style Questionnaire" [21956]

Response Styles Questionnaire (Nolen-Hoeksema et al)

Response to Childhood Incest Questionnaire (Donaldson and Gardner)

Response to Childhood Incest Questionnaire (Edwards et al)

Response to Intrusions Questionnaire (Ehlers)
Developed to assess negative interpretations of intrusions, rumination and efforts to suppress intrusive memories, dissociation, and information on intrusions.  [21169]

Response to Intrusions Questionnaire (Clohessy and Ehlers)

Response to Life Events Scale (Marziali and Pilkonis)
"The RTES is a two-section self-report questionnaire developed in Portugal on the basis of the DSM-IV criteria for PTSD." [84905]

Response to Stressful Experiences Scale (Johnson et al)

Response to Stressful Experiences Scale (Johnson et al)
Johnson, D C; Polusny, M A; Erbes, C R; King, D; King, L; Litz, B T; Friedman, M; Pietrzak, R H; Southwick, S M.  Development and initial validation of the Response to Stressful Experiences Scale.  Military Medicine 176: 161-169 (2011).

Response to the Gulf War Questionnaire (Klingman)

Response to the Gulf War Questionnaire (Klingman)

Response to Traumatic Event Scale (McIntyre and Ventura)
"The RTES is a 22-item instrument measuring 21 individual defense mechanisms and 3 composites (immature, prosocial, and mature)...based on the defense maturity model and originated as the Defense Style Questionnaire-88" [23005]

Response to Traumatic Event Scale (McIntyre and Ventura)

Response to Traumatic Event Scale - Pediatric Cancer Version (Miller et al)
Miller, K S; Vanatta, K; Compas, B E; Vassey, M; McGoron, K D; Sailey, C G; Gerhardt, C A.  The role of coping and temperament in the adjustment of children with cancer.  Journal of Pediatric Psychology 34: 1135-1143 (2009).  [cited in 38304]

Response to Traumatic Event Scale - Pediatric Cancer Version (Miller et al)
"The RSDI is a 12-item instrument for assessing severities of state reexperiencing, avoidance, and dissociative symptoms provoked by script-driven trauma imagery." [81270]

Responses to Stress Questionnaire – Pediatric Cancer Version (Miller et al)

Responses to Stress Questionnaire (Connor-Smith et al)
"The R-SQ is a 26-item questionnaire to assess general beliefs about responsibility." [30309]

Responsibility Attitudes Scale (Salkovskis et al)
"The RAS is a 26-item questionnaire to assess general beliefs about responsibility." [30309]
Responsibility Interpretations Questionnaire (Salkovskis et al)
"The RIQ was developed...to assess the frequency of and belief in specific interpretations of intrusive thoughts about possible harm." [30309]
Salkovskis, P M; Wroe, A L; Gledhill, A; Morrison, N; Forrester, E; Richards, C; et al. Responsibility attitudes and interpretations are characteristic of obsessive compulsive disorder. *Behaviour Research and Therapy* 38: 347-372 (2002). [cited in 30309]

Responsiveness and Dimensionness Scale (Teixeira et al)
"an index of parenting style developed to approximate the responsiveness and demandness dimensions suggested by Baumrind and Maccoby and Martin" [86670]

Responsiveness Scale (Reis)
"an 18-item measure that assesses how much individuals feel understood, validated, and cared for by their current romantic partner" [86222]

Retirement Descriptive Index (Smith et al)

Retrospective Assessment of Problem Behavior (Windle)
"a 25-item retrospective measure of childhood behavior problems" [26046]

Retrospective Assessment of Traumatic Experiences (Gallagher et al)

Retrospective Childhood Peer Victimization Scale (Boulton)
"It consists of 12 self-report items, with 3 items each designed to tap 4 common forms of victimization: physical, verbal, social exclusion, and relational." [40390]
Boulton, M J. Associations between adults' retrospective reports of childhood bullying victimization and growth from adversity. Submitted manuscript, 2012. [cited in 40390]

Retrospective Experiences and Child and Adolescent Psychopathology Interview (Holmshaw and Simonoff)
"a recently-developed semi-structured, investigator-based, standardised interview...designed for interviewing adults about their own history" [22230]

Retrospective Family Pathology Questionnaire (Zanarini et al)
Zanarini, M C; Gunderson, J C; Marino, M F; Schwartz, E O; Frankenburg, F R. Childhood experiences of borderline patients. *Comprehensive Psychiatry* 30: 18-25 (1989). [cited in 30821]

Retrospective Infant Characteristics Questionnaire (Bates et al)
16 items

Retrospective Measure of Behavioural Inhibition (Gladstone and Parker)
"The RMBI is an 18-item self-report inventory used to assess childhood memories of exhibiting inhibition to the unfamiliar..." [37709]

Retrospective Self-Report of Behavioral Inhibition (Reznick et al)
"a 30-item measure in which items were chosen to represent a broad range of behaviors associated with behavioral inhibition" [29138]

Retrospective Self-Report Trauma Survey (Dietz)
unnamed "retrospective self-report trauma survey developed by...Park Dietz in the early 1980s" [25151]

Retrospective Separation Experiences Questionnaire (Zanarini et al)
Zanarini, M C; Gunderson, J C; Marino, M F; Schwartz, E O; Frankenburg, F R. Childhood experiences of borderline patients. *Comprehensive Psychiatry* 30: 18-25 (1989). [cited in 80821]
Return to Australia Psychological Screen (Australian Defence Force)
“RTAPS contains a battery of questionnaires followed by an interview” [85815]

Revenge Feelings and Cognitions Scale (Orth)
a 3-item scale

Revenge Intentions Scale (Gäbler and Maercker)
"we developed a new 3-item scale to assess the intentional and behavior-related components of revenge" [36451]

Review of Life Experiences (Hurst et al)
a 10-item questionnaire concerning major life events (job loss, mortality, etc.)" [21560]

Revised Army Alpha Examination
[used but not cited in 01646]

Revised Behavior Problem Checklist (Quay and Peterson)
USE: Behavior Problem Checklist (Quay and Peterson)

Revised Child Anxiety and Depression Scale (Chorpita et al)
"The RCADS is a revision of the Spence Children’s Anxiety Scale...[It is] a 47-item self-report questionnaire, with scales corresponding to separation anxiety disorder, social phobia, generalized anxiety disorder, panic disorder, obsessive compulsive disorder, and major depressive disorder.” [26934]
Chorpita, V G; Yim, L; Moffitt, C E; Umemoto, L A; Francis, S E. Assessment of symptoms of DSM-IV anxiety and depression in children: a Revised Child Anxiety and Depression Scale. Behaviour Research and Therapy 38: 835-855. [cited in 26934]

Revised Combat Scale (Gallops et al)
USE: Combat Exposure Scale (Legacies of Vietnam)

Revised Controlling Behaviors Scale (Graham-Kevan and Archer)
"used to measure 5 types of coercive behaviors: economic; threats; intimidation; emotional; and isolation.” [83329]

Revised Defining Issues Test
USE: Defining Issues Test (Rest)

Revised Dimensions of Temperament Survey (Windle and Lerner)
USE: Dimensions of Temperament Survey (Lerner et al)

Revised Fear Survey Schedule for Children (Ollendick)
USE: Fear Survey Schedule for Children (Ollendick)

Revised Homosexuality Attitude Inventory
Revised Life Changes Questionnaire (Miller and Rahe)  
"requires respondents to indicate whether...they have experienced any of 74 events..." [24647]  

Revised Obsessional Intrusions Inventory (Purdon and Clark)  
"consists of 52 examples of intrusive thoughts, images, and impulses, which reflect the wide range of themes found in clinical obsessions" [27883]  

Revised Occupational Scale for Rating Socioeconomic Status (Hamburger)  
"A revision of the Warner revision of the Edwards scale"  

Revised Paranormal Belief Scale (Tobacyk)  
USE: Paranormal Belief Scale (Tobacyk and Milford)

Revised Parent Rating Scale for Reactive and Proactive Aggression  
"This 28-item measure was adapted from [Brown et al’s] original teacher version." [84389]  

Revised Physical Functioning Battery (RAND Health Insurance Study)  

Revised Tolerance Questionnaire (Tate and Schmitz)  
"The RTQ is a revision of the Fagerström Test of Nicotine Dependence" [30967]  

Revised Transliminality Scale (Lange et al)  
"This 29-item true/false scale assesses magical ideation, mystical experience, absorption, hyperaesthesia, manic experience, dream interpretation, and fantasy proneness." [35890]  

Revised Trauma Score (Champion)  
Champion, H R; Sacco, W J; Copes, W S; Gann, D S; Ginnarelli, T A; Flanagan, M E.  A revision of the Trauma Score.  Journal of Trauma 29: 623-629 (1989).  [cited in 02683]

Revised UCLA Loneliness Scale (Russell et al)  
USE: UCLA Loneliness Scale (Russell et al)

Revised Restraint Scale  
[used but not cited in 23790]

USE: Escala de Satisfação com o Suporte Social (Pais-Ribeiro)

Satisfaction with Wellbeing Questionnaire
[used but not cited in 92225]

Saving Inventory - Revised (Frost et al)
"The SI-R is a 23-item questionnaire with three factor analytically defined subscales: difficulty discarding, excessive clutter, and compulsive acquisition." [27085]
Frost, R O; Steketee, G; Grisham, J. Measurement of compulsive hoarding: the Saving Inventory - Revised. Submitted for publication, 2005. [cited in 27085]

Scala per la Valutazione Rapida Dimensionale (Pancheri et al)
"A validated scale for the rapid dimensional assessment of psychopathology" [28868]
Pancheri, P; Picardi, A; Gaetano, P; Pasquini, M; Puzella, A; Di Fabio, F; Biondi, M. Validazione dell scala per la valutazione rapida dimensionale “SVARAD”. Rivista di Psichiatria 34: 84-93 (1999). [cited in 28868]

Scale for Ambiguity Tolerance (Macdonald)

Scale for Assessment of Somatic Symptoms (Chaturvedi et al)
"This scale contains 25 symptoms...SASS assesses 5 clusters of somatic symptoms: pain-related symptoms, sensory somatic symptoms, non-specific symptoms, biological function related symptoms, and gynaecological symptoms."

Scale for Interpersonal Behaviour (Arrindell and Ende)
"A Dutch multidimensional, 25-item instrument that assesses both tension associated with assertiveness in specific situations and the frequency of engaging in a specific assertive response" [21864]

Scale for Medical Limitations (Greenberg et al)
measures "late effects and health problems" [26517]
Scale for Past Trauma During Defection (Kang)
"a self-rating scale for the assessment of the traumatic experiences that the defectors experienced when crossing the border and while moving about in transit countries” [87385]

Scale for Past Trauma in North Korea (Kang)
"a self-rating scale for the assessment of traumatic experiences that the subjects had experienced while they were in North Korea” [87385]

Scale for Rating the Dimensions of the Disaster According to Their Perceived Stressfulness
UF: Perceived Stressfulness of Disaster Experiences (Raphael et al)

Scale for Stressful Life Events (Lee and Youm)
[instrument not explicitly named in source article; name assigned by PILOTS Database staff]

Scale for Suicide Ideation (Beck et al)

Scale for Suicide Ideation (Paykel)

Scale of Community Acceptance (Betancourt et al)
"6 items developed from locally collected qualitative data [assessing] the manner in which subjects perceived community acceptance” [34282]

Scale of Coping with Stress (Sahin and Durak)
"The scale involves 30 items.. based on the Ways of Coping Inventory of Folkman and Lazarus” [82334]

Scale of Adaptation (Echeburúa and Corral)
USE: Escala de Adaptación (Echeburúa and Corral)

Scale of Body Connection (Price and Thompson)
“This 20-item questionnaire measures body awareness and body dissociation (response to body awareness).” [38095]

Scale of Community Acceptance (Betancourt et al)
"6 items developed from locally collected qualitative data [assessing] the manner in which subjects perceived community acceptance” [34282]

Scale of Coping with Stress (Sahin and Durak)
"The scale involves 30 items.. based on the Ways of Coping Inventory of Folkman and Lazarus” [82334]

Scale of Holocaust-Related Imagery (Sorscher)
a 37-item scale with 6 sections

Scale of Jewish Identification (Brenner)
a 78-item scale "which measures multidimensional aspects of Jewish identity” [09401]
Scale of Negative Family Interactions (Simonelli et al)

"Participants' experience of physical, emotional, and sexual abuse by parents and by siblings was measured using a scale designed for this study. The scale consisted of 34 items..." [16460]
Simonelli, C J; Mullis, T; Elliott, A N; Pierce, T W. Abuse by siblings and subsequent experiences of violence within the dating relationship. Journal of Interpersonal Violence 17: 103-121 (2002). [16460]

Scale of Negative Feelings (Gagné et al)

"It includes 12 bipolar items, each one describing two opposite feelings towards parents." [80899]

Scale of Perceived Incompetence (Bezinovic)

"measures self-perception of personal mastery and expectations of favorable outcomes of one’s own activity" [32665]

Scale of Perceived Interpersonal Closeness (Popovic et al)

"The PICS is a measure of interpersonal/ socio-emotional closeness with specific individuals. [It] is a single-item measure in which participants rate how close they feel in a given relationship." [33660]

Scale of Persistence (Bezinovic)

"assesses the extent of endurance in problem solving" [32665]

Scale of Positive and Negative Experience (Diener et al)

"The SPANE contains 12 items [consisting of] two subscales, one that measures positive emotional experiences and one that measures negative emotional experiences." [40169]
Diener, E; Wirtz, D; Tov, W; Kim-Prieto, C; Choi, D; Oishi, S; Biswas-Diener, R. New measures of well-being: short scales to assess flourishing and positive and negative feelings. Social Indicators Research 97: 143-156 (2010). [cited in 40169]

Scale of Preoccupation with Others (Davis)

[used but not clearly cited in 84797]

Scale of Prodromal Symptoms (Miller et al)

Scale of Psychological Distress (Ben-Sira)

"a 6-item psychosomatic symptom scale" [83722]
Ben-Sira, Z. A scale of psychological distress. Research Communications in Psychology, Psychiatry and Behavior 4: 337-356

Scale of Recent Life Events (Havelka et al)

Scale of Severity of Posttraumatic Stress Disorder Symptoms (Echeburúa et al)

USE: Escala de Gravidad de Síntomas del Trastorno de Estrees Postraumático (Echeburúa et al)

Scale of Social Sharing (Southwick et al)

Southwick, S; Morgan, C A; Rosenberg, R. Social sharing of Gulf War experiences: association with trauma-related psychological symptoms. Journal of Nervous and Mental Disease 188: 695-700 (2000). [22911; cited in 80792]

Scale of Stress Perception (Fernandez and Mielgo)

USE: Escala de Apreciación de Estrés (Fernandez and Mielgo)

Scale of Symptoms of Psychosomatic Disorders (Havelka et al)

Scale of War Experience

[used but not cited in 17263]

Scale of Work Satisfaction (Weinert)

[used but not usefully cited in 33375]

Scale to Assess Unawareness of Mental Disorder

[used but not cited in 90206]

Scale to Measure Coping Styles (Raphael et al)

USE: Simple Scale to Measure Coping Styles (Raphael et al)
Scales of Independent Behavior (Bruininks et al)
UF: Woodcock-Johnson Psycho-Educational Battery, Part IV

Scales of Perceived Social Support
[used but not cited in 90875]

Scales of Sleep Disturbance (Starker and Hasenfeld)

SCALUP Diagnostic Interview (Keller et al)

Scandinavian Stroke Scale

SCANS
USE: Setting Conditions for Anorexia Nervosa Scale (Slade and Dewey)

Schalling-Sifneos Personality Scale (Schalling and Sifneos)

Schedule for Affective Disorders and Schizophrenia (Endicott and Spitzer)
UF: SADS
Schedule of Affective Disorders and Schizophrenia (Endicott and Spitzer)
Schedule for Affective Disorders and Schizophrenia—Change Version
Schedule for Affective Disorders and Schizophrenia—Lifetime Version

Schedule for Affective Disorders and Schizophrenia for School-Age Children (Puig-Antich and Chambers)

Schedule for Affective Disorders and Schizophrenia—Lifetime Version
USE: Schedule for Affective Disorders and Schizophrenia (Endicott and Spitzer)

Schedule for Interviewing Borderlines (Baron and Gruen)

Schedule for Nonadaptive and Adaptive Personality (Clark)

Schedule for Recent Life Events (Brown and Harris)

Schedule for the Assessment of Domestic Violence Exposure in Children

Schedule for the Assessment of Intimate Partner Violence Exposure in Children
Unit of Epidemiology and Diagnosis in Developmental Psychopathology. Schedule for the Assessment of Intimate Partner Violence Exposure in Children (SAIPVEC). Unpublished manuscript, Universitat Autònoma de Barcelona, 2005. [cited in 37240]
Schedule for the Assessment of Negative Symptoms
[used but not cited in 92507]

Schedule for the Assessment of Positive Symptoms
[used but not cited in 92507]

Schedule for the Deficit Syndrome (Kirkpatrick et al)
Kirkpatrick, B; Buchanan, R W; McKenney, P D; Alphs, L D; Carpenter, W T. The Schedule for the Deficit Syndrome: an instrument for research in schizophrenia. Psychiatry Research 30: 119-123 (1989). [cited in 33838]

Schedule for the Evaluation of Individual Quality of Life
"a measure designed to assess the dynamic nature of individual quality of life“ [20080]

Schedule of Affective Disorders and Schizophrenia (Endicott and Spitzer)
USE: Schedule for Affective Disorders and Schizophrenia (Endicott and Spitzer)

Schedule of Compulsions, Obsessions, and Pathological Impulses (Watson and Wu)
Watson, D; Wu, K D. Development and validation of the Schedule of Compulsions, Obsessions, and Pathological Impulses (SCOPI). Assessment, in press. [cited in 28330]

Schedule of Fears Caused by the Gulf War (Abdel-Khalek)

Schedule of Growing Skills
[used but not cited in 33307]

Schedule of Life Events (Kelso and Fillmore)

Schedule of Racist Events (Landrine and Klonoff)
"The SRE contains 18 items to assess the frequency of specific racist events in the past year and over the lifetime...” [28894]

Schedule of Recent Experience (Holmes)
UF: SRE

Schedule of Sexist Events (Klonoff and Landrine)
"the SSE lists 20 specific instances of sexist discrimination and asks the respondent to indicate how many times the item has occurred in the past year and in the participant’s entire life...” [28894]

Schedule of Sexually Discriminatory Events (House et al)
"The SSDE was developed for this study to measure lifetime exposure to discrimination based on sexual minority status. The items foe the SSDE were developed by modifying items from the Schedule of Racist Events and adding additional items...” [86693]
House, A; Coppeans, C; Stepleman, L. The Schedule of Sexually Discriminatory Events. Unpublished manuscript, Medical College of Georgia, 2006. [cited in 86693]

Schedules for Clinical Assessment in Neuropsychiatry (Wing et al)
Wing, J K; Babor, T; Brugha, T; et al. SCAN: Schedules for Clinical Assessment in Neuropsychiatry. Archives of General Psychiatry 47: 589-593 (1990). [cited in 07930]

Schema Checklist (Hyer et al)

Schema Mode Inventory (Young et al)
Young, J E; Arntz, A; Atkinson, T; Lobbestael, J; Weishaar, M E; Van Vreeswijk, M F; et al. The Schema Mode Inventory. New York: Schema Therapy Institute, 2007. [cited in 33939]

Schema Mode Questionnaire (Arntz et al)
"The SMQ provides a trait measure of 7 dysfunctional modes over 136 items.” [32160]
Schema Questionnaire (Young and Brown)

“The YSQ is a rationally derived 205 item self-report inventory designed to measure 5 schema domains within which are grouped 16 schemas or core beliefs.” [80325]

USE: Young Schema Questionnaire

Schizotypal Personality Questionnaire - Brief (Raine and Benishay)

USE: STQ Psychotic Traits Questionnaire (Claridge and Broks)

Schizotypal Personality Scale (Claridge and Broks)

"The STA is a measure of schizotypal personality consisting of 37 forced-choice items.” [29268]

USE: STQ Psychotic Traits Questionnaire (Claridge and Broks)

Schizotypal Personality Scale (Claridge and Broks)

Schmerzempfindung-Skala (Geissner)

USE: Impact of Event Scale (Horowitz et al)

Schokverwerkingslijst

USE: Impact of Event Scale (Horowitz et al)

Schokverwerkingslijst voor Kinderen (Alisic et al)
"consists of 34 items" [31110]
Alisic, E; Eland, J; Kleber, R J. Schokverwerkingslijst voor Kinderen - Herziene Versie. Zaltbommel/Utrecht, The Netherlands: Institute for Psychotrauma in collaboration with Clinical Psychology (Utrecht University) and Psychotrauma Center for Children and Youth (University Medical Center Itrecht), 2006. [cited in 31130]

USE: Children's Responses to Trauma Inventory (Alisic et al)

Scholastic Aptitude Test
[used but not cited in 32744]

School Abstract Form (Kinard)
"developed specifically for the study” [29104]

School Attachment Scale
"This [9-item] measure targets the quality of participants’ sense of comfort, safety, and belonging at school and perceived closeness with peers and teachers.” [37876]
[used but not cited in 37876]

School Behavior Checklist (Miller)

School Bullying Experience Questionnaire (Kim et al)
"Kim and colleagues have adopted the items from the Korean-Peer Nomination Inventory to develop the 16-item School Bullying Experience Questionnaire (SBEQ), which is a self-reported questionnaire surveying multidimensional experiences of bullying involvement, including being a victim of and perpetration of physical, verbal, and social relational bullying in Korean adolescents.” [Yen et al]
Yen, C-F; Kim, Y-S; Tang, T-C; Wu, Y-Y; Cheng, C-P. Factor structure, reliability, and validity of the Chinese version of the School Bullying Experience Questionnaire. Kaohsiung Journal of Medical Sciences 28: 500-505 (2012). [cited in 40182; the SBEQ appears in an online appendix to this article]

School Bullying Survey (Hazler et al)
a "28-item paper-and-pencil" instrument [83877]

School Competence Scale (Goldin and Levin)
"The scale consists of 16 questions [that] assess child competence in three broad areas: cognitive, emotional, and social.” [32386]
School Loneliness Questionnaire (Asher et al)

School Survey - Student Form (Lambert)

School Trauma Survey (Hyman et al)

School-Age Assessment of Attachment (Crittenden)

School-Age Schedule for Affective Disorders and Schizophrenia
USE: Schedule for Affective Disorders and Schizophrenia for School-Age Children (Puig-Antich and Chambers)

School-Age Temperament Inventory (McClowry)
"This tool consists of 38-item parent report measure for children aged 5 to 11 years and includes the negative reactivity and the approach/withdrawal dimensions." [26347]

Schoolagers’ Coping Strategies Inventory (Ryan-Wenger)

Schwartz Outcome Scale
"The SOS-10 is a...10-item measure designed to examine a broad domain of psychological health in a variety of settings.” [37887]

Schwartz Value Scale
[used but not cited in 92534]

SCID
USE: Structured Clinical Interview for DSM-III (Spitzer and Williams) or Structured Clinical Interview for DSM-III-R (Spitzer et al), as appropriate

SCID-D
USE: Structured Clinical Interview for DSM-III-R Dissociative Disorders (Steinberg et al) or Structured Clinical Interview for DSM-IV Dissociative Disorders ..., as appropriate

SCID-II
USE: Structured Clinical Interview for DSM-III-R Personality Disorders (Spitzer and Williams) or Structured Clinical Interview for DSM-IV Personality Disorders ..., as appropriate

SCII
USE: Strong-Campbell Interest Inventory (Campbell)

SCL-90-R (Derogatis)
USE: Symptom Checklist 90 Revised (Derogatis)

SCL-90-R Crime-Related PTSD Scale
USE: Crime-Related Post-Traumatic Stress Disorder Scale (Saunders et al)

SCOFF Questionnaire (Morgan et al)

Score for Neonatal Acute Physiology

Score for Neonatal Acute Physiology, Perinatal Extension
SNAPPE-II is an infant measure of illness severity, obtained within the first 12 hours, and assesses 6 physical items in addition to gestational age, birth weight, and Apgar score. [38891]

Scottish Index of Multiple Deprivation
The SIMD ranks small postcode areas in quintiles according to deprivation... [40438] [cited only to a Scottish government website in 40438]
Screen for Adolescent Violence Exposure (Hastings and Kelley)
"a 32-item Likert-type scale assessing violence exposure in school, home, and neighborhood on corresponding settings scales” [09423]

Screen for Child Anxiety Related Emotional Disorders (Birmaher et al)
"a questionnaire of nine subscales each measuring symptoms of a DSM-IV-defined anxiety disorder in children” [22320]

Screen for Posttraumatic Stress Symptoms (Carlson)
"a brief, self-report screening instrument for PTSD symptoms...using a low reading level” [23241]

Screening for Depression (Rost et al)
Rost, K; Burnam, M A; Smith, G R. Development of screeners for depressive disorders and substance disorder history. Medical Care 31: 189-200 (1993). [cited in 30020]

Screening Calendar of Premenstrual Experiences
USE: Calendar of Premenstrual Experiences (Mortola et al)

Screening Device for Psychotic Disorder
USE: Psychosevragenlijst (Blankers and Slot)

Screening Device for Psychotic Disorder (Lange et al)
USE: Gewaarwordingenlijst (Lange et al)

Screening für Somatoforme Störungen (Rief et al)
"This 53-item questionnaire tests for the presence of all symptoms relevant for somatization disorders according to DSM-IV-R and ICD-10.” [25764]

Screening Instrument for Traumatic Stress in Earthquake Survivors (Basoglu et al)
"This self-rated instrument consists of three parts: (a) Survivor Information Form...; (b) a Traumatic Stress Symptom Checklist...; (c) Severity of Disability Scale...” [16090]

Screening Instrument for Traumatic Stress in Survivors of War (Basoglu and Saliçoglu)
"a modified form of the Screening Instrument for Traumatic Stress in Earthquake Survivors” [85375]

Screening Interview Checklist (Mendelsohn et al)

Screening Questionnaire (Kilpatrick and Williams)
"designed by the authors to elicit qualitative information from both children and mothers” [09670]

Screening Questionnaire After Impact Head Injury or Whiplash (Parker)
Screening Questionnaire for Disaster Mental Health (Fujii et al)
“a simple interview-format measure [that] screens for PTSD and depression” [32385]
Fujii, S; Kato, H; Maeda, K. A simple interview-format screening measure for disaster mental health: an instrument newly developed after the 1995 Great Hanshin Earthquake in Japan -- the Screening Questionnaire for Disaster Mental Health (SQD). Kobe Journal of Medical Sciences 53: 375-385 (2007). [32385; the SQD appears on p. 381]

Screening Survey of Exposure to Violence (Richters)

Screening Test for Somatization Disorder (Othmer and DeSouza)

Screening Tool for Early Predictors of PTSD
"a stand-alone screening tool for use by clinicians during acute trauma care to identify injured children and their parents who are at risk of significant, persistent posttraumatic stress symptoms" [17765]

Screening Women and Alcohol in Göteborg (Spak et al)

Screening-Fragebogen (Stieglitz et al)
"a 10-item screening instrument" [22819]
Stieglitz, R-D; Nyberg, E; Albert, M; Frommberger, U; Berger, M. Entwicklung eines Screening-instrumentes zur Identifizierung von Risikopatienten fŸr die Entwicklung einer Posttraumatischen BelastungsstŠrung (PTB) nach einem Verkehrsunfall. Zeitschrift für Klinische Psychologie und Psychotherapie 31: 22-30 (2002). [22819]

Screening-Fragebogen zu Beschwerden nach einem Unfall (Südkamp et al)
Südkamp, N P; Angenent, J; Hecht, H; Nowotny-Behrens, U; Köstler, W; Niemeyer, P; Stark, B; Berger, M. Freiburger Arbeitsunfallstudie (FAUST), Teil I: Epidemiologie und Verlauf psychischer FolgestŠrungen nach Arbgeitsunfällen. Trauma und Berufskrankheit, published online: doi 10.1007/s10039-006-1112-4 (2006). [28325; the Screening-Fragebogen appears in the article]

Screening-Fragebogen zur Erfassung von VerhaltensauffŠlligkeiten (Geisel et al)

Screening-Verfahren zur Identifizierung von Personen mit Somatoformen Störungen (Rief et al)
"lists 53 somatic symptoms not caused by a physical conditions" [09269]

SDS
USE: Self-Rating Depression Scale (Zung)

SE Instrument (Kjellberg and Iwanowski)
USE: Stress/energiformuläret (Kjellberg and Iwanowski)

Sead Picture Survey Tool
"a cartoon-based interview instrument modified from one developed to elicit distress symptoms in urban children in the United States" [09931]

Search for Meaning Questionnaire
[used but not cited in 90275]

Search for Meaning Scale (Mooren)

Search Institute Profiles of Student Life: Attitude and Behavior Questionnaire
USE: Attitude and Behavior Questionnaire (Search Institute)

Seashore Rhythm Test
[used but not cited in 09457]
Seattle Angina Questionnaire (Spertus et al)

Seattle Index of Comorbidity

Second Lebanon War Exposure Inventory (Somer et al)
"a rationally-derived, 12-item situation-specific questionnaire" [36065] Somer, E; Zrihan-Weitzman, A; Fusé, T; Parker, H; Dickstein, B; Maguen, S; Litz, B T. Israeli civilians under heavy bombardment: prediction of the severity of post-traumatic symptoms. *Prehospital and Disaster Medicine* 24: 389-394 (2009). [36065; the Inventory appears on p. 394]

Second Lebanon War Trauma History Inventory (Somer et al)
"a 12-item measure adapted from the Life Events Scale" [i.e., the Holmes and Rahe Social Readjustment Rating Scale] [36065] Somer, E; Zrihan-Weitzman, A; Fusé, T; Parker, H; Dickstein, B; Maguen, S; Litz, B T. Israeli civilians under heavy bombardment: prediction of the severity of post-traumatic symptoms. *Prehospital and Disaster Medicine* 24: 389-394 (2009). [36065; the Inventory appears on p. 394]

Secondary Appraisal of Traumatization Test (Segal)
Segal, S A. The development of measures to assess traumatic appraisal. Ph.D. dissertation, Purdue University, 1986. [90825]

Secondary Stressors Measure (Overstreet et al)
"The measure was developed for the current study based on previous research examining ongoing hurricane-related disruption as well as discussions with the school social worker regarding locally relevant secondary stressors." [36536] Overstreet, S; Solloua, A; Badour, C. A school-based assessment of secondary stressors and adolescent mental health 18 months post-Katrina. *Journal of School Psychology* 48: 413-431 (2010). [36536]

Secondary Trauma Questionnaire (Motta et al)

Secondary Trauma Scale (Motta et al)

Secondary Traumatic Stress Measure (Moreno et al)
USE: Cuestionario de Estrés Traumático Secundario (Moreno et al)

Secondary Traumatic Stress Scale
[used but not cited in 91308]

Secondary Traumatic Stress Scale (Bride et al)
"a 17-item instrument designed to measure intrusion, avoidance, and arousal symptoms associated with indirect exposure to traumatic events via one's professional relationships with traumatized clients" [26495] Bride, B E; Robinson, M R; Yegidis, B; Figley, C R. Development and validation of the Secondary Traumatic Stress Scale. *Research on Social Work Practice* 14: 27-35 (2004). [26495; the Scale appears on p. 33]

Secondary Victimization Behaviors Experienced Scales (Campbell et al)
"a list of behaviors that social system personnel may exhibit in their interactions with rape survivors that could be distressing for rape survivors" [21715] Campbell, R; Seif, T; Barnes, H E; Ahrens, C E; Wasco, S M; Zaragoza-Diesfeld, Y. Community services for rape survivors: enhancing psychological well-being or increasing trauma? *Journal of Consulting and Clinical Psychology* 67: 847-858 (1999). [21715]

Secure Care Psychosocial Screening Tool (Putnins)
a multigate assessment tool developed in South Australia specifically as a screening instrument for young people on admission to juvenile detention facilities" [24749] Putnins, A L. *Secure Care Psychosocial Screening: SECAPS, Version IV, Manual*. Adelaide, South Australia: Department for Family and Community Services, 1999. [cited in 24749]

Security in the Interparental Subsystem Scales (Davies et al)

Security in the Marital Subsystem - Parent Report Inventory (Davies et al)
Security Scale (Kerns et al)
"The scale consists of 15 items...used to assess children’s attachment relationship to primary caregivers." [82720]

SED Questionnaire (Havik and Maeland)

Seeking Safety Adherence Scale (Najavits and Liese)

Selecting Childbirth Experience Questionnaire (Lev-Wiesel et al)
"Developed by the authors for the specific purposes of this study,...the SCE consists of 10 items that rate the respondent’s subjective perception of the childbirth event..." [32376]

Selective Reminding Test (Buschke and Fuld)

Self Administered Alcoholism Survey
USE: Michigan Alcoholism Screening Test (Selzer)

Self Assessment Manikin (Hodes et al)

Self Cathexis Scale (Secord and Jourard)
a 40-item scale that "measures satisfaction with the self" [17941]

Self Description Inventory (Miles et al)

Self Description Questionnaire (Marsh and O’Neill)
"The SDQ-III is a 136 item, self-report instrument designed to measure multidimensional academic and nonacademic self-concept for late adolescents and adults.” [14742]

Self Disclosure Questionnaire (Egan)

Self Disclosure Questionnaire (Jourard)

Self Efficacy Scale (Lorig et al)
**Self Esteem Questionnaire (DuBois et al)**

A 24-item questionnaire that includes 4 subscales: peer, family, school, and global self-esteem [27362]

**Self Evaluation Scale**

[used but not cited in 92342]

**Self Image Scale (Halford et al)**

"an 11-item self-report measure of body image adjustment designed specifically for use with women with cancer" [27311]

**Self Perception Profile for College Students (Neeman and Harter)**

Neeman, J; Harter, S. *Self Perception Profile for College Students*. Denver: University of Denver Department of Psychology, 1986. [cited in 17918]

**Self Psychology Inventory**

"comprises 4 subscales" [40376]

[used but not cited in 40376]

**Self Report Assessment of Family Dynamics and Psychosocial Functioning**

[used but not cited in 91032]

**Self Report of Delinquency (Elliot and Ageton)**

"The SRD consists of 47 items [and] assesses 6 types of crimes..." [81053]

**Self-Adjustment Scale - Self-Report (Weissman and Paykel)**

USE: Social Adjustment Scale - Self Report (Weissman and Bothwell)

**Self-Administered Alcoholism Screening Test (Colligan et al)**

**Self-Administered Comorbidity Questionnaire (Sangha et al)**

**Self-Administered Dependency Questionnaire (Berg)**

**Self-Anchoring Scale (Kilpatrick and Cantril)**

**Self-Assessment of Exposure to Community Violence (Aisenberg)**

"a 58-item self-report measure that inquires about mothers' experiences...patterned after the Survey of Children's Exposure to Community Violence (Richters and Saltzman)" [25253]

**Self-Assessment of Irritability (Snaith et al)**

**Self-Assessment of Sleep and Awakening Quality Scale (Saletu et al)**

USE: Selbstbeurteilungsbogen für Schlaf- und Aufwachqualität (Saletu et al)

**Self-Assessment Questionnaire (Matsakis)**

**Self-Assessment Questionnaire on Social Support (Donald and Ware)**

"contains 19 items that measure dimensions of cognitive, emotional, and practical support" [26219]

UF: Social Support Fragebogen (Kirchberger and Bullinger)
Self-Assessment Scale (Roberts)
Roberts, L. A Treatment Manual for Therapy Groups with Survivors of Childhood Incest. Madison, Wisconsin: Rape Crisis Center, 1987. [10103; the Scale appears in Appendix 1, pp. 59-61]

Self-Attributes Questionnaire (Pelham and Swann)
"The SAQ measures people's self-views on 10 attributes such as intelligence, physical attractiveness, and leadership ability." [31834]

Self-Blame Scale (Barnett et al)
"an unpublished 61-item instrument" [13114]

Self-Blame Scale (O'Neill and Kerig)
"The levels of behavioral and characterological self-blame were measured by a questionnaire developed by the researchers specifically for the purposes of this study." [15283]

Self-Care (D) (Bird et al)
"a brief, self-administered screening tool validated to identify depression in older adults" [32321]

Self-care Behavior Checklist (Lounsbury)
"developed specifically for the present study" [92054]

Self-Compassion Scale (Neff)
"The SCS is a 26-item self-report measure consisting of 6 subscales: self-kindness, self-judgment, common humanity, isolation, mindfulness, and over-identification." [82359]

Self-Concealment Scale (Larsen and Chastain)
developed to assess "the predisposition to actively conceal from others personal information that one perceives as distressing or negative" [quoted in 16424]

Self-Concept Clarity Scale (Campbell et al)
"The SCC is a 12-item measure of SCC..." [37832]

Self-Concept Questionnaire (Martorell et al)
USE: Escala de Autoconcepto (Martorell et al)

Self-Concept Scale (Martinek and Zaichowsky)
UF: Martinek-Zaichowski Self-Concept Scale

Self-Concept Scale for Children (Lipsitt)
[used but not cited in 19406]

Self-Consciousness Scale (Fenigstein et al)
UF: Public and Private Self-Consciousness Scale (Fenigstein et al)

Self-Control Questionnaire (Anderson et al)
"evaluated specific behaviors and attitudes targeted by self-management therapy" [80924]
Anderson, C B; Mehta, P D; Rehm, L P; Wagner, A L; DeLaune, K; Cook, H. The revised Self-Control Questionnaire: psychometric properties and relationship to depression. Poster presented at the annual meeting of the Southwestern Psychological Association, Houston, 1996. [cited in 80924]

Self-Control Schedule (Rosenbaum)
Self-Deceptive Enhancement Scale (Paulhus)
“consists of 20 self-deceptive statements” [27487]

Self-defeating Personality Scale (Schill)
“48 true-false items...based on the criteria for diagnosing Self-defeating Personality disorder in DSM-III-R” [08975]

Self-Defense Scale (Ozer and Bandura)

Self-Description and Mate Description Form (Bell)
Bell, L. Self-Description and Mate-Description. Unpublished manuscript, University of Houston—Clear Lake, 1979. [cited in 01040]

Self-Destructive Behaviors Questionnaire (Sadowski)
“a 21-item questionnaire developed at the Mayo Clinic [that] covers five dimensions of self-destructive behavior: self-mutilation, eating disorders, rejection of help, dangerous acting out, and substance abuse” [19220]

Self-Differentiation Scale (Apel)
“measured three dimensions of self-differentiation” [35258]

Self-Directed Search (Holland)
“A self-administered vocational interest survey to determine client’s choice of preferred career paths.” [17514]

Self-Disclosure Index (Miller et al)
"measures the frequency and content of self-disclosure...this inventory consists of 10 questions” [31171]

Self-Disclosure Questionnaire (Simone)
“developed to assess respondent self-disclosure behavior” [90584]

Self-Discrepancy Questionnaire (Higgins)
UF: Selves Questionnaire (Higgins)

Self-Drawings (Field and Reite)

Self-Dyadic Perspective-Taking Scale (Long)
"The SDPT is a 13-item measure designed to assess respondents' empathy for their partner's feelings and their use of perspective-taking strategies." [26870]

Self-Efficacy for Condom Use (Prochaska et al)
"This scale contains 13 reflecting participants' beliefs in their abilities to use condoms in various contexts." [39890]

Self-Efficacy for Life Tasks Scale (Finley et al)
"a [9-item] scale to assess perceived self-efficacy to complete culturally and age-appropriate life tasks among male veterans of Afghanistan (Operation Enduring Freedom; OEF) and Iraq (Operation Iraqi Freedom; OIF)" [38702]

Self-Efficacy for Managing Chronic Disease Scale (Lorig et al)
“SEM-CD5 is a 6-item scale containing items from several self-efficacy scales developed for the Chronic Disease Self-Management study.” [83936]

Self-Efficacy Ratings Questionnaire (Marx et al)
“a 7-item Likert scale of self-reported confidence in being able to handle difficult situations with the opposite sex” [84046]
Self-Efficacy Scale (Coppel)

Self-Efficacy Scale (Hirai and Clum)
"newly developed based on Bandura’s self-efficacy theory and instructions...to assess individuals’ self-efficacy for dealing with anxiety-provoking situations" [19664]

Self-Efficacy Scale (Jerusalem and Schwarzer)
USE: Selbstwirksamkeit (Jerusalem and Schwarzer)

Self-Efficacy Scale (Mueller and Major)

Self-Efficacy Scale (Pearlin et al)

Self-Efficacy Scale (Sherer et al)
"a 30-item scale measuring personal expectations of mastery" [04856]

Self-Efficacy Scale for Advanced Cancer (Hirai et al)
"an 18-item scale...originally designed to assess the effects of self-efficacy on the illness behaviors of patients with advanced cancer" [40689]

Self-Esteem Certainty Index (Harriss and Snyder)

Self-Esteem Check-Up (Schiraldi)
12 items

Self-Esteem Inventory (Battle)
USE: Battle Self-Esteem Inventory (Battle)

Self-Esteem Inventory (Coopersmith)

Self-Esteem Questionnaire (Labouvie and McGee)
"The SEQ is an 18-item self-report measure of general self-esteem..." [16622]

Self-Esteem Questionnaire (Robson)

Self-Esteem Rating Scale (Nugent and Thomas)
"The SERS is a 40-item instrument which aims to measure both positive and negative aspects of self-esteem in clinical practice. The items focus on a range of areas of self-evaluation including overall self-worth, social competence, problem-solving ability, intellectual ability, self-competence, and worth relative to others." [24328]

Self-Esteem Scale (Coopersmith)
USE: Self-Esteem Inventory (Coopersmith)

Self-Esteem Scale (Harlow et al)
Self-Esteem Scale (Rosenberg)

UF: Rosenberg Self-Esteem Inventory
Rosenberg Self-Esteem Scale
Self-Esteem Inventory (Rosenberg)

Self-Evaluation and Social Support Instrument (O'Connor and Brown)

Self-Evaluation of Difficulties Questionnaire (Meek)

Self-Evaluation Questionnaire
[used but not cited in 80868]

Self-Evaluation Test (United Nations)
“10 multiple-choice questions” [80587]

Self-Expression and Self-Control Questionnaire (Maes et al)
USE: Zelfexpressie en -controle Vragenlijst (Maes et al)

Self-Goal Other Discrepancy Scale (Miskimins et al)
"The MSGO is a 15-item scale." [31604]

Self-Handicapping Scale (Jones and Rhodewalt)

Self-Harm Behavior Questionnaire (Gutierrez et al)

Self-Harm Inventory (Sansone)
"a 41-item, yes or no questionnaire...that explores subjects' self-destructive behavior" [06388]

Self-Image Questionnaire for Young Adolescents (Petersen et al)

Self-in-Relationships Interview (Calverley et al)
"adapted from an instrument originally developed by Monsour and Harter...to focus explicitly on self in specific relationships” [21853]

Self-Injurious Behavior Checklist (Friedrich)

Self-Injurious Behavior Interview (Friedrich)

Self-Injurious Behaviors Questionnaire (Hodges)
"a self-report measure that captures a wide variety of information about the respondent’s [and the respondent’s family’s] history of nonsuicidal self-injury” [40611]
[used but not usefully cited in 40611]

Self-Injurious Behaviors Questionnaire (Sadowsky)
"a checklist covering the presence of 21 behaviors in the past year” [19100]

Self-Injurious Thoughts and Behaviors Interview (Nock et al)
"a clinician-administered interview that assesses suicidal behaviors and nonsuicidal self-injury” [30638]
PILOTS Database Instruments Authority List

Self-Injury and Childhood Abuse Questionnaire (Kroll et al)

Self-Injury Inventory (Zlotnick et al)

Self-Injury Questionnaire (Vanderlinden and Vandereycken)
Vanderlinden, J; Vandereycken, W. Trauma, Dissociation, and Impulse Dyscontrol in Eating Disorders. Philadelphia, Brunner/Mazel, 1997. [15041; the Questionnaire appears on pp. 193-198]

Self-Inventory for PTSD (Hovens et al)
USE: Zelfinventarisatievragenlijst Posttraumatische Stressstoornis (Hovens et al)

Self-Perception Profile for Adolescents (Harter)
Harter, S. Self-Perception Profile for Adolescents. Denver: University of Denver, Department of Psychology, 1986. [cited in 03154]

Self-Perception Profile for Children (Harter)
UF: Harter Perceived Competence Scale
Harter Social Support Scale
Perceived Competence Scale for Children (Harter)

Self-Rated Health (Bjorner et al)
"SRH is a single-item measure where the respondent rates his/her present subjective mental and somatic health on a 7-point Likert scale..." [39632]
Bjorner, J B; Søndergaard Kristensen, T; Orth-Gomér, K; Tibblin, G; Sullivan, M; Westerholm, P. Self-Rated Health: A Useful Concept in Research, Prevention and Clinical Medicine. Stockholm: Swedish Council for Planning and Coordination of Research, 1996. [cited in 39632]

Self-Rated Traumatic Reactions Questionnaire (Amone-P’Olak)
"a DSM-IV-based 30-item...questionnaire...aimed at recording the severity of traumatic reactions among the [Ugandan] children" [18818]

Self-Rating Anxiety Scale (Zung)
UF: SAS
Zung Anxiety Scale

Self-Rating Depression Scale (Zung)
UF: SDS
Zung Depression Scale

Self-Rating Inventory for Post-Traumatic Stress Disorder (Hovens et al)

Self-Rating PTSD Scale (Davidson)
USE: Self-Rating Traumatic Stress Scale (Davidson)

Self-Rating PTSD Scale (Liu et al)
USE: Post-Traumatic Stress Disorder Self-Rating Scale (Liu et al)

Self-Rating Scale for Affective Syndromes (Svanborg and Åsberg)

Self-Rating Scale for PTSD (Carlier et al)
"an abridged version of the Structured Interview for PTSD" [09477]
UF: PTSS—Zelf-Scoring
Self-Rating Traumatic Stress Scale (Davidson)
UF: Davidson Trauma Scale
Self-Rating PTSD Scale (Davidson)

Self-Referent Encoding Task
"A SRET was used to assess children's self-concepts. Such tasks are widely used as a measure of individuals' positive and negative self-views." [39713]

Self-Regard Scale (Horowitz et al)
"a 5-item scale reflecting 'fluctuations in subjective experiences of having an integrated conscious self-concept', during the past week" [24847]

Self-Related Disability Scale (Liebowitz)
"Patient-rated instrument with items assessing current and most severe lifetime impairment due to social phobia" [22315]
Schneier, F R; Heckelman, L R; Garfinkel, R; Campeas, R; Fallon, B A; Gitow, A; Street, L; Del Bene, D; Liebowitz, M R. Functional impairment in social phobia. Journal of Clinical Psychiatry 53: 322-331 (1992). [cited in 22315]

Self-Report Altruism Scale (Rushton et al)
a 20-item scale "assessing the extent to which respondents had ever engaged in different types of altruistic behaviors or actions" [36947]

Self-Report Attachment Style Prototypes (Bartholomew and Horowitz)

Self-Report Coping Scale (Causey and Dubow)
"contains 34 items classified in five subscales (problem-solving, seeking social support, distanciation, externalizing, and internalizing)" [21691]

Self-Report Delinquency Index (Jang and Thornberry)

Self-Report Delinquency Inventory (Elliott and Huizinga)

Self-Report Early Delinquency Scale (Moffitt and Silva)

Self-Report Family Inventory (Hampson and Hulgas)

Self-Report Forgiveness Measure (Freedman and Enright)

Self-Report Instrument for Borderline Personality Organization (Oldham et al)
UF: Borderline Personality Organization

Self-Report Interpersonal Trust Scale (MacDonald et al)
"a 10-item Likert-type scale that assesses the degree to which the respondent is generally trusting versus suspicious of others" [21629]
Self-Report Inventory (Brown and Veldman)
UF: Brown Self-Report Inventory

Self-Report Inventory for Disorders of Extreme Stress
[used but not cited in 91587]

Self-Report Inventory of Environmental Hazards and Toxins (Kang et al)
"a widely-used 27-item self-report inventory" [27725]

Self-Report Inventory to Assess Dysfunctional Cognition in Phobics (Zocco)

Self-Report Measure of Family Functioning (Bloom and Lipetz)
UF: Family Functioning Scale

Self-Report Measure of Family Functioning for Children (Stark et al)
"consists of 80 items that require children to indicate on a 5-point scale...the degree to which the item has ever described their family" [17482]

Self-Report Measure of Psychosocial Functioning (Erickson et al)
"five straightforward items were used to assess a person's personal happiness and happiness in four psychosocial domains of work" [23556]

Self-Report of Childhood Abuse Physical (Spatz and Shepard)

Self-Report of Defensive Styles (Bond et al)
UF: Defence Coping Questionnaire

Self-Report of Family Functioning
"consists of 15 items selected from a number of well-known family assessment measures (Family Environment Scale, Family Concept Q-Sort, Family Adaptability and Cohesion Scale, and Family Assessment Measure)*
[used but not cited in 39129]

Self-Report of Offending Scale (Huizinga et al)

Self-Report Psychopathy Scale (Paulhus et al)
The SRP is a 64-item measure of psychopathic personality traits developed for use with nonincarcerated individuals. [40137]

Self-Report Questionnaire
"The SRQ-20...is a simple and effective measurement of the burden of common mental health problems (20 items, yes/no answers)..." [36347]
[used but not cited in 36347]

Self-Report Sexual Aggression Scale (Burton et al)
"The SERSAS is a multi-inventory [that] measures sexually aggressive behaviors over the lifespan." [84290]

Self-Report Stress Reaction Index (March et al)
"an epidemiological self-report version" of Frederick's PTSD Reaction Index [09820]
UF: Self-Reported Post-Traumatic Symptomatology Scale (March et al)
Self-Report Trauma Questionnaire (Mouthaan et al)

"an 11-item self-report questionnaire...based on a deployment-related trauma questionnaire that was designed especially for a large study among Dutch UNIFIL veterans" [31949]

Mouthaan, J; Dirkzwager, A J E; De Vries, M; Elands, M; Scagliola, S I, Weerts, J M P. Libanon laat ons nooit helemaal los: resultaten van onderzoek naar de gezondheid en het welzijn van UNIFIL’ers die in de periode 1979-1985 naar Libanon zijn uitgezonden. s.l: s.n., 2005. [cited in 31949]

Self-Reported Health Measure (NVVRS)

"In this self-report measure used in the National Vietnam Veterans Readjustment Study, respondents are presented with 2 dichotomous rating checklists. The first list includes 22 symptoms and the second includes 37 chronic health problems." [29788]

Self-Reported Lifetime Criminality Scale (Santtila and Haapasalo)

Based on a scale by T.E. Moffit, "this 33-item instrument covers different kinds of delinquent acts ranging from interpersonal violence, burglaries, and frauds to speeding or driving while intoxicated." [21517]

Self-Reported Post-Traumatic Symptomatology Scale (March et al)

USE: Self-Report Stress Reaction Index (March et al)

Self-Report Questionnaire Accessing Adherence to Antiretroviral Medication (Godin et al)

[use but not cited in 37676]

Self-Reporting Questionnaire (Harding et al)

UF: CAR

Cuestionario de Auto-Reportaje

Self-Satisfaction Survey (Kochendorfer)

"a 10-item self-report survey of general satisfaction with a group-related experience shown to be sensitive to clinical change in adolescent groups" [17161]

Self-Stigma of Seeking Help (Vogel et al)

"10 statements rated on a 4-point Likert-type scale" [87501]

Self-Supporting Personality Scale of Adolescent Students (Xia and Huang)

USE: Interpersonal Self-Support Scale (Xia and Huang)

Selfism Scale (Phares and Erskine)

Selim Physical Comorbidity Index

"sums 30 chronic conditions" [39614]

Selim, A J; Fincke, G; Ren, X S; Lee, A; Rogers, W H; Miller, D R; et al. Comorbidity assessments based on patient report: results from the Veterans Health Study. Journal of Ambulatory Care Management 27: 281-295 (2004). [cited in 39614]

Selves Questionnaire (Higgins)

USE: Self-Discrepancy Questionnaire (Higgins)

Semantic Autobiographical Memory Test (Meesters et al)

"This questionnaire was designed for the purpose of the present study and consisted of 22 items." [22868]

Semantic Differential (Livianou et al)

"modified from [an instrument of] Basoglu et al" [24794]

Livianou, M; Basoglu, M; Marks, I M; De Silva, P; Noshirvani, H; Lovell, K; Thrasher, S. Beliefs, sense of control and treatment outcome in post-traumatic stress disorder. Psychological Medicine 32: 157-165 (2002). [24794]

Semantic Differential (Osgood)

Semantic Differential for Appraisal of Traumatic Stressors

[used but not cited in 91798]
Semantic Differential Test Questionnaire (MacCulloch et al)
MacCulloch, M J; Reid, C; Biore, D C. Computer administered semantic differentials (SDs) measure changes in post-traumatic stress disorder (PTSD) symptoms during treatment by eye movement desensitization and reprocessing (EMDR): a preliminary report. Paper in preparation, 1997. [cited in 0'9341]

Semantic Fluency Test (Benton et al)

Semantic Function Assessment Measure (Ingram)
Ingram, R E. Semantic Function Assessment Measure. [cited as “personal communication, 1990” in 08655]

Semi-Structured Assessment for Drug Dependence and Alcoholism (Pierucci-Lagha et al)
"SSADDA is a diagnostic instrument developed for studies of the genetics of substance use and associated disorders." [32742]

Semi-Structured Assessment for the Genetics of Alcoholism (Bucholz et al)
Bucholz, K K; Cadoret, R; Cloninger, C R; Dinwiddie, S H; Hesselbrock, V M; Nurnberger, J I; Reich, T; Schmidt, I; Schuckit, M A. A new, semi-structured psychiatric interview for use in genetic linkage studies: a report on the reliability of the SSAGA. Journal of Studies on Alcohol 55: 149-158 (1994). [cited in 22658]
UF: SSAGA (Bucholz et al)

Semi-structured Child Psychiatric Interview (Goldin and Levin)

Semi-Structured Initial Interview for Desert Storm War-Zone Personnel (Litz et al)

Semi-Structured Interview about Sexual Assault (Echeburúa et al)
"collects sociodemographic data about the victims, the situational and descriptive characteristics of the aggression(s) and aggressor(s), the personal characteristics of the victim before the aggression, and the personal consequences resulting from the aggression" [33282]

Semi-Structured Interview for Survivors of Disaster (Sungur and Kaya)
"The SISD scale has been developed by the authors. It is a combination of the Impact of Event Scale and other characteristics of trauma survivors." [23932]

Semi-Structured Interview for Survivors of Earthquake (Salcioğlu)

Semi-Structured Interview for Survivors of War (Basoglu et al)
modified from the SemiStructured Interview for Survivors of Torture
Basoglu, M; Livanou, M; Crnobaric, C; Franciskovic, T; Suljic, E; Durić, D; Vranesic, M. Psychiatric and cognitive effects of war in former Yugoslavia: association of lack of redress for trauma and posttraumatic stress reactions. Journal of the American Medical Association 294: 580-590 (2005). [25452]

SemiStructured Adult Sibling Abuse Survivor Questionnaire (Caffaro and Conn-Caffaro)

SemiStructured Interview and Rating Manual (Ehlers et al)

SemiStructured Interview and Rating Manual (Ehlers et al)
UF: Mental Defeat Questionnaire (Ehlers et al)

SemiStructured Interview for Adult Survivors of Childhood Abuse (Bartlett)

SemiStructured Interview for PTSD
[used but not cited in 80648]
Semistructured Interview for Survivors of Torture (Basoglu et al)

“based in part on the [Jackson Structured Interview for PTSD]”

Basoglu, M; Paker, M; Paker, O; Özmen, E; Marks, I; Incesu, C; Sahin, D; Sarimurat, N. Psychological effects of torture: a comparison of tortured with nontortured political activists in Turkey. American Journal of Psychiatry 151: 76-81 (1994). [04196]

Semistructured Interview Guide (Hunt)

“Questions...were based on the Double ABCX Model of the Family Stress Theory by McCubbin and Patterson and the research questions of the study.” [92083]

Hunt, J. The perceptions of psychiatric patients with posttraumatic stress disorder and family members regarding the effect of discharge planning on coping with post discharge stressors. Ph.D. dissertation, Catholic University of America, 2007. [92083]

Semistructured Interview Schedule for Torture Treatment Providers (Engstrom)

[instrument not named; name assigned by PILOTS Database staff]

“A semistructured interview schedule with 21 questions...originally developed to address what motivates mental health professionals to work with torture survivors” [82456]

Semistructured Termination Interview (Krupnick et al)

“We developed a brief, semistructured interview that was conducted with experimental participants at the termination of treatment to better understand whether and how the newly adapted therapy achieved its goals in a more qualitative way.” [32335]

Senegal Health Scales (Beiser et al)

Beiser, M; Benfari, R C; Collomb, H; Ravel, J-L. Measuring psychoneurotic behavior in cross-cultural surveys. Journal of Nervous and Mental Disease 163: 10 (1976). [cited in 01293]

Senior South African Individual Scales

Sensation Seeking Scale (Zuckerman)

UF: Disinhibitory Sensation Seeking Scale (Zuckerman)

Sensation Seeking Scale for Children (Russo et al)

Sense of Belonging to the Country Scale (Itzhaky)

dia: a 12-item scale [not named in 33235; name assigned by PILOTS Database staff]

Sense of Coherence Questionnaire (Antonovsky)

Antonovsky, A. The sense of coherence: development of a research instrument. W.S. Schwartz Research Center for Behavioural Medicine, Tel Aviv University, Newsletter and Research Report, 1983.

UF: Orientation to Life Questionnaire

Sense of Coherence Scale (Rumbaut)

dia: a 22-item scale [09006]

Sense of Community Belonging Scale (Bavely)

“The scale contains 9 items in 3 interrelated categories: 5 questions on belonging to the community, 2 on children’s education in the community, and 2 on the respondent’s future in the community.” [30986]

Scale not explicitly named in text; name assigned by PILOTS Database staff.

Sense of Community Index (McMillan and Chavis)

Sense of Control Scale (Basoglu and Salcioglu)  

Sense of Control Scale (Van der Wal et al)  
Van der Wal, J; Cleiren, M P H D; Han, R; Diekstra, R FW. Verslag van het nabestaandenproject, Deel 2: Psychometrische evaluatie van enkele vragenlijsten, afgenomen tijdens de eerste meting onder nabestaanden van suïcides en verkeersslachtoffers. Internal report, Leiden University Department of Clinical and Health Psychology, 1988. [cited in 07092]

Sense of Emotional Control Questionnaire (Znoj et al)  
assesses "four forms of regulating emotions" [24731]
Znoj, H; Sundin, E; Maercker, A; Horowitz, M. Sense of Emotional Control Questionnaire: a self-report measure. Unpublished manuscript, University of Bern (Switzerland), 2000. [cited in 24731]
UF: Emotion Regulation Questionnaire

Sense of Mastery Scale (Pearlin and Schooler)  

Sense of Personal Control Scale (Mirowsky and Ross)  
[an 8-item scale cited but not named in 80189; name assigned by PILOTS Database staff]

Sense of Safety Regarding Terrorism Scale (Solomon and Prager)  
"a 9-item questionnaire in which participants were asked to rate their present level of personal safety" [33938]

Sense of Safety Scale (Henry)  
a 10-item scale [28080]

Sense of Self-Control Questionnaire (Znoj et al)  
Znoj, H; Horowitz, M; Maercker, A; Bonanno, G. Emotional regulation: the Sense of Self-Control Questionnaire. Psychosomatic Medicine, in press. [cited in 26061]

Sensitivity vs Insensitivity to the Communication of the Baby Scale (Ainsworth)  

Sensory Gating Index (Kisley et al)  
" self-report measure that can be divided into four subscales: Perceptual Modulation, Distractibility, Overinclusion, and Stress-Fatigue Vulnerability" [29229]

Sensory Phenomena Scale  
[used but not cited in 37930]

Sentence Completion for Depression  
[used but not cited in 93163]

Sentence Completion Task (Shanan and Nissan)  

Sentence Completion Test  
[used but not cited in 00081]

Sentence Repetition Test (Meyers et al)  

Separation Anxiety Symptom Inventory (Silove et al)  
"a self-report measure used to assess retrospective memories of SA symptoms before the age of 18 years" [24679]

Separation Anxiety Test (Hansberg)  
Separation Distress Scale (Schechter and McGaw)
"a behavioral observation measure applicable to human child subjects...in which videos of child distress during separation are rated on a 5-point scale by two independent raters naive to child or maternal history" [35788]

SEPRA TE
USE: Structured Event Probe and Narrative Rating (Dohrenwend et al)

Sepsis-related Organ Failure Assessment (Vincent et al)
UF: SOFA

September 11th Traumatic Distress Inventory (Pantin et al)
"created for the events of September 11th and consisting of items modeled after the DSM-IV diagnostic criteria for PTSD" [20508]
Pantin, H; Schwartz, S J; Prado, G; Szapocznik, J. Psychometric properties of the September 11th Traumatic Distress Inventory. Technical Report, University of Miami School of Medicine, 2002. [cited in 20508]

Sequential and Repetitive Finger Tapping (Denckla)

Sequential Occupational Dexterity Assessment (Van Lankveld et al)
"The test measures hand dexterity, defined as a complex of bimanual functional abilities in activities of daily living and was especially designed for patients with rheumatoid arthritis." [37314]

Sequential Organ Failure Assessment
[used but not cited in 38983]

Serial Digit Learning Test (Benton et al)

Service Assessment for Children and Adolescents (Stiffman et al)

Service Attachment Questionnaire (Goodwin et al)
assesses "current relationships with mental health service providers in the community" [31735]
Goodwin, I; Holmes, G; Cochrane, R; Mason, O. The ability of adult mental health services to meet clients' attachment needs: the development and implementation of the Service Attachment Questionnaire. Psychology and Psychotherapeutics 76: 145-161 (2003). [cited in 31735]

Service Delivery Perceptions Measure
"an 8-item, 5-point Likert scale response format...measure to assess perceptions related to the mode of service delivery" [29644]
[used but not cited in 29644]

Service Experience Questionnaire (O'Connell)
"a modified version of an instrument developed by M. O'Connell for use with Naval personnel" [02313]

Service Stress Index
"18 questions covering stressors of both the high-intensity, combat-related type and the low-intensity type, such as strain of overwork" [21204]

Service Use and Adjustment Problem Screen

Service Utilization and Risk Factors
Service Utilization Assessment (National Comorbidity Study)

Service Utilization Barriers Scale (Shipherd et al)
"Participants rated 46 potential barriers [to seeking health care] on a 5-point Likert scale..." [40552]

Services Assessment for Children and Adolescents (Horwitz et al)
"The instrument inquires about lifetime and last-year use of 25 specific service settings that are divided among inpatient-residential, outpatient, and school settings." [26142]
Horwitz, S M; Hoagwood, K; Stiffman, A R; Summerfeld, T; Weisz, J R; Costello, E J; Rost, K; Bean, D L; Cottier, L; Leaf, P J; Roper, M; Norquist, G. Reliability of the Services Assessment for Children and Adolescents. *Psychiatric Services* 52: 1088-1094 (2001). [cited in 26142]

Services Needed and Received Checklist (Kilmer and Gil-Rivas)
"On this checklist, caregivers reported if they had needed and received 15 services...and responded to parallel items regarding 7 child needs." [34229]
Kilmer, R P; Gil-Rivas, V. Responding to the needs of children and families after a disaster: linkages between unmet needs and caregiver functioning. *American Journal of Orthopsychiatry* 80: 135-142 (2010). [34229]

Services Received Scales (Campbell et al)
a scale listing services which rape victims received from legal, medical, and mental health systems
Campbell, R; Seff, T; Barnes, H E; Ahrens, C E; Wasco, S M; Zaragoza-Diesfeld, Y. Community services for rape survivors: enhancing psychological well-being or increasing trauma? *Journal of Consulting and Clinical Psychology* 67: 847-858 (1999). [21715]

Session Evaluation Questionnaire (Stiles et al)
"The SEQ examines the participant’s and the therapist's subjective impression of the therapeutic session, their respective assessments of the session, and the perceived competence of the therapist." [34256]

Session Impacts Scale
[used but not cited in 90978]

Setting Conditions for Anorexia Nervosa Scale (Slade and Dewey)
UF: SCANS

Seven-Day Physical Activity Recall Questionnaire (Sallis et al)
"Participants reported the duration and intensity of three types of physical activity." [86790]

Seven-Symptom Screening Instrument for PTSD (Liu et al)
USE: Brief Screening Instrument for PTSD (Liu et al)

Seven-Symptom Screening Scale for PTSD (Breslau et al)

Severe Behavioral Dyscontrol Interview (Borgmann and Bohus)
Borgmann, E; Bohus, M. SBDI: Severe Behavioral Dyscontrol Interview. Interview zur Erfassung schwerwiegender Störungen der Verhaltenskontrolle. [used in 84015 but cited only as web document]
UF: Interview zur Erfassung schwerwiegender Störungen der Verhaltenskontrolle (Borgmann and Bohus)

Severe Exposures Index (Simms et al)
"Items designed to determine participants' exposure to 31 environmental factors, including various potentially stressful events and situations." [25162]

Severe Physical Aggression Scale (Lefkowitz et al)
a 4-item scale

Severe Violence Index (Straus et al)
Severity of Abuse Measure (Leserman et al)
"an abuse severity measure based on a history of rape, serious injury during sexual abuse, and multiple life-threatening incidents" [08832]
Leserman, J; Li, Z; Drossman, D A; Toomey, T C; Nachman, G; Glogau, L. Impact of sexual and physical abuse dimensions on health status: development of an abuse severity measure. Psychosomatic Medicine 59: 152-160 (1997). [08832]
UF: Abuse Severity Measure (Leserman et al)

Severity of Abuse Scale (Wilkin)
"This scale ascertains the severity of childhood or adolescent sexually traumatic experiences." [20773]

Severity of Alcohol Dependence Questionnaire (Stockwell et al)

Severity of Child Abuse Index (Tutty)
"A seven-point scale was developed to gauge the severity of various forms of child abuse, alone and in combination." [14827]

Severity of Childhood Sexual Abuse Scale (Draucker)
"designed for the purpose of this study"

Severity of Dependence Scale (Gossop et al)
"a 5-item measure of an individual's degree of psychological dependence on their drug of choice" [30875]

Severity of Illness Index (Horn and Horn)
Horn, S D; Horn, R A. Reliability and validity of the Severity of Illness Index. Medical Care 24: 159-178 (1986). [cited in 08546]

Severity of Maltreatment Questionnaire (Ehlers et al)
"a checklist of 10 forms of maltreatment and torture...that participants may have experienced during imprisonment" [21964]

Severity of Opiate Dependence Questionnaire (Sutherland et al)
Sutherland, G; Edwards, G; Taylor, C; Phillips, G T; Gossop, M R; Brady, R. The measurement of opiate dependence. British Journal of Addiction 81: 485-494 (1986). [cited in 08561]

Severity of Psychosocial Stress Scale: Children and Adolescents
"This scale is a 6-point, Likert-type index that is intended to assist clinicians in formulating stress severity ratings." [24663]

Severity of Sexual Abuse Scale (Wyatt and Mickey)

Severity of Sibling Incest Scale (Carlson et al)
"5 individual variables known to be important in assessing severity" [80592]

Severity of Stalking Checklist (Blaauw et al)
"Severity of stalking was assessed by means of a checklist consisting of 8 questions, with a yes/no response format." [81410; instrument is not named in article; name assigned by PILOTS Database staff]

Severity of Symptoms Scale (Davidson et al)
"32-item self-rated checklist" [24231]

Severity of Violence Against Men Scale (Marshall)

Severity of Violence Against Women Scale (Marshall)
Severity Scale (Swan)

“a 9-item scale assessing specific characteristics of respondents’ workplace experiences that have been theoretically linked with severity or intensity” [32753]

Sex Guilt Scale (Mosher)

Sex History Form (Creti et al)

“a 28-item questionnaire standardized on 92 Caucasian couples (ages 29 to 40)” [28449]
Creti, L; Fichten, C; Amsel, R; Brender, W; Schover, L; Kalogeropoulous, R; Libman, E. The Sex History Form. In: Davis, C M; Yarder, W L; Bauserman, R; Schreer, G; Davis, S L (ed.), The Handbook of Sexuality-Related Measures, pp. 261-267. New York: Sage, 1998. [cited in 28449]

Sex Knowledge Test (Kirby)

[used but not cited in 91005]

Sex Offender Treatment Rating Scale (Anderson et al)

“the SOTRS is designed to assess both process and outcome measures for cognitive-behavioral sex offender treatment.” [81926]

Sex Role Questionnaire

[used but not cited in 92028]

Sex Role Stereotyping Scale (Burt)

USE: Rape Supportive Beliefs Scales (Burt)

Sex Survey (Capaldi et al)

“assesses sexual knowledge and behavior, with an emphasis on health-risking behaviors” [80247]

Sex-Abuse Time-Line Diagrams (Gardner)

Gardner, R A. Sex-Abuse Trauma?: Or Trauma from Other Sources? Cresskill, New Jersey: Creative Therapeutics, 2002. [18328; the Protocol appears on pp. 301-307]

Sexual Abuse Acting Out Scale (Shapiro et al)

Sexual Abuse Anxiety Scale (Shapiro et al)

Sexual Abuse Background Questionnaire (Crowley)

“The SABQ was adapted from a longer measure created by Finkelhor.” [81071]

Sexual Abuse Board Game (Wagner et al)

“specially developed for use in this study”

Sexual Abuse Coping Self-Efficacy Scale (Cieslak et al)

“The SACSE is a 42-item self-report scale where participants rank their current perceived capability to successfully deal with specific demands related to surviving sexual abuse.” [31030]
Cieslak, R; Benight, C C; Caden Lehman, V. Coping self-efficacy mediates the effects of negative cognitions on posttraumatic distress. Behaviour Research and Therapy 46: 788-798 (2008). [31030]

Sexual Abuse Exposure Questionnaire (Rowan et al)

“The SAEQ was developed in the current study to assess the nature of the sexual abuse experiences, identifying 10 categories of increasingly invasive sexual events…”

Sexual Abuse Fear Evaluation (Wolfe and Wolfe)

UF: SAFE
Sexual Abuse History Questionnaire (Thériault et al)
"The SAHQ is a 10-item measure modeled, in part, after the Incest History questionnaire (Courtois)." [18010]

Sexual Abuse Interview Schedule
"The SAIS was designed to provide detailed face valid information about sexual abuse history." [18227]
[used but not cited in 18227]

Sexual Abuse Perceived Support Scale
"a new measurement inventory designed to evaluate the participant's perception of familial support following child sexual abuse" [91846]
[used but not cited in 91846]

Sexual Abuse Perceptions Scale (Miller-Perin)
"The SAPS was developed for the present study to measure children's perceptions of sexual abuse and includes items designed to probe victims' cognitive processing of a hypothetical sexual abuse situation." [14725]

Sexual Abuse Questionnaire (Carlin and Ward)
Carlin, A S; Ward, N G. Subtypes of psychiatric inpatient women who have been sexually abused. _Journal of Nervous and Mental Disease_ 180: 392-397 (1992). [cited in 21393]

Sexual Abuse Questionnaire (Finkelhor)
USE: Sexual Life Events Inventory (Finkelhor)

Sexual Abuse Questionnaire (Haviland et al)
"developed...for the present study" [28727]
Haviland, M G; Sonne, J L; Anderson, D L; Nelson, J C; Sheridan-Matney, C; Nichols, J G; Carlton, E I, Murdoch, W G C. Thyroid hormone levels and psychological symptoms in sexually abused adolescent girls. _Child Abuse and Neglect_ 30: 589-598 (2006). [28727]

Sexual Abuse Questionnaire (Lock et al)
"The SAQ was designed as a brief screening device to aid in the identification of a childhood sexual abuse history." [19096]

Sexual Abuse Questionnaire (Moncrieff et al)
"designed for this study" [08027]

Sexual Abuse Rating Scale (Friedrich)
"The SARS consists of 21 yes/no items and 3 items coded in number of months that describe abuse-related variables" [19752]

Sexual Abuse Scale (DiTomasso and Routh)

Sexual Abuse Screening Checklist (Kinzl et al)

Sexual Abuse Screening Questionnaire (Mukherjee)
Mukherjee, A. A study on impact of sexual abuse on mental health of children. Doctoral dissertation, Calcutta University (India), 2006. [cited in 84595]

Sexual Abuse Screening Questionnaire (Russell)

Sexual Abuse Severity Scale (Silk et al)

Sexual Abuse Survivor’s Symptom Scale (Clairmont)
"The test consists of 181 self-descriptive statements to which the subject responds on a 5-point Likert scale." [90326]
Sexual Abuse Symptom Scale (Hill)
“an instrument measuring posttraumatic symptomatology related to childhood sexual abuse” [90421]

Sexual Abuse Trauma Index
USE: Trauma Symptom Checklist-40 (Briere and Runtz)

Sexual Activities and Attitudes Questionnaire (Noll et al)
“This computer-administered measure of sexual attitudes and voluntary sexual activity...includes several items from the Sex Activity Questionnaire for Girls and Boys (Udry) and the Fear of Sex subscale from the Children’s Impact of Traumatic Events Scale (Wolfe et al).” [15084]

Sexual Activity Questionnaire for Girls and Boys

Sexual Activity Questionnaire for Girls and Boys (Udry)

Sexual Addiction Screening Test (Carnes)

Sexual Adjustment Inventory (Parker and Parker)

Sexual and Physical Abuse History Questionnaire (Leserman et al)

Sexual and Physical Abuse Questionnaire (Kooiman et al)
“‘The SPAQ’ is a 7-item self-report questionnaire assessing the prevalence of sexual and physical abuse at specific time intervals.” [33116]

Sexual Arousal Inventory (Hoon et al)

Sexual Assault and Additional Interpersonal Violence Schedule (Resick and Schnicke)
[used but not properly cited in 24762]

Sexual Assault and Adult Interpersonal Violence Scale
[used but not cited in 27116]

Sexual Assault Experiences Questionnaire (Jacobson and Richardson)
“A 72-item, semi-structured interview dealing with the participants’ abuse history.” [14854]

Sexual Assault Experiences Questionnaire (Silbert and Pines)
“developed for the purposes of the study”

Sexual Assault History Initial Interview Schedule
USE: Structured Initial Interview (Resick)

Sexual Assault Interview (Resnick et al)
“a structured clinical interview...developed for this study” [30714]

Sexual Assault Profile (Conte and Berliner)
“a detailed questionnaire concerning family, abuse, and legal experiences of child sexual abuse victims” [26043]
Conte, J; Berliner, L. The Sexual Assault Profile. Unpublished document, 1984. [cited in 26043]

Sexual Assault Questionnaire (Frazier and Borgida)
Frazier, P; Borgida, E. Juror common understanding and the admissibility of rape trauma syndrome evidence in court. Law and Human Behavior 12: 101-122 (1988). [02438; the Questionnaire is printed on p. 107]
Sexual Assault Questionnaire (Zlotnick et al)

Sexual Assault Rating Scale (Arata)
"a 25-item scale that was devised for this study...to assess attributions of blame" [14836]

Sexual Assault Response Questionnaire
[used but not cited in 91112]

Sexual Assault Symptom Scale (Ruch et al)
Ruch, L O; Gartrell, J W; Amedeo, S R; Coyne, B J. The Sexual Assault Symptom Scale: measuring self-reported sexual assault trauma in the emergency room. Psychological Assessment 3: 3-8 (1991). [02349]

Sexual Assertiveness Scale (Morokoff et al)

Sexual Attitudes and Behaviors of College Students Questionnaire (Hall and Knox)
a 100-question survey "created for the purpose of studying college students’ relational experiences and attitudes" [40131]

Sexual Attitudes Survey (Finkelhor)
"six item survey...designed to measure attitudes on sex and body image" [21932]

Sexual Awareness Questionnaire (Snell et al)
"a measure of sexual assertiveness and self-confidence" [40309]

Sexual Behavior Assessment Schedule—HIV-Adolescent (Meyer-Bahlburg and Ehrhardt)

Sexual Behavior Questionnaire (California)

Sexual Behavior Questionnaire (Poulosny)

Sexual Behavior Scale (Jemmott et al)
"The SBS is an 18-item survey designed to assess a range of sexual practices during the respondent’s last sexual encounter and over the past 30 days." [86688]

Sexual Behavior Screen
"a 12-item questionnaire administered to adolescents" [22462]
[used but not cited in 22462]

Sexual Behavior Screen (SAPE)
a computer-assisted self-interview published by S-SAPE, Charleston, West Virginia [cited in 86646]

Sexual Coercion Characteristics Questionnaire (O’Sullivan et al)
"a series of objective questions in which participants checked the response(s) that applied to their situation" [86216]

Sexual Communication Self-Efficacy Scale (Wingood and DiClemente)
a 6-item scale
**Sexual Compulsivity Scale (Kalichman et al)**

"a 10-item questionnaire consisting of statements related to sexually compulsive behaviors and thoughts.” [83829]

**Sexual Concerns Scale**
[used but not cited in 91849]

**Sexual Conservatism Scale (Burt)**
USE: Rape Supportive Beliefs Scales (Burt)

**Sexual Contact During Childhood Scale (Broach and Petretic)**

"the SCDCS was developed specifically for this study using items from the Sexual Experiences Survey (Koss and Oros) that were modified to be more appropriate for assessing child sexual assault.” [29195]

**Sexual Dependency Inventory**
[used but not cited in 93521]

**Sexual Desire Conflict Scale for Women**
[used but not cited in 92028]

**Sexual Encounter Profile**
[used but not cited in 33885]

**Sexual Events Questionnaire (Calam and Slade)**
"derived from the interview protocol used by Russell, 1983” [02740]
USE: Sexual Events Questionnaire (Russell)

**Sexual Events Questionnaire (Finkelhor)**
USE: Sexual Life Events Inventory (Finkelhor)

**Sexual Events Questionnaire (Russell)**
UF: Sexual Events Questionnaire (Calam and Slade)

**Sexual Events Questionnaire (Segal et al)**
"Developed by the Vancouver General Hospital Adult Psychiatric Outpatient research team, the SEQ is a self-report descriptive questionnaire containing questions regarding sexual abuse.” [28052]
Segal, B; Weideman, R; Gehring, D; Crockett, D. Long-term effects of child abuse in the psychiatric outpatient sample. Unpublished manuscript, University of British Columbia, 1994. [cited in 28052]

**Sexual Experiences As a Child (Carlson and Putnam)**
"a structured interview that quantifies sexual abuse experiences...an adaptation of a measure developed by Jacobsen and Richardson” [14042]

**Sexual Experiences History (Lisak et al)**
USE: Personal History Questionnaire (Lisak et al)

**Sexual Experiences Interview (Koss)**
"The SEI consisted of 39 questions that explored the victimization the subject had experienced.”

**Sexual Experiences Questionnaire - DoD (Fitzgerald et al)**
"The SEQ-DoD consists of 24 behavioral items that assess respondents’ unwanted sex-related experiences in the military during the previous 12 months that were perpetrated by military personnel (on or off duty, or on or off base/post) or civilian employees/contractors employed in the military workplace.” [25201]

**Sexual Experiences Questionnaire (Fitzgerald et al)**
"comprises three subscales measuring three dimensions of workplace sexual harassment: gender harassment, unwanted sexual attention, and coercion or imposition” [09494]
Fitzgerald, L F; Shullman, S L; Baily, N; Richards, M; Swecker, J; Gold, Y; Ormerod, M; Weitzman, L. The incidence and dimension of sexual harassment in academia and the workplace. *Journal of Vocational Behavior* 35: 309-326 (1988). [cited in 09494]
Sexual Experiences Questionnaire (Wagner and Linehan)
"developed specifically for this study"

Sexual Experiences Survey (Koss and Oros)

Sexual Harassment Inventory (Murdoch)

Sexual Harassment Experience Questionnaire (Fitzgerald et al)

Sexual Harassment Inventory (Murdoch)

Sexual Harassment of Men Scale (Waldo et al)

Sexual Health and Reproductive History Interview (Gold and Feske)

Sexual Health Form (Schoover et al)

Sexual History Questionnaire (Artime and Peterson)
"The SHQ was developed for this research project and assessed risky sexual behavior.”  [86671]

Sexual History Questionnaire (Cupitt)
"The SHQ consists of 23 questions that assess an individual’s sexual history and behavior.”  [31285]
Sexual Identity Challenges Scale (Murdock et al)
"Adapted from the Gender Role Enforcement Subscale of the Sexual Harassment of Men Scale" [80962]
Murdock, M; Pryor, J B; Polusny, M A; Gackstetter, G D. Functioning and psychiatric symptoms among military men and women exposed to sexual stressors. *Military Medicine* 172: 718-725 (2007). [80962; the Scale appears on p. 724]

Sexual Intimacy in Psychotherapy Questionnaire (Somer and Saadon)
"The SIPQ is a 36-item questionnaire developed by the authors (21 open-ended questions and 15 structured questions), eliciting demographic information and inquiring about the offending therapists' gender, age, mental health profession, duration of therapy, estimated number of sessions, and date of the last professional encounter." [21231]

Sexual Knowledge and Attitude Test
[used but not cited in 90355]

Sexual Knowledge Survey (Allgeier and Allgeier)

Sexual Life Events Inventory (Finkelhor)
UF: Life Events Questionnaire (Finkelhor)
Risk Factor Checklist (Finkelhor)
Sexual Abuse Questionnaire (Finkelhor)
Sexual Events Questionnaire (Finkelhor)
Survey of Childhood Sexual Experiences (Finkelhor)

Sexual Opinion Survey (Fisher et al)

Sexual Partner Intimacy Scale (Haning et al)

Sexual Practices Assessment Schedule (Carballo-Diéguez et al)

Sexual Problems Related to Cancer (Kornblith et al)
"used to measure sexual problems in Hodgkin's disease and leukemia survivors using 6 items, with survivors asked about whether the problem was attributed to cancer" [84337]

Sexual Relationship Index Scale (Haning et al)
27 items "used to assess sexual satisfaction" [86646]

Sexual Relationship Power Scale (Pulerwitz et al)
"used to operationalize power differentials in the respondent's romantic relationship" [83763]

Sexual Risk Behavior Assessment (Meyer-Bahlburg et al)

Sexual Risk Behavior Questionnaire (Cavanaugh et al)
"a questionnaire developed for this study consisting of 25 questions regarding women’s sexual behavior and health" [35363; questionnaire not named in article; name assigned by PILOTS Database staff]

Sexual Satisfaction Questionnaire (Feldman-Summers et al)
Sexual Self Schema Scale for Women (Andersen and Cyranowski)
"contains 26 trait adjectives plus 24 adjective fillers...predicts a wide range of sexual attitudes, behaviors, and responses" [22798]

Sexual Self-Acceptance Scale (Harlow)
Whitmire, L E; Harlow, L L; Quina, K; Morokoff, P J. Childhood Trauma and HIV: Women at Risk. Philadelphia; Brunner/Mazel, 1999. [15564; the Scale appears on p. 169]

Sexual Self-Esteem Inventory - Women (Zeanah and Schwarz)

Sexual Self-Esteem Inventory (Finkelhor)
[confusingly cited in 06165]

Sexual Sensation Seeking Scale (Kalichman et al)
"a 9-item scale developed to assess sexual aspects of sensation seeking" [83829]

Sexual Symptom Checklist (Maltz and Holman)

Sexual Victimization Questionnaire (Groth)

Sexual/Alcohol History Questionnaire
[used but not cited in 90442]

Sexuality Scale (Snell and Papini)

Sexually Assaulted as a Child Inventory
USE: Physical and Sexual Assault Experiences Interview (Jacobson et al)

SF-36
USE: MOS Short-Form General Health Survey

Shame Posture Measure (Feiring and Taska)
"The SPM comprises 5 drawings of figures in a shame posture and 2 in a neutral posture. Participants are asked to rate the extent to which they feel each drawing depicts current feelings using a 5-point scale." [38120]

Shame Questionnaire (Feiring et al)
"an 8-item self-report instrument used to assess children's feelings of shame about being abused" [87040]

Shape Matching
[a cognitive processing task used but not clearly cited in 86560]

Shapes Task
an executive function task for children
[used but not clearly cited in 85554]

Shared Power Scale (Slattery and Goodman)
"a 15-item measure ... which assesses participants; perceptions of shared power within their organization" [34653]
Shedler Quick PsychoDiagnostics Panel

"a hand-held, computerized test with branching internal logic that screens for 7 psychiatric disorders using DSM-IV criteria" [20933]

Shedler-Westen Assessment Procedure - 200

"The SWAP-200 is a set of 200 personality-descriptive statements or items." [19678]

Sheehan Disability Scale (Sheehan)

Sheehan Stress Vulnerability Scale (Sheehan)

USE: Vulnerability to the Effects of Stress Scale

SHIP Questionnaire

USE: Sailors’ Health Inventory Program Questionnaire

Shipley Institute of Living Scale (Shipley)

UF: Shipley-Hartford

Institute of Living Scale

Shipley-Hartford

USE: Shipley Institute of Living Scale (Shipley)

Short Alcohol Dependence Data Questionnaire

"a 15-item scale assessing current alcohol dependence" [30468]

Short Category Test (Wetzel and Boll)

"administered to evaluate abstract thinking" [31869]

Short Depression-Happiness Scale (Joseph et al)

"This is a 6-item scale containing 3 items concerned with positive thoughts and feelings and 3 items concerning negative thoughts and feelings." [80752]

Short Evaluation of Eating Disorders (Bauer et al)

This measures the main behavioural and cognitive/affective symptoms of eating disorders. [87500]

Short Explanatory Model Interview (Lloyd et al)

Lloyd, K R; Jacob, K; Patel, V; St Louis, L; Brughra, D; Mann, A. The development of the Short Explanatory Model Interview (SEMI) and its use among primary-care attenders with common mental disorders. Psychological Medicine 28: 1231-1237 (1998). [cited in 31395]

Short Form Health Survey

USE: MOS Short-Form General Health Survey

Short Index of Problems (Woolard et al)

"15 yes/no items representing lifetime consequences of alcohol use in 5 domains" [39960]

Short Inventory of Problems (Miller et al)

"The SIP is a 15-item test that measures physical, social, intrapersonal, impulsive, and interpersonal consequences of alcohol consumption." [18419]

Short Michigan Alcoholism Screening Test (Selzer et al)

Short Orientation-Memory-Concentration Test (Katzman et al)

Short Portable Mental Status Questionnaire (Pfeiffer)

Short Psychological Well-Being Scale ( Ryff)
"The SPWB is an 84-item measure of autonomy, environmental mastery, personal growth, positive relations with others, purpose in life, and self-acceptance." [18830]

Short PTSD Rating Interview (Davidson et al)
an 8-item PTSD-specific global scale

UF: SPRINT

Short Social Capital Assessment Tool (De Silva et al)
"The SASCAT is a shortened version of the Short Social Capital Assessment Tool...and is specially designed to measure cognitive and structural social capital in low-income countries." [33787]

Short Test of Functional Health Literacy in Adults (Nurss et al)
"There are 36 reading items included on the S-TOFHLA and respondents are typically given 7 minutes to complete the test." [37101]

Short Understanding of Substance Abuse Scale
USE: Understanding of Alcoholism Scale

Shortened Health Locus of Control Scale (Bush et al)

Shortness of Breath Questionnaire (Eakin et al)
"The SOBQ is a validated, disease-specific scale that measures the influence of dyspnea on health-related quality of life." [36084]

Shutdown Dissociation Questionnaire (Schauer and Elbert)
[instrument not named in source; name assigned by PILOTS Database staff]

Shyness Scale (Cheek and Buss)

Sibling Abuse Interview Schedule (Caffaro and Conn-Caffaro)

Sibling Behavior Problem Checklist (Moos et al)
USE: Health and Daily Living Form (Moos et al)

Sibling Family-of-Origin Cartoon (Caffaro and Conn-Caffaro)
"a crayon-and-paper task...designed to explore relationships between family members, with an emphasis on their sibling connection" [15245]

Sibling Impact Questionnaire
[used but not cited in 92547]
Sibling Inventory of Differential Experience (Daniels and Plomin)

"The SIDE is a self-report questionnaire consisting of 11 scales designed to assess nonshared environmental influences." [87355]
[cited in 87355]

Sibling Knowledge of Illness Test

[used but not cited in 92547]

Sibling Perception Questionnaire (Carpenter and Sahler)

"The SPS contains 23 items with four dimensions of appraisal: interpersonal, intrapersonal, communication, and fear of the disease." [17038]

Sibling Relationship Interview (Stocker and McHale)

"designed to assess school-age children’s perceptions of the quality of the sibling relationship" [36822]

Sibling Relationship Questionnaire (Furman and Buhrmeister)

Sickness Impact Profile (Martin et al)

Martin, D P; Gilson, B S; Bergner, M; Bobbitt, R A; Pollard, W E; Conn, J R; Cole, W A. The Sickness Impact Profile: potential use of a health status instrument for physician training. Journal of Medical Education 51: 942-944 (1976).
Bergner, M; Bobbitt, R A; Pollard, W E; Martin, D P; Gilson, B S. The Sickness Impact Profile: validation of a health status measure. Medical Care 14: 57-67 (1976). [cited in 01659]

SIDCARB

USE: Spousal Inventory of Desired Changes and Relationship Barriers (Bagarozzi)

Side Effect Rating Scale (Asberg)

Asberg, M. Dose effects of antidepressant medication in different populations. Journal of Affective Disorders suppl. 2: S1-S67 (1986). [cited in 21498]

Side Effects Form for Children and Adolescents (Klein)

"The SEF-CA is a child- and caretaker-informed form to be completed regarding psychotropic medication side effects." [31984]

Side Effects Summary (Bauer)

SIGAM Mobility Grades

Ryall, N; Eyres, S B; Neumann, V C; Bhakta, B; Tennant, A. The SIGAM Mobility Grade: a new population specific measure for lower limb amputees. Disability and Rehabilitation 25: 833-844 (2003). [cited in 30860]

Significant Events Inventory (Catlin and Epstein)

Significant Events Questionnaire (Liem et al)

"developed by the authors to survey participants about a variety of stressful events which may have occurred in childhood" Liem, J H; O'Toole, J G; James, J B. Themes of power and betrayal in sexual abuse survivors' characterizations of interpersonal relationships. Journal of Traumatic Stress 9: 745-761 (1996). [cited in 13292]

Significant Others Scale (Power et al)

"This scale assesses 4 different social support functions; 2 emotional and 2 practical, in 7 individuals." [30163]

Silencing Response Scale (Baranowsky)

"a 15-item scale "developed to help care-givers identify specific communication difficulties in their trauma work involving the review of clients’ traumatic memories" [24094]
[cited in 14094 only as “personal communication”]

Silencing the Self Scale (Jack and Dill)

"a 31-item self-report questionnaire...developed to measure cognitive schemas about intimacy" [15098]
Silver Lining Questionnaire (Sodergren and Hyland)
"This is a 38-item self-report questionnaire that measures a wide variety of positive changes of illness, with items related to perceptions of oneself, relationships with others, and meaning/appreciation of life." [33764]

Simmons Drug Usage Scale
"created for this study by the author" [91177]
Simmons, R V.  Child sexual trauma and female prostitution.  Ph.D. dissertation, University of Texas at Austin, 1999.  [91177]

Simmons Prostitution Scale
"created for this study by the author" [91177]
Simmons, R V.  Child sexual trauma and female prostitution.  Ph.D. dissertation, University of Texas at Austin, 1999.  [91177]

Simple Choice Reaction Time Task
[used but not cited in 29319]

Simple Personality Inventory (Hwu and Yang)
"The SPI consists of 10 simple yes/no questions that explore the core characteristics of 10 specific personality traits, including nervous, obsessive, histrionic, inhibited, easy-going, paranoid, romantic, practical, modest and timid, and assertive personalities." [24130]

Simple Reaction Time (Donders)

Simple Scale to Measure Coping Styles (Raphael et al)
UF:  Scale to Measure Coping Styles (Raphael et al)

Simple Screening Instrument for Alcohol and Other Drugs (Winter and Zenilman)
Winter, K; Zenilman, J.  *Simple Screening Instrument for Outreach for Alcohol and Other Drug Abuse and Infectious Diseases*  (No. 9-18).  Baltimore: Maryland Department of Health and Human Services, 1994.  [cited in 19447]

Simplified Acute Physiology Score
[used but not cited in 31375]

Simplified PTSD Screen (Schuitevoerder)
"a novel 8-item measure...derived from the PTSD Checklist (PCL-S)" [93174]
Schuitevoerder, S.  Psychometric properties of a novel PTSD screen in older combat veterans with varying levels of cognitive impairment.  Ph.D dissertation, Alliant International University, San Diego, 2011.  [93174]

Simpson-Angus Scale

Simulator Sickness Questionnaire (Kennedy et al)
"The SSQ lists 26 symptoms that are associated with physical discomfort experienced in VR simulators." [31930]

Singapore Youth Resilience Scale (Broekman)
a 50-item "resilience scale for the Singaporean population" [86445]

Single Category Implicit Association Test (Karpinski and Steinman)
"a variant of the classical Implicit Association Task in which associations with single targets like the self-concept can be measured without the need for an opposite category" [33939]

Single-Item Forgiveness Scale (Berry and Worthington)
"used to assess the degree to which the respondent has forgiven a specific transgression in a relationship" [39505]

Single-Item Measure of Social Support (Blake and McKay)
"used to examine the size of the social support network available to each participant" [32138]

SIS
USE: Somatic Inkblot Series (Cassell)
Situation-Specific Emotional Reaction Questionnaire (Van Veldhuizen and Last)

Situational Anxiety Scale (Spielberger)
[used in 11786, cited only as "Spielberger, 1973"

Situational Confidence Questionnaire (Annis)
Annis, H M. [uncited 1982 article]

Situational Factors Survey (Breitenbecher and Scarce)
"The SFS includes 13 items that have been used by previous researchers to assess assault characteristics..." [19848]

Situational Humor Response Questionnaire (Martin and Lefcourt)
"This scale was designed to measure sense of humor as measured by the frequency that individuals display mirth in a wide variety of situations." [08857]

Situational Inventory of Body-Image Dysphoria (Cash)
"The SIBID is a 50-item text that is scored based on responses to the first 48 questions." [27937]

Six-Item Cognitive Screen (Callahan et al)
Callahan, C M; Unverzagt, F W; Hui, S L; Perkins, A J; Hendrie, H C. Six-item screener to identify cognitive impairment among potential subjects for clinical research. Medical Care 40; 771-781 (2002). [cited in 40027]

Sixteen Personality Factor Inventory (Cattell et al)
UF: 16-PF

Size Judgment Span (Cherry et al)

Skala Aktualnej Pamati (Ruisel et al)
Ruisel, I; Müllner, J; Farkas, G. Skala Aktualnej Pamati (SAP) Prirucka. Bratislava: Psychodiagnosticke a Didakticke Testy, 1983. [cited in 24978]

Skala Gereiztheit/Belastetheit (Mohr)
Mohr, G. Die Erfassung psychologischer Befindensbeeinträchtigungen bei Arbeitern. Frankfurt am Main: Peter Lang, 1986. [cited in 83290]

Skala Psychosomatische Beschwerden (Mohr)
Mohr, G. Die Erfassung psychologischer Befindensbeeinträchtigungen bei Arbeitern. Frankfurt am Main: Peter Lang, 1986. [cited in 83290]

Skala Ustosownikwn Interpersonalnych (Stanik)
UF: Scale of Interpersonal Relationships (Stanik)

Skala Zmian Zyciowych (Zieba et al)
UF: Life-Changing Events Scale (Zieba et al)

Skala zu Problemlosekompetenzen (Perkonigg and Wittchen)
"a short self-competence scale" [26804]

Skala zum Religiöses Coping (Murken et al)
Murken, S; Schönhofen, K; Müller, C. Entwicklung und Validierung der Skalen zur Gottesbeziehung und zum religiösen Coping (SGrC). In press. [cited in 81906]

Skala zur Erfassung der Wirkung traumatisierender Ereignisse im Polizeidienst (Gasch)
Skala zur Erfassung von Lehrer- und Schülermerkmalen (Schwarzer and Jerusalem)

Skripte-Erhebungsbogen zur Therapieoptimierung (Bering and Köhler)
Köhler, M; Bering, R. Missberfolgs- und Erfolgsskripte als Einflussfaktoren in der Traumatherapie. Trauma und Gewalt 6: 30-47 (2012). [06178; the instrument appears on pp. 44-47]

SKT Neuropsychological Test Battery
USE: Kurztest zur Erfassung von Gedächtnis- und Aufmerksamkeitsstörungen (Erzigkeit)

Sleep and Nightmare Diary (Wood and Bootzin)

Sleep Assessment (Daniels and McGuire)
a 25-item sleep and nightmare assessment

Sleep Breathing Severity Scale (Krakow et al)
Krakow, B; Melendrez, D; Warner, T D; Clark, J O; Sisley, B N; Dorin, R; Harper, R M; Leahigh, L K; Lee, S A; Sklar, D; Hollifield, M. Signs and symptoms of sleep-disordered breathing in trauma survivors: a matched comparison with classic sleep apnea patients. Journal of Nervous and Mental Disease 194: 433-439 (2006). [28901]

Sleep Diary (Morin and Espie)

Sleep Disorders Questionnaire (Douglass)

Sleep Disruption Questionnaire (Karan)
Karan, C; Warneke, G; Thornby, J I; Swab, J J; Williams, R L. Prevalence of sleep disturbance in the general population. In: Chase, M H; Stern, W G; Walter, P L (ed.), Karacan, I; Warheit, G J; Thornby, J I; Schwab, J J; Williams, R L. Prevalence of sleep disturbance in the general population. Los Angeles: University of California, Brain Information Service, 1973. [cited in 11072]

Sleep Disturbance Screening Questionnaire (Allen et al)
a 21-item questionnaire designed “to assist clinicians in disentangling trauma-related factors that contribute to sleep disturbance from other common factors, such as depression” [16333]
Allen, J G; Console, D A; Brethour, J R; Huntoon, J; Fultz, J; Stein, A B. Screening for trauma-related sleep disturbance in women admitted for specialized inpatient treatment. Journal of Trauma and Dissociation 1(3): 59-86 (2000). [16333; the Questionnaire appears on pp. 84-86]

Sleep Experiences Questionnaire (McNally and Clancy)
Based on Cheyne’s Waterloo Unusual Sleep Experiences Questionnaire

Sleep History Questionnaire
[a 6-item scale used but not cited in 30223]

Sleep Hygiene Self-test (Blake and Gómez)
a 30-item scale measuring “activities that may directly affect sleep quality and quantity” [20867]

Sleep Impairment Index (Morin et al)
Morin, C M; Colecchi, C; Stone, J; Sood, R; Brink, D. Behavioral and pharmacological therapies for late-life insomnia: a randomized controlled trial. Journal of the American Medical Association 281: 991-999 (1999). [cited in 23460]
SEE ALSO: Insomnia Severity Index (Bastiens et al)

Sleep Medicine History (Krakow et al)
“organized as modules according to standard nosology or guidelines of the American Academy of Sleep Medicine” [18398]

Sleep Problem Scale (Jenkins et al)

Sleep Problems Checklist
[used but not cited in 90125]
Sleep Quality Questionnaire (Alderman et al)  
"an in-house...questionnaire, which included 12 questions on the quality of sleep" [32562]  

Sleep Questionnaire (Simonds and Parraga)  

Sleep Questionnaire (Walsh et al)  
"a patient-related evaluation of sleep" [29658]  

Sleep Survey (Wisconsin Sleep Cohort Study)  

SLEEP-50 (Spoormaker et al)  
[cited in 27511 as "Spoormaker et al, submitted manuscript]

Sleep-Eval Knowledge-Based System  
"an expert system specially designed to administer questionnaires and conduct epidemiological studies in the general population [that can] formulate a series of diagnostic hypotheses based on the data provided by a respondent" [22020]  
Ohayon, M; Gilleminault, C; Paiva, T; Priest, R G; Rapoport, D M; Sagales, T; et al.  An international study on sleep disorders in the general population: methodological aspects of the use of the Sleep-EVAL system.  *Sleep* 20: 1086-1092 (1997).  [cited in 22020]

Slosson Intelligence Test—Revised (Slosson)  

Slowness Questionnaire (Hymas et al)  
"a self-rated scale to assess pervasive slowness in activities of daily living" [23323]  

SMART Clinic Symptom Checklist  
"The SMART Checklist was created by one of the authors specifically for this treatment protocol. It measures 31 symptoms seen in children who are sexually reactive toward others." [82730]  

Smell Identification Test (Doty)  

Smith Digit Modalities Test  
[used but not cited in 35018]

SmithKline Beecham Quality of Life Scale  

Smoking Abstinence Self-Efficacy Scale (Velicer et al)  
"used to assess confidence in resisting the urge to smoke" [38433]  

Smoking Consequences Questionnaire (Copeland et al)  
"used to assess outcome expectancies associated with smoking behavior" [27348]  

Smoking History Questionnaire (Brown et al)  
"The SHQ includes items pertaining to smoking rate, age of onset at initiation, and number of years of being a regular smoker" [81124]  

Smoking Withdrawal Questionnaire (Shiffman and Jarvik)  
Rose, J E; Behm, F M; Westman, E C; Levin, E D; Stein, R M; Lane, H D; Ripka, G V.  Continued effects of nicotine and mecamylamine in attenuating smoking satisfaction.  *Experimental and Clinical Psychopharmacology* 2: 1-17 (1994).  [cited in 07111]
Snith-Hamilton Pleasure Scale
a self-report scale

SNAP-IV Questionnaire (Hinshaw et al)
Hinshaw, S; March, J; Abikoff, H; Cantwell, D; Conners, C K; Elliott, G; Halperin, J; Greenhill, L; Hchtmann, L; Hoza, B; Jensen, P; Newcorn, J; McBurnett, K; Pelham, W; Richters, J; Serere, J; Schiller, e; Swanson, J; Vereen, D; Wells, K; Wigal, T. Comprehensive assessment of childhood attention-deficit hyperactivity disorder in the context of a multisite, multimodal clinical trial. Journal of Attentional Disorders 1: 217-234 (1997). [cited in 21183]

Sniffin’ Sticks
"pen-like odor dispensers" used for "testing of odor thresholds and odor identification" [34094]

SOAPP
USE: Screener and Opioid Assessment for Patients with Pain (Butler et al)

Social Acknowledgement Scale (Ljubotina et al)
"This instrument was created for the purpose of this study. It is designed to measure participants' subjective view on the level of acknowledgment they receive from their family, friends, acquaintances, state, and state institutions." [81824]

Social Acknowledgement Questionnaire (Maercker and Müller)
a 16-item self-report measure
Maercker, A; Müller, J. Social acknowledgment as a victim or survivor: a scale to measure a recovery factor of PTSD. Journal of Traumatic Stress 17: 345-351 (2004). [18529]

Social Activity Scale (Van der Wal et al)
Van der Wal, J; Cleiren, M P H D; Han, R; Diekstra, R FW. Verslag van het nabestaandenproyekt, Deel 2: Psychometrische evaluatie van enkele vragenlijsten, afgenomen tijdens de eerste meting onder nabestaanden van suicides en verkeersslachtoffers. Internal report, Leiden University Department of Clinical and Health Psychology, 1988. [cited in 07092]

Social Adaptation Checklist (Sagi-Schwartz et al)
"designed to obtain a global picture of the participants' integration into the community" [23271]

Social Adaptation Index (Clare and Cairns)
USE: Standardized Interview to Assess Social Maladjustment and Dysfunction (Clare and Cairns)

Social Adaptation Self-Rating Scale (Bosc et al)
"This instrument, developed to evaluate social functioning skills and interests, is composed of 21 items." [81075]

Social Adjustment and Behaviour 2 (Hildreth and Place)
a 50-item school-based instrument for use with 5-16 year old children "designed to measure child behaviour and to help identify emotional problems which arise because the child has been a victim of child sexual abuse" [09375]

Social Adjustment Inventory for Children and Adolescents (John et al)

Social Adjustment Scale - Self Report (Weissman and Bothwell)
"a self-report adaptation of Weissman and Paykel's structured interview: the Social Adjustment Scale..." [dbat 422]

UF: Self-Adjustment Scale - Self-Report (Weissman and Paykel)
Weissman Social Adjustment Scale

Social Adjustment Scale (Cooper et al)
USE: Work, Leisure and Family Life Questionnaire (Cooper et al)
Social Adjustment Scale (Weissman and Paykel)
"a semistructured interview" [02006]

Social Adjustment Scale-II (Schooler et al)

Social and Health Assessment (Weissberg et al)

Social and Occupational Functioning Scale
"a 100-point scale, modeled on the Global Assessment of Functioning (GAF) scale, but it assesses only social and occupational functioning without including psychiatric symptoms" [29287]

Social Anxiety Scale for Children (La Greca et al)

Social Avoidance and Distress Scale (Watson and Friend)

Social Behavior Inventory (Gully)

Social Behavior Questionnaire (Masse and Trembley)
"38 items measuring childhood behaviours and traits" [31134]

Social Behaviour Assessment Schedule (Platt et al)

Social Capital Assessment Tool (Harpham et al)
Harpham, T; Grant, E; Thomas, E. Measuring social capital within health surveys: key issues. Health Policy and Planning 17: 106-111 (2002). [cited in 84576]

Social Capital Benchmark Survey
[used but cited only as a Web document in 37120]

Social Capital Index (Runyon et al)
"includes number of parents in the home, number of children, maternal-specific social support, support in the neighborhood, and church participation" [36233]

Social Capital Measure (Onyx and Bullen)
[used but not named in 29626; name assigned by PILOTS Database staff]

Social Change in Canada Survey

Social Cognition and Object Relations Scales (Westen et al)
"a system...for assessing individual differences with respect to object relations and social cognition using Thematic Apperception Test..." [07935]

Social Cognitions Questionnaire (Wells et al)
"This 22-item questionnaire asks patients to rate how frequently they have had common social phobia cognitions in the previous week and how much they believed them to be true when they felt anxious." [30486]
Wells, A; Stopa, L; Clark, D M. Social Cognitions Questionnaire. Unpublished instrument. [cited in 30486]
Social Cohesion and Trust Scale (Sampson et al)

Social Comfort Questionnaire (Lawrence et al)
"The SCQ is an 8-item measure designed to measure social comfort." [36807]
Lawrence, J W; Fauerbach, J A; Heinberg, L; Doctor, M; Thombs, B D. The reliability and validity of the Perceived Stigmatization Questionnaire (PSQ) and the Social Comfort Questionnaire (SCQ) among an adult burn survivor sample. Psychological Assessment 18: 106-111 (2006). [cited in 36807]

Social Competence Scale (CPPRG)
"It consists of 12 items that measure a child’s total behavioral competence in a social setting as perceived by the parent." [83903]

Social Competency Interview (Ewart and Kolodner)

Social Concern Scale

Social Connectedness in Mainstream Society Scale (Yoon)
"the SCMN is used to measure a sense of connection, belonging, and closeness to Americans in the U.S. society" [39671]

Social Connectedness in the Ethnic Community Scale (Yoon)
"The SCETH is used to assess a sense of connection, belonging, and closeness to Chinese or Taiwanese individuals in the Chinese/Taiwanese community" [36971]

Social Connectedness Scale (Blum et al)
10 items

Social Constraints Scale (Lepore et al)

Social Contact Questionnaire (Söderquist et al)
"specifically developed for this study...[18 statements] regarded participants' perceived social support from partner, family and friends" [26454]
Söderquist, J; Wijma, K; Wijma, B. Traumatic stress in late pregnancy. Journal of Anxiety Disorders 18: 127-142 [26454]

Social Desirability Scale (Crowne and Marlowe)
UF: Marlowe-Crowne Social Desirability Scale

Social Desirability Scale (Edwards)

Social Disruption Index (Palinkas et al)

Social Dominance Orientation Scale (Pratto et al)
"This 20-item scale measures the degree of subjects' agreement with beliefs that the world is competitively and hierarchically organized and that national policies should foster domination of other nations." [30192]
Social Embeddedness Scale (Norris et al)
"Social embeddedness was assessed with a 10-item measure derived by the investigators on the basis of earlier measures." [34719]

Social Experience Questionnaire - Self Report (Storch et al)
"This measure consists of 2 five-item victimization subscales: Overt Victimization and Relational Victimization." [84599]

Social Experience Questionnaire (Crick and Grotputer)
a 15-item scale "used to assess the frequency with which children experience overt and relational victimization and prosocial support from peers" [26457]

Social Experiences Checklist (Revenson et al)
measures "current positive and negative social experiences" [14452]

Social Functioning Assessment Scale

Social Functioning Exam (Starr et al)
UF: Social Ties Checklist

Social Functioning Problems Scales (Solomon et al)

Social Functioning Questionnaire (Tyrer et al)
"The SFQ is an 89-item questionnaire that asked participants to rate statements like 'I feel lonely and isolated from other people' on a 4-point scale based on the past 2 weeks." [38753]

Social Functioning Scale (Birchwood et al)
specifically designed to assess 7 areas of functioning for individuals with a diagnosis of schizophrenia" [80265]

Social Hassles Scale (Lepore et al)

Social History Interview (Linehan and Heard)
"an adaptation of both the psychosocial functioning portion of the Social Adjustment Scale and the Longitudinal Interval Follow-Up Evaluation base schedule" [34935]

Social History Questionnaire (Hiley-Young)

Social Information Processing Interview (Quiggle et al)

Social Integration Scale (Cleiren et al)
Van der Wal, J; Cleiren, M P H D; Han, R; Diekstra, R FW. Verslag van het nabestaandenproject, Deel 2: Psychometrische evaluatie van enkele vragenlijsten, afgenomen tijdens de eerste meting onder nabestaanden van suidces en verkeersslachtoffers. Internal report, Leiden University Department of Clinical and Health Psychology, 1988. [cited in 07092]

Social Interaction Anxiety Scale (Mattick and Clarke)
Social Interaction Phobia Scale (Carleton et al)

"The SIPS is a 14-item self-report measure designed to assess symptoms specific to social anxiety disorder... The items were derived as a subset of items from the Social Interaction anxiety Scale and the Social Phobia Scale." [35678]

Carleton, R N; Collimore, K C; Asmundson, G J; McCabe, R E; Rowa, K; Antony, M M. Refining and validating the Social Interaction Anxiety Scale and the Social Phobia Scale. Depression and Anxiety 26(2): E71-E81 (2009). [cited in 35678]

Social Interaction Self-Statement Test (Glass et al)

"a 30-item instrument measuring frequency of [15 positive and 15 negative] self-statements relating to social interactions” [27127]

Social Interactions Survey (DeRosier)

Social Interview Schedule (Faltermayer et al)

Social Isolation Schedule

[used but not cited in 20357]

Social Network Density Grid (Jones and Fischer)

Social Network Index (Berkman)

Social Network Interview (Mueller)

UF: Social Network Inventory (Mueller)

Social Network Inventory (Copeland)

Copeland, J; Hall, W; Didcott, P; Biggs, V. A comparison of a specialist women’s alcohol and other drug treatment service with two traditional mixed-sex services: client characteristics and treatment outcome. Drug and Alcohol Dependence 32: 81-92 (1993). [08562]

Social Network Inventory (Mueller)

USE: Social Network Interview (Mueller)

Social Network List (Hirsch)

Social Network Questionnaire (McCallister and Fischer)

[used but not otherwise cited in 91270]

Social Network Reciprocity and Dimensionality Assessment Tool (Kazak)

"a self-administered social network assessment questionnaire that was developed for use with parents of children with physical disabilities and chronic illness” [08342]

Social Network Schedule (House)

"This schedule consists of four types of social support: emotional, esteem, instrumental and informative.” [25237]

Social Perception Scale (Hall and Carter)

a 27-item "measure of sensitivity to the social environment” [84046]

Social Phobia and Anxiety Inventory (Turner et al)

Social Phobia and Anxiety Inventory for Children (Beidel et al)

"The SPAI-C is a 26-item self-report questionnaire developed specifically to assess symptoms of social anxiety across a broad range of social situations and settings." [23263]

Social Phobia Diagnostic Questionnaire (Newman et al)

"The SPDQ is a 25-item, self-report measure designed to diagnose social anxiety disorder based on DSM-IV criteria." [37098]

Social Phobia Inventory (Connor et al)

UF: Mini-SPI (Connor et al)

Social Phobia Questionnaire (Newman et al)

"The SPQ is a 10-item self-report measure designed to diagnose social phobia based on DSM-IV criteria." [24362]

Social Phobia Scale (Mattick and Clarke)

Social Phobia Weekly Summary Scale (Clark et al)

"This 6-item scale comprises 0-8 ratings of social anxiety, avoidance, self-focused versus externally focused attention, anticipatory processing, and postevent rumination." [30486]

Social Problem List (World Health Organization)

Social Problem-Solving Inventory (D’Zurilla and Nezu)

Social Problem-Solving Measure (Pettit et al)

Social Provisions Scale (Cutrona and Russell)

Social Reactions Questionnaire (Ullman)

Social Readjustment Rating Scale (Holmes and Rahe)

UF: Critical Life Events Scale

Life Events Scale (Holmes and Rahe)

Social Reintegration Scale (Legacies of Vietnam)

Social Rejection Scale (Lev-Wiesel et al)

"each of the 21 items describes a different situation of social rejection" [19886]

Social Relational Quality Scale (Hou et al)

Social Self-Esteem Inventory (Lawson et al)
"used to assess self-esteem in social situations..comprises 30 items" [21560]

Social Sharing of Emotion Questionnaire (Rimé et al)

Social Skills Assessment - Adolescents
[used but not cited in 92837]

Social Skills Rating System (Gresham and Elliott)

Social Stress and Support Inventory (Jenkins et al)

Social Stress Measure (Tolan et al)

Social Support and Disregard Scale (Abbey et al)
assesses "supportive and non supportive responses from others" [83869]

Social Support and Social Obstruction Scale (Gurley)
"consists of 22 items composed of 2 distinct components: 10 items measure social support and 12 items measure social obstruction" [82035]

Social Support Appraisals Scale (Dubow and Ullman)
USE: Survey of Children’s Social Support (Dubow and Ullman)

Social Support Appraisals Scale (Vaux et al)

Social Support Behaviors Scale (Vaux et al)

Social Support During Coverage Scale (Hatanaka et al)
"consisted of three subscales based on support resources, such as supervisors and peers, as well as family and friends" [83706]

Social Support Effectiveness Questionnaire (Rini and Dunkel Schetter)
25 items

Social Support for Recovery Scale (Laudet et al)
"a 7-item scale designed to assess the degree to which people in the participant’s life support them in their recovery" [40263]

Social Support Fragebogen (Kirchberger and Bullinger)
USE: Self-Assessment Questionnaire on Social Support (Donald and Ware)

Social Support from Others Scale
[used but not cited in 92345]

Social Support Index (McCubbin et al)
"The 17-item SSI assessed support received from family members, friends, and the community." [80256]
Social Support Interaction Global Coding System
USE: Système de Codification des Interactions de Soutien (Pizzamiglio et al)

Social Support Interview (Melchior et al)

Social Support Inventory (Holeva)
"a 5-item measure of perceived social support, based on an expanded version of the Perceived Criticism Measure (Hooley and Teasdale)" [23410]

Social Support Inventory (Timmerman et al)
"The SSI is a [20-item] scale that quantifies satisfaction with perceived social support." [25774]

Social Support Inventory Scheme (Paardekooper et al)
"This measure asks children whether they did or did not receive material social support, emotional social support, guidance social support, and play social support from up to five self-chosen persons." [35533]

Social Support Knowledge and Social Support Behavior (Johnson et al)

Social Support List Interactions/Discrepancies (Van Sonderen)
"This self-report questionnaire has been designed and validated in the Netherlands." [21864]

Social Support Measure (Moos et al)
USE: Health and Daily Living Form (Moos et al)

Social Support Microsystems Scales (Seidman et al)

Social Support Network Inventory (Flaherty et al)

Social Support Network Scale (CWHR)
"The Chicago Women's Health Risk Study collaborators constructed a new measure of social support...This scale consists of 12 items to which respondents either agreed or disagreed." [81856]
[used but not clearly cited in 81856]

Social Support Provisions Scale (Weiss)

Social Support Questionnaire (Green and Berlin)

Social Support Questionnaire (Lauterbach et al)
"A [36-item] composite index of social support was created that assessed support received from the respondent's spouse, other family members, and friends." [80696]

Social Support Questionnaire (Lubben)
"The seven-item Lubben Social Support Questionnaire asks about contact and closeness with relatives, contact and closeness with friends, and the presence of someone to consult for important decisions." [23923]

Social Support Questionnaire (O’Brien et al)
"Includes items assessing instrumental social support, emotional social support, social isolation, and social network size" [21570]
Social Support Questionnaire (Revenson et al)

Social Support Questionnaire (Santé Québec)
"This questionnaire assesses the frequency of social contacts as well as the number of persons who are available for help or who give affection to the subject." [29287]

Social Support Questionnaire (Sarason)

Social Support Questionnaire (Schaefer et al)

Social Support Questionnaire (Tempelaar et al)

Social Support Questionnaire 6
[used but not cited in 91121]

Social Support Questionnaire for Satisfaction (Doeglas et al)
evaluates "perceived social support" [81020]

Social Support Questionnaire for Transactions (Suurmeijer et al)
evaluates "received social support" [81020]

Social Support Questions (Schuster et al)
"These sets of questions identify negative and positive support provided by friends and family." [33949]

Social Support Rating Scale (Cauce et al)

Social Support Record (Vaux)
"The Vaux Social Support Record measures participants' perceived emotional and practical social support from adults at school, family members, or friends. It includes 9 statements..." [22476]

Social Support Resources Questionnaire (Vaux and Athanassopoulou)

Social Support Scale (Adolescent Pathways Project)
"measuring different types of social support for urban adolescents in each microsystem of family, peers, and school" [82672]

Social Support Scale (Barrett)
"This scale was developed especially for our study."

Social Support Scale (Caplan et al)
"This instrument evaluates social support received from three sources: work supervisor, work colleagues, and family and/or friends." [19638]

Social Support Scale (Coppel)
USE: Index of Social Support (Coppel)
Social Support Scale (Habif)
UF: Social Supports Inventory (Habif)

Social Support Scale (Harper and Kelly)

Social Support Scale (Hobfoll and London)

Social Support Scale (Khamis)

Social Support Scale (Medalie and Goldbourt)
"a 4-item self-report questionnaire" [30936]

Social Support Scale (Noguchi)
"used extensively to measure perceived social support among older people in Japan" [18116]

Social Support Scale (Pollack and Harris)
"includes 23 items based on themes of alienation and satisfaction" [14145]

Social Support Scale for Children (Harter)

Social Support Scale for Children and Adolescents (Harter)

Social Support Scales (Zich and Temoshok)

Social Undermining Scale (Vinokur and Van Ryn)
"a 3-item measure...used to assess stresses caused by members of the participant's social network" [27198]
Social Vulnerability Index (Cutter et al)

"The SOVI is a construct of demographic and socioeconomic data developed to specifically measure vulnerability to environmental hazards at the county level." [39759]

Social Well Being Scale (Keyes)

"This 14-item scale assessed five domains of social well-being: Meaningfulness of Society, Social Interaction, Acceptance of Others, Social Contribution, and Social Actualization." [32235]

Social Well-Being Index (Donald and Ware)

Donald, C; Ware, J. The Quantification of Social Contacts. Santa Monica, California: The Rand Corporation, 1982. [cited in 07983]

Social Work Activity Form (Stehl et al)

"developed by our team to track contact and services provided to families by social work staff in the first month after diagnosis" [34024]

Social Work Education Consortium Demographic Survey

[used but not cited in 92253]

Social Worker Effectiveness Questionnaire (Itzhaky)

"a multipronged questionnaire, defined by 8 skills, to assess effectiveness at the micro and macro levels" [used but not named in 40700; name assigned by PILOTS Database staff]

Social Worker Empowerment Scale (Frans)

[a 34-item scale used but not named in 40700; name assigned by PILOTS Database staff]

Social, Attitudinal, Familial, and Environmental Acculturation Stress Scale (Mena et al)

"This scale consists of 24 items that measure acculturative stress in social, attitudinal, familial, and environmental contexts, in addition to perceived discrimination (majority group stereotypes) toward migrant populations." [22279]

UF: SAFE Scale (Mena et al)

Sociale Redzaamheidsschaal-Z (Kraijer and Kema)

"Dutch social adaptive behaviour scale for individuals with a higher level of intellectual disability" [35034]

Kraijer DW, Kema GN: "Dutch social adaptive behaviour scale for individuals with a higher level of intellectual disability". Groningen, The Netherlands; Noordelijk Centrum voor Gezondheidsvraagstukken, 2011. [cited in 35034]

Sociale Steun Lijst - Discrepanties (Van Sonderen)

"It assesses ... the extent to which the received support equals the needs of the individual. The SSL-d features 34 items in 6 subscales..." [86444]

Socio-Demographic Questionnaire (Daigneault et al)

"The 13 items...evaluate the family composition, living arrangements, and age, etc." [80326]

Socio-Demographic Questionnaire (Schild and Dalenberg)

"The SoDe-Q was developed to assess three main areas: (a) general demographic information, (b) deaf specific information (e.g., degree of hearing loss), and (c) use of alcohol and illicit drugs." [85973]

Socio-Economic Index 2 (Nakao and Treas)

"This measure approaches the issue of measuring socioeconomic status by ranking the relative prestige of an individual’s occupation on a scale from 1 to 100.

Socio-Economic Index for New Zealand (Elley and Irving)

"This scale classifies SES into six levels on the basis of paternal occupation..." [31138]

Socio-Sexual Knowledge and Attitudes Tool (Griffiths and Lunsky)
"an assessment tool to evaluate the sexual knowledge and attitudes of persons with intellectual disability" [35831]

Sociocultural Adjustment Measure (Kira et al)
"This 10-item…scale measures [refugees'] degree of adjustment to the new multicultural multiethnic society." [82453]

Sociocultural Attitudes Towards Appearance Scale (Thompson et al)

Sociocultural Context Measure (Lindstrom et al)
"a 7-item measure developed for this study" [38140]
Lindstrom, C M; Cann, A; Calhoun, L G; Tedeschi, R G. The relationship of core belief challenge, rumination, disclosure, and sociocultural elements to posttraumatic growth. Psychological Trauma: Theory, Research, Practice, and Policy (published online 28 March 2011). [38140]

Socioeconomic Index for Occupations in Canada (Blishen et al)

Socioeconomic Indexes (Steven and Cho)

Sociopolitical Reactions to Attacks of International Terrorism (Ai and Evans-Campbell)
10 items

Sociopolitical Satisfaction Scale (Khamis)

Sociosexual Orientation Inventory (Simpson and Gangestad)

Sociosexuality Questionnaire (Bailey et al)
"a measure of willingness to engage in casual sex" [40309]

Sociotropy-Autonomy Scale (Beck et al)

SOFA
USE: Sepsis-related Organ Failure Assessment (Vincent et al)

Solitary Confinement Questionnaire (Deaton et al)
"assessed the usefulness of coping strategies employed during captivity, especially during solitary confinement" [85894]

Solomon Islands Deployment Questionnaire
"included questions on vaccinations received for deployment, chemical and environmental exposures, and overall deployment experience" [32869]

Solution-Focused Recovery Scale for Survivors of Sexual Abuse (Dolan)

SOMAT
USE: Somatization Scale (Samelius et al)

Somatic and Psychological Health Report Questionnaire
"a highly sensitive measure for detection of non-specific symptoms that may indicate the presence of a psychological disorder" [35030]
Somatic Complaints Scale (Cox)

Somatic Discomfort Questionnaire (Wittenborn and Buhler)

Somatic Inkblot Series (Cassell)
"a new series of ambiguous yet partially structured designs...more consistently capable of stimulating imagery for diagnostic and therapeutic purposes” [23000]

Somatic Stress Response Scale
[used but not cited in 93261]

Somatic Symptom Index (Escobar et al)

Somatic Symptom Index (Othmer and DeSouza)

Swartz, M; Hughes, D; George, L; Blazer, D; Landerman, R; Bucholz, K. Developing a screening index for community studies of somatization disorder. Journal of Psychiatric Research 20: 335-343 (1986). [cited in 21638]

Somatic Symptom Inventory (Barsky et al)
"composed of 26 bodily complaints drawn from the MMPI hypochondriasis subscale and the Hopkins Symptom Checklist somatization subscale” [04469]

Somatic Symptoms Questionnaire (Skarpa et al)
"a self-assessment questionnaire consisting of 20 items to assess the intensity of somatic symptoms” [26879]
Skarpa, I; Rubesa, G; Moro, I; Manestar, D; Petrovecki, M; Rukavina, D. Changes of cytolytic cells and perforin expression in patients with posttraumatic stress disorder. Croatian Medical Journal 42: 551-555 (2001). [26879]

Somatic, Cognitive, and Behavioral Anxiety Inventory (Lehrer and Woolfolk)
"The SCBAI assesses the level and type of uncomfortable feelings participants are experiencing.” [39679]

Somatization Scale (Samelius et al)
"SOMAT was developed for the present study in accordance with the DSM-IV criteria for somatization disorder and comprises all the DSM-IV criteria of the somatization disorder.…It comprises 44 symptom items.” [82660]

Somatoform Dissociation Questionnaire (Nijenhuis at al)
Nijenhuis, E R S; Spinhoven, P; Van Dyck, R; Van der Hart, O; Vanderlinden, J. The development and psychometric characteristics of the Somatoform Dissociation Questionnaire (SDQ-20). Journal of Nervous and Mental Disease 184: 688-694 (1996). [09539]

Somatosensory Amplification Scale (Barsky et al)
"10-item questionnaire to assess sensitivity to uncomfortable visceral and somatic sensations” [24025]

Sometimes It Is Sad To Be At Home (Diehl and Baker)
"In this workbook, children respond to stories about their feelings, emotions, and behaviors pertaining to violence and trauma.’ [82802]
Soothing Receptivity Scale (Glassman)
“The SRS is a 27-item measure assessing an individual’s receptivity to soothing.” [38095]

Source of Stress Inventory (Chandler)

Source of Traumatic Experiences Scale (DeCarvalho)
“STES is a 12-item instrument, developed by the author for the purpose of determining participants’ experiences with trauma.” [35871]

Sources of Occupational Stress (Beaton et al)
“a 57-item measure of job-related stressors inherent and/or related to employment as a professional firefighter and/or paramedic” [08379]

Sources of Pressure in Your Job Questionnaire (Cooper et al)

Sources of Support Scale (NVQRS)
“a 10-item self-report measure of social support” [80062]

Sources of Traumatic-Related Guilt Survey (Kubany et al)
Kubany, E S; Abueg, F R; Kilauano, W L; Manke, F P. 121 ways to feel guilty about the war: the development of a Sources of Trauma-Related Guilt Survey—War Zone Version. Manuscript submitted for publication, 1994. [cited in 06491]

South African Child Assessment Schedule (Barbarin and Richter)
“A structured maternal-report questionnaire based on a three-point frequency scale. Items assess personal adaptability and frustration tolerance.” [21236]

South Oaks Gambling Screen (Lesieur and Blume)

Southeast Asian Adolescent Stressful Event Inventory (DuongTran)
“a 105-item measure composed of stressful life events derived from available inventories...and items that focus specifically on stressful life events for Southeast Asian adolescents.” [20668]

Southern California Sensory Integration Test (Ayers)

Southern Methodist University Health Questionnaire
[used but not cited in 03133]

Soziale Unterstützung (Sommer and Fydrich)

Soziodemographische Fragebogen (Koch)
[used but not usefully cited in 83747]

SPAN (Davidson et al):
a 4-item scale intended “to serve as a brief, self-rated, diagnostic screen” [21756]

Spann-Fischer Codependency Scale
“a 16-item self-report inventory” [83818]
Specialty Group Evaluation Surveys (Kleinpeter et al)
“pre- and post-test surveys measuring the client’s knowledge, group objectives achieved, and satisfaction with the group” [83931]

Specific Interpersonal Trust Scale (Johnson-George and Swap)
"The SITS-Female Form is a self-report questionnaire designed to measure an individual’s trust in her partner." [14738]

Specific Stressor Questionnaire (Wilson and Krauss)
USE: Vietnam Era Stress Inventory (Wilson and Krauss)

Spectrum of Suicidal and Assaultive Behavior Scales (Pfeffer et al)

Spectrum of Suicidal Behavior (Pfeffer)

Speech-Sounds Perception Test
[used but not cited in 09457]

Speed and Capacity of Language Processing Test (Baddeley et al)

SPIKE Interview (Angst et al)
"a structured interview which was especially developed for epidemiological studies" [03260]

Spinal Cord Injury Lifestyle Scale
[used but not cited in 93310]

Spinal Cord Injury Spasticity Evaluation Tool
[used but not cited in 93310]

Spiral After-Effect Test (Holland)

Spirit Possession Scale (Ertl et al)
“developed for the study” [34436]

Spiritual Effects Questionnaire (Pritt)

Spiritual Injury Scale (Berg)
"The SIS is a self-assessment instrument that investigates the degree of difficulty a person has with 8 spiritual injuries.” [37581] [cited only as a web document in 37581]
Spiritual Involvement and Beliefs Scale (Hatch et al)
"a 25-item, 7-point Likert scale [measuring] core spirituality, spiritual perspective, personal application/humility, and acceptance/insight” [17760]

Spiritual Orientation Inventory
[used but not cited in 90993]

Spiritual Perspective Scale (Reed)
[called “Escala de Perspectiva Espiritual” in 29434; English name assigned by PILOTS Database staff]
Reed, P G. Developmental resources and depression in the elderly. Nursing Research 35: 368-374 (1986). [cited in 29434]

Spiritual Profile Assessment (McSherry et al)
"a large survey administered through the Chaplain Service of the Department of Veterans Affairs” [21059]
McSharry, E; Tappert, T; King, P; Shuster, B; Anderson, R; Bard, T; Phillips, D. The Spiritual Profile Assessment Manual. West Roxbury, Massachusetts: Veterans Affairs Medical Center, 1986. [cited in 21059]

Spiritual Support Scale (Ai et al)
a 12-item scale used “to assess spiritual support among participants with diverse belief patterns” [27342]

Spiritual Transcendence Index (Seidlitz et al)
"a scale developed to measure a dimension of an individual's spirituality that might be associated with health” [19981]

Spiritual Well-Being Scale (Paloutzian and Ellison)

Spirituality Assessment Scale (Howden)
[used but not cited in 28854]

Spirituality Questionnaire (Jones)
a 25-item instrument developed for this study that assesses "(a) spiritual beliefs, (b) church-related activities and frequency of attendance, (c) prayer, and (d) the use of spiritual being as a source of support and coping” [30885]

Spirituality Scale (Garfield et al)
"2-item scale [that] asked how important spirituality was in respondents’ lives” [32235]

Spontaneous Use of Imagery Scale (Reisberg et al)
"The scale contains 12 items that are rated on a 1-5-point scale.” [33651]
Reisberg, D; Pearson, D G; Kosslyn, S M. Intuitions and introspections about imagery: the role of imagery experience in shaping an investigator's theoretical views. Applied Cognitive Psychology 17: 147-160 (2003). [cited in 33651]

Spot the Word Test
USE: Speed and Capacity of Language Processing Test (Baddeley et al)

Spousal Inventory of Desired Changes and Relationship Barriers (Bagarozzi)
UF: SIDCARB

Spouse Language Use Survey (Jin et al)
a covert and indirect measure of hostile attributional bias created for this study...based on the 12 aggression items in the Spouse-Specific Assertion and Aggression Scale (O'Leary and Curley)” [82343]

Spouse Specific Support Scale (Beach et al)
Beach, S R H; Mendolia, M; Tesser, A. Self-esteem maintenance and relationship closeness. Presented at the 25th annual convention of the Association for the Advancement of Behavior Therapy, New York, 1991. [cited in 09014]

Spouse-Specific Dependency Scale (Rathus and O'Leary)
"The SSDS assesses anxious attachment (8 items) and emotional dependency (8 items) on one’s spouse or partner...” [83321]

Spouse-Specific Fear Measure (O’Leary and Curley)
PILOTS Database Instruments Authority List

SPRINT
USE: Short PTSD Rating Interview (Davidson et al)

SRB Battery (Dureman and Sälde)

SRE
USE: Schedule of Recent Experience (Holmes)

Sri Lankan Index of Psychosocial Status (Fernando)
"The SLIPPS–A is a 26-item measure assessing local indicators of distress." [31870]

SSAGA (Bucholz et al)
USE: Semi-Structured Assessment for the Genetics of Alcoholism (Bucholz et al)

SSIAM
USE: Structured and Scaled Interview to Assess Maladjustment (Gurland et al)

Stable 2007 (Hanson et al)
"a dynamic risk tool for sexual offenders [that] comprises 13 items" [40601]

Staff Behavior in the Milieu (Brown and Wilcox)
"a 12-item self-report Likert scale that describes direct care staff behaviors thought to be indicative of trauma-informed care” [38096]

Stafford Train Disaster Questionnaire (Chung et al)
"a self-constructed questionnaire which aimed to record focusing on residents’ experience of the disaster” [21957]
Chung, M C; Werrett, J; Farmer, S; Easthope, Y; Chung, C. Responses to traumatic stress among community residents exposed to a train collision. Stress Medicine 16: 17-25 (2000). [21957]

Stagar-Blenden-Frey Scale of PTSD and Attachment
"a psychometric instrument designed to measure the relationship between attachment style and PTSD” [92982]

Stages of Change Questionnaire (McConnaughy et al)

Stages of Change Readiness and Treatment Eagerness Scale (Miller and Tonigan)

STAI
USE: State-Trait Anxiety Inventory (Spielberger et al)

Stalking and Harassment Behaviour Scale (Turmanis and Brown)
"A composite list of 42 stalking behaviours was assembled from the literature and six [other] scales...” [33331]
Turmanis, S A; Brown, R I. The Stalking and Harassment Behaviour Scale: measuring the incidence, nature, and severity of stalking and relational harassment and their psychological effects. Psychology and Psychotherapy: Therapy, Research and Practice 79: 183-198. [33331; the Scale appears on pp. 196-198]

Stalking Behavior Checklist (Coleman)
"The SBC is a 25-item inventory assessing a variety of unwanted harassing and pursuit-oriented behaviors.” [23481]

Stalking Behavior Questionnaire (Fremouw et al)

Stalking Inventory (Kamphuis et al)
"a 21-item questionnaire...specifically developed for the present study” [25774]
Stalking Questionnaire (Kamleiter)
[Identified in 30075 only as "Fragebogen nach Kamleiter"; name assigned by PILOTS Database staff]

Stalking Questionnaire (Kuehner et al)
"a 51-item self-report...questionnaire assessing the experience of harassing intrusions...adapted from an instrument developed by Voss and Hoffman." [86192]

Standaard Vraagstelling Roken (GGD Nederland)
"standardized smoking questions of the Dutch Local and National Public Health Monitor" [29092]

Standard Gamble

Standard Progressive Matrices (Raven)
USE: Raven Progressive Matrices (Raven)

Standardized Assault Interview (Foa and Rothbaum)
Foa, E B; Rothbaum, B O. The Standardized Assault Interview. Unpublished instrument, Department of Psychiatry, Medical College of Pennsylvania at Eastern Pennsylvania Psychiatric Institute, Philadelphia, 1985. [cited in 06517]

Standardized Assessment of Personality (Mann et al)

Standardized Battering Interview (Mechanic et al)
"This interview consists of a variety of questions assessing demographic and abusive relationship characteristics" [23481]

Standardized Client Information System
[includes the 201-item parent Questionnaire and the 75-item Family and Household Questionnaire; used but not cited in 24334]

Standardized Interview to Assess Social Maladjustment and Dysfunction (Clare and Cairns)
Clare, A W; Cairns, V E. A standardized interview to assess social maladjustment and dysfunction (Clare and Cairns). In: Williams, P; Clare, A (ed.). Psychosocial Disorders in General Practice. London: Academic Press, 1979. [cited in 06500]
UF: Social Adaptation Index (Clare and Cairns)

Standardized Trauma Interview
"The STI is a modification of the Standardized Assault Interview (Rothbaum et al) designed to be appropriate for use with a full range of traumatic events and not restricted to physical or sexual assault. The STI is a 94-item semistructured interview" [80288]

Standardized Trauma Memory Questionnaire (Dekel and Bonanno)
"Memory for exposure to the 9/11 attacks was assessed...using a set of 12 standardized questions." [38133]

Standing Reach Test
"administered to assess upper body flexibility and mobility" [36800]

Stanford Acute Stress Reaction Questionnaire
"a 30-item questionnaire that elicits responses on a six-point Likert scale...regarding the frequency of experiencing each of the symptoms associated with ASD within the first 4 weeks of getting diagnosed" [21150]
[stamm 293-295]
UF: Stanford Acute Stress Reaction Scale
USE: Stanford Acute Stress Reaction Scale (Classen et al)
Stanford Emotional Self-Efficacy Scale - Cancer

Stanford Health Assessment Questionnaire

Stanford Hypnotic Clinical Scale (Morgan and Hilgard)

Stanford Hypnotic Clinical Scale for Children (Morgan and Hilgard)

Stanford Hypnotic Susceptibility Scale (Weitzenhoffer and Hilgard)

Stanford Life Events Scale
"a brief self-report measure assessing the possible occurrence of 15 events in the respondent's lifetime” [13207] [used without citation in 13207]

Stanford Preschool Internal-External Scale (Mischel et al)

Stanford Psychosocial Oncology Questionnaire
"a brief demographic survey” [38453] [used but not cited in 38453]

Stanford Revised Sleep Inventory
"The Stanford-RSI was derived from the larger 146-item Stanford Center for Narcolepsy Sleep Inventory, and it is a validated 51-item, self-administered questionnaire focused solely on cataplexy.” [32242] Anic-Labat, S; Guilleminault, C; Kraemer, H C; et al. Validation of a cataplexy questionnaire in 983 sleep-disorders patients. Sleep 22: 77-87 (1999). [cited in 32242]

Stanford Sleepiness Scale

Stanford-Binet Intelligence Scale (Thorndike et al)
Thorndike, R L; Hagen, E P; Sattler, J A. Stanford-Binet Intelligence Scale. 4th ed. Chicago: Riverside, 1986. [harvard]

Star Social Network Scale (Harding et al)
Based on an instrument originally designed for the Yale University longitudinal study of schizophrenia; “measures density of (ego) social networks, types of relationships, and frequency of contact, in addition to a variety of other relationships reflective of the quality of interpersonal relationships” [22451] Macias, C; Young, R; Barreira, P. Loss of trust: correlates of the comorbidity of PTSD and severe mental illness. Journal of Personal and Interpersonal Loss S: 103-123 92000). [22451]

Starry Night Test (Rizzo and Robin)

STARTTS Intervention Survey (Morris and Silove)

STAS
USE: State-Trait Anger Scale (Spielberger)
STaT (Paranjape and Lienschutz)
"slapped, threatened and throw...a 3-question instrument developed by validation against a semi-structured interview" [39306]

State Affect Scale
"Using 10-point scales, participants rated 22 state affect descriptors after the initial baseline phase and after each dyadic social interaction." [81627]
[used but not named or cited in 81627]

State Chances Inventory Test (Weiss et al)
Weiss, D W; Hirt, R; Tarcic, N; Berzon, Y; Ben-Zur, H; Breznitz, S; Glaser, B; Grover, N; Baras, M; O'Doriso, T M. Studies in psychoneuroimmunology: psychological, immunological, and neuroendocrinological parameters in Israeli civilians during and after a period of Scud missile attacks. *Behavioral Medicine* 22: 5-14 (1996). [08244]

State Dissociation Questionnaire (Murray et al)
"a 7-item scale developed by the authors" [24926]

State Felt Security Scale (Murray et al)
"composed of three subscales that assess felt rejection, felt acceptance, and anxiety about acceptance in a current romantic relationship" [86222]

State Hope Scale (Snyder)
"The SHS is a 6-item scale designed to measure hope...as a temporal state that is related to the ongoing events in people’s lives." [37325]

State Pressure Inventory (Weiss et al)
Weiss, D W; Hirt, R; Tarcic, N; Berzon, Y; Ben-Zur, H; Breznitz, S; Glaser, B; Grover, N; Baras, M; O'Doriso, T M. Studies in psychoneuroimmunology: psychological, immunological, and neuroendocrinological parameters in Israeli civilians during and after a period of Scud missile attacks. *Behavioral Medicine* 22: 5-14 (1996). [08244]

State Scale of Dissociation (Kruger and Mace)
"a seven scale measure of state dissociation" [19591]

State Shame and Guilt Inventory (Tangney and Dearing)
"a 15-item questionnaire [that] assessed the current level of shame, guilt, and pride experienced by the individual" [34468]

State Shame and Guilt Scale (Marschall et al)
"The SSGS is a 15 item measure assessing current mood states of shame, guilt, and pride." [40525]
Marschall, D; Safner, J; Tangney, J P. *The State Shame and Guilt Scale*. Fairfax, Virginia: George Mason University, 2004. [cited in 40525]

State-Trait Anger Expression Inventory (Spielberger)
USE: State-Trait Anger Scale (Spielberger)

State-Trait Anger Inventory
USE: State-Trait Anger Scale (Spielberger)
State-Trait Anger Scale (Spielberger)
“a 20-item psychometric self-report inventory” [dbat 446]
UF: STAS

UF: How-I-Feel Questionnaire

State-Trait Depression Questionnaire (Spielberger)
“The questionnaire identifies the intensity (state) and the frequency (trait) of the affective component of depression, showing the presence (dysthymia) or the absence (euthymia) of depression.” [38257]

State-Trait Personality Inventory (Spielberger et al)
Spielberger, C D; Barker, L; Russell, S; Silva De Crane, R; Westberry, L; Knight, J; Marks, E. Preliminary Manual for the State-Trait Personality Inventory (STPI). Tampa: University of South Florida, 1979. [cited in 03687].
Hodapp, V; Schwarzer, R; Schwenkmezger, P; Laux, L; Spielberger, C D. State-Trait Personality Inventory (STPI). Unpublished manuscript, Heinrich-Heine Universität, Düsseldorf, Germany. [cited in 03924 as “the German version” of the STPI]

Staten Island Behavior Scale
[used but not cited in 90836]

States of Consciousness During Movement Activity Inventory
[used but not cited in 90983]

States of Mind Training and Coding Manual (Ewert et al)

Static 99 (Hanson and Thornton)
“a measure of risk [that] contains 10 items concerned with 4 broad categories associated with increased likelihood of committing further sexual offenses” [40601]
STAX
USE: State-Trait Anger Scale (Spielberger)

STD Knowledge Index (Sikkema at al)
a 7-item index

Stealing Behavior Questionnaire (Vanderlinden and Vandereycken)
Vanderlinden, J; Vandereycken, W. Trauma, Dissociation, and Impulse Dyscontrol in Eating Disorders. Philadelphia, Brunner/Mazel, 1997. [15041; the Questionnaire appears on pp. 187-192]

STEP-BD...
USE: Systematic Treatment Enhancement for Bipolar Disorders...

Stereotypic Roles for Black Women Scale (Thomas et al)
Stigma and Barriers to Care Scale (Hoge et al)

"The [16-item] scale stem asked respondents to: 'Rate each of the possible concerns that might affect your decision to receive mental health counseling or services if you ever had a problem.'" [32554]

Stigma Apprehension Scale (Moses)

"A 4-item scale was developed to capture concerns about being devalued and rejected if/when others find out about recent hospitalization." [37876]

Stigma Receptivity Scale (Bambauer and Prigerson)

"The SRS is an 18-item self-report questionnaire that was developed...to assess attitudes about severe grief, receptivity to mental health interventions and stigmatization due to bereavement-related distress." [82854]

Stigma Scale (Gibson and Leitenberg)

"Developed to assess feelings of stigma following sexual abuse or sexual assault." [34362]

Stigma Scale for Receiving Psychological Help (Komiya et al)

"The SSRPH is a 5-item scale used to determine an individual's beliefs about how stigmatizing it is to receive psychological treatment." [37298]

Stigmatization Scale (Feigelman et al)

"Consisting of two [11-item] subscales: (a) family and social strain and (b) family and social harm/help" [82907]

Still-Face Paradigm

"The SFP is a videotaped observational procedure used extensively to study infants’ behavioral and physiological responses to brief, moderate levels of induced stress." [32486]

Tronzick, E Z; Als, H; Adamson, L; Wise, S; Brazelton, T B. The infant’s response to entrapment between contradictory messages in face-to-face interaction. *Journal of the American Academy of Child and Adolescent Psychiatry* 17: 1-13 (1978)

Stillwell Conscience Interview (Stillwell et al)

Stockholm Syndrome Scale (Graham et al)

"A 49-item scale designed to measure Stockholm Syndrome" [08087]

Graham, D L R; Rawlings, E I; Ihms, K; Latimer, D; Foliano, J; Thompson, A; Suttman, K; Farrington, M; Hacker, R. A scale for identifying "Stockholm Syndrome" reactions in young dating women: factor structure, reliability, and validity. *Violence and Victims* 10: 3-22 (1995). [08087; the Scale appears on pp. 9-10]

Stony Brook Child Symptom Inventory

Stop-Signal Task (Logan and Cowan)

Storm Impact Questionnaire (Cherry et al)

"We developed a structured storm impact questionnaire with four modules to assess hurricane impact, modeled after a similar instrument used [by Acierno et al] to assess the psychological sequelae of the 2004 Florida hurricanes." [35134]

Cherry, K E; Galea, S; Su, L J; Welch, D A; Jazwinski, S M; Silva, J L; Erwin, M J. Cognitive and psychosocial consequences of Hurricanes Katrina and Rita among middle-aged, older, and oldest-old adults in the Louisiana Healthy Aging Study (LHAS). *Journal of Applied Social Psychology* 40: 2463-2487 (2010). [cited in 35134]

Story Recall Test (Green)

STQ Psychotic Traits Questionnaire (Claridge and Broks)
A two-scale questionnaire, comprising the Borderline Personality Scale and the Schizotypal Personality Scale.
Claridge, G; Broks, P. Schizotypy and hemisphere function, I: theoretical considerations and the measurement of schizotypy. 
UF:  Borderline Personality Scale
Schizotypal Personality Scale

STRAIN
USE: Stress Appraisal Inventory

Strain Questionnaire (Whittington and Wykes)
USE: Maudsley Strain Questionnaire (Whittington and Wykes)

Strange Situation (Ainsworth et al)
Ainsworth, M D S; Blehar, M C; Waters, E; Wall, S. Patterns of Attachment: A Psychological Study of the Strange Situation. 

Strange Stories Test (Happé)
"This cognitive task...requires participants to read 24 short vignettes..." [38333]

Stranger Task (Trickett)
"examined how participants responded to an informal interaction with an unfamiliar male interviewer" [37659]

Strength of Religious Faith Scale
[used but not cited in 92119]

Strengths and Difficulties Questionnaire (Goodman)
"includes 25 items [divided into] scales of hyperactivity, emotional symptoms, conduct problems, peer problems, and prosocial scale" [23100]

Strengths Questionnaire (Williams and McGee)
"This measure of self-concept consists of 22 positive self-descriptors and was developed for the Dunedin Multidisciplinary Health and Development Study to measure New Zealand young people’s perceptions of their own strengths." [23717]

Stress and Coping Inventory (Rahe et al)

Stress and Coping Process Questionnaire (Reicherts and Perrez)

Stress and Felt Stress Inventory (Brown and Campbell)
"This is a 54-item self-report measure specifically devised for the study. 13 of the items are operational policing stressors; and 41 are organisational/management stressors." [40313]

Stress and Health: Issues for Women Questionnaire (Miller)
Miller, B A. Stress and Health: Issues for Women Questionnaire. Buffalo: New York State Research Institute on Alcohol and Addictions, 1990.  [cited in 16956]

Stress and Social Support Scale (Sheehan)
"a single-item instrument" [22079]

Stress Appraisal Inventory
[used but not cited in 23736]
UF:  STRAIN

Stress Appraisal Measure (Peacock and Wong)
**Stress Appraisal Scale (Carpenter and Suhr)**

"The SAS contains 36 items related to feelings about entering a counseling relationship with the client in the audiotaped interview." [21387]

**Stress Appraisal Checklist (Mackay et al)**

**Stress Arousal Checklist (Mackay et al)**

**Stress Arousal Scale (Everly et al)**

"The original SAS contains 20 items designed to tap the respondent's cognitive-affective domain, i.e. the precipitators of the psychophysiological stress response, thereby allowing the indirect assessment of one's level of stress arousal." [82305]

**Stress Audit (Miller et al)**

**Stress Check List for Self (Katsura)**

**Stress Check List for Self (Katsura)**

**Stress Check List for Self (Katsura)**

**Stress Checklist (Conner)**

"designed from the [DSM-IV] criteria for PTSD" [90046]

**Stress Coping Inventory (Ryding et al)**

"developed to assess the individual's appraisal of her adaptive resources to deal with [41] stressful situations" [26454]

**Stress Event Survey (Pearce et al)**

**Stress Event Test (Ohlde et al)**

**Stress Events Perceptions Scale**

"The scale consisted of 24 items derived from children's life event scales and fear schedules." [25413]

**Stress Events Scale (Ajdukovic)**

**Stress Impact Questionnaire**

"a structured interview schedule designed from similar trauma questionnaires used elsewhere in the world" Somasundaram, D J; Sivayokan, S. War trauma in a civilian population. British Journal of Psychiatry 165: 524-527 (1994). [05236]

**Stress in Children Questionnaire (Osika et al)**

**Stress in General Scale (Smith et al)**

**Stress in Life Coping Scale**

USE: Life Strains and Stress Scale (Pearlin and Schoolder)

**Stress in Military Service Questionnaire (Dobreva-Martinova)**

"The [27-item] SMSQ measured the participants' concerns with five types of military-related occupational stressors during the previous month." [35361]

Stress Index (Attar et al)
"a 16-item self-report scale" derived from Tolan et al’s stress scale [07785]

Stress Index for Parents of Adolescents (Sheras et al)
"The SIPA is a 120-item parallel version of the PSI [Parenting Stress Index] for use with parents of adolescents." [82906]

Stress Inducing Speech Task (Steiner et al)
"The SIST is a standardized [2-part] task that permits the examination of in vivo behavior and emotional content." [28301]

Stress Management Scale (Freedland et al)
"developed for this study...a 7-item rating scale that closely resembles the Cognitive therapy Scale, except it evaluates the components of the supportive stress-management intervention" [32155]
Freedland, K E; Skala, J A; Carney, R M; Rubin, E H; Lustman, P J; Dávila-Román, V G; Steinmeyer, B C; Hogue, C W. Treatment of depression after coronary artery bypass surgery: a randomized controlled trial. *Archives of General Psychiatry* 66: 387-396 (2009). [32155]

Stress on Operations Scale (Canadian Forces)
"developed by Director General Military Personnel Research and Analysis using items from the U.S. Army Mental Health Advisory Team survey (MHAT)" [34263]

Stress Profile (Setterlind and Larsson)

Stress Profile (Wheatley)

Stress Questionnaire (Boudoukha et al)
"Using scales from prison guards’ stress studies, correctional officers were asked to respond to 12 items regarding employment-related stress." [40584]

Stress Reaction Checklist (Sadeh et al)
"the SRCL was developed specially for this study and includes 15 items...on stress reactions and PTSD manifestations in young children" [30841]

Stress Reaction During Coverage Scale (Hatanaka et al)
"14 items assessing digestive problems, headaches, sleeplessness, and dissociative symptoms, among others" [83706]

Stress Reaction Questionnaire (Schwarzwald et al)
"Twenty of the [26] items were based on the Child Post-Traumatic Stress Reaction Index interview of Frederick and Pynoos, [i.e., PTSD Reaction Index (Frederick)]"
Schwarzwald, J; Weisenberg, M; Wayersman, M; Solomon, Z; Klingman, A. Stress reaction of school-age children to the bombardment by SCUD missiles. *Journal of Abnormal Psychology* 102: 404-410. [03925; the Questionnaire is printed on p. 410]

Stress Reactions Checklist (Vocational Instructional Material Laboratory)
Vocational Instructional Material Laboratory. *Managing Stress Before It Manages You*. Columbus: Ohio State University, 1983. [cited in 04924]

Stress Reactions Checklist for Disorders of Extreme Stress (McHugo)
"a 17-item self-report...developed in the Women, Co-Occurring Disorders, and Violence study” [30660]
Ford, J D; Hawke, J; Alessi, S; Ledgerwood, D; Petry, N. Psychological trauma and PTSD symptoms as predictors of substance dependence treatment outcomes. *Behaviour Research and Therapy* 45: 2417-2431 (2007). [30660; the Checklist appears on p. 2428]

Stress Reactions Questionnaire for Disorders of Extreme Stress (Ford)
"a 15-item dichotomous (yes/no) instrument” [82543]
Ford, J. Stress Reactions Questionnaire for Disorders of Extreme Stress, 15-item screen. Unpublished measure, Department of Psychiatry, University of Connecticut School of Medicine, 2000. [cited in 82543]
Stress Reactions Scale (Vogt et al)
"This 14-item measure was developed by the original investigation team during focus groups with prior Marine trainees and leadership. Items are intended to assess stress reactions associated with recruit training." [31301]

Stress Response Inventory (Koh et al)

Stress Response Rating Scale (Weiss et al)

Stress Response Scale
[used but not cited in 90612]

Stress Scale (Boulangier and Smith)
[used but not cited in 90674]

Stress Scale (Legacies of Vietnam)

Stress Test for Children (Elkind)

Stress Tolerance Test (Harrower)

Stress-Related Growth Scale (Park et al)
a 50-item scale designed "to quantify self-reported positive outcomes from a stressful event" [21429]

Stress/Arousal Adjective Checklist (King et al)
"To quantify self-reported positive outcomes from a stressful event" [21429]

Stress/Arousal Questionnaire (Kjellberg and Iwanowski)
USE: Stress/energiformuläret (Kjellberg and Iwanowski)
Stress/energiformuläret (Kjellberg and Iwanowski)
"The SE instrument is a self-estimation instrument concerning individuals’ energy and stress experiences." [19262]
UF: SE Instrument (Kjellberg and Iwanowski)
Stress/Arousal Questionnaire (Kjellberg and Iwanowski)

Stress/Mood Scale (Wolmer et al)
"Includes 8 items concerning fears, stress, and mood." [36371]
Wolmer, L; Hamiel, D; Barchas, J D; Slone, M; Laor, N. Teacher-based resilience-focused intervention in schools with traumatized children following the second Lebanon War. In press, 2011. [cited in 36371]

Stressbezogene Arbeitsanalyse (Semmer and Dunckel)
"self-report scales including job content variables, communication at work and work-related stressors." [27952]
UF: Instrument for Stress-Oriented Job Analysis (Semmer and Dunckel)
Stress-Oriented Job Analysis (Semmer and Dunckel)

Stressful and Traumatic Events Questionnaire (Arensman et al)
"The STEQ consists of 96 items addressing stressful and traumatic life events in three different periods before a suicide attempt: childhood and early adolescence (0-15 years); late adolescence and adulthood (≥ 15 years); 12 months prior to the interview. In addition, the STEQ inquires about life events with regard to different types of relationships: parents, siblings, partners, children, and strangers." [16611]

Stressful Caregiving Adult Reactions to Experiences of Dying Scale (Prigerson et al)
"examined caregivers’ exposure to traumatic experiences." [34973]

Stressful Event Scale (Sattler et al)
"adapted from Freedy et al. (1994)" [80414]

Stressful Events Checklist (Flack)
"A checklist of 13 stressful events was developed by the first author based on the types of events typically included in checklists for the evaluation of potentially traumatic events in civilians, and on specific events that were being screened for a subsequent study." [19501]

Stressful Events Checklist (Punamäki)
"17 items...developed for the purpose of assessing the prevalence of stressful experiences among Middle Eastern children" [09544]
[cited ambiguously in 09544]

Stressful Events Questionnaire (Smith et al)
"The SEQ is a 39-item instrument assessing recent and lifetime Total Life Stress (TLS) via exposure to stressful life events. The SEQ was developed for the purposes of the current study..." [36737]

Stressful Events Screening Scale (Green et al)
"asked about the occurrence of eight types of events" [07564]
Green, B L; Kruptnick, J; Corcoran, C; et al. Stressful Events Screening Scale. Unpublished instrument, 1994. [cited in 07564]

Stressful Experience History (Clum)
"assessed frequency of 19 specific traumatic events that occurred in one’s lifetime" [19664]
[cited only as “unpublished raw data, 1999” in 19664]

Stressful Illness Experiences (Green et al)
"developed by the investigators to assess a full range of experiences across the course of cancer diagnosis and treatment that might be stressful and that might be targets for intrusive thinking" [09692]
Stressful Life Event Check-List (Shilony)
"a measure developed for this study"

Stressful Life Events (Bean et al)
"used to assess the number and type of stressful event(s) experienced" [19835]

Stressful Life Events (Verplanken et al)
"The SLE is an 18-item self-report questionnaire designed to measure exposure to the following stressful life events..." [28617]
[used but not usefully cited in 28617]

Stressful Life Events Checklist (Weathers and Pitman)
"designed to quantify the number of lifetime (noncombat) experiences that potentially meet the DSM-IV A.1 (stressor) and A.2 (response) criteria" [20484]

Stressful Life Events Interview (Ehring et al)
"developed for this project on the basis of similar scales" [28842]

Stressful Life Events Questionnaire (Kendler et al)
[not named in 33775; name assigned by PILOTS Database staff]

Stressful Life Events Questionnaire (Polusny)
"The SLEQ is a thorough self-report questionnaire that combines scales from several widely used research instruments": Wyatt Sexual History Questionnaire, Sexual Experiences Survey, Parent-Child Conflict Tactics Scale, and Conflict Tactics Scale. [24279]

Stressful Life Events Rating Scale (Zheng and Lin)
"This instrument comprises nine subscales: academic events, intimate partner events, health events, family events, work events, financial events, social relationship events, environmental events, and political events." [33303]

Stressful Life Events Report (Newcomb et al)
"a list of 39 positive and negative events that the student may have experienced in the past year" [30378]

Stressful Life Events Scale (Thornberry et al)

Stressful Life Events Scale for Youth (Sandler and Block)
USE: Life Events Scale for Children (Sandler and Block)

Stressful Life Events Schedule (Williamson et al)
"an interview instrument to assess stressors in children and adolescents" [26058]
Williamson, D E; Birmaher, B; Ryan, N D; Shiffrin, T P; Lusky, J A; Protopapa, J; Dahl, R E; Brent, D A. The Stressful Life Events Schedule for children and adolescents: development and validation. Psychiatry Research 119: 225-241 (2003). [26058]

Stressful Life Events Screening Questionnaire (Goodman et al)
Goodman, L A; Corcoran, C; Turner, K; Yuan, N; Green, B L. Assessing traumatic event exposure: general issues and preliminary findings for the Stressful Life Events Screening Questionnaire. Journal of Traumatic Stress 11: 521-542 (1998). [14123; the Questionnaire appears on pp. 538-541]

Stressful Life Experiences Screening Form (Stamm)

Stressful Responses Questionnaire – Frequency (Clum)
"22 items measuring frequency of symptoms associated with PTSD in the past month" [19664]
[cited only as "unpublished raw data, 1999" in 19664]

Stressful Scene Construction Questionnaire
Stressful Urban Life Events Scale (Attar et al)
"This scale was designed to assess children's experience of stressful events over a 1-year period." [29109]

Stressor Questionnaire (Sawamura et al)
"This original questionnaire consists of 15 items thought to be stressors during deployment." [31012]

Stressor Survey
[used but not cited in 91260]

Stressors of Migration Scale (Larose)
"27 questions [appraising] the subjective impact of...stressors typically encountered by immigrants" [80646]

Stressverarbeitungsfragebogen (Janke and Erdmann)
UF: Stress-Coping Questionnaire (Janke and Erdmann)

Strong Tie Support Scale (Lin et al)
"a three-item scale assessing the availability/presence of close companions, friendships, and confidants over the last six months’ [21843]

Strong-Campbell Interest Inventory (Campbell)
"a revision and combination of the Strong Vocational Interest Blank for Men and the Strong Vocational Interest Blank for Women" [cep 1087]
UF: SCII

Stroop Color and Word Test (Golden)

Stroop Neuropsychological Screening Test (Trennery et al)
Trennery, M R; Crosson, B; Deboe, J; Leber, W R. *Stroop Neuropsychological Screening Test*. Odessa, Florida: Psychological Assessment Resources, 1989. [cited in 25289]

STRS (Bracha et al)
"a one-page, two-minute checklist [measuring] peritraumatic activation of the autonomic nervous system" [26707]

STRS and Resilience Checklist (Bracha et al)
"This 60-second post-disaster interview was designed to rapidly identify predictors of PTSD in large numbers of people." [28587]

Structural Analysis of Social Behavior (Benjamin)

Structural Assessment of Stressful Experiences (Stamm and Bieber)
[stamm 333-339]

Structural Assessment of Traumatic Stress
[used but not cited in 90593]

Structural Family Interaction Scale (Perosa et al)

Structure of Violence and Peace Scale (Ballif-Spanvill and Clayton)
"This scale is based on a three-dimensional model of violence and peace that includes the affect, value, and intentions displayed toward self and others." [82162]
Structured Abuse Interview (Leserman et al)

Structured and Scaled Interview to Assess Maladjustment (Gurland et al)
Gurland, B J; Yorkston, N J; Stone, A R; Frank, J D. Structured and Scaled Interview to Assess Maladjustment. New York: Springer, 1974. [cited in 02653]
UF: SSIAM

Structured Assessment Form (Reeler and Todd)

Structured Assessment of Independent Living Skills

Structured Background Interview (Deblinger et al)

Structured Child Abuse Interview (McKeever)
"A structured child abuse interview was created for the purposes of this study" [29928; name assigned by PILOTS Database staff]

Structured Child Interview (Coakley et al)
"developed for this study, based on previous research...it assesses the child's subjective perceptions of the injury event and baseline psychological functioning" [84319]

Structured Childhood Trauma Inventory (Van der Bossche et al)
USE: Vragenlijst naar Belastende Gebeurtenissen (Van der Bossche et al)

Structured Clinical Interview (Azarian and Skriptchenko-Gregorian)

Structured Clinical Interview (Brown et al)
"The SCI queries demographic information, adolescent psychosocial functioning, and psychiatric history. The SCI also includes detailed family assessment of alcohol and drug involvement..." [16622]

Structured Clinical Interview (Coles et al)
"The semistructured interview asked detailed questions about the child's caregiving environment..." [14856]
Coles, C D; Platzman, K A; Brown, J. The Structured Clinical Interview. Paper presented at the annual meeting of the National Center for Clinical Infant Programs, Atlanta, December 1995. [cited in 14856]

Structured Clinical Interview (Gold et al)
"designed as part of a larger protocol for ongoing research" [07836]

Structured Clinical Interview for Alcohol and Psychoactive Substance Use Disorders
[used but not cited in 91711]

Structured Clinical Interview for DES NOS (Van der Kolk et al)
USE: Structured Interview for Disorders of Extreme Stress (Van der Kolk et al)

Structured Clinical Interview for Domestic Violence (Douglas)
"adapted from the Conflict Tactics Scale" [13295]
Structured Clinical Interview for DSM-III (Spitzer and Williams)
Spitzer, R L; Williams, J B. *Structured Clinical Interview for DSM-III (SCID).* New York: New York State Psychiatric Institute, Biometric Research Department, 1985. [wolfe]

Structured Clinical Interview for DSM-III-R (Spitzer et al)
Spitzer, R L; Williams, J B W; Gibbon, M. *Structured Clinical Interview for DSM-III-R (SCID).* New York: New York State Psychiatric Institute, Biometric Research Department, 1987. [apa; cited in 02839]

Manion, I G; McIntyre, J; Firestone, P; Ligezinska, M; Ensom, R; Wells, G. Secondary traumatization in parents following the disclosure of extrafamilial child sexual abuse: initial effects. Child Abuse and Neglect 20: 1095-1109 (1996). [08217]

Structured Inventory of Malingering Symptomatology
[used but not cited in 92086]

Structured Parent Interview (Coakley et al)
"consists of questions formulated for this study, based on previous research, [it] assesses subjective perceptions of the injury event, involvement in the event, baseline child and parent functioning, and previous utilization of mental health services" [84319]

Structured Pediatric Psychosocial Interview (Webb and Van Devere)

Structured Pocket Toolkit Questionnaire
Essar, N; Palgi, Y; Saar, R; Ben-Ezra, M. Pre-traumatic vaccination intervention: can dissociative symptoms be reduced? Prehospital and Disaster Medicine 25: 278-284 (2010). [35830; two versions of the Questionnaire appears on p. 284]

Structured Questionnaire for Ecstasy Users (Klein et al)
[instrument not named in article; name assigned by PILOTS Database staff]
"designed specifically for this study...based on existing validated instruments (GAIN; Risk Behavior Assessment; ASI)" [36523]

Structured Self-Report Questionnaire (Sledge et al)
"covering changes in 53 traits, attitudes, and behaviors" [22070]

Structured Trauma Interview (Boon and Draijer)

Strukturiertes Interview für die Diagnose Einer Demenz
[used but not cited in 31687]

Student Adaptation to College Questionnaire (Baker and Siryk)
"The SACQ is a 67-item self-report measure designed to assess student adjustment to college." [83275]

Student Alienation and Trauma Survey
[used but not cited in 91868]

Student Assessment of Teachers Scale (Klem and Connell)

Student Critical Symptoms Questionnaire (Ewart)

Student Development Task and Lifestyle Inventory (Winston et al)

Student Self-concept Scale (Gresham et al)

Student Survey of Risk and Protective Factors (Arthur et al)

Student Worry Scale (Davye)
"a 10-item scale which asks subject how much they worry about 10 content areas relevant to students" [07724]
Student-Teacher Relationship Scale (Pianta and Steinberg)

"The STRS is a 30-item instrument assessing the quality of the relationship between a child and teacher, as reported from the teacher’s perspective." [21293]

Student’s Autobiographical Memory Interview (Neufeind et al)

"In order to assess participants’ ability to recall personal semantic memories, items from the Autobiographical Memory Interview (Kopelman et al) were combined with items from the Children’s Autobiographical Memory Interview [sic] (Bekerian et al) to create an interview that...elicited memories from lifetime periods that are applicable to undergraduate university students.” [32178]

Student’s Life Satisfaction Scale (Huebner)

Student’s Concerns Inventory (Klingman)

"This instrument was specifically constructed for the purpose of the present study.” [06466]

Students Assessment of Daily Experience Questionnaire (Evans et al)

"a 27-item check-list...to determine how frequently participants experience a number of desirable and undesirable events” [17257]

Study Scheme for Signs of Autonomic Impairment

[attributed to Russian Center for Autonomic Pathology in 34496]

Stuffed Animal Attachment Questionnaire (Cromer and Freyd)

"The SAQ is an empirically-developed 20-item questionnaire that asks about attachment to stuffed animals.” [39379]

Cromer, L D; Freyd, J J. Stuffed animals, pets, and dissociation. Poster presented at the American Association for the Advancement of Science annual conference, Seattle, February 2004. [cited in 39379]

Subarachnoid Haemorrhage Stress Questionnaire (Baisch et al)

"We developed a study-specific questionnaire, which asked patients to rate how stressful and/or frightening they had found 11 different aspects of their SAH experience.” [35102]

Baisch, S B; Schenk, T; Noble, A J. What is the cause of post-traumatic stress disorder following subarachnoid haemorrhage?: post-ictal events are key. Acta Neurochirurgica (published online 21 October 2010; DOI: 10.1007/s00701-010-0843-y). [35102]

Subjective Anxiety Scale (Wolpe)

UF: Subjective Units of Disturbance Scale (Wolpe)

Subjective Appraisal of Myocardial Infarction Questionnaire (Ginzburg)

"The scale consists of 6 items tapping the perceived severity of the MI.” [28614; scale is not named in text; name supplied by PILOTS Database staff]

Ginzburg, K. Comorbidity of PTSD and depression following myocardial infarction. Journal of Affective Disorders, published online 23 May 2006. [28614]

Subjective Birthing Experience Questionnaire (Lev-Wiesel and Daphna-Tekoah)

"We developed the [10-item] SBE for the current study to assess subjective pain and severity of distress during childbirth.” [84051]

Lev-Wiesel, R; Daphna-Tekoah, S. The role of peripartum dissociation as a predictor of posttraumatic stress symptoms following childbirth in Israeli Jewish women. Journal of Trauma and Dissociation 11: 266-283 (2010). [84051]

Subjective Cognition Impairment Scale (Binder et al)

"a subscale derived for this study from SCL-90-R items...that assess subjective experience of cognitive impairment” [23179]

Binder, L M; Storzbach, D; Anger, W K; Campbell, K; Rohlman, D; et al. Subjective cognitive complaints, affective distress, and objective cognitive performance in Persian Gulf War veterans. Archives of Clinical Neurology 14: 531-536 179]

Subjective Experience of the Writing Task

"Participants completed 3 items that assessed their reactions to the writing task.” [37672]

Subjective Experience of the Writing Task (Lyubomirsky and Lepper)

"4 questions...addressing how happy the person perceives him- or herself to be in comparison to other people” [37364]

Subjective Health Complaints Inventory (Eriksen et al)
"This system consists of 29 questions concerning severity and duration of subjective somatic and psychological complaints..." [40323]

Subjective Life Adaptation Questionnaire (Grossman et al)
"developed for this project" [16256]

Subjective Probability Questionnaire (Lichtenstein et al)

Subjective Sleep Grading Scale
USE: Dutch Selective Sleep Grading Scale (De Graaf)

Subjective Stress Scale
USE: Dutch Selective Sleep Grading Scale (De Graaf)

Subjective Stress Experience Scale (Vaisman-Tzachor)
"a self-report likert-type paper-and-pencil 34-item questionnaire administered individually" [20397]

Subjective Threat from Armed Conflict Events Scale (Harel-Fisch et al)
"This is a scale constructed from respondent's answers on three distinct dimensions of exposure to events related to the armed conflict: (1) frequency, (2) intensity, and (3) the perceived level of subjective threat (fear) experienced due to this exposure." [34798]

Subjective Units of Disturbance Scale (Jaycox et al)

Subjective Units of Distress Scale (Barlow et al)

Subjective Well-Being Inventory (Sell)
Substance Abuse and Incest Survey (Glover et al)

Substance Abuse Outcomes Module (Smith et al)

Substance Abuse Problem Scales (Westermeyer)
"devised by the author" [21583]
[used but not cited in 21583]

Substance Abuse Subtle Screen Inventory (Miller)
Miller, G A. A Substance Abuse Subtle Screen Inventory (SASSI) manual. [used but not cited in 21032]

Substance Abuse Test for Resistant Students or Employees (Ewart)

Substance Dependence Scale (Gossop et al)

Substance Frequency Index
USE: Global Appraisal of Individual Needs (Dennis)

Substance Problem Index
USE: Global Appraisal of Individual Needs (Dennis)

Substance Use Disorders Diagnostic Schedule (Harrison and Hoffman)

Substance Use Inventory (Cohen et al)
"The SUI...consists of a series of self-report questions about quantity and frequency of substance use in the past 7 days adapted from the Time Line Follow-Back measure and included alcohol, cocaine, heroin, marijuana, sedatives and stimulants" [35383]
[unpublished instrument used but not cited in 35383]

Substance Use Inventory (Sobell et al)
"consists of self-report questions" [26661]

Substance Use Questionnaire (Brunet)
"The SUBS is a self-report questionnaire that measures drug and alcohol use as a way of coping with anxiety symptoms." [83724]
Brunet, A. Substance Use Questionnaire (SUBS). Unpublished instrument, Douglas Hospital Research Center, Montréal, 2000. [cited in 83724]

Substance Use Questionnaire (Villagonzalo et al)
"formulated for this study" [35537]
Villagonzalo, K; Dodd, S; Ng, F; Mihaly, S; Langbein, A; Berk, M. The relationship between substance use and posttraumatic stress disorder in a methadone maintenance treatment program. Comprehensive Psychiatry, published online 2010 (DOI: 10.1016/j.comppsych.2010.10.001)

Subtle and Overt Psychological Abuse of Women and Men Scale (Marshall)
"a 35-item scale that assesses psychological abuse" [30575]

Subtle Trauma Symptom Screening Scale (Hohman et al)
"a brief [6-item] screen for trauma symptoms in women with substance use disorders" [83770]

Successful Families Instrument (Baveres and Hampson)

Suffocation Fear Scale (Rachman and Taylor)
"a 16-item scale that assesses fears related to situations in which one’s air supply is threatened" [29558]

Suicidal Behavior Index (Rosenheck and Fontana)
Suicidal Behaviors Questionnaire – Revised (Osman et al)
'The SBQ-R is a 4-item measure which assesses the level of suicidal behavior experienced by the participants.' [38846]

Suicidal Behaviors Questionnaire (Linehan and Addis)

Suicidal Circumstances Schedule (Brent et al)

Suicidal Cognitions Interview (Holmes et al)
"A structured interview was developed based on previous clinical mental imagery studies." [30295]
Holmes, E A; Crane, C; Fennell, M J V; Williams, J M G. Imagery about suicide in depression -- "flash-forwards"? *Journal of Behavior Therapy and Experimental Psychiatry* 38: 423-434 (2007). [30295]

Suicidal Ideation and Behaviors Protocol (Adams)
used to measure of lifetime suicidal ideation [32593]

Suicidal Ideation Measure (Yoder et al)

Suicidal Ideation Scale (Rudd)
"The [10-item] SIS provides information about the presence or absence of suicidal thinking, the intensity of those thoughts, and the presence or absence of prior suicide attempts." [37655]

Suicidal Ideations and Behaviour Questionnaire (Marusic et al)
"based on Beck et al’s classification model of suicidal behaviour” [32089]

Suicidal Intent Scale (Beck et al)

Suicide Assessment Scale (Stanley et al)
"a 20-item semistructured interview” [30430]

Suicide Attempt Self-Injury Interview (Linehan et al)

Suicide Behaviors Questionnaire (Linehan and Nielsen)

Suicide Cognition Scale (Rudd et al)

Suicide Event Report (U.S. Department of Defense)
"The DoDSER is an electronic surveillance database used to standardize suicide surveillance across the services... The DoDSER is filled out by a behavioral health professional following a confirmed suicide death or attempted suicide resulting in hospitalization.” [87045]

Suicide Ideation Questionnaire (Reynolds)
Reynolds, W M. Suicide Ideation Questionnaire. Unpublished manuscript, University of Wisconsin, Madison, 1985. [cited in 03543]

Suicide Lethality Checklist for Youth
Steele, W. *A Handbook of Interventions Following Suicide or Trauma in Schools*. Grosse Pointe Woods, Michigan: National Institute for Trauma and Loss in Children, 2001. [17769; the Checklist appears on p. 27]
Suicide Lethality Scale (Beck et al)

Suicide Probability Scale (Cull and Gill)

Suicide Risk Assessment (Arnoldi et al)
USE: Risico Taxatielijst (Arnoldi et al)

Suicide Risk Scale (Josepho and Plutchik)
"26 items validated in several populations as discriminators differentiating patients who have made suicide attempts from other patients" [20861]

Suinn-Lew Self-Identity Acculturation Scale

Supervision Effectiveness Questionnaire (Itzhaky and Lazar)
"a self-report questionnaire comprising 6 items that relate to attainment of supervisory goals" [40700]

Supervision Risk Classification Instrument (Florida Department of Juvenile Justice)
"The SRCI measures 7 criminogenic risk factors that have been shown empirically to indicate whether a juvenile is at low, moderate, high, or very high risk of reoffending and therefore a threat to public safety." [82606]

Supervisor Adherence Measure for Multisystemic Therapy (Henggeler et al)
"measures three constructs of supervision using a 43-item, Likert-type format" [33200]

Supervisory Alliance Working Inventory (Efstation et al)

Supplemental Perceived Control Items (Frazier)
"assessed women’s perceptions of control in the last 30 days over the recovery process from their sexual assault experience” [32114]

Support and Control During Birth Questionnaire (Ford et al)
"The SCBQ was used to measure internal control which refers to control over reactions to pain, emotions and behaviour (10 items), external control which refers to control over procedures, decisions and information (11 items), and support during birth which refers to different aspects of support from healthcare professionals (12 items).” [32274]

Ford, E; Ayers, S; Wright, D. Development of a questionnaire measure of support and control during labor and birth. Manuscript submitted for publication to *Journal of Health Psychology*, 2009. [cited in 32274]

Support Appraisal for Work Stressors Inventory (Lawrence et al)

Support for Political Violence Scale (Pedahzur et al)
[scale used but not named in 30389; name assigned by PILOTS Database staff]

Support Functions Questionnaire (Pines et al)

Support Persons Scale (Milgram and Toubiana)

Support Team Assessment Schedule (Higginson)
"This measure contains items relating to physical symptoms, psychological functioning of patient and carer, and communication aspects." [20087]

Supported Employment Fidelity Scale (Bond et al)

Supportive Care Needs Survey (Bonevski et al)
"a psychometrically validated [71-item] instrument assessing the unmet needs of cancer patients" [18699]

Surgical Experience Scale (Osterman et al)
"a self-report measure developed for this study" [07344]

Survey of Children's Stress Symptoms

Survey of the Attitudes Toward Genetic Testing (Morren et al)
"This is a 13-item questionnaire assessing attitudes related to major issues raised in response to genetic testing..." [39595]

Survey of Child Exposure to Community Violence (Aisenberg)
"This 60-item measure asks parents to indicate...their child's experiences of different acts of community violence...as well as the frequency of such exposure." [25253]

Survey of Childhood Sexual Experiences (Finkelhor)
USE: Sexual Life Events Inventory (Finkelhor)

Survey of Children's Exposure to Community Violence (Richters and Saltzman)

Survey of Children's Social Support (Dubow and Ullman)

Survey of Children's Stress Symptoms—Parent Report (Richters)
USE: Children's Stress Symptoms-Parent Report (Richters)
Survey of Coping Profile Endorsement (Matheson and Anisman)

"The SCOPE comprised 43 items that assess 12 strategies that differentiate between various stress-related disturbances, such as anxiety, depression, and PTSD symptoms." [32359]

Survey of Driving (Deffenbacher et al)

used to assess "history of accident-related outcomes and risky driving behavior" [87530]

Survey of Emergency Medicine Residents (Mills and Mills)

instrument is not named in text; name assigned by PILOTS Database staff

"The survey inquires about the death or near death of a patient and about feelings of fear, helplessness or distress during or after the event. The remainder of the survey contains questions associated with PTSD, according to the DSM-IV diagnostic criteria." [27264]

Survey of Exposure to Community Violence—Parent Report Version (Richters and Saltzman)

USE: Survey of Children’s Exposure to Community Violence (Richters and Saltzman)

Survey of Exposure to Hurricanes and Their Aftermath (Weems et al)

"We asked participants a set of 23 questions to assess level of exposure to hurricane-related traumatic events." [29925]

Weems, C F; Watts, S E; Marsee, M A; Taylor, L K; Costa, N M; Cannon, M F; Carrión, V G; Pina, A A. The psychosocial impact of Hurricane Katrina: contextual differences in psychological symptoms, social support, and discrimination. Behaviour Research and Therapy 45: 2295-2306 (2007). [29925]

Survey of Exposure to Traumatic Events (Eriksson et al)

"listed 36 possible traumatic events in a relief or development setting...adapted from surveys of community violence and war trauma exposure" [15870]

Survey of Functional Gastrointestinal Disorders (Drossman et al)

Survey of Health Related Behaviors Among Active Duty Military Personnel (U.S. Department of Defense)

"a worldwide survey conducted every 2-4 years by RTI International for the U.S. Department of Defense ... designed to describe trends in health risks and protective behaviors relevant to active duty military" [85899]

Survey of Health Related Behaviors in the Reserve Component (U.S. Department of Defense)

Survey of Healthcare Experiences of Patients (USDVA)

"The SHEP is administered by the VHA Office of Quality and Performance and is used to support VHA quality improvement...The SHEP asks patients questions about their most recent VHA clinic visit and their overall care at VHA in the last 2 months." [85493]

[used but not usefully cited at 85493]

Survey of Immunological and General Health (Kang et al)

Survey of Inmates in Local Jails

Survey of Inmates in Jails

Survey of Pain Attitudes (Jensen and Karoly)

"The SOPA is a 35-item self-report questionnaire that assesses patients' beliefs about their pain." [37791]

Survey of Perceived Organizational Support

[used but not cited in 93321]

Survey of Personal Beliefs (Kassinove)

"assesses the endorsement of the five core irrational ideas" [04211]

Survey of Recent Life Experiences (Kohn and McDonald)

Survey of Sexual Abuse (Tsai et al)

Survey of Violence and Threats of Violence Against Women and Men in the United States

"Conducted in 1995 to 1996, the survey involved telephone interviews with a national probability sample of approximately 8,000 English-speaking women and men aged 18 and older residing in households throughout the United States." [28000]

Survey of Violent Victimization (McGee)

"developed to assess the extent of violent victimization among students at predominately Black schools" [22726]

Survey of Work Styles (Jackson and Mavrogiannis)

Survey Questionnaire on Personality Change in Adults After Catastrophic Experience (Beltran and Silove)

Beltran, R O; Silove, D M. Expert opinions about the ICD-10 category of enduring personality change after catastrophic experience. Comprehensive Psychiatry 40: 396-403 (1999). [21165; the Questionnaire is printed on pp. 401-402]

Survivor Information Form (Önder et al)

"This form is designed to elicit information on demographic characteristics, trauma experience, previous trauma and psychiatric history, family history of psychiatric illness, and perceived distress during the earthquake." [35237]

Survivor Information Questionnaire (Wang et al)

"This is a self-administered questionnaire, designed to elicit information on sociodemographic characteristics, trauma experience, psychiatric history, family history of psychiatric illness, and the disaster losses." [34477]

Wang, B; Ni, C; Chan, J; Liu, X; Wang, A; Shao, Z; Xiao, D; Chang, H; Jiang, J; Yan, Y. Posttraumatic stress disorder 1 month after 2008 earthquake in China: Wenchuan earthquake survey. Psychiatry Research (published online 2010; DOI: 10.1016/j.psychres.2009.07.001). [34477]

Survivor Torture Assessment Record (Turner)

"a specifically designed semi-structured interview" Turner, S W. Personal communication. [cited in 04133]

Survivor Offspring Questionnaire (Hammerman)

"designed for this study to measure aspects of historical awareness including attitude about the Holocaust's personal significance in their lives, knowledge of their family background, and behaviors prompted by an interest in the Holocaust and their family past" [92181]

Survivor Symptom Check List (Sigal and Weinfeld)

"a checklist of items derived from Danieli's description of various types of survivors' personalities" [23834]

Survivors Module (Thewes et al)

"The Survivors Module was designed to form a stand-alone module of [41] items that assessed the specific needs of survivors of breast cancer that could be used as an adjunct to the existing SCNS-Short Form [Supportive Care Needs Survey]." [18699]

Survivors of Childhood Sexual Abuse Program Evaluation Questionnaire (Margolin)

Suspicion Scale (Levine and McCormack)

Sustained Attention to Response Task (Robertson et al)

“A computer administered vigilance task.” [25289]

SWAP Quality Improvement Questionnaire

“an anonymous soldier satisfaction questionnaire” [82860]

Gahm, G A; Swanson, R D; Lucenko, B A; Reger, M A. History and implementation of the Fort Lewis Soldier Wellness Assessment Program (SWAP). *Military Medicine* 174: 721-727 (2009). [82860]

Swedish Annual Level-of-Living Surveys

Undersökningar om levnadsförhållanden

Swedish Universities Scales of Personality

"The SSP is an inventory based on the Karolinska Personality Scales. The SSP comprises 13 scales, each of which contains 7 items for a total of 91 items." [25624]

SWiFT Tool

"a rapid assessment instrument that was administered by a dyad comprising a nurse and a social worker“ [36911]

Symbol Digit Modalities Test (Smith)

Symptom Assessment - 45 Questionnaire

"The SA-45 is a 45-item scale developed as a brief yet comprehensive general assessment of psychiatric symptomatology ... a shortened version of the Symptom Checklist 90 (SCL-90)“ [19266]

Symptom Check List (Vinson and Benowitz)

[used but not cited in 90551]

Symptom Checklist (Akbayrak et al)

"derived from a clinician-administered PTSD scale, included 16 PTSD symptoms and 8 associated symptoms“ [27773]

Symptom Check List (Foy et al)

USE: Los Angeles Symptom Checklist

Symptom Checklist (Gleser et al)

USE: Health Symptom Checklist (Bartone et al)

Symptom Checklist (Bartone et al)

"specifically designed...for this study...to elicit the symptoms of panic as defined by the diagnostic criteria set down in the DSM-IV“ [19405]

Symptom Checklist (Green et al)

USE: Los Angeles Symptom Check List (Gleser et al)

Symptom Checklist 10 (Nguyen et al)

"has six items representing the primary factor and four items tapping somatization and phobic avoidance“ [22763]

Symptom Checklist 10 Revised (Rosen et al)

"used items from all nine of the original SCL-90 subscales“ [22763]

Rosen, C S; Drescher, K D; Moos, R H; Finney, J W; Murphy, R T; Gusman, F. Six- and ten-item indexes of psychological distress based on the Symptom Checklist-90. *Assessment* 7: 103-111 (2000). [22763]

Symptom Checklist 36 (McNiel et al)

"The SCL-36 is a self-report instrument measuring general psychopathology.” [36004]

Symptom Checklist 6 (Rosen et al)
"two items each from the SCL-90 depression, anxiety, and psychoticism subscales were selected..." [22763]
Rosen, C S; Drescher, K D; Moos, R H; Finney, J W; Murphy, R T; Guzman, F. Six- and ten-item indexes of psychological distress based on the Symptom Checklist-90. Assessment 7: 103-111 (2000). [22763]

USE: Tell Me a Story (Costantino et al)

Temperament and Character Inventory (Cloninger et al)

Temperament and Personality Questionnaire (Parker et al)
"T&PQ: a 109-item questionnaire designed to identify a range of personality styles that are considered to either predispose people to developing depression or to shape the way depression is expressed." [37829]

Temporal Disintegration Scale (Holman and Silver)

Temporal Integration Inventory (Melges)
"assesses the degree of continuity, integration, and organization of thoughts about past, present, and future experiences" [09699]

Temporal Orientation (Benton et al)

Temporal Orientation Scale (Holman and Silver)
Ten Items Personality Instrument (Gosling et al)
"a brief measure of the Big five personality domains" [32529]

Ten Question Drinking History (Rosett et al)

Ten-Word Delay Recall Test (Prince et al)

Tender Point Count (Okifuji et al)

Tennessee Self Concept Scale (Fitts)

Tension Index Scale (Glass et al)
"This four-item scale measures subjective feelings of arousal." [08857]

Terminal Value Survey (Rokeach)
UF: Value Survey (Rokeach)

Terror Event Exposure (Somer et al)
"rationally derived for this study" [82165]

Terror-Related Stress Scale (Zeidner)
a 9-item scale [28145]

Terrorism Catastrophizing Scale (Sinclair and LoCicero)
a 13-item "tool...to measure the psychological impact of fearing future terrorism and illustrate how these fears have an impact on people's lives" [82165]

Terrorism Exposure Measurement (Pat-Horenczyk et al)
"The participants were asked to respond 'yes' or 'no' to 8 statements about their experiences..." [29002]
Pat-Horenczyk, R; Peled, O; Miron, T; Brom, D; Villa, Y; Chemtob, C M. Risk-taking behaviors among Israeli adolescents exposed to recurrent terrorism: provoking danger under continuous threat? American Journal of Psychiatry 164: 66-72 (2007). [29002]

Test Anxiety Inventory (Spielberger)

Test Anxiety Scale (Sarason)

Test Anxiety Scale for Children (Sarason et al)
"The TASC was developed as a 30 item self report instrument." [32472]

Test d2 (Brickenkamp)
"This is a pencil task...employed to test concentration." [32253]
Test delle Campanelle (Biancardi and Stoppa)
UF: Attention Bell Test (Biancardi and Stoppa)

Test for Concealed Child Abuse (Ewart)

Test for Potentially Dangerous Employees (Ewart)

Test of Achievement and Proficiency
"a standardized test used in high schools to assess academic skills" [90890]
[used but not cited in 90890]

Test of Early Reading Ability (Reid et al)

Test of Everyday Attention (Robertson et al)

Test of Facial Recognition (Benton and Van Allen)
"a matching-to-sample task that assesses skill in perceptually discriminating human faces" [28711]
UF: Benton Facial Recognition Task

Facial Recognition Task (Benton)

Test of Memory and Learning (Reynolds and Bigler)

Test of Memory Malingering (Tombaugh)
Tombaugh, T M. *Test of Memory Malingering*. Toronto: Multi-Health Systems, 1996. [cited in 09566]

Test of Memory Motivation (Tombaugh)
"Simple 50-item memory test assessing tendency to purposefully perform poorly" [23617]

Test of Mental Ability (Henmon and Nelson)
Watson, C G; Klett, W G. The Henmon-Nelson, Cardall-Miles, Slosson and Quick Tests as predictors of WAIS IQ. *Journal of Clinical Psychology* 31: 310-313. [cited in 01583]

Test of Nonverbal Intelligence (Brown et al)
Brown, L; Sherbenou, R J; Johnsen, S K. *Test of Nonverbal Intelligence*. Los Angeles: Western Psychological Services, 1982. [cited in 06358]

Test of Prose Recall (Powell et al)
"designed to be formally identical to the logical memory test in the Wechsler Memory Scale but with four different but equivalently memorable versions to permit repeated testing" [24647]

Test of Psychological Maturity (Harris and Goodenough)
USE: Draw-A-Person Test (Goodenough)

Test of Self-Conscious Affect (Tangney et al)
Tangney, J P; Wagner, P; Gramzow, R. *The Test of Self-Conscious Affect*. Fairfax, Virginia: George Mason University, 1989. [cited in 07716]

Test of Self-Conscious Affect for Adolescents (Tangney et al)
Tangney, J P; Wagner, P E; Gramzow, R. *The Test of Self-Conscious Affect for Adolescents (TOSCA-A)*. Fairfax, Virginia: George Mason University, 1991. [cited in 19613]

Test of Self-Conscious Affect for Children (Tangney et al)
"The TOSCA-C contains 15 brief hypothetical scenarios (10 negative and 5 positive) designed to assess shame- and guilt-proneness." [84355]
Tangney, J P; Wagner, P E; Burggraf, S A; Gramzow, R; Fletcher, C. *The Test of Self-Conscious Affect for Children (TOSCA-C)*. Fairfax, Virginia: George Mason University, 1990. [cited in 84355]

Test of Variables of Attention
Test of Written Language (Hammill and Larsen)

Test pour l’Examen de l’Aphasie (Ducarne de Ribaucourt)

Test pour l’Examen de l’Apraxie (Ducarne de Ribaucourt)

Testbatterie zur Aufmerksamkeitsprüfung (Zimmermann and Fimm)
"a computer-driven working memory test" [27925]

Texas Christian University Drug Screen
a 19-item instrument "designed to screen for alcohol and drug disorders" [32380]

Texas Grief Inventory (Faschingbauer et al)
USE: Texas Inventory of Grief (Faschingbauer et al)

Texas Inventory of Grief (Faschingbauer et al)

UF: Texas Grief Inventory (Faschingbauer et al)

Texas Revised Inventory of Grief (Faschingbauer et al)

Texas Social Behavior Inventory (Helmreich and Stapp)

TF-CBT Practice Checklist (Deblinger et al)
"a [49-item] self-assessment of adherence to the TF-CBT treatment model" [37284]
Deblinger, E; Cohen, J; Mannarino, A P; Hanson, R; Runyon, M. TF-CBT Practice Checklist – Self-Report. Unpublished instrument, 2005. [cited in 37284]

TF-CBT Rating Form (Cohen)
an 11-item measure indicating "the frequency with which the supervisee currently implemented TF-CBT with a high degree of skill along several key dimensions" [37284]

The Way I Feel About Myself
USE: Piers-Harris Children’s Self-Concept Scale (Piers and Harris)

Theater Medical Register Form - Psychiatry (U.S. Navy)
Conway, T L; Hammer, P S; Galarneau, M R; Larson, G E; Edwards, N K; Schmied, E A; Ly, H L; Schmitz, K J; Webb-Murphy, J A; Boucher, W C; Johnson, D C; Ghaed, S G. Theater Mental Health Encounter Data (TMHED): overview of study design and methods. *Military Medicine* 176: 1243-1252 (2011). [85817; the Form is reproduced on pp. 1245-1248]

Thematic Apperception Test (Morgan and Murray)

UF: Aron’s Scale
TAT

Thematic Assessment Measurement System (Lifton)
"a standardized semi-structured interview format to measure unconscious processes" [90134]

Thematic Interview (Roth and Newman)
Themes Following Stressful Events Questionnaire (Armsworth)

Therapeuten-Fragebogen Trauma (Krüger and Brüggemann)
Krüger, A; Brüggemann, A. Therapeuten-Fragebogen Trauma. Unpublished instrument. [cited in 81805]

Therapeutic Alliance Rating System
USE: California Therapeutic Alliance Scale (Marmar et al)

Therapeutic Alliance Scale (Doucette and Bickman)
a 30-item questionnaire [81368]
Doucette, A; Bickman, L. Therapeutic Alliance Scale: Therapist-TAS, V5.0. Memphis [i.e., Nashville?]: Center for Mental Health Policy, Vanderbilt University, 2002. [cited in 81368]

Therapeutic Alliance Scale for Adolescents (Shirk and Saiz)
"The TASA is a 12-item scale that measures children’s perceptions of the therapy relationship." [36608]

Therapeutic Influence Subscale (Kilcrease-Fleming et al)
"adapted from the Vanderbilt Psychotherapy Process Scale"

Therapeutic Intervention Scoring System (Cullen et al)

Therapeutic Outcome Questionnaire (Foa et al)
"This questionnaire, an adaptation of Borkovec and Nau’s (1972) scale, measures the perceived credibility of each active treatment." [30597]

Therapist Action Scale (Hoyt et al)

Therapist Adherence and Competency Rating Form (Long et al)
"The TAC, developed or the current study was sued to systematically evaluate clinician competence and adherence to the treatment manual..." [34058]

Therapist Adherence Scale (Letourneau et al)
USE: MST Therapist Adherence Scale (Letourneau et al)

Therapist Engagement Subscale (Sayer and Thuras)
9 items

Therapist Evaluation of Termination Status
USE: Evaluation of Termination Status (Wolfe et al)

Therapist Facilitating Scale (Paivio et al)
"a measure for assessing therapist competence with the imaginal confrontation (IC) intervention" [28394]

Therapist Information Questionnaire
[used but not cited in 91273]

Therapist Rating Form (Friedrich et al)

Therapist Rating Scale (Williams and Chambless)
Therapist Reaction Questionnaire (Kelly)
UF: Therapist Reaction Questionnaire

Therapist Reactions and Emotions Questionnaire (Smith et al)
"The TREQ is a 20-item questionnaire developed to measure therapist emotions and behavioural tendencies in clinical situations.” [81404]

Therapist Response Questionnaire
"a 110-item self-report inventory, modified from the Therapist Reaction Questionnaire" [05179]
USE: Therapist Reaction Questionnaire (Kelly)

Therapy Effectiveness Monitoring Scale (USNH Okinawa)
A locally developed 35-question measure assessing symptom presence and severity, level of distress about symptoms and other key areas, level of functional impairment in multiple roles, and health-related behaviors. [81745]

Therapy Effectiveness Scale (Rehm)
"an unpublished measure previously devised to assess helpfulness of self-management therapy” [80924]

Therapy Gain Scale
[used but not cited in 19402]

Therapy History Questionnaire (Steever)
"a self-report instrument that examines participants’ history of psychotherapy and other mental health treatment...designed by the primary investigator for use in this study” [15869]

Therapy Procedures Checklist (Weersing et al)
"The TPC was developed to assess therapists' reports of the treatment techniques they employ in their everyday work with clinical cases.” [33200]

Therapy Process Observational Coding System for Child Psychotherapy-Strategies Scale (McLeod and Weisz)

Therapy Satisfaction Questionnaire (Deblinger et al)
"The TSQ is a 14-item questionnaire developed to assess clients’ opinions about the group therapy programs.” [16318]
Deblinger, E; Stauffer, L B; Steer, R A. Comparative efficacies of supportive and cognitive behavioral group therapies for young children who have been sexually abused and their nonoffending mothers. Child Maltreatment 6: 332-343 (2001). [16318]

Therapy with Women Scale
[used but not cited in 90550]

Things I Have Seen and Heard (Richters and Martinez)

Things I Worry About Scale (Kroll and Egan)
a 20-item scale (8 “moral worry items” and 12 “practical worry items”) "designed for this research” [26792]

Thinking and Behaving Scale
"The TABS is an 11-item self-report unpublished scale designed to measure recent behaviour related to antisocial personality characteristics.” [39909]
[used but not cited in 39909]

Third-Level Decompression User Satisfaction Survey (Canadian Forces)
A 68-item, voluntary, anonymous survey was administered as participants were leaving Cyprus. [86250]
Thought Control Questionnaire (Wells and Davies)

"an instrument [30 items] that measures strategies that can be used to control unpleasant and unwanted thoughts" [07724]

Thought Description Questionnaire (Tolin et al)

"The TDQ consists of 5 items that ask about occurrences of the target thought during the most recent 5-minute period." [32832]

Thought Disorder Index (Holzman)

Thought Fusion Instrument (Wells et al)

"The [14-item] TFI was developed originally...to assess beliefs about thoughts across "fusion" domains that are considered relevant in the metacognitive formulation and treatment of obsessive-compulsive disorder." [82992]

Wells, A. Metacognitive Therapy for Anxiety and Depression. New York: Guilford Press, 2009. [82992; the TFI appears on p. 265]

Thought Suppression Scale (Davies and Clark)

"a single item scale designed for this study" [09261]

Thoughts and Behaviors Inventory (Slattery et al)

"The TBI is a modified version of the Y-BOCS-SC (Yale-Brown Obsessive-Compulsive Scale) that includes 33 items on obsessive thoughts and 32 items on compulsive behaviors organized according to the 15 categories of obsessions and compulsions outlined in the Y-BOCS-SC." [28074]

Thoughts and Feelings Questionnaire (Halligan et al)

Thoughts Questionnaire, Anticipatory and Post (Abbott And Rapee)

"These 24-item instruments were used to assess anticipatory processing and post-event rumination, respectively." [34297]

Threat Appraisal Scale (Program for Prevention Research)

Threat Appraisals of Negative Events Scale (Kliewer)

"a 24-item measure of threat appraisal...developed by the first author" [32333]

Threat Index (Neimeyer et al)

Threat to Need Scale (Williams)

USE: Post Game Questionnaire (Williams)

Three Mile Island

SEE ALSO: TMI

Three Mile Island Mental Experience Questionnaire (Handford et al)

Three-Factor Religiosity Scale (Chatters et al)

Thrill and Adventure Seeking Scale (Zuckerman)

NOTE: This is a subscale of the Sensation Seeking Scale.

USE: Sensation Seeking Scale (Zuckerman)
**Thrivving Scale (Abraído-Lanza et al)**

"developed...for individuals with physical illness" [27025]

**Thurstone Fluency Test**

**Thurstone Picture Memory Test**

[used but not cited in 18852]

**Time Line (Najavits)**

**Time Ordered Stress and Health Interview (Kitamura and Kijima)**

"identified eight categories of parental abusive behaviours" [21025]
"a structured interview guide...developed specially for this study...included psychiatric history designed to yield major DSM-III-R Axis I diagnoses, early parental loss, child abuse experiences, bullying, and other life events" [21650]
Kitamura, T; Kijima, N. *Time Ordered Stress and Health Interview*. Ichikawa, Japan; National Institute of Mental Health, 1995. [cited in 21025]

**Time Orientation Questionnaire (Cottle)**

**Time Perspective Scale (Zimbardo and Boyd)**

**Time Tradeoff (Torrance et al)**

"The TTO is a method of utility assessment developed specifically for the health care setting..." [36132]

**Time Urgency Scales (Landy et al)**

"assess a variety of dimensions of the time urgency component of the Type A syndrome" [26030]
Landy, F J; Thayer, J; Colvin, C. The measurement of time urgency. Unpublished manuscript, 1988. [cited in 26030]

**Tool to Measure Parenting Self-Efficacy (Kendall and Bloomfield)**

"Although the TOPSE was originally designed to measure the effectiveness of parenting intervention programs, it can also serve to measure a parent’s perception of his or her own ability to parent effectively.” [40160]

**TOP-8**

USE: Eight-Item Treatment-Outcome Post-Traumatic Stress Disorder Scale (Davidson and Colket)
Tornado Exposure Questionnaire (Knight and Sullivan)

"The TEQ assessed information pertaining to perceived life threat, life-threatening experiences, and loss-disruption experiences in an age-appropriate format. The TEQ is similar in content and structure to the Hurricane-Related Traumatic Experiences Questionnaire (LaGreca et al)" [80306]

Toronto Alexithymia Scale (Taylor et al)

Torrance Test of Creative Thinking

Torture Items Checklist (Westermeyer et al)

75 items

Torture Severity Scale (Kira et al)

"this 16-item scale, designed to measure the severity of torture experience, was modified from a form developed by Survivors International in San Francisco to assess torture." [82453]

Total Symptom Frequency Index (Jackson et al)

developed for this study "to measure the current frequency of each of the 13 cognitive symptoms commonly associated with mild traumatic brain injury" [24274]

Total Symptom Severity Index (Jackson et al)

developed for this study "to measure the severity of cognitive symptoms commonly associated with mild traumatic brain injury" [24274]

Tough Times Checklist

[used but not cited in 91337]

Toulouse-Pieron Test

[used but not cited in 02405]

Tower of London Test (Krikorian et al)

Tower of Toronto Puzzle

"a problem-solving task...a modified version of the Tower of Hanoi puzzle" [24097]

Townsend Deprivation Index

"derived from U.K. Census data for a given geographical district and relates to four variables: car ownership, employment status, home ownership, and level of accommodation overcrowding" [30782]

Toxic Symptom Checklist (Bowler et al)

"a 40-item symptom checklist" [09021]

TPO Baksbat Inventory (Chhim)

ea 24-item "inventory measuring a Cambodian cultural syndrome of distress called ‘baksbat’ (broken courage)" [40291]

Chhim, S. Baksbat (broken courage): the development and validation of the inventory to measure Baksbat, a Cambodian trauma-based cultural syndrome of distress. Culture, Medicine and Psychiatry 36: 640-659 (2012). [40291; the Inventory appears on pp. 636-637]

UF: Baksbat Inventory (Chhim)

Tracas Quotidiens (Plancherel et al)

Traditional Family Ideology Scale (Levinson and Huffman)

Traditional Machismo and Caballerismo Scale (Arciniega et al)
"The TMCS is a 20-item self-report instrument designed to assess the extent to which men identify with two different constructs of machismo." [40029]

Trail Making Test (Armitage)
Reitan, R M. *Trail Making Test: Manual for Administration, Scoring and Interpretation*. Indianapolis: Indiana University, 1959. [cited in 01047]
Included in the Halstead-Reitan Neuropsychological Test Battery for Adults and the Halstead-Reitan Neuropsychological Test Battery for Children.

TRAILS Family History Interview
"part of the Tracking Adolescents’ Individual Lives Survey (TRAILS)...a large prospective population study of Dutch adolescents who are measured biennially until at least 25 years of age" [23383]

TRAILS Stressful Events Questionnaire
"This questionnaire is composed of 36 life events, of which 22 negative, 7 positive, 5 negative or positive, and 2 open questions.” [37924]

Training Evaluation Form (Miller-Karas and Leitch)
"The TEF consists of 14 open-ended questions about the specifics of training that were most and least helpful.” [83919]

Training Evaluation Scale (Adler et al)
The TES, an 18-item self-report measure, was developed for this study to assess perceptions of postdeployment resilience training. [39660]
Foran, H M; Adler, A B; McGurk, D; Bliese, P D. Soldiers’ perceptions of resilience training and postdeployment adjustment: validation of a measure of resilience training content and training process. *Psychological Services* 9: 390-403 (2012). [39660; the TES appears on p. 403]

Training Relevance, Use, and Satisfaction Scale (Leitch)
"TRUSS is a 9-item instrument that examines three domains: (1) relevance of the training material to the trainee, (2) likelihood of use of the skills (including for self-care), and (3) satisfaction with the skills and training." [83919]

Trait Coping Style Questionnaire (Wang)
"TCSQ is a self-report questionnaire with 20 items...assessing the relatively stable coping strategies related to personality traits." [31249]

Trait Dissociation Questionnaire (Murray et al)
"developed by the authors...contains 38 items" [24926]

Trait Emotional Intelligence Questionnaire
[used but not cited in 93007]

Trait Emotional Regulation Questionnaire
[used but not cited in 93609]
Trait Forgivingness Scale (Berry et al)
"A 10-item Likert-type scale that measures a person's dispositional tendency to be forgiving." [39505]

Trait Meta-Mood Scale (Salovey et al)
"a 48-item emotional intelligence questionnaire" [25995]

Trait-Self Descriptive Personality Inventory
"S subscales representing 5 factors of personality. Each subscale is composed of 15 items..." [84945]
[used but not clearly cited in 84945]

Transcultural Psychosocial Organization Questionnaire
[used but not cited in 20538]

Transgression-Motivated Interpersonal Motivations Inventory (McCullough et al)

Transmissible Liability Index (Vanyukov et al)
"an index...assessing the relative risk of developing substance use disorders based on evaluations drawn from self reports, mother reports, and teacher reports" [33450]

Transparent Box (Goldsmith et al)
"a 4-minute emotionally challenging task designed to elicit frustration [in children]" [85554]
Goldsmith, H H; Reilly, J; Lemery, K S; Longley, S; Prescott, A. The Laboratory Assessment Battery: Preschool Version (LAB-TAB). Madison: University of Wisconsin, 1999. [cited in 85554]

Transplant Effects Questionnaire (Ziegelmann et al)
"The [23-item] TxEQ measures the emotional response to organ transplant." [83729]
Ziegelmann, J P; Griva, K; Hankins, M; Harrison, M; Davenport, A; Thompson, D; et al. The Transplant Effects Questionnaire (TxEQ): the development of a questionnaire for assessing the multidimensional outcome of organ transplantation -- example of end stage renal disease (ESRD). British Journal of Health Psychology 7: 393-408 (2002). [cited in 83729]

Trauma Analysis Protocol (Everstine and Everstine)

Trauma and Attachment Belief Scale
"The [84-item] TABS is designed to assess the impact of directly and indirectly experienced trauma." [40176]

Trauma and Injury Severity Score

Trauma and Loss Spectrum - Self-Report (Dell'Osso et al)
"a self-report version of the SCI-TALS interview [Structured Clinical Interview for Trauma and Loss Spectrum] that matches the interview content" [32841]
Dell'Osso, L; Carmassi, C; Rucci, P; Conversano, C; Shear, M K; Calugi, S; Maser, J D; Endicott, J; Fagioli, A; Cassano, G B. A multidimensional spectrum approach to post-traumatic stress disorder: comparison between the Structured Clinical Interview for Trauma and Loss Spectrum (SCI-TALS) and the Self-Report instrument (TALS-SR). Comprehensive Psychiatry 50: 485-490 (2009). [32841]

Trauma and PTSD Screening Questionnaire (Morgan et al)

Trauma and Spiritual Event Questionnaire (Brack)
"an open-ended survey in which participants told their stories of trauma and spirituality and identified their personal criteria for what constituted a traumatic or spiritual event" [91298]
[used but not otherwise cited in 91298]

Trauma and Substance Abuse Treatment Questionnaire (Brown)

Trauma and Symptom Form (Danish Red Cross)
Trauma and Victimization Scale (Cohen et al)
“examines 18 lifetime trauma events” [29198]

Trauma Appraisal Questionnaire (DePrince et al)
"a 54-item measure of posttraumatic appraisals” [83875]

Trauma Assessment for Adults (Resnick et al)
[stamm 362-625]

Trauma Assessment for Young Children (Strickler)
"The current study developed an assessment instrument of trauma symptoms in young children based on a combination of the American Psychiatric Association’s diagnostic criteria for PTSD, recommendations for alternative diagnostic criteria for PTSD in preschool children, and theoretical literature related to complex trauma and developmental trauma disorder in young children.” [93082]
Strickler, H L H. The validation of the Trauma Assessment for Young Children. Ph.D. dissertation, University of Texas at Arlington, 2011. [93082]

Trauma Assessment Matrix (Kira)
"a comprehensive tool for the assessment of cumulative trauma” [18270]

Trauma Attribution Checklist (Knight and Sullivan)
“Items on the TAC were constructed to measure dimensions identified in attribution research...” [80306]

Trauma Belief Inventory (Scott)
"A set of dysfunctional trauma beliefs... The TBI draws on belief items from the Trauma Constellation Identification Scale (Dansky et al) and Jehu’s Belief Inventory.” [15013]

Trauma Checklist for North Korean Refugees
[instrument not explicitly named in source article; name assigned by PILOTS Database staff]
"Based on interviews with North Korean refugees and previous measures of traumatic experiences for North Korean refugees...the team finalized a checklist with 17 items for the period in North Korean and 18 items for the defection period.” [37449]

Trauma Composite Index (Banyard et al)
[instrument not named; name assigned by PILOTS Database staff]
"Includes five main types of lifetime interpersonal trauma exposure” [81618]

Trauma Constellation Identification Scale (Dansky et al)

Trauma Content Index (Armstrong and Lowenstein)
"The TC/R is the sum of 5 of the 27 total content scores of the Rorschach Inkblot Method (blood, anatomy, sex, aggression, and morbidity) divided by the total number of responses.” [81066]

Trauma Counseling Course Experience Questionnaire (Black)
"a 14-item, anonymous course experience exit questionnaire” [82459]

Trauma Discourse Exposure Interview (Yeomans et al)

Trauma Event Questionnaire (Casi et al)
a 13-item scale "developed in collaboration with Bedouin informants” [81119]
Trauma Events Interview (Green)
"a 13-item measure that documents lifetime trauma history" [28997]
[used but not cited in 28997]

Trauma Events Questionnaire (Lipschitz et al)
Lipschitz, D S; Pawl, G; Winegar, R K; Wolfson, M A; Faedda, G L. Trauma Events Questionnaire. Unpublished instrument.
[cited in 08412]

Trauma Events Scale (Briere and Rickards)
"The TES was created...to assess multiple forms of childhood abuse experiences, including a 20-item emotional abuse maternal figure scale and a 20-item emotional abuse paternal figure scale." [34076]

Trauma Experience Questionnaire (Widows et al)
"The six-item Trauma Experience Questionnaire was developed specifically for the current study to assess patient's subjective experience of the traumatic value of [bone marrow transplantation]." [23216]

Trauma Experience Scale (Parslow et al)
[instrument not named in source; name assigned by PILOTS Database staff]
"Study participants answered 11 questions concerning their exposure to the bushfires." [30011]

Trauma Experiences Checklist (Ramsay et al)
"The TEC is a 41-item checklist [developed specifically for use in this study] in which participants are asked to endorse the number of times a particular traumatic experience had happened to them before the age of 18 years." [36639]
Ramsay, C E; Flanagan, P; Gantt, S; Broussard, B; Compton, M T.; CIEC. Correlates of maltreatment and traumatic experiences in childhood and adolescence among predominantly African American, socially disadvantaged, hospitalized, first-episode psychosis patients. Psychiatry Research (DOI: 10.1016/j.psychres.2011.05.019). [36639]

Trauma Experiences Questionnaire (Hollifield et al)
"The TEQ was used to screen people into 1 of the 3 entry-criteria categories (torture, non-torture war-related trauma, no war-related trauma)." [28084]
Hollifield, M; Eckert, V; Warner, T D; Jenkins, J H; Krakow, B; Ruiz, J; Westermeyer, J J. Development of an inventory for measuring war-related events in refugees. Comprehensive Psychiatry 46: 67-80 (2005). [28084]

Trauma Exposure Assessment (Cook et al)
"This brief screen queries exposure to several potentially traumatic events...using a yes/no response format." [19310]
Cook, J M; Elhai, J D; Cassidy, E L; Rusek, J I; Ram, G D; Sheikh, J I. Assessment of trauma exposure and posttraumatic stress disorder in older, long-term care veterans: preliminary data on psychometrics and PTSD prevalence. Military Medicine, in press. [cited in 19310]

Trauma Exposure Questionnaire (Pat-Horenczyk et al)
Pat-Horenczyk, R; Chemtob, C M; Abramovitz, R; Baum, N; Daie, A; Brom, D. The Israeli Trauma Exposure and Functional Impairment. Jerusalem: Israel Center for the Treatment of Psychotrauma, 2002. [cited in 83896]

Trauma Exposure Questionnaire (Taylor et al)
"a scale developed expressively for the present study" [31880]

Trauma History Checklist
[used but not cited in 09058]

Trauma History Interview (Ehring et al)
"based on similar trauma checklists" [28842]

Trauma History of the Child
[a trauma intake questionnaire listing 11 traumatic events, used but not cited in 24334]

Trauma History Profile (NCTSN)
"The THP is a comprehensive assessment of an individual’s trauma history including type of trauma and when it occurred un the life span....The THP is derived from the trauma history component of the UCLA PTSD-Reaction Index and included to include 19 trauma types." [40812]
Trauma History Questionnaire (Berkowitz and Stover)

"This questionnaire contains 13 identical items presented as child or parent report developed at Trauma Section at the Yale Child Study Center to assess the child's history of previous traumatic events and the intensity of their reactions. The items were derived from the Traumatic Events Screening Inventory Child and Parent Report (TESI)." [84129]

Berkowitz, S; Stover, C S. Trauma History Questionnaire Parent and Child Version. Unpublished questionnaire, Yale Child Study Center Trauma Section, 2005.

Trauma History Questionnaire (Cohen and Brom)

"This 30-item Hebrew language questionnaire...surveys a broad range of traumatic experiences" [28039]

Dominguez, D V; Cohen, M; Brom, D. Trauma and dissociation in psychiatric outpatients. Israel Journal of Psychiatry and Related Sciences 41: 98-110 (2004). [28039]

Trauma History Questionnaire Self-Report (Green)

"The instrument has 24 items addressing the lifetime occurrence of a variety of traumatic events in three categories: crime, general disaster/truma, and sexual and physical assault experiences." [stamm, 366]

Trauma History Screen (Allen et al)

"The THS is a 14-item questionnaire that assesses a variety of life traumas..." [26817]

Trauma History Screen (Carlson et al)

"The THS inquires about exposure to 12 types of sudden, high-magnitude stressors." [30567]

Trauma Screening Measure (National Comorbidity Survey)

Trauma Screening Questionnaire (Brewin et al)
a brief 10-symptom screening instrument” [24754]

Trauma Screening Questionnaire (McIntyre et al)
"a 10-item self-report questionnaire that assesses a woman’s history of childhood and adult sexual trauma, sexual harassment, and domestic violence, and measures her desire for mental health help” [20912]
McIntyre, L M; Butterfield, M I; Nanda, K; Parsey, K; Stechuchak, K M; McChasney, A W; Koons, C; Bastian, L A. Validation of a trauma questionnaire in veteran women. Journal of General Internal Medicine 14: 186-189 (1999). [20912; the Questionnaire appears on p. 189]
UF: Trauma Questionnaire (McIntyre et al)

Trauma Screening Tool - Self-Report
"a 29-question tool” [93261]
[used but not cited in 93261]

Trauma Sequelae (Hanna et al)
Hanna, C; Koverola, C; Proulx, J; Battle, R. Psychometric properties of four diagnostic measures for identification of PTSD. Presented at the 8th annual meeting of the Society for Traumatic Stress Studies, Los Angeles, October 1992. [cited in 13115]

Trauma Severity Index (Davidson)
"unpublished” [09256]

Trauma Severity Instrument (Shalev et al)
"an ad hoc instrument [comprising] 17 ‘yes/no’ items that document distinct traumatic occurrences and 9 items that evaluate emotional reactions experienced during or shortly after the event” [30717]

Trauma Severity Rating Scale (NVVRS)
"an adaptation of a scale used by the National Vietnam Veterans Readjustment Study (NVVRS) to rate trauma severity” [14122]
Kulka, R A; Schlenger, W E; Fairbank, J A; Hough, R L; Jordan, B K; Marmar, C R; Weiss, D S. Trauma and the Vietnam War Generation. New York: Brunner/Mazel, 1990. [cited in 14122]
Trauma Severity Scale (Martin et al)
"Trauma severity was assessed using a questionnaire constructed by the research team. It measured a total of 13 objective and subjective dimensions of the traumatic event." [83624]
Martin, M; Marchand, A; Boyer, R; Martin, N. Predictors of the development of posttraumatic stress disorder among police officers. *Journal of Trauma and Dissociation* 10: 451-468 (2009). [83624]

Trauma Symptom Checklist for Children (Briere)
"a 54-item instrument consisting of six subscales" [04855]

Trauma Symptom Checklist for Young Children (Briere)
"This test is a 44-item measure that assessed posttraumatic stress and related psychological symptoms for children and adolescents." [30201]

Trauma Symptom Inventory (Briere)
"a longer and more detailed version" of the Trauma Symptom Checklist-40 [02881, p. 397]

Trauma Symptom Screen (Scotti and Del Ben)
“designed to evaluate the factor structure of PTSD symptomatology” [80295]
Scotti, J R; Del Ben, K. Trauma Symptom Screen. Unpublished instrument, West Virginia University, 2000. [cited in 80295]

Trauma Symptom Survey (Heller)

Trauma Symptoms Checklist (Boothby et al)
adapted from one section of the Harvard Trauma Questionnaire
Boothby, N. What happens when child soldiers grow up?: the Mozambique case study. *Intervention* 4: 244-259 (2006). [80351]
Trauma Symptoms Investigation Form in Autistic Spectrum Disorders (Mehtar and Mukaddes)
"This form aims to assess the effect of traumatic events on core symptoms of autism as well as other associated behavioral features." [35209]

Trauma Workers Incident Exposure Scale
[used but not cited in 91390]

Trauma-Induced Stress Scale (Khamis)

Trauma-Informed Belief Measure (Brown and Wilcox)
"a 19-item Likert scale that assesses how favorable staff beliefs are toward trauma-informed care" [38096]

Trauma-Outcome-Profile
[used but not cited in 31566]

Trauma-Related Beliefs Questionnaire (Hazzard)
"A 56-item measure of trauma-related beliefs"

Trauma-Related Dissociation Scale (Carlson and Waelde)
[used but not cited in 92727]

Trauma-Related Guilt Inventory (Kubany et al)
"an event-focused measure of traumatic guilt" [08310] with 32 items
Kubany, E S; Haynes, S N; Abueg, F R; Manke, F P; Brennan, J M; Stahura, C. Development and validation of the Trauma-Related Guilt Inventory (TRGI). Psychological Assessment 8: 428-444 (1996). [08310; the Inventory appears on pp. 443-444]

Trauma-Related Nightmare Scale (Davis et al)
Davis, J L; Wright, D; Borntrager, C. The Trauma-Related Nightmare Scale. Tulsa: Department of Psychology, University of Tulsa, 2001. [cited in 28493]

Trauma-Related Thoughts and Attitudes Questionnaire (Fauth and Mehnert)
a 23-item self-report questionnaire
Fauth, M; Mehnert, A. Trauma-Related Thoughts and Attitudes Questionnaire (Fauth and Mehnert). [Unpublished instrument], 2006. [cited in 39362]

Trauma/Loss History Profile (Pynoos and Steinberg)
Pynoos, R S; Steinberg, A M. Trauma/Loss History Profile. Unpublished measure, 2004. [cited in 83059]

Traumaexposition-Index (Müller and Maercker)

Traumagram Questionnaire (Figley)

Traumatic and Protective Antecedents Interview (Perry et al)
"We adapted the Traumatic Antecedents Interview (Herman et al) to include additional specific experiences and add coverage of potential protective factors." [28019]
Perry, J C; Sigal, J J; Boucher, S; Paré, N. Traumatic and Protective Antecedents Interview (TPAI) — Adapted for Orphanage Experiences. Unpublished instrument, Sir Mortimer B. Davis - Jewish General Hospital, Montréal, n.d. [cited in 28019]

Traumatic Antecedents Questionnaire (Herman et al)
"a 100-item semistructured interview" [02628]
Herman, J L; Van der Kolk, B A. Structured Interview for Trauma Study. Unpublished instrument, 1988. [cited in 04896]
UF: Structured Interview for Trauma Study (Herman and Van der Kolk)

Traumatic Anxiety Index (Weisaeth)

Traumatic Attachment Belief Scale
[used but not cited in 92520]

Traumatic Brain Injury Questionnaire
[used but not cited in 91569]
Traumatic Brain Injury Screen (Irvins et al)
"a brief self-report measure" [34427]

Traumatic Dissociation and Grief Scale (Laor et al)
"The TDGS...consists of 23 items that cover dissociation and grief reactions" [25377]
Laor, N; Wolmer, L; Kora, M; Yucel, D; Spirman, S; Yazgan, Y. Posttraumatic, dissociative and grief symptoms in Turkish children exposed to the 1999 earthquakes. Journal of Nervous and Mental Disease 190: 2824-832 (2002). [25377; the TDGS appears on p. 826]

Traumatic Emotions Questionnaire (Sotgiu and Galati)
"a self-report ... to assess the emotional intensity of the traumatic memory" [86448]

Traumatic Event Disclosure Scale (Davidson and Moss)
"The purpose of the scale was to capture the partner's perception of the officer's disclosure of a particular work-related traumatic event.” [31093]
Davidson, A C; Moss, S A. Examining the trauma disclosure of police officers to their partners and officers' subsequent adjustment. Journal of Language and Social Psychology 27: 51-70 (2008). [31093; the Scale appears on p. 67]

Traumatic Event Questionnaire (Amir and Sol)
"This self-report questionnaire was compiled for the present study based on other questionnaires from non-clinical samples...and adapted to the Israeli situation.” [14309]

Traumatic Event Scale (Wijma et al)
Wijma, K; Wijma, B; Söderquist, J. Presentation of the Traumatic Event Scale (TES). Manuscript submitted for publication, 1997. [cited in 09448]

Traumatic Event Survey - Lifetime (Gershuny)
USE: Traumatic Events Scale - Lifetime (Gershuny)

Traumatic Event, Peritraumatic Experiences, and PTSD Scale (Dyb et al)
[instrument not named in article; name assigned by PILOTS Database staff]
"A newly developed instrument...constructed for this exploratory study.” [82723]
Dyb, E; Rodríguez, N; Brymer, M J; Saltzman, W R; Steinberg, A M; Pynoos, R S. Emotional reactions, peritraumatic dissociation, and posttraumatic stress reactions in adolescents. Journal of Child and Adolescent Trauma 1: 63-74 (2008). [82723]

Traumatic Events Checklist (Arikan and Karanci)
"The Traumatic Events Checklist was constructed for the present study and consisted of 30 traumatic events.” [86226]

Traumatic Events Checklist (Asukai)
"a 15-item self-rating checklist” [25692]
[used but not cited in 25692]

Traumatic Events Checklist (Long)
"created for this study” [90471]

Traumatic Events Checklist (Qouta et al)
"14 items describing events that were typically experienced by Gaza children during the Intifada” [07580]
[used but not cited in 07580]

Traumatic Events Interview (Gillespie et al)
"The TEI is a clinician-administered questionnaire designed to assess number and type of traumatic incidents that a particiant has experienced throughout his or her lifetime. The TEI includes 15 questions about a range of potential traumatic events.” [36179]
Gillespie, C F; Bradley, B; Mercer, K; Smith, A K; Coneely, K; Gapen, M; et al. Trauma exposure and stress-related disorders in inner city primary care patients. General Hospital Psychiatry 31: 505-514 (2009). [cited in 36179]

Traumatic Events Inventory (Rothbaum and Davidson)
"a 13-question self-report that assesses traumatic events, frequency of events, age at worst incident, and feelings of terror, horror, and helplessness” [27012]
Rothbaum, B O; Davidson, J R T. Traumatic Events Inventory. Unpublished instrument, 2000. [cited in 27012]

Traumatic Events Inventory (Scoboria et al)
"The TEI was designed to record lifetime trauma history with items adapted from similar instruments.” [31681]
Traumatic Events Inventory (Shmotkin and Litwin)
"Includes 17 difficult life events" [85870]

Traumatic Events Inventory (Weine et al)
an 18-item index "designed by the researchers specifically for Tajik labor migrants" [38447]
Weine, S; Bahromov, M; Loue, S; Owens, L. Trauma exposure, PTSD, and HIV sexual risk behaviors among labor migrants from Tajikistan. AIDS and Behavior (published online 20 January 2012). [38447]

Traumatic Events Questionnaire (Al-Krenawi et al)
"In order to assess political violence the researchers created an 18-item Traumatic Events Questionnaire (TEV) tailored to each community's language and to their respective modes of exposure to political violence." [33438]

Traumatic Events Questionnaire (Fullilove et al)
"a structured assessment of exposures to specific traumatic life events...modeled after Fullilove et al's work assessing trauma histories of substance-abusing women" [22433]

Traumatic Events Questionnaire (Lev-Wiesel et al)
"This self-report questionnaire was compiled for the present study based on other questionnaires from non-clinical samples." [27936]

Traumatic Events Questionnaire (Vrana and Lauterbach)

Traumatic Events Scale - Lifetime (Gershuny)
UF: Traumatic Event Survey – Lifetime (Gershuny)

Traumatic Events Screening Inventory (Ford and Rogers)
"a structured clinical interview [which identifies] trauma events per DSM-IV PTSD criteria with respondent-appropriate phrasing" [21183]

Traumatic Events Screening Inventory for Children (Ribbe)
[used but not usefully cited in 82463]

Traumatic Events Survey (Elliott)
Elliott, D M. Traumatic Events Survey. Unpublished instrument, UCLA School of Medicine, Los Angeles, 1992. [cited in 12723]

Traumatic Experience Questionnaire (Genest et al)

Traumatic Experience Questionnaire (Steinberg)
Steinberg, M. Traumatic Experience Questionnaire. New Haven: Yale University School of Medicine, 1993. [cited in 08839]

Traumatic Experiences Checklist (Nijenhuis et al)
"The TEC is a self-report questionnaire inquiring about 29 types of trauma." [16369]

Traumatic Experiences Inventory (Sprang)
"a self-report instrument designed to measure the existence, intensity, and duration of biopsychosocial symptoms of the traumatic experience following a crime or natural disaster in which lives were lost" [09394]

Traumatic Experiences Questionnaire (Kaplan et al)
"a 49-item self-report questionnaire developed by [Kaplan, Lipschitz, and Asnis]"
Kaplan, M L; Lipschitz, D S; Sorkenn, J B; Faedda, G L; Scalmati, A; Chorney, P; et al. Prevalence and characteristics of abuse in psychiatric outpatients. Presented at the 102nd annual meeting, American Psychological Association, Los Angeles, 1994. [cited in 06237]
Traumatic Experiences Questionnaire (Martinez-Taboas et al)

“The TEQ is a self-report instrument that measures neglect, emotional abuse, physical abuse, and sexual abuse.” [80150]

Martinez-Taboas, A; Shrouf, P E; Canino, G J; Chavez, L M; Ramirez, R; Bravo, M; Bauemreister, J J; Ribera, J C. The psychometric properties of a shortened version of the Spanish Adolescent Dissociative Experiences Scale. *Journal of Trauma and Dissociation* 5(4): 33-54 (2004). [18812]

Traumatic Experiences Questionnaire (Nijenhuis et al)

“a self-report questionnaire inquiring about 25 types of trauma, their age of occurrence or onset, as well as duration” [14139]

Traumatic Experiences Scale (Murphy)

“an 18-item self-report measure based on DSM-III-R PTSD criteria,...developed by the principal investigator for this study” [14632]

Murphy, S A; Johnson, C; Cain, K C; Das Gupta, A; Dimond, M; Lohan, J; Baugher, R. Broad-spectrum group treatment for parents bereaved by the violent deaths of their 12- to 28-year-old children: a randomized controlled trial. *Death Studies* 22: 209-235 (1998). [22016]

Traumatic Experiences Scale for North Korean Defectors (Kang)

“based on reference literature and reports by witnesses of the trauma experienced by North Korean defectors while defecting from North Korea and while living in North Korea” [18954]

Traumatic Exposure Scale (Eustace)

“18-item scale...developed specifically for use in this survey” [22835]

Traumatic Exposure Severity Scale (Elal and Slade)

a 24-item instrument “developed specifically to assess dimensions of exposure to an earthquake disaster in adults” [19182]

Traumatic Grief Evaluation of Response to Loss (Prigerson et al)

"a structured clinical interview that provides a diagnosis for traumatic grief" [22479]

Traumatic Grief Inventory for Children (Dyregrov et al)

"The TGIC...an adapted version of the adult Inventory of Complicated Grief – Revised...is a 23-item self-report questionnaire designed to measure maladaptive symptoms of grief in children and youngsters.” [82279]

Dyregrov, A; Yule, W; Smith, P; Perrin, S; Gjestad, R; Prigerson, H. *Traumatic Grief Inventory for Children (TGIC).* Bergen, Norway: Children and War foundation, 2001. [cited in 82279]

Traumatic Guilt Inventory (Holland)

"61 items scored on a 5-point Likert scale [measuring] the presence of six domains of self-blame: survivor, demonic, social, abandonment/betrayal, superhuman, and self” [90425]

Traumatic Incidents in Police Work Scale (Carlier and Gersons)

Traumatic Index Scale

USE: PTSD Reaction Index (Frederick)

Traumatic Injury and Psychophysiological Stress Inventory (Victorson)

"a multidimensional psychosocial instrument [comprising] three important dimensions related to the psychological adjustment following traumatic physical injury: Reaction, Risk, and Resilience-Recovery” [91590]

Traumatic Life Events Clinical Assessment Protocol (Mathias et al)

“The Traumatic Life Events CAP identifies three groups within inpatient and community mental health settings: (1) those who are in immediate danger due to current abuse; (2) those who have experienced one or more traumatic life events that evoked an intense sense of horror or fear; (3) the not-triggered group.” [40223]

Traumatic Life Events Interview (Kubany)

“The TLEI is [a structured interview] composed of questions that correspond to questions on the Traumatic Life Events Questionnaire.” [22292]

Traumatic Life Events Questionnaire (Carleton et al)
"This scale assesses for exposure to 16 traumatic events commonly reported by community members..." [38011]
Carleton, R N; Brundin, P; Asmundson, G J G; Taylor, S. Traumatic Life Events Questionnaire. Unpublished manuscript, Department of Psychology, University of Regina (Canada), 2006. [cited in 38011]

Traumatic Life Events Questionnaire (Kubany)
"a brief questionnaire that assesses exposure to a broad range of potentially traumatic events" [22292]

Traumatic Life Events Questionnaire (Realmuto et al)

Traumatic Life Experiences Questionnaire
measures exposure to "17 lifetime criterion A events" [40041]
[used but not cited in 40041]

Traumatic Memory and Trauma Characteristics Interview (Reynolds and Brewin)
"based on Reynolds and Brewin, 1999" [27286]

Traumatic Memory Inventory (Van der Kolk and Fisler)
"a 60-item structured interview" [12718]

Traumatic Panic Cognitions Scale (Joscelyne et al)
"12 items...based on proposals from experienced PTSD clinicians concerning the common fears that PTSD patients report during their panic attacks" [39540]

Traumatic Police Incidents Scale
"asks the participant to indicate occurrence of [9] traumatic events experienced during the past year" [81916]

Traumatic Sexualization Survey (Matorin and Lynn)
a 38-item measure assessing “cognitive and behavioral factors purportedly associated with child sexual abuse histories” [14072]

Traumatic Stress Disorder Scale (Muris et al)
A 4-item subscale of Birmaher et al's 66-item Screen for Child Anxiety Related Emotional Disorders intended as "a brief, initial screen for the presence of PTSD symptoms" [22874]

Traumatic Stress Exposure Scale (Australian Defence Force)
"developed for the ADF...contains 12 yes/no items concerning exposure to traumatic experiences that could occur on deployment" [85815]

Traumatic Stress Index
USE: Global Appraisal of Individual Needs (Dennis)

Traumatic Stress Institute Belief Scale (Stamm et al)
Pearlman, L A; Mac Ian, P S. The TSI Belief Scale: data from four criterion groups. Unpublished manuscript, Traumatic Stress Institute, South Windsor, Connecticut. [cited in 05612]
UF: Belief Scale (Traumatic Stress Institute)
TSI Belief Scale
**Traumatic Stress Institute Inner Experience Questionnaire**

"The IEQ is a 24-item questionnaire assessing three self capacities (the ability to tolerate, manage, and integrate affective experience; the ability to maintain a sense of self as viable, benign, and positive; and the ability to maintain a sense of inner connection with others)." [22656]

**UF:** TSI Inner Experience Questionnaire

**Traumatic Stress Institute Life Event Questionnaire (Mac Ian and Pearlman)**

**UF:** Life Event Questionnaire (Mac Ian and Pearlman)

TSI Life Event Questionnaire (Mac Ian and Pearlman)

**Traumatic Stress Inventory (Reig et al)**

"a 25-item questionnaire that describes stressful events" [09430]

Reig, M; Riggs, D; Miller, S; et al. Traumatic Stress Inventory. Unpublished instrument, National Center for PTSD, Behavioral Sciences Division, n.d. [cited in 09430]

**Traumatic Stress Inventory Scale (Steinritz and Crocq)**

USE: Inventaire-Échelle de Névrose Traumatique (Steinitz and Crocq)

**Traumatic Stress Reaction Scale (Boulanger)**

"designed specifically for the study" [90666]

**Traumatic Stress Schedule (Norris)**

**Traumatic Stress Survey (Riggs)**

"a 23-item self-report questionnaire developed...to assess a range of potentially traumatic events...across the lifespan" [14078]

**Traumatic Stress Symptom Checklist (Basoglu et al)**

"relating to 17 DSM-IV PTSD items and 6 symptoms of depression in the last week, all measured on an intensity scale" [16090]

Basoglu, M; Salcioglu, E; Livanos, M; Özeren, M; Aker, T; Kilic, C; Mestçioglu, Ö. A study of the validity of a screening instrument for traumatic stress in earthquake survivors in Turkey. *Journal of Traumatic Stress* 14: 491-509 (2001). [16090; the checklist appears on pp. 507-508]

**Traumatic Stress Symptoms Child Scale (Graham-Bermann and Levendosky)**

"The TSSC measure was used to assess the mother's perceptions of the presence or absence of 17 behavioral stress reactions seen in her child for more than one month as a direct response to the violence the child had witnessed." [29304]

**Traumatic Violence Inventory (Gallers et al)**

**Traumatization Measure (Kahana et al)**

"a [5-item] Holocaust-specific symptom scale" [80218]

Kahana, B; harel, Z; Kahan, E. *Holocaust Survivors and Immigrants: Late Life Adaptations*. New York: Springer, 2005. [80218; the Measure appears on p. 104]

**Traumatizing Events Questionnaire (Schalinski et al)**

[instrument not named in source; name assigned by PILOTS Database staff]

"a newly developed checklist consisting of traumatizing events with focus on different experiences of sexual violence" [84995]

**Travel Anxiety Questionnaire (SUNY Albany)**

[a "locally developed...self-report questionnaire", used but not cited in 92034]

**Travel Anxiety Scale (Mayou et al)**

**Travel Phobia Beliefs Questionnaire (Ehring et al)**

"developed for this study" to assess "concerns about future accidents and negative beliefs about travel" [28842]

Travel Phobia Questionnaire (Ehring et al)
The TPQ was developed for the purposes of this study. The main part consists of 12 items enquiring about fear experienced in travel situations. [28842]

Trauma Sonrası Stres Bozukluğu Belirtileri Tarama Formu (Yorbik et al)
a "posttraumatic stress disorder symptoms check list... developed in our department" [24986]

Treatment Appraisal Questionnaire (Spoont et al)
a "26-item inventory assessing use of standard treatments for PTSD... and variables that have been associated with treatment adherence..." [27607] Spoont, M; Sayer, N; Nelson, D B. PTSD and treatment adherence: the role of health beliefs. Journal of Nervous and Mental Disease 193: 515-522 (2005). [27607; the inventory appears on pp. 518-519]

Treatment Components Effectiveness Scale (Johnson et al)

Treatment Credibility Scale

Treatment Efficacy Expectancy Scale (Largo-Marsh and Spates)

Treatment Emergent Symptom Scale
[used but not cited in 40245]

Treatment Expectancy Scale (Borkovec and Nau)
USE: Credibility of Therapy Questionnaire (Borkovec and Nau)

Treatment Experiences Questionnaire (Chessen et al)
"an 11-item survey developed for this study to determine clients' subjective experience of mental health services with respect to physical and sexual assault and its consequences" [37369] Chessen, C E; Comtois, K A; Landes, S J. Untreated posttraumatic stress among persons with severe mental illness despite marked trauma and symptomatology. Psychiatric Services 62: 1201-1206 (2011). [37369]

Treatment Fidelity Checklist (Scheeringa et al)

Treatment Fidelity Rating Scale (Bryant et al)

Treatment History Interview (Linehan and Heard)

Treatment Motivation Questionnaire (Ryan et al)

Treatment Outcome Package (Kraus and Seligman)

Treatment Outcome Patient Survey (Blair et al)
Blair, R S; Blair, J; Rueckert, P. The Treatment Outcome Patient Survey (TOPS): a psychological screening instrument for chronic back pain patients. Unpublished data. [cited in 09718]
Treatment Outcome Profile (Holcomb et al)
"developed to be a simple, easy-to-administer, comprehensive self-report measure of response to behavioral health services in different treatment modalities and settings" [20088]

Treatment Outcome PTSD Scale (Davidson and Colket)

Treatment Outcomes Prospective Study (Hubbard et al)

Treatment Preference Questionnaire (Back)

Treatment Process Scale (Freedland et al)
"a measure developed for this study...11 items...each item addresses a particular aspect of the case from the therapist's perspective" [32155]
Freedland, K E; Skala, J A; Carney, R M; Rubin, E H; Lustman, P J; Dávila-Román, V G; Steinmeyer, B C; Hogue, C W. Treatment of depression after coronary artery bypass surgery: a randomized controlled trial. *Archives of General Psychiatry* 66: 387-396 (2009). [32155]

Treatment Program Assessment Scale (Johnson et al)

Treatment Provider Survey (Kadambi and Truscott)
"a 24 item questionnaire developed for this study to gather information on therapist demographics, their work with sex offenders, and factors hypothesised to be predictive of vicarious traumatization" [18290]

Treatment Punishment Scale (Wilk and McCarthy)
"consists of 10 items...for assessing attitudinal differences regarding treatment and punishment for [perpetrators and family members]" [26175]

Treatment Questionnaire (Feigon and De Rivera)

Treatment Reactions Scale (Reger et al)
developed to support this study...to assess stigma and treatment reactions for specific forms of treatment [39319]
Reger, G M; Durham, T L; Tarantino, K A; Luxton, D D; Holloway, K M; Lee, J A. Deployed soldiers' reactions to exposure and medication treatments for PTSD. *Psychological Trauma: Theory, Research, Practice, and Policy* (published online 2012; DOI: 10.1037/a0028409). [39319]

Treatment Response Rating
[used but not cited in 90580]

Treatment Response Scale (Csernansky et al)

Treatment Satisfaction Questionnaire (Cox et al)
"used to measure participants' perceptions of how credible the treatment was following their reading of a treatment rationale and description" [33302]

Treatment Services Review (McLellan et al)

Treatment Summary Questionnaire (Najavits)
"The TSQ is a 52-item interview that assesses participants' self-reported lifetime and current treatment history." [34497]

Treatment, Legal, and Drug Update Interview
[used but not cited in 09058]
Triage Assessment Form: Crisis Intervention (Myer et al)
Myer, R A; Peterson, S E; Willow, R A. Assessment of children and adolescents in crisis. *Trauma and Loss: Research and Interventions* 2(1): 10-20 (2002). [16840; the form appears on pp. 18-20]

Triangular Love Scale (Sternberg)
"The TLS is [a] self-report instrument composed on a 45-item scale in which individuals are asked to indicate on a 9-point Likert scale the extent in which they agree with the content of a sentence regarding their romantic relationship." [39422]

Tridimensional Personality Questionnaire (Cloninger)

Trier Illness Coping Questionnaire
USE: Trierer Skalen zur Krankheitsbewältigung

Trier Social Stress Test
USE: Trierer Inventar zur Erfassung von Chronischem Stress (Schulz and Schlotz)

Trier Social Stress Test (Kirschbaum et al)

Trierer Inventar zur Erfassung von Chronischem Stress (Schulz and Schlotz)

Trierer Skalen zur Krankheitsbewältigung
"The TICQ is a 37-item inventory...designed to measure coping with illness." [26122]

TRiM Risk Assessment Tool
a 10-item checklist developed by the UK military

Trimbos/iMTA Questionnaire for Costs Associated with Psychiatric Illness
Hakkaart-Van Roijen, L; Van Straten, A; Donker, M; Tiemens, B. *Handleiding Trimbos/iMTA Questionnaire for Costs Associated with Psychiatric Illness (TiC-P)*. Rotterdam, The Netherlands: Instituut voor Medische Technology Assessment, Erasmus Universiteit Rotterdam, 2002. [cited in 86444]

Trinity Amputation and Prosthesis Experiences Scales (Gallagher and MacLachlan)
The TAPES is a multidimensional assessment of adaptation to amputation and prosthesis use developed specifically for use with individuals with lower limb amputations." [28936]

Troubles-Related Experiences Questionnaire (Dorahy et al)
"The TREQ is a recently developed self-report measure for assessing exposure to Troubles-related incidents in Northern Ireland in both childhood and adulthood." [31609]
Dorahy, M J; Shannon, C; Maguire, C. The factor structure and psychometric properties of the Troubles-Related Experiences Questionnaire (TREQ). Submitted for publication, 2008. [cited in 31609]

Trust in People Scale (Rosenberg)

Trust Scale (Rempel and Holmes)
"The Trust Scale measures three aspects of trust in partner relationships: Predictability, Dependability, and Faith." [21969]

Trusting Relationship Questionnaire (Mustillo et al)

TSI Belief Scale
USE: Traumatic Stress Institute Belief Scale (Stamm et al)

TSI Inner Experience Questionnaire
USE: Traumatic Stress Institute Inner Experience Questionnaire
TSI Life Event Questionnaire (Mac Ian and Pearlman)
USE: Traumatic Stress Institute Life Event Questionnaire (Mac Ian and Pearlman)

[19674]

Use of Violence Scale
[used but not cited in 91697]
Useful Field of View (Edwards et al)

"The UFOV consists of three subtests and a category indicating risk for motor vehicle crashes." [37142]

Edwards, J; Vance, D; Wadley, V; Cissell, G; Roenker, D; Ball, K. Reliability and validity of Useful Field of View test scores as administered by personal computer. *Journal of Clinical and Experimental Neuropsychology* 27: 529-543 (2005). [cited in 37142]

Usefulness of Hypnosis Questionnaire (Walters)

"provide[s] data about the client's subjective experience of aspects of therapy" [25184]

Usefulness of Techniques Inventory (Foa et al)

"This inventory is designed to assess utilization and usefulness of the specific Brief Cognitive Behavioral Intervention (B-CBT) treatments clients received." [19807]

Utilization and Cost Patient Questionnaire (Kashner et al)

"a 3-item scale...originally developed for a cardiac sample" [27342]

Utrecht Work Engagement Scale

Utrechtse Coping Lijst (Schreurs et al)

VA Primary TBI Screening Tool

"a modified version of the Brief TBI Screen...developed by the Defense and Veterans Brain Injury Center" [33537]

VA TBI Clinical Reminder

"a brief screen for mTBI administered to all OEF/OIF veterans seeking health care through the VAMC" [87202]

VA Traumatic Brain Imaging Screening Tool

"the goal was to develop an instrument to screen OEF/OIF returnees presenting to the VA for health care in an effort to identify those who may have sustained deployment-related TBI and were experiencing symptoms that could be related to the TBI...The VA measure was based largely of the Brief Traumatic Brain Injury Screen..." [37094]

Donnelly, K T; Donnelly, J P; Dunnam, M; Warner, G C; Kittleson, C J; Constance, J E; Bradshaw, C B; Alt, M. Reliability, sensitivity, and specificity of the VA Traumatic Brain Injury Screening Tool. *Journal of Head Trauma Rehabilitation* (Published online 7 March 2011; DOI: 10.1097/HTR.0b013e3182005de3) [37094; the VATBIST appears in an appendix]

VA Women’s Health Project Questionnaire

"This questionnaire has six sections that address health, life, and military experiences." [80410]

[used but not cited in 80410]

VAD Questionnaire (Bunzel et al)

"a self-developed tool that includes the most stressful fears and complaints when being attached to the [ventricular assist] device" [29652]

Validity Indicator Profile (Frederick)

"specifically designed to assess feigning, symptom exaggeration, and malingering" [21710]

Validity of Cognition Scale (Shapiro)

Value Survey (Rokeach)
UF: Rokeach Value Survey
Terminal Value Survey (Rokeach)

Van Dream Anxiety Scale (Agargun et al)
"The VDAS consists of 17 self-rated questions." [25637]

Vancouver Interaction and Calmness Scale

Vancouver Obsessional Compulsive Inventory (Thordarson et al)
"The VOCI is a 55 item self-report measure designed to assess a broad spectrum of OCD symptoms and associated personality characteristics." [33283]

VESI
USE: Vietnam Era Stress Inventory (Wilson and Krauss)

Veterans Adjustment Scale (Boudewyns et al)
UF: VETS Scale
Veterans Affairs Military Stress Treatment Assessment (VAMSTA)
"a multi-measure assessment packet used to assess pre- and post-treatment functioning for veterans referred for treatment of military-related traumatic stress.” [34805]
Fontana, A; Ruzek, J; McFall, M; Rosenheck, R. The Veterans Affairs Military Stress Treatment Assessment (VAMSTA): a descriptive and monitoring instrument for the treatment of PTSD and comorbid disorders. Unpublished instrument, 2006. [cited in 34805]

Veterans Diagnostic Scale (Villereal)
"a 32-item scale...developed by the author” [20371]

Veterans Experience Questionnaire: Abbreviated Form
[used but not cited in 90806]

Veterans History Project Oral History Interview
[used but not cited in 30009]

Veterans Interpersonal Adjustment Questionnaire (Figley)
USE: Vietnam Veteran Survey (Figley)

Veterans Update Form (Wolfe)

Veterans' Functional Disability Form
"This form consists of 17 items relating to current functioning in three domains: daily functioning, personal relationships, and occupational performance.” [18960]
[used but not cited in 18960]

VETS Scale
USE: Veterans Adjustment Scale (Boudewyns et al)

VIA Inventory of Strengths (Peterson and Seligman)
"a self-report questionnaire [measuring] 24 positive traits valued in the contemporary United States” [26041]

Vicarious Trauma Scale (Vrklevski and Franklin)
"an 8-item self-administered scale [measuring] participants’ subjective experience of symptoms related to exposure to clients traumatic material” [39914]

Vicarious Traumatization Questionnaire (Culver et al)
"a 29-item electronic questionnaire...developed by the researchers with item content based on the current conceptual literature on vicarious trauma” [85246]

Vicarious Traumatization Questionnaire (Lerias and Byrne)
the VTQ is an anonymous interview-based questionnaire developed for this study...to detect the presence and extent of vicarious traumatization and to allow for the analysis of potential associations between respondent characteristics and event-related variables and the incidence of vicarious traumatization.” [80190]
Byrne, M K; Lerias, D; Sullivan, N L. Predicting vicarious traumatization in those indirectly exposed to bushfires. Stress and Health 22: 167-177 (2006). [80190]

Victim Questionnaire (Malecki et al)
"35 questions on being victimized were developed by using and/or adapting items from other measures of school violence...” [81286]

Victim Scale (Mynard and Joseph)
"a 16-item measure of peer-victimisation experienced during the last school year” [22876]

Victim Support Questionnaire (Whittington and Wykes)
Victimization During Childhood and Before Incarceration (Warren et al)

"The VCI is a questionnaire designed for the current study that queried the women on prior experiences with rape, sexual assault, incest, and nonsexual physical assault by an adult or other child before the age of 18 years and recent experiences (within the six months prior to incarceration) of rape, sexual assault, nonsexual assault, robbery or theft." [33554]

Victimization in Dating Relationships Scale (Foshee et al)

"an 18-item inventory designed to measure physically violent victimization within dating relationships" [81723]

Victimization Index: Inmates-to-Staff Assaults Questionnaire

Victimization Questionnaire (Falsetti and Resick)

"a [24-question] self-report questionnaire developed for the present study based on structured interviews used to assess trauma developed by Resick for use in her studies of crime victims" [05930]

Victimization Scale (Fitzpatrick and Wilson)

Victimization Scale (Nadel et al)

"It measures exposure to violence in one's neighborhood and school." [32273]

Victimization Screen: Problems in Your Family Growing Up (Friedrich)

Victimization Screening Form (Bell et al)

Victimization Severity Scale (Battle)

Victims Group Needs Interview Schedule (Manktelow)

"The interview asked a series of open-ended questions in order to explore the topic, together with a series of probes to encourage further elaboration. These questions were designed to elicit the feelings and experiences of being a victim." [30900]

Victoria Symptom Validity Test (Slick et al)

"The VSVT is a 48-item, forced-choice recognition memory task that is computer-administered." [32272]

Video Apperception Test (Hill et al)

"modeled after the Thematic Apperception Test in its use of unstructured but suggestive stimuli" [20899]

Videoconference Therapy Questionnaires (Paquin)

"These questionnaires evaluate people’s perception of the application of videoconferencing to psychotherapy treatment and their assessment of the therapeutic session that has just ended." [32026]

Videoconferencing Participant Satisfaction Questionnaire (Wong)

"consists of 7 items rated on a 5-point Likert scale" [32025]

Videoconferencing Telepresence Scale (Bouchard and Robillard)

USE: Échelle de Téléprésence en Videoconference (Bouchard and Robillard)

Vienna Test System (Schuhfried)

USE: Wiener Testsystem (Schuhfried)
Vietnam Military History Interview Guide (Scurfield and Blank)

Vietnam Era Stress Inventory (Wilson and Krauss)

Vietnam Veterans Study Questionnaire: Female Veterans (Commonwealth of Australia)

Vietnam Veterans Study Questionnaire: Male Veterans (Commonwealth of Australia)

Vietnam Veterans Survey (Figley)
USE: Vietnam Veteran Survey (Figley)

Vietnam Veterans’ Dream Survey (Ziarnowski and Broida)
"a 12-item instrument constructed by the authors"

Vietnam War Experience Questionnaire (Casella and Motta)
"a 10-item scale constructed for this study"

Vietnam-Era Nurses Adjustment Survey (Stretch et al)
"a modified version of the Vietnam-Era Veterans Adjustment Survey"

Vietnam-Era Veterans Adjustment Survey (Stretch)
"a questionnaire based on the Vietnam Veteran[s] Questionnaire”

Vietnam-Era Veterans Survey (Figley)
USE: Vietnam Veteran Survey (Figley)

Vietnamese Depression Scale (Kinzie et al)

Vietnamese PTSD Scale (Shapiro et al)
"a 14-item scale was constructed to assess PTSD in respondents." [20938]
Shapiro, J; Douglas, K; De la Rocha, O; Radecki, S; Vu, C; Dinh, T. Generational differences in psychosocial adaptation and predictors of psychological distress in a population of recent Vietnamese immigrants. Journal of Community Health Nursing 24: 95-113 (1999) [20938]

Vineland Adaptive Behavior Scales (Sparrow et al)

Vineland Screener (Sparrow et al)
"derived from the Vineland Adaptive Behavior Scale...consists of 45 items measuring two domains: socialization and daily living skills" [19623]
Sparrow, S S; Carter, A S; Cicchetti, D V. Vineland Screener: Record Booklets, Administration and Scoring. New Haven: Yale University Child Study Center, 1993. [cited in 19623]
Violence Against Women Survey (Statistics Canada)

Violence and Aggression in Your Work Questionnaire (Santos et al)
“A questionnaire...tailored for use with police” [40256]

Violence and Trauma Screening Questionnaire for Human Service Agencies
“The measure consists of 8 items that were taken from various instruments and interviews on trauma.” [19208]

Violence Assessment (Peragallo et al)
“collected information regarding community violence and abuse during childhood and adulthood” [36877]

Violence Attitudes Scale (Jackson et al)
[cited only as “Jackson et al, 1994” in 90013]

Violence Exposure Scale for Children (Fox and Leavitt)
“A cartoon-based interview...developed to assess children’s self-reports of exposure to violence...based on a measure ["Things I have Seen and Heard"] designed by Richters and Martinez” [22183]

Violence History Interview (Cloitre et al)
"a close-ended clinical interview [composed of 425 questions] developed by the authors specifically for an in-depth assessment of history of violence among psychiatric patients, both as perpetrators and as victims”

Violence History Questionnaire
[used but not cited in 90093, 90229]

Violence Questionnaire
“13 questions that evaluated the characteristics of the violence experienced by women” [37650]
[used but not cited in 37650]

Violence Questionnaire (Garbarino and Kostelny)

Violence Questionnaire (Skjørtelen)
"developed by Alternative to Violence (Oslo) for research and clinical purposes” [84925]

Violence Response Questionnaire
[used but not cited in 91877]

Violence Scale (Bardis)

Violence Scale (Russell)

Violence Screen (NCPTSD)
"The V-Screen is an unpublished instrument developed at the Behavioral Science Division of the National Center for PTSD to assess aggressive behaviors over the past 4 months.” [26854]

Violence Screening Form (Shakoor and Chalmers)

Violence, War, and Abductee Exposure Scale (Ertl et al)
"The VWAES is a modified and extended version of the Clinician-Administered PTSD Scale Event Checklist.” [34436]

Violent Behavior Checklist
[used but not cited in 20562]
Violent Experiences and Coping Strategies Interview (Bryant-Davis)
“...is designed to obtain participants’ narratives of their childhood violent experiences with follow-up questions.” [28628]

Violent Socialization Scale
[used but not cited in 91637]

Virtual Planning Test
[used but not cited in 36280]

Visual Analogue Scale

Visual Design Learning Test (Rey)
[used but not usefully cited in 33436]

Visual False Memory Paradigm (Moritz et al)
“...four pictures that each depict a prototypical scene are shown to participants on a computer screen.” [32159]
Moritz, S; Woodward, T S; Rodriguez-Raecke, B. Patients with schizophrenia do not produce more false memories than controls but are more confident in them. *Psychological Medicine* 36: 659-667 (2006). [cited in 32159]

Work Intensity Scale (Brown and Leigh)

Work Limitations Questionnaire (Lerner et al)
Lerner, D; Amick, B; Rogers, W H; Malspeis, S; Bungay, K; Cynn, D. The Work Limitations Questionnaire. Medical Care 39: 72-75 (2001). [cited in 82496]

Work Outcome Coding Scale (Matthews et al)

Work Outcome Co

Work Potential Profile (Rowe)

Work Problems Scale (Langsley)

Work Productivity and Adjustment Inventory (Reilly et al)

Work Related Affect Scale (Warr)

Work Related Basic Need Satisfaction Scale (Van den Broeck et al)

Work-Related Control, Abuse, and Sabotage Checklist (Brush)

Work-Related Strain Inventory (Revicki et al)

Work-Related Stress Scale (Ehring et al)
Work-Related Trauma Questionnaire (Klaassens et al)
“a 7-item self-report...designed specifically for this study” [33751]

Work, Leisure and Family Life Questionnaire (Cooper et al)
UF: Social Adjustment Scale (Cooper et al)

Work/School Abuse (Riger et al)

Workers’ Attitude Questionnaire (Braun)
"developed by this investigator" [90028]

Working Alliance Inventory
[used but not cited in 90036]

Working Alliance Inventory (Horvath and Greenberg)
"to evaluate the quality of the working, or therapeutic, alliance—the relationship between the patient and the patient’s primary clinician" [21472]

Working Model of the Child Interview (Zeanah and Benoit)
administered "to assess the caregiver’s subjective experience of his or her relationship with the infant" [18597]

Workplace Environment Survey
[used but not cited in 25204]

Workplace Harassment Questionnaire (Viaux)
[used but not cited in 25204]

Workplace Issues Scale (Hatanaka et al)
"7 items assessing relationship problems with the supervisor and/or colleagues” [83706]

Workplace Trauma Debriefers Scale (Ortlepp)
"This [36-item] scale consists of three sub-scales measuring perceptions pertaining to specific aspects of trauma counselling in the workplace, namely, Programme Co-ordination, Self-efficacy, and Stakeholder Commitment.” [24094]

Workplace Violence Questionnaire (ILO/ICN/WHO/PSI)

Workplace Violence Scales (Rogers)
three scales measuring frequency of violent events at the workplace, vicarious experience of violence, and fear of future violent events at work

Workshop Evaluation Questionnaire (Bush et al)
"The WEQ contained nine 5-point items generated specifically for this study to inform general acceptability of the workshop sessions." [40257]
Bush, N E; Prins, A; Laraway, S; O’ Brien, K; Ruzeck, J; Cuilla, R P. A pilot evaluation of the AfterDeployment.org online posttraumatic stress workshop for military service members and veterans. *Psychological Trauma: Theory, Research, Practice, and Policy* (Published online 25 March 2013) [40257].

Worksites Harassment Tool
[used but not cited in 92429]

World Assumptions Questionnaire (Kaler)
"a new measure of the assumptive world”
World Assumptions Scale (Janoff-Bulman)
UF: Benevolent World Scale (Janoff-Bulman)

World Health Organization Adult ADHD Self-Report Scale
"a self-reporting symptom checklist...consists of 18 questions, 6 of which serve as a screener" [80458]

World Health Organization Brief Disability Questionnaire

World Health Organization Disability Assessment Scale
"The WHODAS-II is a self-report instrument, developed by a task force of the WHO, and assesses a variety of impairment and disability dimensions using multi-item scales that include: work loss days, pain, concentration, mobility, self care, family burden, social participation, and discrimination." [26353]
UF: WHODAS

World Health Organization Health and Work Performance Questionnaire

World Health Organization Performance Scale (Karnofsky)
USE: Karnofsky Performance Scale

World Health Organization Quality of Life Instrument

World Health Organization Screening Instrument for Harmful and Hazardous Alcohol Consumption

World Health Organization Short Disability Assessment
USE: Psychiatric Disability Assessment Schedule (World Health Organization)

World Health Organization Student Drug Use Questionnaire
[used but not cited in 29942]

World Health Organization Well-Being Index
[used but not clearly cited in 39585]
UF: WHO-5 Well-Being Index
WHO-10 Well-Being Index

World Mental Health Social Support Scale (Kessler et al)

World Trade Center Disaster Event Exposure Measure (Boscarino and Adams)
"This consisted of 14 possible events that the respondent could have experienced during the attacks." [32135]

World Trade Center Disaster Survey (Katz et al)
"a 3-page questionnaire" [17113]
Katz, C L; Gluck, N; Maurizio, A; DeLisi, L E. The medical student experience with disasters and disaster response. CNS Spectrums 7: 604-610 (2002). [17113]

World Trade Center-NYC Student Survey (Hoven et al)
"a screening instrument...to assess exposure to trauma and related media, PTSD symptoms, other mental health problems, level of interference, parenting, coping, and service use" [27676]
Hoven, C W; Duarte, C S; Lucas, C P; Mandell, D J; Cohen, M; Rosen, C; et al. Effects of the World Trade Center Attack on NYC Public School Students — Initial Report to the New York City Board of Education. New York: Columbia University Mailman School of Public health, New York State Psychiatric Institute, and Applied Research and Consulting, 2002. [cited in 27676]

World Value Survey (Inglehart)
[used but not clearly cited in 84797]
Worry Catastrophic-Cognitions Scale (Hinton et al)
  USE: Worry Scales (Hinton et al)

Worry Controllability Scale (Hinton et al)
  USE: Worry Scales (Hinton et al)

**Worry Domains Questionnaire (Tallis et al)**

"The WDQ measures a range of worry themes in an adult population." [22706]

**Worry Index (Miles et al)**

"measured the mother’s degree of worry about the child’s health" [25767]

**Worry Scale (Wisocki et al)**

"The Worry Scale is a 35-item measure. There are subscales of three types of worries: Financial, Health, and Social." [24176]

**Worry Scales (Hinton et al)**
[generic name assigned by PILOTS Database staff to 6 instruments developed to profile worry attacks in Cambodian refugees]

UF: Irritability Scale (Hinton et al)
Worry Catastrophic-Cognitions Scale (Hinton et al)
Worry Controllability Scale (Hinton et al)
Worry-Induced Somatic-Symptoms Scale (Hinton et al)
Worry Severity and Topic Scale (Hinton et al)
Worry Trauma-Recall Scale (Hinton et al)

Worry Severity and Topic Scale (Hinton et al)
  USE: Worry Scales (Hinton et al)

Worry Trauma-Recall Scale (Hinton et al)
  USE: Worry Scales (Hinton et al)

Worry-Induced Somatic-Symptoms Scale (Hinton et al)
  USE: Worry Scales (Hinton et al)

**Wortschatztest (Schmidt and Metzler)**

"This test requires participants to identify the only real word out of a number of pseudowords." [82320]

UF: German Vocabulary Test (Schmidt and Metzler)

**WPPSI**

USE: Wechsler Preschool and Primary Scale of Intelligence (Wechsler)

**WRAP Interview Guide**

designed “to understand how participants’ lives had changed (or not) since completing the Women Recovering from Abuse Program (WRAP)” [81079]

**WRAT**

USE: Wide Range Achievement Test (Jastak and Jastak)

**WTC Attack Exposure Questionnaire (PATSS)**

"an instrument designed by clinicians at PATSS [Program for Anxiety and Traumatic Stress Studies] to assess severity of utility workers’ WTC trauma exposure on the day of 9/11/01 and during any subsequent disaster work" [19467]

**WTC-NYC Child and Adolescent Questionnaire (Hoven et al)**

Hoven, C W; Duarte, C S; Mandell, D; Musa, g; Wicks, J; Wu, P; Lucas, C; Cohen, M. *WTC-NYC Child and Adolescent Questionnaire*. New York: Columbia University-New York State Psychiatric Institute, 2002. [cited in 27238]
Wyatt Sex History Questionnaire (Wyatt)
"a 478-item structured interview"

Wyoming Telehealth Client Satisfaction Scale
"11 items...created...to assess client opinions and reactions regarding treatment delivery" [33143]

Yale Adherence Competence Scale (Carroll et al)
Carroll, K; Nich, C; Sifry, R; Nuro, K; Frankforter, T; Ball, S; et al. A general system for evaluating therapist adherence and competence in psychotherapy research in the addictions. *Drug and Alcohol Dependence* 27: 225-238 (2000). [cited in 36641]

Yale Children’s Inventory

Yale Evaluation of Suicidality Scale
"The YES is a 13-item instrument that measures current suicidal thoughts and actions, and past and planned attempts.” [27003]
Latham, A E; Priegerson, H G. Suicidality and bereavement: complicated grief as psychiatric disorder presenting greatest risk for suicidality. *Suicide and Life-Threatening Behavior* 34: 350-362 (2004). [27003; the YES appears on pp. 360-361]

Yale Global Tic Severity Scale
"provides information about number, frequency, intensity, complexity, and interference of motor and phonic symptoms with behaviors” [31311]

Yale Greater New Haven Health Survey - Community Interview (Myers)

Yale Health and Aging Project (Corno-ni-Huntley et al)
Corno-ni-Huntley, J C; Roley, D F; White, L R; Suzman, R; Berkman, L F; Evans, D A; Wallace, R B. Epidemiology of disability in the oldest old: methodological issues and preliminary findings. *Milbank Memorial Fund Quarterly/Health and Society* 63: 350-376 (1985). [cited in 15153]

Yale Social Support Index (Seeman and Berkman)

Yale-Brown Obsessive Compulsive Scale (Goodman et al)

Yale-Brown-Cornell Eating Disorder Scale
"assesses the severity and types of core obsessions and compulsions specific to eating disorders” [36824]

Yatabe-Guilford Personality Inventory
based on the Guilford-Martin Inventory of Factors
Tsujio, B; Yatabe, T; Sonohara, T. A factorial study of the temperament of Japanese college male students by the Yatabe-Guilford Personality Inventory. *Psychologia* 1: 110 (1957). [cited in 22702]

Yoga Experience Scale (Dale et al)
"The YES is an unpublished measure that obtains information regarding yoga experience and depth of yoga practice.” [86486]
Dale, L P; Carroll, L E; Galen, G C; Schein, R; Bliss, A; Mattison, A M; Neace, W P. Yoga practice may buffer the deleterious effects of abuse on women’s self-concept and dysfunctional coping. *Journal of Aggression, Maltreatment and Trauma* 20: 90-102 (2011). [86486]

Young Adult Alcohol Consequences Questionnaire (Read et al)
"Participants were asked whether they had experienced any of 48 alcohol-related consequences in the past month.” [39278]

Young Adult Alcohol Problem Severity Test (Wood et al)
Young Adult Psychiatric Assessment (Angold et al)

"The Young Adult Psychiatric Assessment (YAPA) is a modification of the Child and Adolescent Psychiatric Assessment (CAPA) that is suitable for use with young adults. It provides a focus on diagnoses, living situations, relationships, and areas of functioning relevant to this age group." [DUHS website]

Angold, A; Cox, A; Prendergast, M; Rutter, M; Simonoff, E; Costello, E J; Ascher, B H. Young Adult Psychiatric Assessment. Duke University Health System Center for Developmental Epidemiology, n.d.

Young Adult Self-Report (Achenbach and Edelbrock)

USE: Child Behavior Checklist (Achenbach and Edelbrock)

Young Children's Self-Concept Scale

USE: McDaniel-Piers Young Children’s Self-Concept Scale (McDaniel and Piers)

Young Loneliness Inventory (Young)

Young Mania Rating Scale (Young et al)

Young Schema Questionnaire

USE: Schema Questionnaire (Young and Brown)

Young Women Survey Instrument

"The YWS instrument assessed demographic characteristics and included items pertaining to alcohol and drug use, sexual behaviors, general medical and specific gynecologic-obstetric history, sources of HIV-prevention information, and psychosocial variables." [15107]

Young Women's Health Survey

[used but not cited in 84588]

Youth and Young Adult Health and Safety Needs Survey (Bernstein et al)

a "screening instrument [that] included risk questions from the CDC Youth Risk Behavior Survey" [36511]

Bernstein, J; Heeren, T; Edward, E; Dorfman, D; Bliss, C; Winter, M; Bernstein, E. A brief motivational interview in a pediatric emergency department, plus 10-day telephone follow-up, increases attempts to quit drinking among youth and young adults who screen positive for problematic drinking. Academic Emergency Medicine, 17: 890–902 (2010). [35611]

Youth Asset Survey (Oman et al)

Youth Coping In Traumatic Times (Hoven et al)

"a brief measure of coping strategies administered to children and adolescents after a mass traumatic event" [34460]

Hoven, C W; Duarte, C S; Mandell, D J; Musa, G; Wicks, J; Wu, P; Lucas, C; Cohan, M. WTC-NYC Child and Adolescent Questionnaire. New York: Columbia University [and] New York State Psychiatric Institute, 2002. [cited in 34460]

Paasivirta, M E; Duarte, C S; Wu, P; Bin, F; Goodman, R F; Brown, E J; Andrews, H F; Hoven, C W. Factor structure of the Youth Coping In Traumatic Times (YCITT) scale. Psychiatry Research (published online 2010: DOI 10.1016/j.psychres.2009.03.018). [34460]

Youth Coping Index (McCubbin et al)

McCubbin, H I; Thompson, A I; Elver, K M. Youth Coping Index. In: McCubbin, H I; Thompson, A I; McCubbin, M A (ed.), Family Assessment, Resiliency, Coping and Adaptation: Inventories for Research and Practice. Madison: University of Wisconsin, 1996. [cited in 25449]

Youth Data Inventory

"a semi-structured questionnaire...designed to obtain information on various aspects of adolescent functioning and family life" [33839]

[used but not cited in 33839]

Youth Interview Schedule: National Youth Survey (Behavioral Research Institute)

Youth Life Orientation Test (Ey et al)

"The YLOT is a measure of dispositional optimism which includes 7 optimism and 7 pessimism items..." [37420]

Youth Life Stress Interview (Rudolph and Flynn)
"The YLSI is a semi-structured interview modeled after the contextual threat interview method of the Bedford College Life Events and Difficulties Schedule (LEDS)." [36605]

Youth Outcome Questionnaire (Burlingame et al)
"The YOQ is a parent-report measure of treatment progress for children ages 4-17 receiving psychological treatment." [15065]
Burlingame, G M; Wells, M G; Lambert, M J. *Youth Outcome Questionnaire*. Stevenson, Maryland: American Professional Credentialing Services, 1996. [cited in 15065]

Youth Psychopathic Traits Inventory
[used but not cited in 92110]

Youth Questionnaire (Cain et al)
"The YQ is [a 15-item] educational/skills questionnaire...to measure educational attainment and skill development from pre- to postintervention." [84534]

Youth Risk Behavior Surveillance System (Kann et al)

Youth Risk Behavior Survey
a 93-item inventory developed by the Centers for Disease Control and Prevention [used but not cited in 23939]

Youth Self-Report (Achenbach and Edelbrock)
USE: Child Behavior Checklist (Achenbach and Edelbrock)

Youth Self-Report Child Hostility Scale (Cook)
"a 23-item self-report measure of conduct problems" [33808]

Youth Social Support Index (McCubbin et al)
"This self-report scale captured the youth's perceptions of support from various sources, including parents, siblings, friends and members of a faith group." [83885]
McCubbin, H I; Thompson, A I; McCubbin, M A. *Family Assessment: Resiliency, Coping and Adaptation*. Madison: University of Wisconsin, 1996. [cited in 83885]

Youth Symptom Survey Checklist (Margolin)
"The YSSC is a 17-item self report measure of the PTSD symptoms..." [37572]

Youth Trauma and Stress Screening Inventory (Jurkovic et al)
"The YTSSI was designed specifically for juvenile offenders to screen for exposure to a wide range of traumatic and stressful events." [81624]
Jurkovic, G; Zucker, M; Ball, J; Fasulo, S. The Youth Trauma and Stress Screening Inventory (YTSSI). Poster presented at International Society for Traumatic Stress Studies annual meeting, Baltimore, November 2003. [cited in 81624]

Zaburzenia Pourazowe Kwestionariusz (Rutkowski)
"a questionnaire which helps the researchers verify the diagnosis and differentiate between PTSD, ASD and a permanent personality change" [27652]

Zahlenverbindungstest
USE: Number Connection Test (Oswald and Roth)

ZAN Scale
"a scale of lifetime frequency of traumatic events" [36000]
[used but not cited in 36000]

Zanarini Rating Scale for Borderline Personality Disorder

Zelf-Beoordelings Vragenlijst
USE: State-Trait Anxiety Inventory (Spielberger et al)

Zelfbeschrijvingvragenlijst (Van der Steene)
USE: Self Description Questionnaire (Marsh and O’Neill)
Zelfexpressie en -controle Vragenlijst (Maes et al)
"The ZECV consists of 4 [10-item] subscales measuring internalization of anger, externalization of anger, and experienced control over each." [30284]
UF: Self-Expression and Self-Control Questionnaire (Maes et al)

Zelfinventarisatievragenlijst Posttraumatische Stressstoornis (Hovens et al)
"measures symptoms according to the DSM-IV classification of PTSD" [26577]
UF: Self-Inventory for PTSD (Hovens et al)
ZIL (Hovens et al)
USE: Zelfinventarisatievragenlijst Posttraumatische Stressstoornis (Hovens et al)

Zubrod Performance Scale

Zuckerman Inventory of Personal Relations (Zuckerman)
USE: Inventory of Personal Relations (Zuckerman)

Zuckerman-Kuhlman Personality Questionnaire
"This scale consists of 99 items in the form of statements, and testees are required to indicate whether they perceive the statement to be true or false." [29877]

Zung Anxiety Scale
USE: Self-Rating Anxiety Scale (Zung)

Zung Depression Scale
USE: Self-Rating Depression Scale (Zung)

ZVT
USE: Number Connection Test (Oswald and Roth)

Zygosity Questionnaire for Young Twins (Goldsmith et al)
